The spread of these doctrines might also have been attributable to Spanish and Norman/Anglo-Saxon pagan pilgrims, who journeyed to the far-eastern Baltic area during the Middle Ages, or a little known colony of Frisians (fur traders?) that lived near the Swedes, North of Novgorod, in Rus'. Presumably the Frisians were travelling back and forth to the Lowlands (Holland and Belgium) on ships which periodically left the Baltic and sailed down to their ancestral homelands, sited along the seaboard of the British Channel. Therefore the Luciferian creed probably re-entered Europe from two different directions, the first being by sea (Frisians, Norsemen, Spaniards, Basques and English), and the second route via Bulgaria, Prussia, Bohemia, Hungary and Poland (pagan Slavs).

Beliefs identical to the twisted and inverted doctrines of the German heretics in the 1200's AD were present among the Magus preachers of Rus' as far back as 1071 AD. Clearly the link between the 'Luciferianism' of the German heretics and pagan Russians is a strong one, perhaps signifying the movement of these religious concepts out of Russia and into Germany sometime between 1071 and 1223 AD.

Why was Lucifer like a cat?

The heretical Luciferians discovered in Germany confessed their lord was a being whose upper body was that of a glowing man, and lower body that of a black cat.¹⁰⁵¹ I will now expound several reasons why this may have been so.

REASONS WHY THE
DEVIL WAS PORTRAYED
AS A CAT

1. One possibility is that Lucifer was not a black cat at all, but a black *got*, a Black God, who among the Slavs was alternatively called Chernobog. But due to a play on words, a new image developed over centuries, which saw him become a black cat, rather than a *got*.
2. The image might have arisen from a mistranslation of Gypsy and Turkic words for "goat" (*katts, keth, katsi, kadza, and kasaga*) into Russian, German and other European languages.
3. The Lucifer lauded by Germanic witches may have been related to the Midgard serpent of Scandinavian mythology. According to Norse tradition the Great Dragon was able to adopt the form of a cat under the influence of Loki's magic.¹⁰⁵²
4. An even more unlikely interpretation can be found in the Egyptian *Book of the Dead*. The following excerpt, which I include here for the sake of completeness, was taken from the *Papyrus of Nebseni*. Despite being an Egyptian religious text, it carries significant Magian influences.

"I am the Cat which fought near the Persea Tree in Anu (Heliopolis ie: The City of the Sun) on the night the Neb-er-tcher were destroyed. (This war over a tree can be compared with the assaults of the black Magi and the forces of evil on the Haoma tree of the Persians) Who is this Cat?

This male Cat is Ra himself....He is like unto that which he hath made.....As concerning the fight which took place near the Persea Tree in Anu, these words have reference to the slaughter of the children of rebellion, when righteous retribution was meted out to them for (the evil) which they had done. As concerning the "Night of the Battle", (these words refer to) the invasion of the eastern portion of the heaven by the children of rebellion, whereupon a great battle arose in heaven and in all the earth".¹⁰⁵³

THE EGYPTIANS
BELIEVED THAT THE
CHILDREN OF THE
REBELLION WOULD
STORM HEAVEN, AND
FIGHT OVER THE PERSEA
TREE. RA WOULD FIGHT

Accordingly Lucifer, the half man, half cat could have been a misguided depiction of the radiant feline Sun god Ra, who also participated in the Persian war against evil, theoretically alongside the white Magi. Opposing the Egyptian sun-worshippers that protected the tree were the followers of Set, himself a dethroned god of evil, whose name and image were stricken from all Egyptian monumental masonry. Only the occasional statuette of him remains.

LUCIFER WAS HALF
MAN AND HALF FELINE

The alternative viewpoint put forward by Cohn, is that *Vox in Rama* (the Papal Bull issued against the Luciferian heretics) was based on the fictitious revelations fabricated by Conrad's blinding zeal during the 13th Century AD

rather than actual evidence of any such cult. The fact that the fundamental tenets of the "Luciferian doctrine" were already being perpetuated in Iran, Roman Gaul, and in 11th Century Russia (some 200 years earlier than the main thrust of the Inquisitions), means that this view is open to serious question. As discussed previously, based on linguistic material from continental Europe, and accounts of pagan pilgrims from certain parts of Europe coming to Rus' and the Baltic during the Middle Ages, it is possible to suggest that this cult had its own missionaries. Since many details contained in *Vox in Rama* tally with data gathered in Russia concerning early pagan beliefs I am willing to speculate that there was a factual connection between the movements of eastern pagans and the emergence (or resurgence) of devil-worship during the Middle Ages.

In the tale *Svyatogor, Mother-earth and Destiny*³³⁵ we learn of the tallest and strongest giant in existence, who lived in exile atop a distant mountain, and was not permitted to tread upon the earth. In pride he looked up to the god of the sky and swore that he would fasten an iron chain to the heavens, if he should ever get the chance to walk the earth. *With this chain he would pull down the celestial sphere and cast it down below the earth, thus turning the world upside down.* After many forays about the land, he ran across a smith who told him where his future wife lived, for she had been sleeping upon a pile of dung, near a kingdom situated next to a sea (Constantinople?, Khorezm?, Itil?). Having reached her, Svyatogor rained death upon her with his deadly sword, but only after leaving money for the bride price. Thus he made her his wife only moments before he slew her with his own hand and departed. While the woman appeared a hag of sorts the first time he saw her, she turned into a glorious maiden shortly after he left the grisly murder scene, and rose to become the greatest trader in all of history - everyone did business with her. Her city became filled with wealth from every part of the world, carried hither and thither by *her fleets of red sailing vessels.* It was in Kiev that Svyatogor ran into her again, and like every man who had ever met her, became infatuated with her admirable beauty. He fell in love with the wife he had killed, and who had arisen. From this Svyatogor realised that he could not escape his destiny, nor the verdict the gods would hand down against him. In the end Svyatogor was entombed for ever and ever, but not before lamenting that he had not breathed death instead of strength into the body of Ilya Muromets, his "brother". If Svyatogor was really a Russian folk pseudonym name for Lucifer and his wife Geh, the Great whore, who according to the Magi was the goddess of wicked witches, then we can compare this with a biblical passage in the *Book of Revelation*, which may have been the underlying theme for the story. Alternatively the Magian epic may have been a contributing component of the *Book of Revelation*.

"And upon her forehead was a name written, MYSTERY, BABYLON THE GREAT, THE MOTHER OF HARLOTS AND ABOMINATIONS OF THE EARTH. And I saw the woman drunken with the blood of the saints, and with the blood of the martyrs of Jesus: and when I saw her, I wondered with great admiration. And the angel said unto me, Wherefore didst thou marvel? I will tell thee the mystery of the woman, and of the beast that carrieth her, which hath the seven heads and ten horns.

The beast that thou sawest was, and is not; and shall ascend out of the bottomless pit, and go into perdition: and they that dwell on the earth shall wonder, whose names were not written in the book of life from the foundation of the world, when they behold the beast that was, and is not, and yet is. And here is the mind which hath wisdom. The seven heads are seven mountains, on which the woman sitteth. And there are seven kings: five are fallen, and one is, and the other is not yet come: and when he cometh, he must continue a short space. And the beast that was and is not, even he is the eighth and is of the seven and goeth into perdition. And the ten horns which thou sawest are ten kings, which have received no kingdom as yet: but receive power as kings one hour with the beast. These have one mind, and shall give their power and strength unto the beast. These shall make war with the Lamb, and the Lamb shall overcome them: for he is Lord of lords and King of Kings and they that are with him are called, and chosen, and faithful..... And the woman which thou sawest is that great city, which reigneth over the kings of the earth (ie; Babylon ... And the kings of the earth, who have committed fornication and lived deliciously with her, shall bewail her and lament for her, when they shall see the smoke of her burning. Standing afar off for the fear of her torment, saying, Alas, alas that great city Babylon, that mighty city! for in one hour thy judgement has come. And the merchants of the earth shall weep and mourn over her: for no man buyeth their merchandise any more: The merchandise of gold, and silver, and precious stones, and of pearls, and fine linen, and purple, and silk, and scarlet, and all thyme wood, and all manner of vessels of ivory, and all manner of vessels of most precious wood, and of brass, and iron, and marble. And cinnamon, and odours, and ointments, and frankincense, and wine, and oil, and fine flour, and wheat, and beasts, and sheep, and horses, and chariots, and slaves, and souls of men. And the fruits that thy soul lusted after are departed...

Was Luciferianism an inversion of Manichaeism?

Stoyanov comments that the Devil worshippers who intermingled with the Neo-Manichaean Cathars of 13th Century France were propagating a “heresy of a heresy”.¹⁰⁵⁶ If the information at our disposal is true, that is exactly what it appears to have been, a *deliberate inversion* of the puritanical Neo-Manichaean heresy of Catharism, then sprouting in France around 1022 AD. About 1207 AD a Cistercian abbot, one Ralph of Coggeshall promoted decretals of the Luciferianism present in Rheims during the 1100’s.¹⁰⁵⁷ The sect directly implicated was the Publicans (thought to be a corruption of the term Paulician), who were at that time evidently migrating into France and England.¹⁰⁵⁷ Many points require mentioning, as for instance his likening of Publican marvels to those of Simon Magus.¹⁰⁵⁷ Publicans appear to have been absolute dualists, offering homage not only to Jesus, but to the devil, “*an apostate angel*” whom they called Luzabel (Lucifer).¹⁰⁵⁷ Prior to her execution the “Witch of Rheims” explained the teachings of her sect, testifying that the devil “*presides over all the material creation, and all things on earth are done by his will. The body is shaped by the devil, the soul is created by God and infused into the body; whence it comes about that a persistent struggle is always being waged between body and soul*”.¹⁰⁵⁸ The Luciferianism in this case appears to have been appended to Manichaeism, for clearly sect members cherished their souls more than their bodies. Their dietary constraints (eg; the refusal of dairy produce) conformed to Manichaean precepts, as did their rejection of the Old Testament, marriage and the Christian saints. Yet they were further alleged to have carried out “*execrable sacrifices to their Lucifer at stated times and ... sacrilegious infamies*”.¹⁰⁵⁸ Their womenfolk supposedly pretended to be models of chasteness, all the while they discretely behaved like whores.¹⁰⁵⁸ If true, these last details point to an absolute dualist form of Manichaeism, that hoped to simultaneously appease the god of souls, and the god of the material world. The performance of hidden Manichee rites is corroborated by the Magi, who, like the Christian monks, wrote of “*the deceivers, the very great and very mighty, very evil-teaching and empty-skulled Manichaeans, whose devotion is witchcraft, whose religion is deceitfulness, and whose teaching is folly and intricate secret proceedings*”.¹⁰⁵⁹ So there may have been rogue demonolators in their midst. Consider the following passage of Manichaean scripture, which is bursting at the seams with Magian apocalypticism, giving cognisance to the existence of Az, witches and demons;

“Thereupon the Az from all that progeny of the demons that had fallen down unto the earth from the sky put on as a garment these two, the male Asreshtar and the female Asreshtar, lion-shaped, lustful and wrathful, sinful and terrible ... Az herself from the primeval beginning in that Hell of Darkness, her abode, had taught the demons and witches, the demons of wrath, the Mazans and Asreshtars, male and female, lewdness and copulation, so again thereafter Az began to teach also these ... that had fallen upon the earth from the sky ... so that they might become lewd and copulate and, with joined bodies, be mixed together so that dragon progeny might be born from them, and so that Az then might take and devour that progeny in order to make herefrom two creatures, a man and a woman”.^{1059a} Here the cannibalisation of the serpent children gave rise to human demons.

Accordingly the witches of Rheims were just some of the dualistic Neo-Manichees who participated in this war between the spirit and the flesh, by alternately ritually appeasing the spirit and the flesh. For instance the convicted 14th Century black witch Anne Marie de Georgel maintained views very close to purist Luciferianism. Namely that the devil (the lord of this world) was as equi-potent as his eternal enemy the God in heaven, in both power and dominion.¹⁰⁶⁰ As for that matter of souls, they did exist, but those won over by Satan were held captive on the earth.

Church accounts of the Luciferian Cathars reveal a faith so different from the true beliefs of the puritanical Manichaean Elect that according to Cohn, this is a sure sign that most of the information gathered by the Inquisitors had been forged, or based on the reports of fanatics so drunk on religion that they saw a devil lurking behind every blade of grass. It was a senseless beat up of people who didn’t believe in drinking alcohol, sexual intercourse or eating meat. In some respects I agree with Cohn’s prognosis; any suggestion that debauchery was a standard facet of purist Manichaeism are misguided, that is except for forms of sexuality that do not result in the issue of children (eg; sodomy, oral sex). The supposed labyrinthine exploits of the sect were irreconcilable with the true beliefs of the Manichaean Elect, or the commandments of Mani, the founder of Manichaeism. As it was the Elect (as their priests were called) were bound to rigorous vows of poverty and chastity, a total distancing of oneself from the evil, devil-created world. So the austere “white” Neo-Manichaeans (who originally wore black robes) probably stayed well clear of lurid sexual behaviour. That is not to say that all the reports of diabolical activity were untrue. One possibility

DEVIL-WORSHIPPERS
MIGHT HAVE EMULATED
THE DARK SIDE OF
MANICHAISM, WITH A
PERVERTED FORM OF
JUDAISM

is that these dark rites are attributable to the weighty residual influences of Zurvanite absolute dualism in Asia Minor. Additionally the especially damning Inquisitorial reports concerning the Cathars were probably attributable to a group of Luciferians, who were in every way the opposite of the Cathar Elect, but who viewed themselves as an indispensable part of Catharism. They had bored their way into the puritanical sect, then introduced a necessity for devil-worship as an integral part of cult activities. It is known that dualist heretics of the black side had a duty to emulate that which was above, so that the counterworld would have its accompanying mirror-image likeness, but in antithesis. If the Cathars had been infiltrated by black Magian Luciferians, then their inversion of Neo-Manichaeism, might outwardly have appeared as a twisted and wholly unorthodox form of Judaism, festooned with magicians. According to Manichaeism (and Magian) philosophy, Yaweh, the god of Israel was a voracious demon, the demi-urge. He was an opponent, not only of Christ, but Ahura Mazda. Yaweh's other name was Yaldabaoth, and according to them this infernal world-maker appeared as a lion, the biggest of all cats. This would help explain why Lucifer was represented as a cat among the Luciferian Neo-Manichaeans. Admittedly lions are not black in colour, but from the Manichaeism perspective, the Lion god of Israel could certainly be seen as black, but black in nature, rather than colour. If the above scenario actually took place, then we have evidence that even smallish heretical movements were being penetrated by a "Religion of heresies" during the Middle ages, a faith of inversion, who put into effect the very tenet formalised in the *Emerald Tablet* of Hermes Trismegistus - "As it is above, *so shall it be* below". So did the Neo-Manichaeism Cathar Elect, like the early Christians, suffer unjust persecution for carrying out rites that they never even performed? Could it be that the many Church denunciations against the extremely pious Neo-Manichaeism preachers (accusations of sodomy, incest) would have been better directed against the handiwork of a shadowy cult which had been lurking behind them, mimicking and bastardising their faith through the performance of Jewish rites which were the exact opposite of everything the Manichees ever believed? Remember, while the Church was utterly opposed to the Cathar view that Yaweh was the devil, many Inquisitors, the enemies of the Neo-Manichees, willingly conceded that the Cathars lived an austere life of moral restraint, and yet there was no shortage of accounts detailing their supposedly infernal activities. To my mind it seems conclusive that, in many cases, Inquisitors were witnessing a perverted form of Manichaeism, with the traditional pietist Manichee creed flipped upside down through the teachings of black Magian infiltrators, keen on bringing the world out of order.

SOME SIX STYLES OF WITCHCRAFT ARE PERCEPTIBLE IN VARIED WITCH TRIAL ACCOUNTS

Empires of the black Magi

In summation, European witches were probably party to a variety of *infernal traditions*, or to dualistic sects that outwardly seemed morally forthright, but which knowingly or unknowingly contained an infernal component. These styles of witchcraft could only be properly differentiated by the Inquisitors using skilled interrogation techniques. In saying this I am not alluding to torture alone, but the sophistication of the questions posed to suspects, who in many cases would have been fairly reticent. The various sects are as follows;

SCHOOL OF WITCHCRAFT	OBJECT OF VENERATION
1. Magianism	Chaldean/Iranian daemones
2. Dionysianism	Titans, fauns, satyrs
3. Mithraism	Chaldean/Iranian daemones
4. Inverted Manichaeism	Jewish angels
5. Chaldeanism	Chaldean, Babylonian and Assyrian daemones
6. Dualistic animism (shamanism)	Evil spirits and Buddhist demons

Fig 53. Buddhist demon.

In some of these the devil is portrayed as a goat or dog, and in others a cat (ie; a lion). But in every case we are looking at a treacherous, twisted deity, supremely hateful of that other god, who ruled in the heavens above.

If these many analogies are correct then we are close to recovering some of the undocumented beliefs of the pagan black Magi, or fine-tuning what is already known of them, by means of retrospective reconstructions made possible by a detailed and open-minded analysis of Late Mediaeval/Renaissance documentation on the witches. The Zurvanites and pagan Gnostic cults such as Mithraism and Neo-Pythagoreanism had common ritual regimes which resembled those of the Rus' dualistic Magi. This is unlikely to be a coincidence. At best these were a

borrowing of nifty rituals that possessed some appeal, or at worst they are evidence of the penetration of pagan Gnosticism and Mithraism by the Magi, of both white and black varieties.

Mediaeval Jews were reputedly great spreaders of the infernal arts during the Middle Ages, and for this they endured persecutions by the Church, and more especially by the general public. The term “witches sabbath” is a vestige of this superstition that Jews were witches and abominable baby eaters. Quite clearly this was a racist perception aimed at derogation, but I am inclined to think that at least a small portion of the mediaeval Jewish community (who had emigrated from the collapsed Khazaria) were still practitioners of the magical arts, once performed in pre-Judaic Khazaria. Before their conversion the Khazars were undeniably dualistic, and their form of Judaism deviated substantially from that of the Orthodox Rabbis, which apparently later came to Ifil and cleaned up the sorts of dualistic Kabbalistic activities which were going on there.

The many rites already mentioned are also conceptually similar to those of the black “shamans” who headed the dualistic animist cults common to Rus’ and the Urals, plus Central and Western Siberia. They are all dualistic, and all of the above permit the adoration of good and/or evil, by means of white and/or black ritualism. This synthesis of animism and Magianism can be seen in similarities between the Magi and the dualist white and black shamans of the Finns. These points of semblance are given added significance considering the close proximity within which they both lived. For instance is it a coincidence that Finnish and Western Siberian shamans also believed in a bridge to the Heavens, which could become as thin as a razor (an exact description of the Magian Kinvat, the Bridge of the Separator). Moreover, the stark resemblances between Tibetan shamanism and Persian Magianism (like the defleshing of corpses) have been much commented upon in the past, because they are quite numerous indeed. Such features seem to prove a northward movement of the Magi as their civilisation gasped for air, asphyxiated by the armies of Islam. That Turkic shamanism and Manichaeism was liberally bathed in the doctrines, terms and practices of the fugitive Magi is repeatedly found in this book and equally compelling.

Human and animal sacrifice in the black witch rites

That Mediaeval witches were accused of ritual homicide and animal sacrifices bespeaks a correlation with certain aspects of paganism. In repeated instances the sacrificial methods used by witches have a Chaldean or black Magian character, but they incline more towards black Magianism of the sort discussed and condemned in the Magian texts.

The animal and human sacrifices of the witches were frequently performed in private, and only occasionally at their group gatherings. Unfortunately witch trial documents rarely describe the precise manner of a given ritual slaying allegedly performed by a suspect, but the effusion of blood seems to have been a common central feature of the killing.¹⁰⁶⁵ Bearing this in mind it was far more common for them to draw blood from themselves using a jabbing instrument than an unrestrained string of ritual killings. The following is a precised list of sacrificial methods used by the witches. In practically every case the maelific offering had a necromantic aspect.

RITUAL HOMICIDE

1. Feeding a demon familiar bread or milk.
2. Eating pies or bread tainted with the boiled flesh of a murder victim. This victim, usually a baby might have been freshly killed, or a decaying corpse used in its stead. In either case it served as a defiling agent for what might otherwise have been wholesome food.
3. Eating a sabbath meal of bread, wine and beef.
4. Eucharistic bread or wine, that had been defiled and eaten, or fed to a demonic familiar.
5. Eating desecrated pagan ceremonial foods and libations.
6. The ritual slaughter of a dog, cat or chicken.
7. The sacrifice of babies, sometimes pierced with instruments.
8. Sundry poisonings.

TYPES OF OFFERINGS

Therefore witches made animal sacrifices only infrequently, in simple homage to a given devil, or they did so to obtain their intercession. Where animals were slain, the victims were usually only small animals like cats, dogs and chickens.¹⁰⁶⁶ As it happens these three species of animal were deemed holy to the white Magi. So too the cattle that were sometimes slain to provide repast at their communal banquet

SACRIFICES AS A RITE OF ADORATION, OR TO GAIN INTERCESSIONS

Usually the sacrifices were much more sedate; milk or bread fed to a familiar who was considered to be a

BLOOD NEEDED TO FEED
FAMILIARS, WHO WERE
SAID TO BE DEVILS

personification of a demon in animal form, or small amounts of spilled blood. Familiars might be a dog, a cat, a weasel, a toad or some such creature. In 1566 an English woman, called Elizabeth Francis confessed that her grandmother privately inducted her into the arts of witchcraft and,

*“counselled her to renounce God and His word, and to give of her blood to Satan (as she termed it) which she (the grandma) delivered (to) her (Elizabeth) in the likeness of a white spotted cat, and taught her to feed the said cat with bread and milk, and she did so. Also she taught her to call it by the name of Satan, and to keep it in a basket”.*¹⁰⁶⁷

THE FEEDING OF WITCH
FAMILIARS WAS
CONCEPTUALLY SIMILAR
TO THE SPECIALISED
SACRIFICIAL METHODS OF
SOME RUSSES

Whenever Elizabeth sought intercessions from the devil she fed the familiar with blood, bread or some other offering, and it would speak to her, and grant her requests.¹⁰⁶⁷ Such confessions immediately call to mind the sacrificial practices of the pagan Russes. On the Upper Volga one was seen giving thanksgiving offerings of meat to a few different gods. He presented the offerings without a priestly intercessor by hanging the meat portions around the necks of the idols, which had the form of carved posts. Dogs came thereafter and ate the meat portions left for the god in question. The pagan who left the offerings was delighted that the dogs had eaten the sacrifices. For he was visibly glad, professing that *“he (the god) has consumed my gifts”*.¹⁰⁶⁸ Therefore it is likely that the act of feeding a familiar with the sacrificial offering (whether animate or inanimate) was the primary means of giving sustenance to a deity. In brief, the continental European witch practice bore some resemblance to a pagan Russian means of making offerings.

SIMILAR TO CHALDEAN
RITES, BUT CLOSER TO
THE BLACK MAGIAN

Sacrificial blood-letting of the sort practiced by European black witches seems distinctly Chaldean, and yet the fact they didn't kill creatures in groups of prescribed number (except in the case of the Italian fairy cult), or burn the offering until there was nothing left makes them unlike Chaldeanism. This leaves black Magian ritualism as their closest possible precursor, for their infernal arts required the ritual defilement of holy objects, milk and bread, plus cannibalism and the killing of good animals, amongst which were the dog, cat and chicken. So many aspects of European witchcraft can be found in the scriptures of the Magi that we can suggest a factual connection. Some of these witch rites also match the supposed sacrificial regimes of several heretical groups covered previously.

BABIES SACRIFICED

Some European witches made animal sacrifices more than others. After the initiation of one Daeneus into a witch coven it was said that *“every day afterward offreth something of his goods to his patrone, some his dogge, some his hen, and some his cat”*.¹⁰⁶⁹ At certain times children were sacrificed by the (black) witches. These were allegedly eaten by the coven, or burned. This is another allegation which seems to have stemmed from the anti-witch polemics of the Middle Ages, and yet we find that they go back a very long way.

A PIE MADE FROM A
ROTTING BABY

Helen Guthrie was one of a gang of 5 witches which, in 1661 at Forfar, gouged the decaying remains of a baby from a church graveyard.¹⁰⁶⁹ A pie was made from the rotting flesh carved from its head and appendages so as to render them invulnerable to confessing their arts.¹⁰⁷⁰

CATTLE MUTILATION

It is entirely possible the burning of an unbaptized or bastard child was an actual event, one of the highest forms of rite ever performed by the black Magi. It may have been a ritual that in some ways parodied the Christian mass where the Eucharist, the Body of Christ (which is supposed to take away the sins of the world), is eaten by the congregation in the form of holy bread. But in this black ceremony, I hypothesise that it concerned the slaying and cremation of a child that represented Satan, the “Black Son”, of God, (he who caused the sins of the world), and who would perhaps one day be immolated by his own father.

Since the black Magi hoped to cause maximum distress to the labouring ox, I theorise that in practice this led to milk stealing, or even the deliberate mutilation of their udders, severing off the teats and so on. *Article 84* of the Mediaeval Russian law codes, the *Russkaya Pravda* states;

“And whoever vilely maims or slaughters anothers horse or cattle shall pay a 12 grivna fine, and for the damages, amends to the owner”.¹⁰⁷¹

To put this in perspective that is the same blood-money price for killing a prince's farm manager, and more than double what you'd pay for murdering a peasant. Sure, one could accidentally maim anothers horse or cow, but what does this mean *“viley maims”*. *Article 84* was undeniably formulated to stamp out cattle mutilation of a callously vicious or malicious nature, in the newly converted Russia. It appears self-evident; they had a problem with horse and cattle mutilators in Russia not long after its conversion. I suggest the offenders were witches. Even if

the said Article was an early Mediaeval form of animal cruelty legislation, we would still need to explain why it doesn't apply to other animals. On the other hand it might have had something to do with the Turkic custom of tapping blood from the veins of cattle, and horses more especially, to make libations. Certainly the Prussians (and by inference other pagans in their region) were also supposed to have incorporated the blood of draft animals into their intoxicating libation. Whatever the case, this is an anti-pagan legal Article.

On cock sacrifice

One name for Russian sorcerers was *Kudesnik*, and due to its phonetic affinity to two other words *kudakhtan'e* and *kudri*, one can suggest that they were long haired priests somehow connected with chickens or cackling birds. Since Rus' pagans were known to have slaughtered chickens to Volos the serpent of the underworld,¹⁰⁷² it is my contention that *Kudesniki* slaughtered fowls in sacrifice. But why chickens? While some might say they were cheaper than lambs, pigs or rams, I believe there was a deeper religious significance behind cock or chicken sacrifices, mainly because a number of wealthy mediaeval necromancers were reported to have killed them during their rituals, and they had enviable sums of money at their disposal. Cock sacrifice during the performance of witchcraft may be elaborately intertwined with the fact that they were closely allied with the Good Sun, especially in Magianism. Like the dog, the cock acted as a sentinel against the onset of evil, and so by killing them, the witch ridded the world of the security which they provided, and gained infernal merits for their troubles. As the wise Magi declared;

"when a hen utters a crow in a house, or the cock crows unseasonably, it is desirable that they do not kill it, and do not consider it a bad habit. Because it is uttering that crow for the reason that a fiend has found a way into that house, and the hen or the cock, alone, does not possess the power that would keep the fiend away from that house, and the hen is going to give the cock assistance, and utters the crow.

Therefore, if any time the chance happens in that manner, it is requisite to bring another cock, so that they may drive away that fiend through the assistance of one another. And if a cock crows unseasonably it is likewise not desirable to kill it, because the reason may be this which I have stated.

For it is declared in the good religion, that there is a fiend whom they call Seg (the secret-moving deceiver who causes annihilation), and in every house where an infant exists, that fiend strives that she may cause some misfortune to come upon that house (eg; cot death). So it is necessary that they should keep a cock on the watch for her, so that it may smite that fiend and force her to the road away from that house".¹⁰⁷³

The black Magi were probably preoccupied with the business of slaughtering cocks, for they loomed large in the battle against the witches, and warred against the demoness Seg. Even more than that the act of killing a cock was considered extremely sinful.

"And there are several things the slaughter of which is very bad, and the sin is very abundant, as the lamb, the kid, the ploughing ox, the war horse, the swallow bird that catches the locust, and the cock; and of the whole of these the sin is most as regards the cock. If it becomes a necessity, it is proper to kill a cock that does not crow, and it is necessary to consecrate their heads. Any head of an animal, not consecrated, it is not desirable to eat, so that it becomes so far a righteous gift. If one be not able to consecrate the head, it is requisite to consecrate one kidney as a substitute for it".¹⁰⁷³

Right across Europe a custom developed whereby, the cock, the friend of the morning sun, was placed atop roofs in the form of a weather vein, both to frighten off witches and avert the destructive lightning strikes which the tempestarii (storm raising witches) called down upon the earth.¹⁰⁷⁴ In Scandinavia it was thought that a cock would warn the gods that Ragnarok was upon them.

Memories of the cock and his once highly regarded role still exist today. There is a continuing belief which has persisted in England, even as late as this century, that cocks prophesied, and that it was bad and unjust to chase away any cock that came crowing at your front door.¹⁰⁷⁵ Its crow was an omen of coming misfortune, perhaps even a death in the family, particularly if it sounded during the night.¹⁰⁷⁵ There is an obvious link between their call, and the threat of coming annihilation to someone you knew. To see a cock and hen sitting together was a good omen, and

CATTLE MUTILATORS
STILL ACTIVE IN RUS'

COCK SACRIFICES

COCKS WERE SENTINELS
AGAINST EVIL

COCKS WATCHED ONE'S
HOUSEHOLD,
PROTECTING IT FROM A
HIGHLY DISCRETE
DEATH DEMON

THE MAGI TAUGHT THAT
IT WAS VERY SINFUL TO
KILL A COCK

often portended a coming marriage. These superstitions resemble those outlined in *Sad Dar*.

And on the contrary, there are superstitions that you must kill a crowing hen, else it would bring misfortune; but the very persons who advised people to kill the hen would themselves not do it when pressed.¹⁰⁷⁵

Magian scripture mentions that the heads of any chicken sacrificed was to be consecrated beforehand. The heads of sacrificial victims were consecrated by other races, by the outpouring of a libation in order to make the offering holy, presentable and befitting. Herodotus tells us that the Scythians sacrificed their war prisoners only after tipping wine over their forehead.¹⁰⁷⁶ The pagan Gnostic priests of Egypt inspected their white sacrificial bulls at some length, and rejected them if even one black hair was detected.¹⁰⁷⁶ Those that were satisfactory had their heads anointed by a libation, and their horns bound with a seal impressed with the mystically engraved magical ring worn by the high priest.¹⁰⁷⁶ Druids placed seals on the heads of their sacrificial cattle. Whether the pagan Slavs sealed and anointed the heads of their intended sacrifices has gone unrecorded.

JUVENILE AND INFANT
REMAINS FOUND IN AN
UNDERGROUND VAULT

Child sacrifice

Did people really sacrifice their own children? It's an interesting question. Historical accounts mentioning the exposure or sacrifice of one's own offspring have been regarded by "right-thinking people" as a non event, untrue, lies. But just when you thought there has never been any physical evidence for child sacrifices, archaeologists have discovered an underground vault at the site of the once great Carthage (see fig 118, Part I), perhaps the same one referred to by Agathocles as recounted in the writings of Diodorus Siculus.¹⁰⁷⁷ It contained numerous examples of infant and juvenile skeletal remains, usually in a charred state, which were associated with furnace altars. What is more, wall motifs were found thereabouts showing depictions of human sacrifices.¹⁰⁷⁷ We know from Diodorus that *the children chosen for sacrifice were of noble parentage*,¹⁰⁷⁷ a custom also noted among the Celts. Priests participating in the sacrifice of the noble youngsters *played tambourines and pipes, and wore masks*.¹⁰⁷⁷ At the *night time ceremony* the children had their throats slit, and after being placed in the hands of an idol were lowered into the flames at the foot of the idol.¹⁰⁷⁷ Parents had to watch their children killed in this fashion without weeping at any stage.¹⁰⁷⁷ Such intricate details can easily be found replicated in the testimonies of witches, and witnesses to their rites, which took place throughout the next 1,500 years across Europe. Particularly interesting is the Celtic parallel, for in both cases the sacrifice of high-born children brought about the spiritual purification of a person; atonement.

THE SACRIFICED
CHILDREN WERE OF
NOBLE PARENTAGE

Consider also the following accounts from that same part of the world, that in some ways echo the happenings in the Carthaginian vault;

The Gospel of Philip:63, a Valentinian heretical text excavated in Egypt this century stated;

THEIR BODIES WERE
BURNED IN A FURNACE

*"God is a man-eater. For this reason men are (sacrificed) to him. Before men were sacrificed animals were being sacrificed, since those to whom they were sacrificed were not gods".*¹⁰⁷⁸

There you have it. Real gods needed important sacrifices, people for instance. Only false gods accepted anything less. As regards this Carthaginian prohibition on weeping, we find that Mediaeval witches were supposedly unable to cry either. So too the pagan Danes:

GOD, THE MAN-EATER

*"Tears and complaints and other forms of compunction, by us regarded as wholesome, are by the Danes so much abominated that one may weep neither over his sins nor over his beloved dead".*¹⁰⁷⁹

REAL GODS NEEDED
IMPORTANT SACRIFICES

This might have been a residual Indo-European custom, for there was originally a taboo binding on female Brahmin, that if they should cry it would cause the destruction of their kin and kingdom.¹⁰⁸⁰ Only in Europe, it seems to have applied to menfolk also. *The Primary Chronicle* reported the following pagan Russian sacrifices.

THEY SHALL NOT WEEP

*"Vladimir then began to reign alone in Kiev, and he set up idols on the hills outside the castle with the hall (and tower): one of Perun, made of wood with a head of silver and a mustache of gold, and others of Khors, Dazh'bog, Stribog, Simar'gl, and Mokosh. The people sacrificed to them, calling them gods, and brought their sons and their daughters to sacrifice them to these devils. They desecrated the earth with their offerings, and the land of Rus' and this hill were defiled with blood".*¹⁰⁸¹

From one British witch trial we hear that ...

*“They sacrifice their owne children to the diuell before baptisme, holding them up in the aire vnto him, and then thrust a needle into their braines”.*¹⁰⁸²

CHILDREN SACRIFICED
IN KIEV

This reference deserves further comment. Firstly, does the fact that the witch raised the sacrificed child up in the air mean the witches believed their God was currently ruling in the heavens above? Such was implied in the confession of one Widow Coman *who stated that the Devil was already sitting at the right hand of the Father.*¹⁰⁸³ This account dating to the 17th Century AD could easily reflect elements of heretical Massalian trinitariansim, which advocated the redemption and justification of Satan over the top of Christ.¹⁰⁸⁴ In relation to this, Inquisitors were said to be disgusted at the mere existence of star charts which were beginning to appear during the Middle Ages. They depicted demons in charge of the heavens, and were drawn by “black” witches.¹⁰⁸⁵ Might these maps indicate that some witches believed their lord had already risen from the Abyss? Secondly, the mention of needles being thrust through the head of the victim is paralleled not only by accounts of the behaviour of the Rus’ warriors towards war prisoners taken during the sacking of Amastris, but more importantly in the writings of the Magi. According to the Magi this was one of the outrages perpetrated by demons in the underworld against sinners. Other admissions of their activities such as;

SOME SAID WITCHES
SHOULD KILL A CHILD
PER MONTH

*“they burne their children when they have sacrificed them”*¹⁰⁸⁶ or *“This must be an infallible rule, that euerie fortnight, or at the least eurie moneth, each witch must kill one child at the least for hir part”.*¹⁰⁸⁷

These two prior-mentioned baby sacrifices have similar characteristics to Chaldean child sacrifice. Perhaps these English witches were the descendants of *kolduny* (Chaldean sorcerers) who had migrated into Russia from Southern Iraq, and thence into Europe.

To re-ignite Louis XIV’s passions for his ex-mistress, a ceremony was held in 1679 AD by a Parisian Grand master, who also happened to be an abbot named Guilborg.¹⁰⁸⁸ By his own admission, and without torture Guilborg confessed to having sacrificed a child to achieve this end.¹⁰⁸⁸

AN ITALIAN WITCH
CLAIMED TO HAVE
SACRIFICED 30
CHILDREN BY TAKING
THEIR BLOOD
IN HER WORDS SHE HAD
LIBERATED THEM

The next anecdote came from a monk operating in the Padua area of Italy, one Bernardino, in the year 1427;

*“One among the others...said and confessed without any torture that she had killed thirty children by sucking their blood (ie; their life); and she also said that she had liberated sixty of them... And furthermore she confessed that she had killed her own son, and turned him into dust, some of which she gave people for such purposes”.*¹⁰⁸⁹

I would like to highlight the comment that she had “liberated them”. This strongly savours of Manichaeism, Gnosticism or even Dionysianism, where the body was seen as evil, and the spirit pure. The death of the body meant the liberation of the soul from its doleful incarceration. It is conceivable that Manichees might have martyred children to save them from enduring the pains of this world, though it is difficult to prove the factuality of these sacrifices without hard physical evidence. Even then charred remains tell us little, unless they are found in a ritual context. Moreover the Elect were against all killing so one of the Hearers might have performed the act if such a deed was ever sanctioned by the Manichees.

LIFE RESIDED WITHIN
THE BLOOD

In the ancient world the belief that life resided within the blood was widespread. Might the drinking of the blood have represented the moment the victim’s life force fled the body spurting out from severed or pierced veins?

There are some stark similarities between details found in this example and what was written about the Chaldeans (by Al-Nadim) and the Paulician heretics (by a high-ranking Armenian cleric named John IV), in particular the killing of the child and pulverising its body to dust.

INFANTICIDE

Even in our day we have evidence for widespread “infanticide”. For example it is well known in India that Hindus kill many of their daughters at birth, mainly because it is highly desirable that they have sons, and to avoid the financial burden of dowries on the family. This may seem repulsive to Western readers, yet we should pause for a moment to understand that in the Hindu scheme of things these children will live again, in one form or other. In India this is considered women’s business, and it is not a happy occurrence for all concerned, including the mothers themselves, many of which feel saddened by having to do it, due to family or social pressures. Moreover many Western women choose to abort their own children for financial reasons, to save their career, or due to psychological reasons, a shortcoming in the relationship, abandonment, and so on. The main difference between Western and Indian women is that the termination of the child’s life is inter-uterine in the West, while in India the child is more

often than not carried full term. The child might be buried alive, or even have hot oil poured down their throat. It's an tragic situation which the Indian government and the World Health Organisation is trying to prevent with better availability of contraception and education programmes.

Clearly these are not sacrifices, but I include mention of these practices to illustrate that in many societies it is considered socially acceptable to kill your own children, yet it is still a taboo subject. If these things are true, can we then say that religious infanticide is fictitious? Is it so hard to believe that ancient cultures could have possessed religious concepts which permitted the killing of children when we ourselves are slaughtering millions upon millions of innocent unborn per annum world wide?

Witchcraft never existed?

The problem of identifying actual diabolism within the pre-Christian pagan religion (the "Old Faith") is greatly amplified by the writing habits of early Churchmen, who frequently referred to pagan gods as devils. As a result of this gloss, the ability of scholars to discern a factual underlying substrata which included the intentional homage of demons (as distinct from the celestial fertility gods) has been significantly hampered. In response to this need to sift fact from fantasy, the late Margaret Murray resolved to scrutinise the evidence through the eyes of an anthropologist, in an attempt to gain an objective view of the primary historical data.

But the answers she arrived at drew her into direct confrontation with later generations of her academic peers, who adhered to the prevailing view at that time, that witchcraft never existed. For the past few decades her books have come in for a real bashing by academics specialising in the study of witchcraft. Their main gripe was that Murray had the audacity to suggest that, based on the evidence she presented, that aspects of witchcraft were a religious manifestation of rites enacted by a heathen cult of considerable antiquity, which had been present across much of Europe and Britain.

Murray's real crime was postulating that, in a number of instances, trial data showed evidence that the devils and shape-changers were, in reality, human beings that, as a consequence of their rites, underwent a psychological mutation, plus changed their attire to suit this new persona. These, she said, were elements that can be understood anthropologically, in a religious sense. Attendees were dressing as animals and demons, however it was the demons that were, and remained, true demons, whether dressed in their costume or not.

For this assessment she was scourged at the pillory. Not content with condemning her work on legitimate academic grounds, Cohn went a step further and began to grossly misrepresent the aim of her two books the *Witch Cult in Western Europe*", and the *God of the Witches*. His mud slinging stuck well and truly, after which no self-respecting student would be willing to soil their hands with them.

Those who believe Cohn has proved that witches never existed are seriously delusional; he does nothing of the sort. What he does highlight though, is a number of factors which helped disseminate the "witch craze" mentality, and the actual or potential travesties inherent in the legal processes used to try suspects. This was no doubt a result of his chosen field of specialisation - persecution studies, and in particular the persecution of the Jews.

Murray, being an anthropologist amongst other things, decided to look at trial documents as would an anthropologist rather than an historian. For this reason it explored a new dimension to the subject of witchcraft. A great deal of her books are taken up with excerpts from her sources (which also include examples in the French and German), and a certain amount of explanation. One suspects that she could have transcribed even more trial documents if she wished, but as it states in the introduction to *The Witch Cult in Western Europe* "there are limits to the size of a readable book". In any case she provides more extracts than does Cohn. In her introduction to the *Witch-Cult in Western Europe*, Murray states;

*"Among the believers in witchcraft everything which could not be explained by the knowledge at their disposal was laid to the credit of supernatural powers... The common beliefs as to the powers of the witches are largely due to the credulous contemporary commentators, who misunderstood the evidence and then exaggerated some of the facts to suit their preconceived ideas of the supernatural powers of the witches; thereby laying themselves open to the ridicule of all their opponents, past and present".*¹⁰⁹⁰

She then went on to explain that the fantastical phenomena which the witches experienced (like shape-

changing) were for the most part a spiritual experience, though sometimes enacted in the flesh. For this reason their testimonies carry a blend of real and surreal. She states that once these glosses of mysticism are stripped away (which were very real in the participant's mind, a point amply reflected in the court transcripts) one finds a factual substrata of religiosity that is reflected in a number of primitive societies.

Next Murray states,

*"The evidence which I now bring forward is taken entirely from contemporary sources, i.e. the legal records of the trials, pamphlets giving accounts of individual witches, and the works of Inquisitors and other writers".*¹⁰⁹⁰

Now I want to stress the next point . . . she proceeds to say *"I have omitted the opinions of the authors, and have examined only the recorded facts, without however including the stories of ghosts and other "occult" phenomena with which all the commentators confuse the subject (in an anthropological sense). I have also, for the reasons given below omitted all reference to charms and spells . . . and have confined myself to those statements only which show the beliefs, organisation, and ritual of a hitherto unrecognised cult".*¹⁰⁹⁰

Well I think that says it all. She left these things out, not because she felt they should not be mentioned, or detracted from her argument, but because it only padded out the anthropological examination which was the central theme of her book.

Now let's see what magic Cohn weaves with her work. Cohn begins by summing up Murray's major arguments for those who are unfamiliar with them. He then says;

"The only way to find out is to examine her sources in their original contexts - a tiresome task, but one which is long overdue."

*"The relevant passages in the Witch-Cult carry references to some fifteen primary sources, mostly English or Scottish pamphlets describing notorious trials. Now, of all these sources only one is free from manifestly fantastic and impossible features - and even in that one the Devil, though "a bonny young lad with a blue bonnet", has the conventional requirements of a cold body and cold semen, and gladly mates with a witch aged eighty".*¹⁰⁹¹

He starts out, *"Margaret Murray was not by profession a historian but an egyptologist, archaeologist and folklorist. Her knowledge of European history, even of English history, was superficial and her grasp of historical method was non-existent".*¹⁰⁹²

Where does Murray say she is examining these court transcripts under the guise of an historian? She doesn't. Next he accuses Murray of selectively quoting from her sources, stripping away tales of the fantastical to add to the validity of her earthly explanations for the cult. Anyone who has read Murray's work would legitimately have known about the methodology she employed. They would have known she believed that hallucinatory experiences were simply a part of shape-changing. While Murray admitted these mysterious phenomena were very real to the witch, she left them out, preferring to show that for the most part witches met in the flesh, the devil himself being a man dressed as a goat, or in black, or in a variety of other etheric forms, or modes of attire. It was at such times that a mystical oil was dispensed by the man-devil and duly applied by those present. Consequently participants at the gathering experienced feelings of flight and euphoria. How can anyone have a problem with what Murray did, I ask you?

Cohn launches a series of tirades against her omission of text in which members of a Scottish coven transformed into horses. Again a gross misrepresentation of her methodology and aims. Then comes Cohn's crescendo of attack;

*"Murray is of course aware of these fantastic features - but she nevertheless contrives, by the way she arranges her quotations, to give the impression that a number of perfectly sober, realistic accounts of the sabbat exist".*¹⁰⁹³

Cohn further adds that a subsequent exploration of shape-changing in many primitive cultures has not yielded any satisfying evidence that shape-changers formed formal societies or religions. That's a fairly bold statement, untrue at that. As it happens shape-changing of the sort portrayed in Murray's accounts is a perfect description of pagan Norse, Slavic and Alanic shape-changing.

Those who believe there were no such things as witches, are obviously unaware that Al-Nadim wrote about sorcerers and magicians in Mediaeval Iraq and Mesopotamia who worshiped devils, using either Chaldeanism or the so-called "condemned system" which required the deliberate pursuit of evil. These societies had existed in Harran, and somewhere near Basra for several hundred years before Christ and continued to do so until the Middle

Ages. And then there were the Eastern European witches.

Like Cohn, I have problems with Murray's work, though this disquiet extends more to the number of cases which she drew upon. Just how widespread was the sort of material she presented throughout Europe? In attempting to answer this one finds the single greatest shortcoming of witchcraft studies, a lack of scientific procedure when assessing the phenomenon of European witchcraft as a whole, and indeed a heavy reliance on English works, themselves fairly threadbare when it comes to assimilating foreign witch data from many parts of Europe, including Eastern Europe especially. So controversial are the witch trials that nothing less than a total round up and microscopic analysis of all surviving documents (or should I say what's left of it) shall enable us to make definitive statements about the witches.

The amount of information supporting the general observations of Murray means that many academics will rally to double and re-double their efforts to nail Murray's door shut. As in the past some will attack the mere concept that witches once existed by labelling those who support that line as "lunatic fringe". The remainder will do this not through through vociferous outbursts, but by ignoring the very existence of such a portal. Every hope lies therefore in those who are prepared to admit that Murray's shortcomings were due to her inability to further develop and support her thesis in an academically hostile environment, rather than the successes of later opponents in exploring such a line of enquiry and finding it to be false or unsustainable.

Their arguments against her studies were numerous, but looking closely at the historical records leads me to believe, like Murray, that the prevailing notions of many modern academics on the subject of witchcraft are incorrect. The main points which they have used to debunk the concept of witches as members of a formal pagan religion are as follows, and which I will now address;

PAGANISM AS AN
ORGANISED RELIGION

1. *What kind of a religion could be based around the worship of a man dressed up as a goat or dog, and revel in such seemingly inane ceremonies as whippings, uttering obscenities, destroying plants, crops, stock, people, and the stealing of milk from cows, burying porridge, or flying around on (besoms) brooms!*

PAGANISM HAD A WHITE
AND DARK SIDE

I believe I have adequately shown thus far that these rites can only be properly understood in a dualistic context. They constituted black mirror image ceremonies which were parodies or inverted opposites of the white Magian rituals, and which had to be so, if their full efficacy was to be brought to fruition, on behalf of their Lord, the Evil One.

PAGANISM, HERESY AND
WITCHCRAFT WERE OFTEN
RELATED

2. *There is no evidence that pagans were members of an organised religion, as the witches were recorded to have been!*
Clearly, written records stemming from the ancient world and the Middle Ages seem to indicate that actual blood Magi, such as those which served the dualistic religious needs of the Iranians, were active throughout the Slav lands, as well as in ancient Egypt, Rome and Briton, and perhaps even in Scandinavia, Germany and Gaul.

The best part of *The Forbidden History of Europe* is dedicated to illustrating the organised nature of pre-Christian pagan religion in Eastern Europe and elsewhere on the continent. In Russia, as abroad, the descendants of these earlier pagans lived on, many continuing to preserve the old ways. For instance in folk hymns native to the Yaroslavl region of Inner Russia, we learn of *an organised earthly society of witches*.¹⁰⁹⁴ They sought to bring much harm to mankind by their misdeeds, mainly by milk stealing and crop damage.¹⁰⁹⁴

THE DEVIL AS THE ENEMY
OF THE SUN

3. *If the witch covens were supposed to be survivals of an ancient pagan religion, as Murray suggested, then how is it that most Church evidence depicts them as heretics beholden to a white or an infernal deity, rather than focussing on the pagan nature of their organisation? In other words paganism, Witchcraft and heresy were separate issues, and not inter-related.*

ENEMY OF THE SUN-
CHRIST

Paganism, heresy and witchcraft were anything but unrelated beliefs. Anyone who has delved into the subject of dualistic heresy will know that the line between paganism, heresy, witchcraft and Christianity was exceedingly blurred. But why was this so? Professor Zaehner, a renowned specialist in the study of the Magi, has strongly assertively theorised that Zurvanite Magi were responsible for many of the heretical concepts circulating in Medieval Europe,¹⁰⁹⁵ and which so raised the wrath of the Church authorities that the inquisitions were their chosen response to this unwanted influence. But what factors could have provided for such elaborate inter-connections between paganism, heresy and Christianity? The link between paganism, Christianity, heresy and witchcraft, I believe, can be found within the eschatological myths of the Magi, stemming from a Magian belief in the coming of

Sraosha the incarnate Word of God, the virgin-born world Messiah, who among the pagan Slavs was referred to as Khors or Khres, and Keresa, the Zoroastrian word for Jesus.

Another vital clue so often overlooked by researchers is that Satan, the so-called “Enemy of Mankind”, was perceived as a horned goat or dog, and yet the Bible does not describe him in this manner. No, this sort of infernal iconography belongs fairly and squarely to the pagan Magi. How is it then that mediaeval European witches chose to depict Satan in the same way as the horned god of the black Magi? Why did the heathen Slavic Volkhvy Magus priests use this same image for Chernobog (the Antichrist), the vehement enemy of Dazhbog (the Good Sun), or Keresa (Jesus the Good Sun)? In attempting to answer this we arrive at the heart of one of the most enduring heretical myths of the Middle Ages, that the Antichrist was the fallen brother of Jesus Christ.

CONVICTED WITCHES
WERE SUBJECTED TO AN
“ACT OF FAITH”

4 *Witchcraft was simply a superstition, a fantasy of religious zealots!*

Whether or not witchcraft or miracles actually work is not something I propose to delve into. What I do want, though, is to show that people of the Middle Ages definitely did believe it existed, and for this very reason, the subject warrants closer attention, commensurate with the importance of the subject. The deaths of up to 150,000+ people can never be described as a fantasy.

In Western Europe, convicted witches and heretics were subjected to what was termed an “Act of Faith”, or *auto da fe*, a formal part of the legal process with regard to these two “crimes”, that preceded the possible execution of a capital sentence.¹⁰⁹⁶ The “Act of Faith” was an organised public gathering convened in the village or town square (see p. 850). There the convicted offenders were paraded in front of large numbers of townsfolk, who were encouraged to attend. In readiness for an “Act of Faith” the convicted witch or heretic was normally required to wear a tall pointy white hat or bonnet (not dissimilar to those of the white Magi) as they were led onto an open air dais surrounded by the assembled citizenry.¹⁰⁹⁷ Paintings by Goya and Berruguete are just some of those showing the continuation of this Mediaeval practice even as late as the late 1700’s AD.¹⁰⁹⁸ Those who had been convicted of “Crimes against the Faith” were collectively stood atop a platform, and each permitted to have their say.¹⁰⁹⁸ They had basically two options. To recant their “error” in matters of faith, or to continue to adhere to a belief in the “heresy” or witch rites. Again, as mentioned, those who chose to admit that they had done “wrong” and turned their back on the “falsehood” that they had so long adhered to were permitted to leave, having been fully acquitted by their own recantation.¹⁰⁹⁸ Those who refused to abjure, descended the dais into the custody of militia, who then escorted them to the place of their execution (if this had been their second offense of that nature), or back to the dungeons for further attempts to convert them (if it had been the first occasion that their “crime” had come to the attention of the authorities).¹⁰⁹⁹

Since witch trials were such a public affair, are we expected to believe, as many scholars tell us, that up to 150,000 people felt shy about denouncing a fictitious black god that they didn’t really believe in, and chose to be strangled or burned to death at the stake for a non-existent faith, rather than recant what many scholars see as a petty or worthless belief? Would they have wanted to die for what scholars have been saying was a fictional or illusory religion rather than make a painless and simple admission of their guilt, and a recantation in the freedom of a public forum - then walk off scot-free? This was the very thing that would have saved their lives!

Are we expected to believe that they forsook their own lives, and in some cases endured torture (which for some clerics was aimed not so much at cruelty, but at making the prisoner renounce their “error”) if, in the coven members’ minds, witchcraft was nothing other than a fabrication, a farce and a fantasy? No, for the witches at least, the Black God was very real, and worth being martyred for I might add.

5 *Witchcraft was an imaginary offense, a trumped-up charge diverted to sinister ends, and used to persecute medieval feminists, or anyone else who disagreed with the Church apparatus in any particular matter.*

If witchcraft was a Church contrivance, as some scholars have claimed, then why was there any need to get rid of trouble makers and dissenters by inventing a supposedly fictitious event, a phoney category of crime, when they could have been “railroaded” on a whole range of other crimes, which would also have attracted the same penalties of death or imprisonment? Why was there a need to compromise the entire legal system by inventing non-existent crimes? Why are acquittal rates so high in many areas? Surely if there was a judicial conspiracy at work there would have had even bigger body counts.

6 *If the witches were the survival of an ancient pagan religion, then how is it that they were absent in any great numbers in Western Europe in the few centuries leading up to the witchcraze of the 14th-15th Centuries AD? If witches were pagans, and they had been there all along, why was there such a large time lag between the end of the pagan era and the emergence of the witches?*

It is my belief that scholars who have adopted this stance have not looked at the available evidence dating to before the 13th and 14th Centuries, or abandoned it as untrustworthy. Sadly few writers, such as Adam, turned their hand to writing about these issues in the 10th-11th Centuries AD, so their works are often all we have to rely on. Others may have been written, but did not survive the past 1,000 years. The truth of the matter is that records of criminal trials were hardly ever made at the beginning of the Middle Ages, hence historians have little or nothing to work with during the early Mediaeval period of witch activity in Europe

In 572 AD deacon Peter (who served at Alais, where there were once many Gothic parishes) was tried before St Nicetius on the charge of murdering Bishop Sylvester by magic.¹¹⁰⁰ Having taken an oath of innocence before the assembled laity and clerics he was exonerated of complicity and freed. But the deceased's son's anger was not assuaged by the verdict, and so he slew Peter down some alleyway in 574 AD.¹¹⁰⁰ This was, as it were, a sorcery trial, a trial of black magic, and the proceedings were recorded only in the briefest possible terms. We know nothing of the statements tendered by the prosecution and defence, only the outcome. For all intents and purposes this was a 6th Century AD witch trial, though not so named.

Our next problem is that historical documentation on witch trials, when it was made, was often destroyed (like so many of the forbidden books) sometime thereafter. So we have the non-existence of a written account, which some will say weighs heavily against an earlier wave of witch persecution, during which historically unverifiable trials were held. Consider what Adam of Bremen said;

"In fact they say, he (King Olaf Tryggvason (whose personal standard was a black serpent of a white background)) was also given to the practice of the magic art and supported as his household companions all the magicians, with whom that land was overrun, and, deceived by their error, perished".¹¹⁰¹

Other stories quite contrary to this were in circulation about King Olaf, which Adam also included.

"They say that among other virtuous characteristics of his was a great zeal for God, so that he routed out the magicians from the land. Although all barbarism overflows with their number, the Norwegian land in particular was full of these monsters. For soothsayers and augurs and sorcerers and enchanters and other satellites of Antichrist live where by their deceptions and wonders they may hold unhappy souls up for mockery by the demons".¹¹⁰²

At length they say, the most blessed King Olaf was driven from the throne of Norway by a rebellion of the nobles whose wives he had apprehended for sorcery".¹¹⁰³

The last two quotes are in accord with what *St Olav's Saga* says about Tryggvason. In *Olav's Saga* we find that mass witch burnings had occurred as early as the close of the 10th Century AD, for it was then that the Christian King Olaf Tryggvason seized the moment at the Thing assembly at Tunsberg, Norway, demanding that all the sorcerers *and* witches be expelled from his lands.¹¹⁰⁴ Wherefore he conducted a search for all persons known to be involved in the arts, who were then brought to his hall. There, amid a lavish feast which he had prepared for them, he set the building ablaze, burning to death all but one, who escaped and went into hiding.¹¹⁰⁴ This macabre event went undocumented; there was no trial held in their defence, nor do we even know how many perished.

Admittedly Adam of Bremen was reporting what others (who he does not identify) had told him regarding King Olaf Tryggvason, who died about the year 1,000 AD, and this is probably the main reason for divergent stories about his behaviour. Adam reckoned that Norway was fairly overflowing with magicians; but this was some 484 years earlier than Pope Innocent's 1484 AD mobilisation against the witches of Germany. Scholars such as Gwyn Jones disregard Adam's references as unreliable, perhaps because Adam did make some obvious errors in some instances where he was understandably credulous of inaccurate testimonies and stories supplied to him about the surrounding nations. But some of these informants were reigning monarchs, and therefore individuals with a better than average understanding of what was happening in their respective domains.

Anti-pagan zeal is unlikely to have coloured Adam’s mention of sorcerers, in fact he did not include his own opinions about them in these extracts. Adam did not want to slander the pagans, just simply report what appears to have been occurring in nearby lands. There are a number of instances where he referred to the Slav pagans in benign terms, even though they had been ravaging the Holy Roman Empire.

Lastly although Olaf’s affiliations with the magicians appear to be the subject of contradictory reports, the presence of manifold magicians appears to be a common thread. Yes, witches were present in Western Europe, the Baltic and Scandinavia, perhaps in vastly reduced numbers, or in some cases even in large numbers between the 8th and 10th Centuries AD, if sources are acceptable. *Malleus Maleficarum* specifically stated that witches had always been present in what is now Germany. From what accounts I have read, it appears to me that the number of witches in Europe began to increase steadily between the 10th-13th Centuries, but by the 14th Centuries the influx had reached endemic proportions, perhaps indicating that many were arriving in Europe from elsewhere. Icelandic law might provide a reason for large-scale movements of witches, after the 12th Century in particular.

Mediaeval Icelandic juries (twelve in number) were to try cases involving sorcery. “If someone uses spells or witchcraft or magic ... the penalty is lesser outlawry”, and “If a man practices black sorcery, the penalty for that is full outlawry”.¹¹⁰⁵ For legal purposes Icelanders classified sorcery as maleficia if “through his words or his magic a man brings about the sickness or death of livestock or people”.¹¹⁰⁵ These laws were first committed to writing in 1117 AD. It is therefore an acknowledgement that witch trials, for want of a better term, were being carried out in early 12th Century Iceland. Whomsoever was found guilty of black magic could not expect to be treated any differently from any other full outlaw. They were to be banished. A light sentence one might guess, but it was everyone’s civic duty to kill a banished fugitive on sight if they were encountered after their sentencing. The smartest thing a convicted Icelandic sorcerer or witch could do was head to sea, set foot in a new country, and start a new life.

If there had originally been magicians in Europe, why did they diminish in number? It is my guess the bulk of the white and black witches probably left Western Europe moving eastward or northward in the wake of Charlemagne’s brutal missionary activities among the Franks, and yet others stayed put in Western Europe confining their pagan religious activities to customs which did not attract the death penalty. But if Western European witches had been displaced and gone to live among the Slavs and Balts, then why did witches later choose to move out of Russia, the Baltic, Poland, and Bulgaria and back into Europe during the 12th-14th Centuries AD? This is the million dollar question which will help us understand the factors which led to the witch explosion. I believe there are several possibilities for their emergence;

a. A CHANGE IN THE WAY WITCH TRIALS WERE CONDUCTED

Norman Cohn explains that the rise of western witch trials during the 16-17-18th Centuries was attributable to the abandonment of the old Talion legal system in western Europe.¹¹⁰⁶ The Talion was a penalty inflicted on whomsoever brought false and vexatious charges against a person. If you could not prove the charges levelled at the accused then you might even forfeit your life, or be sent to the galleys in Mediaeval Italy. Accordingly malicious litigation was only infrequently entered into prior to the 16th Century AD, because it was just too risky.¹¹⁰⁶ With a freeing up of the legal system, the witches that had always been present now became liable for prosecution on an ever increasing basis, giving the impression that there was a sudden increase in their number. Some believe the ability to submit anonymous accusations helped things along. During the 1500’s, in places such as Venice, denunciation boxes became a feature of the Inquisition, and are still to be found there. These drop-off points allowed citizens to make allegations against supposed witches and heretics, and are testimony to the freedom that people experienced when making such accusations.

While allowing for anonymous accusations, at no stage did the Holy Office permit witnesses to entirely avoid the investigation process. In the inquisitorial text *Sacro Arsenale* of 1653 Masini wrote “since we do not inform him who the accusers are, it is necessary that the evidence for conviction be absolutely clear and beyond doubt”.¹¹⁰⁷ While it seems unfair that a defendant’s accuser remained anonymous, there was a specific reason for it. Once detained the defendant was required to list all of their local and family enemies, and whomsoever bore grudges against them.¹¹⁰⁷ If the person was a witch then more than likely they would have vexed many of those they listed. If few of them had been hexed by the suspect then the person was less likely to have been an active witch.¹¹⁰⁷ Rather than give a list of false names to throw the inquisitors off their trail, it was in the defendant’s best interests to be as accurate as possible, even if they

CHANGES TO LEGAL
PROCEDURES MADE IT
EASIER TO MAKE
ALLEGATIONS OF
WITCHCRAFT

THE ACCUSED WAS NOT
TOLD THE NAME OF
THEIR ANONYMOUS
ACCUSER

were a genuine witch. For if one of the names recorded by the accused matched that of an accuser, the Inquisitors began a lengthy inquiry into the possibility of slanderous false witness on the part of the accuser/s. By listing the name of a personal enemy, the defendant could cast aspersions on the veracity of the accuser, thereby helping their case.

WHEN PAGANS WERE AT
THERE MOST NUMEROUS
NO TRIAL DOCUMENTS
WERE KEPT

b. WITCHES DID EXIST DURING THE EARLY MEDIAEVAL PERIOD, AND EVEN BEFORE THAT, BUT DUE TO A LACK OF SURVIVING LEGAL DOCUMENTATION FROM THOSE TIMES, THERE APPEARS TO BE LITTLE EVIDENCE FOR IT ON ANY SCALE. Witch trials shall ever remain a paradox for researchers, for when pagans were at their most numerous, very little documentation was kept; indeed it was not required by law. It was only 500 to 700 years later, after paganism had undergone substantial devolution, that legal documentation became commonplace in many areas. Accordingly witchcraft, whether real or imagined could only ever have appeared in trial documents from the 15th Century AD onwards.

I will now briefly examine witch trial methodology in mediaeval Scandinavia and Russia, and the Holy Roman Empire prior to the late Middle Ages. Charlemagne's *Laws for Saxony* ensured that recalcitrant pagans among the newly converted Saxons would be slain for continuing heathen rites. One might guess that a considerable number were put to death during the 9th Century, pursuant to these laws. Yet, to the best of my knowledge, there is no documentation to speak of. Clearly the absence of documentation does not prove the absence of witches and pagans in Saxony. However the existence of anti-witchcraft laws for Saxony indicate they did exist, but that statistics and details were never kept. Why draft legislation to combat a non-existent practice?

PAGANS HAD NO RIGHTS
UNDER CHRISTIAN LAW

In Early Mediaeval Russia and Scandinavia heathens had no rights under the law. The same goes for Islamic countries where infidels derive no benefit from Islamic law, and where, from time to time Muslims killed non-believers with total impunity. *In Christian Europe if you were not baptised you automatically lost your case.* There was no need for a trial of any kind, whether for witchcraft, or any other crime. Sweden first recorded their laws in the mid-14th Century.¹¹⁰⁸ Here the absence of written records is the everlasting bane of folklorists and mediaeval researchers seeking to trace back customs which appear to have originated during the Middle Ages.¹¹⁰⁸ Obviously they had laws against witchcraft on the Danish peninsula, and in Sweden, so they must have had trials. *The non-presence of trial documentation is not proof that trials never took place,* but simply that they were not written about, or that the documents have subsequently been lost or destroyed (intentionally or accidentally). *This is a major point,* one that cannot be stressed enough. Does the proliferation of witch trial documentation in the 16th-18th centuries indicate that witchcraft only began in the 16th-18th Centuries? Many scholars have tried to push this line of thought, but it is fundamentally incorrect.

HOW COULD THERE BE A
TRIAL?

The prosecution of witches was an inherent part of Sweden's first recorded legal process, though by definition criminal witchcraft only applied to cases of maleficia, that is, where a person or cow had been maimed or killed by black magic.¹¹⁰⁹ The same can be said for Danish Church laws (posted around 1170) who applied the same definition. These Danish laws predate those of the 13th Century secular courts in Jutland, so presumably cases concerning death magic were only heard by an ecclesiastical judge or panel prior to 1241 AD.¹¹⁰⁹ Not until the 1400's did *secular* Danish legal codes contain provisions for trying witches.¹¹⁰⁹ Thus prior to that time, the Danish witch trial was a Church matter, not secular. More often than not a pagan witch was not a baptised Christian, and therefore they instantly lost their case, hence no need for a trial and no need for documentation. History would never remember these cases. If laws against witches were in place from the first, then it is certain that witches had been there too, hence the need for the law. References to sorcerers repeatedly appear in the Sagas, and in the writings of Adam of Bremen, which date to between the 10th and 12th Centuries AD, up to 400 years earlier than the first promulgated Swedish anti-witch laws. But during this 400-year stretch what happened to witches? Well we simply don't know. Many writers negate the implications of this, the witch phenomenon's most hazy period, by insinuating that there were no sorcerers around the 10th Century. Any reference to them was made by monks or people who had received Christian schooling, and therefore they were lies, untruths, plain and simple.

ANTI-WITCHCRAFT LAWS,
BUT NO COURT
TRANSCRIPTS

But below we will examine what I believe was their most likely fate, in that time when records were neither made nor kept.

SWEDEN'S FIRST
RECORDED LAWS
INCLUDED ARTICLES
AGAINST WITCHCRAFT

To achieve a conviction a witch had to be caught performing the act.¹¹¹⁰ Once the crime was established, and the offender convicted, the laws of Sweden in the 1300's demanded that the guilty party be subjected to the retribution of the deceased victim's family.¹¹¹⁰ This penalty probably reflects a more ancient pagan tradition for the punishment

ORIGINALLY A WITCH
HAD TO BE CAUGHT IN
THE ACT

and lynching of witches and other serious criminals.¹¹¹⁰

Having been sentenced the offender was turned loose, and probably gathered their possessions for a speedy flight to some other district. They knew full well that a vigilante posse would be hot on their trail any time soon, if not immediately. They might not even have had time to make preparations for a quick departure, cornered on their way home from the place of sentencing and put to death by vengeful and irate relatives.

One of the earliest recorded precedents for kinsmen taking vengeance on magicians exists in the Russian *Primary Chronicle*, relating to events of the year 1071 AD. Following an incident at Beloozero, during which the Yaroslavl sorcerers killed many women, one of Svyatoslav II's tax collectors headed out after them in company with a Christian priest.¹¹¹¹ After prolonged chase, and a hand to hand engagement with the magicians and their supporters (during which the priest was slain), the prince's agent, Yan, eventually took them into custody. After a theological sermon by the sorcerers, who declared themselves worshippers of a demon called the Antichrist, they went on to demand to see the Prince himself, presumably to receive a trial before him.¹¹¹¹ They said Yan had no right of jurisdiction over them.¹¹¹¹ Yan disagreed. His response was to have them beaten and tortured in the field, ordering their beards excruciatingly plucked out.¹¹¹¹ Following this they were gagged (perhaps so they could not utter spells) and bundled into the first of two boats. Next both vessels set off downriver, to where the river Sheksna opens, all the while Yan kept the sorcerers' boat a safe distance in front. Having reached that point Yan turned to the locals who had assisted him in capturing the magicians and said:

"Has any relative of any one of you been killed by these men?" A few of them replied they had lost family in the incident. "So Yan ordered them to avenge their kinsfolk. They then seized and killed the magicians, whom they hanged upon an oak tree".¹¹¹²

This was no doubt a practical manifestation of *Article 1* of the Russian Mediaeval law code, the *Russkaya Pravda*, itself based on earlier pre-Christian law. While the *Russkaya Pravda* does not expressly mention a penalty for witchcraft, this article prescribes that *the aggrieved family is obligated to take vengeance on anyone who has killed a member of their family, by whatever means.*¹¹¹³

Barring the seemingly ridiculous comment about the Antichrist (for which a possibly valid explanation has already been fielded), the remainder of the Chronicle entry seems perfectly feasible and logical. There was no trial under these circumstances. They had captured the offenders, they were so to speak "guilty"; all that remained was to pass sentence using vigilante justice not unlike that portrayed in the 'western' movie "Hang 'em High". Doubtless to say that "kangaroo-court" procedures of this kind were open to the worst imaginable abuses. The *Pravda* does not delegate to tax collectors the role of Justicier in frontier locales, but evidently Yan took it upon himself to act as one. That is not to say that these were unlawful proceedings. After all, the *Russkaya Pravda* was simply a list of articles composed to clarify new additions and amendments to the pre-existing heathen law codes, which were already known, and did not need to be recorded within the body of the *Russkaya Pravda*. It is therefore plausible, but by no means certain, that an officer of the prince could act as a judge, if circumstances so dictated.

By Maksimov's reckoning 18th and 19th Century Russian witches had lost any understanding of exactly where their kind (their bloodline), had originated.¹¹¹⁴ Evidently witchcraft had fallen into a disorganised and degenerate state compared to what it once had been, and their numbers dwindled.

Throughout Mediaeval Russia it was customary for folk to inflict cruel reprisals against local witches and sorcerers. For example, during the first half of the 1400's some twelve witches were burned alive at Pskov. Due to the unregulated, extra-judicial nature of anti-witch proceedings in Russia it is impossible to arrive at a realistic figure for the number of persons killed there for using witchcraft on their neighbours, whether truly or falsely.

Even so the Middle Ages saw the emergence of more enlightened Church fathers in Russia, who tried to stem the tide of the time-worn witch-hunting practices that permeated their society. But in that unforgiving time these particular clerics stood little chance of gaining receptive ears, and largely failed to make an impression.

Foremost among them was Bishop Serapion of Suzdal, who pitted himself against his society's customary readiness to ascribe misfortune and calamities to witchcraft. He said *"All of you are still captivated by the pagan arts of the Volkhvy (ie; Magi) ... believe me, you are burning innocent people!"*¹¹¹⁵ From his comments it is more than clear Serapion did not believe in the existence of either witches or witchcraft. Innocent souls were being superstitiously held

A RUSSIAN BISHOP
TRIES TO STOP PEOPLE
BURNING WITCHES. HE
CONNECTS THE
PRACTICE WITH THE
OLD FAITH

- accountable for the misfortunes of other people, and died accordingly. Serapion's encyclical is significant in that it not only connects witchcraft to the Magi, but witch hunting also. The Frankish *Capitulary for Saxony* tell us much the same thing.¹¹¹⁶
- WITCH BURNINGS IN RUSSIA It was by god's laws that the Russians handed down the death penalty, for those convicted of witchery on the basis of witness' testimonies. They could expect to be dunked in water and burned. During the reign of Tsar' Alexei, one Olena was condemned as a heretic and subsequently incinerated at the stake, together with her many magic books, roots and herbs. She was convicted not only for harming individuals with her artifices, but for healing a number of others with her special remedies. In 1674 we hear that the wife of one Theodosius was burned to death for witchcraft. In 1730 the Russian senate saw fit to highlight an existing edict regarding the witchcraft laws, which demanded death by fire for those so convicted.¹¹¹⁷ This grim reminder no doubt arose in response to an increased presence of sorcery and witchcraft in the wider Russian community. In 1779 a bishop reported the emergence of sorcerers and magicians of both genders, who were turning the faithful away from the Orthodox faith, and allegedly infecting many people with illnesses by means of certain worms.¹¹¹⁸ They dragged the sorcerers in front of the senate, accused of renouncing the Christian faith, and pacts forsworn to the devil who gave them the worms.¹¹¹⁸ Having heard what the sorcerers had to say, the Senate referred the matter to the jurisdiction of the civil court system.
- A NORSE SORCERER ACCUSED OF WITCHERY Such was the newer and more civilised means of dealing with witchcraft: taking it out of the village neighbourhoods, and bringing it into the better regulated secular court system. The same intricate web of local family-reprisals that we find previously mentioned in Russia was also active in pre-Christian Scandinavia, as is evidenced by the Norse *Laxdaela Saga*. Kotkel and his family;
- KOTKEL SLAYS HIS ACCUSER WITH STORM MAGIC *"were making life unbearable with their thieving and sorcery, and enjoyed the protection of Hallstein the (pagan) Priest"*.¹¹¹⁹
- EVERYONE WANTED KOTKEL'S BLOOD FOR THIS In retaliation for a raid on his farm, Kotkel recited magical songs atop a specially prepared platform, which had the effect of raising a storm, to sink Thord's vessel, for daring to formally accuse him of witchcraft. Consequently both Thord and his crew were drowned as the ship sank.¹¹²⁰
- THREATS WERE MADE TO HAVE HIM LEAVE THE AREA, OR THE LOCALS WOULD KILL HIM AND HIS FAMILY *"Everyone felt that death was the only proper end for people who performed the kind of sorcery that Kotkel and his family had done"*.¹¹²¹
- KOTKEL'S ASSOCIATE HEXES THE COUNTRY SIDE Here Kotkel and his kin were judged guilty by community consensus; not by any legal gathering. Oddleifsson gave the area's priest an ultimatum, *"sending the sorcerers away, or else, he said, he would kill them"*.¹¹²¹ And so Kotkel's family moved to a new residence in Laxriverdale. From the very moment of their arrival the local folk were keen to kill them, within at least three years, it was hoped. And so the cycle of trouble raised up once more. Kotkel was seen making magical chants by a number of people. After his witchery laid low Kari, son of Hrut,
- HE WAS BASHED TO DEATH *"Olaf said that Kotkel and his wife and sons must be put to death immediately - "however belatedly"*.¹¹²²
- THE COURTS HOPED TO REGULATE THE PROSECUTION OF WITCHES So an avenging mob killed them all, then placed Kotkel's body under a pile of stones, known ever after as "the Devil's cairn".¹¹²² The outlawed fugitive sorcerer Stigandi remained at large after Kotkel's death, and was suspected of causing a loss of sheep's milk throughout Hundadale.¹¹²³ They tracked him down and captured him with a view to killing him. To prevent Stigandi from hexing the surrounding country side with his evil eye,
- "they took out a bag and pulled it over his head"*. But *"there was a tear in the bag, and Stigandi could glimpse the hillside .. it was a fine stretch of land, rich with grass; but suddenly it was as if a whirlwind came and turned the whole sward upside down, so that no grass has ever grown there since"*.¹¹²³
- This outlaw was bludgeoned to death with stones, thereby ridding the area of his worrisome activities.¹¹²³ A realisation that such loose procedures had inherent shortcomings may have convinced the Swedes to implement a more formal, more centralised procedure for sentencing witches. This new system was introduced around 1350 AD. Now witches were to be judged by a bishop's court, and amendments were made expanding the list of witch crimes to include any form of black magic.¹¹²⁴ References to witches having to be caught red handed were omitted,¹¹²⁴ so this may signal a venture into newer legal territory, where a range of other proofs and verbose

arguments could be tendered before the court. Although death magic still remained a capital offense, harm-working sorcery was only finable.¹¹²⁴ Still, extensive court transcripts were not made during this period.

So paradoxically, the time frame for the Christianisation of early Medieval Europe coincides with a lack documentation. Because trial records were rarely kept or made, we will never be able to calculate the number of pagan Saxons slaughtered pursuant to Charlemagne's *Capitulary for Saxony*, their names, their sex, or their offense.

Many were lost in seemingly endless battles with the Franks, though a lack of casualty records prevents us from establishing even a crude figure for those killed in action. At one point we even hear of 4,000 being executed for their part in an uprising against the Emperor.¹¹²⁵ There are no names mentioned, just an isolated, off-the-cuff remark about the body count. Nor will we know how many pagan Prussians and Balts were killed during the Northern Crusades. We will never know the names of the many sorcerers burned to death in a feast hall at the command of King Olav Trygvasson. These countless executions took place long before the alleged beginning of the witch trials during the Renaissance. They also had the effect of multiplying the true number of people slain for the arts by a considerable degree; numbers we'll never know.

c. INITIALLY THE WITCHES DID NOT EXIST IN EUROPE IN ANY QUANTITY, BUT THEIR NUMBERS BEGAN TO SWELL AS MORE OF THEIR KIND BEGAN MIGRATING INTO WESTERN EUROPE FROM THE 14TH CENTURY AD ONWARDS;

I THE ARRIVAL OF ZOROASTRIANS IN RUS'.

In ancient times white Magian vigilantes pursued the devil-worshipping black Magi, seeking to exterminate them at every turn. The arrival in Rus' of "white" Orthodox Zoroastrians fleeing the Muslims and Turks in Central Asia might have prompted the black Magi of Slavia to seek safer territory. These Zoroastrians would have been as keen as the Church authorities to expel or eliminate this more archaic wave of devil-worshipping Magi.

II THE ARRIVAL OF THE GOLDEN HORDE.

Perhaps the Mongol overlords made life difficult for the Magi and Chaldeans then living in Russia. Certainly they were responsible for destroying the Chaldean temples at Harran, so why not harass the Russian *Koldumy*?

III THE CAMPAIGNING OF THE TEUTONIC KNIGHTS IN THE BALTIC.

Magicians, necromancers and soothsayers were fairly commonplace throughout the Baltic region according to Adam of Bremen. Many resided in Latvia, and the lands of the Ests which was formerly known as Askala (the realm of wizards). But all this changed during the 13th Century, with the Teutonic Knights undertaking anti-pagan crusades there.¹¹²⁶ This might have dislodged large pockets of pagan sorcerers and witches, compelling them to move further afield. It is also possible that many Germans and Saxon occupation troops might have interbred with the local inhabitants and brought forbidden, long eradicated heathen customs back into Germany once they returned home from the anti-pagan Baltic Crusades.

III THE BALKAN ANTI-HERESY CAMPAIGNS.

At the beginning of the 12th century the Byzantine Emperor declared open season on the colony of Paulician Magian-Christian heretics then inhabiting the Balkans together with Massalians, Bogomils and similar neo-Manichaeen cults. One can only guess how swollen the Paulicians had become by the 12th Century. No doubt interbreeding would have substantially increased the original population of 200,000 forcibly repatriated there in the 10th Century. As the war intensified many Paulicians evaded his onslaught by slipping out the back way and migrating into 12th Century Austria, Germany, Bavaria, Bohemia in sizeable numbers.

IV THE OLD FAITH WAS BEGINNING TO REORGANISE AND REGROUP UNDER THE INFLUENCE OF A MAJOR PAGAN RELIGIOUS FIGURE.

By the 15th Century AD, we discover the emergence of a new pagan pontiff in the Baltic states, who in every sense rivalled the Christian Pope and the Patriarchs of the East. This might also be tied in with the myth of Prester John, and the migration of his Magian nation from the inhospitably cold Ural mountains into a Europe that he promised to invade.

MUSLIM REPRISALS

V MUSLIM REPRISALS AGAINST THE DUALIST CULTS OF THE ISLAMIC EAST

Norman Cohen has erred when he stated witches were an exclusively western Catholic phenomenon. The truth of the matter is that throughout the Middle Ages the Abassid Caliphate was riddled with dualist heretics and sorcerers, some of whom professing doctrines that accommodated formal ritualised devil worship for a variety of reasons. Eastern dualists were composed of Manichees (including a number of offshoot sects), Paulicians, Marcionites, Mazdakites, Magi, Gnostics, Greek philosophers, the so-called Nabataeans and Chaldean sorcerers. Mediaeval Muslims were fairly tolerant of Jews and Eastern Christians or anyone that was part of a faith sanctioned by the Koran (as long as they didn't start trying to convert Muslims from Islam). Many dualists did not fall into this category however, though for the most part the Abassids ignored the existence of the average dualist hearer, and chose to pursue and execute the perfecti or priests of these religions. Some of the dualists were extremely well organised, and shut themselves up in remote, heavily fortified enclaves which the Muslims could not penetrate. Accordingly the few dualist priests that did survive continued practicing their faith for a very long period unmolested. Dualist migrations into Europe probably coincided with periods during which Islamic authorities made reprisals against them and their priests.

VI TO HELP FULFILL A DIVINE/INFERNAL PROPHECY

"And when the thousand years are expired, Satan shall be loosed out of his prison (in the Abyss). And shall go out to deceive the nations which are in the four quarters of the earth, Gog and Magog, to gather them together for battle: the number of whom is as the sand of the sea. And they went up on the breadth of the earth, and compassed the camp of the saints about, and the beloved city: and fire came down from God out of heaven, and devoured them".¹¹²⁷

One of the most bizarre and seemingly unlikely reasons of all is that they came to Europe to help fulfil Biblical and Magian apocalyptic prophecy, by bringing the religion of Ahriman (the Antichrist) among the white Magian and Church flocks, and to surround of the camp of the Saints, namely the Churches of Rome and Constantinople. This would have been to bring about the creation of the much-portedend reign of the Antichrist, a Kingdom of Chaos beginning at the end of the first millennium AD, that would see much war, destruction, pestilence, and apostasy, as well as widespread ecological and social disaster.

A quote was provided earlier in this chapter detailing one witch's professed belief that he was participating in the erection of Satan's kingdom on earth. Potential evidence for 'Luciferian' missionary activity in the shadow of the Church has already been presented.

VII THE BLACK DEATH

The 13th Century Black death resulted in severe social disturbance and population dislocations. The movement of refugees, including sorcerers, between European nations by land is under-documented. There was plenty of opportunities to accuse prospective witches of bringing on plagues with black magic under such circumstances. This social group was more likely than others to take flight if they were being harassed by local townsfolk.

VIII DURING THE 13TH-14TH CENTURIES THE RUSSIAN ORTHODOX CHURCH HAD BECOME INCREASINGLY ADVENTUROUS IN THEIR PHYSICAL AND THEOLOGICAL ATTACKS ON THE PAGAN PRIESTHOOD AND SORCERERS. THIS SAW AN INCREASE IN THE SEVERITY OF SECULAR PENALTIES FOR THE CRIMES OF WITCHCRAFT AND "HERESY".

Another reason for the European migrations of eastern witches and sorcerers was a change in the Russian Orthodox Church's attitude towards them, which saw the clergy turn up the heat on "black" heretics, who were engaging in worship of the horned god. Perhaps witches and heretics were treated much more harshly in Rus' than in 12th Century Germany, some 400 years after its conversion.

To give you an even better idea of how stern and unrelenting the Russian Orthodox Church's position was in relation to this matter, the Russian priest St Avraamij of Smolensk was threatened with death at the stake by his fellow priests because of his allegedly dubious or borderline preaching methods, which, we might think, had a demi-pagan tinge. Yet, he was never formally tried as a heretic, or even branded as one. If this is the kind of treatment a priest (who was later canonised for his many successes in the conversion of the pagans) could expect for activities which were perceived to be on the edge of acceptability, how much more iron-fisted would they have

CHURCH CRACKDOWNS
ON THE PAGAN PRIESTS
OF EASTERN EUROPE

been to those confirmed to have been performing witchcraft and devil worship?

Since Rus' cities were the only real bastion of the Church among the Eastern Slavs during the Middle Ages, the pagans moved out into the countryside, in every direction, to escape the attention of the authorities, and freely practiced the old faith. Serious missionary work only took place in these areas from the 13th Century AD onwards, when the Church erected frontier monasteries, especially in Finnish zones. These allowed for permanent outposts from which the Russian Church could launch its prolonged presence among people who were still practicing "heathens", not just pagan residue, but true practitioners of the Old Faith.

Seg presto! - History disappears

The greatest problem with modern writers on the subject of witchcraft is they confine themselves to placing history on the psychiatrist's couch and, with white coat, clipboard and pen, only hear what the patient is saying, rarely listening to, or better still understanding the patient. They dare to presume they have the right to act as the judge and censor of history, rather than its examiner.

History cries out to us that many Europeans of the past 500 to 1,500 years actually believed in the existence of magic, and unless one come to grips with this, we remain very far from delving into their minds. For example, a proper and complete analysis of traditional Australian aboriginal life is pointless unless it is examined in the context of mystical beliefs like the 'Dreamtime', perhaps the most important thing they possessed, for in it lay a profound understanding of the world in which they lived. Whether we believe in the dreamtime or not is irrelevant to the study of a people who did. *In examining the witch phenomenon it is imperative that we concern ourselves with what Mediaeval Europeans believed, instead of experimenting with social studies and conspiracy theories.*

The primary Mediaeval sources are studded with ritual inversion and testimonies of the devil as a dog or fly, or masked witches shape-changing into animals, or riding out into the night on the backs of fellow coven members. Some historians believe this is all the more reason to disregard the accounts as stupid, flippant, and unworthy of academic analysis. By adopting this approach many modern witch commentators *have greatly failed us* in the objective study and assessment of witchcraft. What they are doing is like an atheist saying that there is no such thing as Christianity because he believes in neither miracles, nor Christ, nor the efficacy of prayers, lit candles and holy water. Whether one feels that given religious observances harness and yield actual powers or not does not impact on the factual historical existence of that religion. The same could be said about shamanism, Islam, Magianism, Buddhism, Hinduism, animism and so forth. You, the reader, may not adhere to these faiths, but I'm sure it would not lead you to disbelieve the very existence of their organisational infrastructures, holy sites, and religious texts. Yet that is precisely what many witch researchers have tried to do. Very sad.

Immense support for the notion of a clandestine corporation of devil-worshippers comes from the mouths of the witches themselves. On certain points their admissions show some semblance of uniformity across a number of countries. So to counter the harmful impact of these confessions on their theory that witches never existed, some academics saw fit to alienate this damaging evidence by saying that it was merely the product of torture, and largely fake. A certain group of academics specialising in the infamous Spanish Inquisition have advocated differently.¹¹²⁸ Their study of inquisitorial regulations and trials statistics shows that this theory cannot be applied to the witch phenomenon as a whole. Having scrutinised the 350 years worth of archival documentation generated by the Inquisition, they discovered that the Spanish Inquisitors applied torture in only 2.5% of instances!¹¹²⁹ As it rightly points out, the treatment of witches in Germany, France, England and Scandinavia was a lot harsher, and suspects fared rather poorly in these other locations.¹¹²⁹ Even so, we would do well to refrain from commenting on alleged levels of torture until a study as equally comprehensive as the Spanish one has been undertaken in these other countries. This is not going to be easy. For example in Britain witch trial court transcripts were only available for five counties. To accept modern theories that wholesale and widespread torture was standard procedure without there ever having been an empirical study of *all surviving trial accounts*, is not only unscientific, it's gullible. It's like trying to find the most popular brand-names on sale by polling just 10 people. Until a significant statistical sample from all countries involved has occurred, for me anyway, the general level of torture applied to witches elsewhere can only ever remain a question mark. Even so, statistics are available for some countries, and I will present these in a short while. As a matter of fact *there is not even common consensus on the number of witches executed*, with estimates ranging

EUROPEANS ONCE BELIEVED IN MAGIC

RITUAL INVERSION WAS KNOWN

WITCHES THEMSELVES CONFESSED THAT THEY WERE PART OF A BIGGER CULT

SOME SAY THESE STATEMENTS ARE FALSE CONFESSIONS

BUT IN SPAIN ONLY 2.5% OF SUSPECTS WERE TORTURED!

NO AGREED FIGURE FOR THE NUMBER OF WITCHES EXECUTED

from as little as 50,000 through to a ridiculous 9 million. Nothing can more glaringly illustrate the paucity of serious study than this!

In how many instances were prisoners cut short in mid sentence, when they started divulging things the Inquisitor didn't want to hear. I say this in response to Cohn's single account of Inquisitors desisting from recording the confession of a witch once the accused started drifting off into accounts of a witch dressed in snow white robes. He says they were nothing less than carving the witch's confession; he might be right, but then again the priest might have been protecting the interests of a fellow cult member, rather than their mutual enemy the black Witches. Not impossible when you consider one example fielded by Murray in which a witch was acquitted on the basis of the immense good she had performed for her community. White witches were sometimes, if not often viewed differently from black witches. Sure they were irritating, but whether they were to be repressed, and what penalty they would pay varied according to time, place and judicial sensibilities.

Bearing in mind the strict rules in place for the scrutiny of witnesses against witches, how many cases were tossed out of court due to insufficient evidence? What were the motives of torture? Political subterfuge? Since a person walked free by confessing and renouncing their participation in witchcraft, were many instances of torture the Inquisitor's desperate attempt to extract the very confession which would save the accused's life, and more importantly their soul? We have written regulations to this effect.

The Inquisitorial guidebook *Sacro Arsenale* specifically stated that torture enabled confessions, *with the aim of reconciling the sinner with god.*¹¹³⁰ In other words the expressed aim was not so much to inflict cruelty, or sate their desire for vengeance, but to extract a confession from a reticent suspect against whom their was already a burgeoning mass of evidence implicating them in the arts of witchcraft. The text went on to say,

*"It would be iniquitous and against all human and divine law to expose anyone to torment without weighty evidence".*¹¹³¹

Only once the details had been submitted before a panel of six or so legal and theological experts could a decision be made about the suitability and permissibility of torture. In borderline cases a pronouncement was required from Rome as to whether a confession could be extracted by torture.

Or were the Inquisitions, as some have claimed, an instrument used to seditiously forge a sub-human picture of the witch using fictional, contrived evidence, and by soliciting certain answers that followed a *standard formula* which the Inquisitors dished up to the accused ('now repeat after me' , etc). They maintain that the Inquisition could then be used as a tool of state, where nefarious clergy could indiscriminately slaughter whomever opposed them. In the light of so little systematic study, this last view is an absolute disgrace, and very unscholarly. Sure show-trials are not unknown throughout history (eg; Macarthyism, the Stalinist purges), and no doubt would have taken place in an unknown number of witch trials. But certain academics *theorise* that alternative power-seeking motives were at work, and automatically default to the *universality* and totality of this conspiracy motive. And what is even worse, they then go on to employ that theory to *vindicate stuffing the primary historical evidence, those priceless documents, into the dustbin of history.* This is not only irresponsible, but *very scary.* Doing this to the primary sources is like someone 500 years hence "exposing" the filmed images of naked Jews running to their deaths in Nazi pit graves, or allied bulldozers piling the emaciated corpses of the liberated Belsen camp, as a cruel hoax, and having people believe that. Just as Jews died in WW II precisely *because they were Jews,* the fact remains, very many people died during the 12th-16th Centuries AD for the "crime" of witchcraft. And yet, we are expected to believe that (by some estimates) in excess of 150,000 people died without some underlying cause (perceived or real) besides the Church's attempts to create a powerful mind control tool! And I am not by any means insinuating that there was one single cause; life just isn't that simple. Was it all a fantasy, a sham, an imagination? Come now! Whatever the underlying causes of the witchcraft, be it schizophrenia, exotic mental illnesses, a vivid imagination, or diverse ancient cults, including the black Magi (the existence of which has been illustrated in this book), superstition or, more likely, a combination of all of the above, we must never erase history. We would do well to remember that in the minds of most Mediaeval folk, theirs was an era of magic and miracles. *This can be the only sane conclusion emanating from the historical record.*

I have no qualms whatsoever drawing on the firsthand data put forward by Summers and Murray because their work differs from many others on one major point. They preferred to present the data unabridged, rather than

TORTURE WAS ONLY TO
BE USED WHERE THE CASE
AGAINST A SUSPECT WAS
OVERWHELMING

IT HAD TO BE
AUTHORISED BY A LEGAL
PANEL

SHOW TRIALS

COURT TRANSCRIPTS
SEEN AS A WASTE OF TIME

drift off into lengthy opinion and commentary, which needs little reference to primary source material. Commentaries are one thing (and very necessary), but transcribing data from the past accounts, word for word (if you have access to it), is just about one of the most important things that a historian can ever do. This is a significant deviation from the work of many other authors who condemn the factuality of Mediaeval witch cults using attitudes better left to feminist lobbyists, social theorists and psychologists, than historians. I found Murray's work particularly helpful in that it preserved the finer "superstitious" details, primary sources which clearly show that in very many cases Satan was a *man-God* dressed as the horned-god, or little treasures like besoms and ash branches which, as you will have read in Part I, were integrally linked with the rituals of the white Magi.

I have noted a dearth of published first-hand accounts (confessions, witnesses, accusations etc) from the earliest years of the witch cults in Europe, when the first witches spearheaded the witch-explosion, that particularly mobilised during the 13th Century. This is an extremely important phase in the history of the witches. I think there needs to be more work done in this area, not just more commentary and opinion. There should be an emphasis on the translation of court transcripts and other civil documentation on the witches, from both western and eastern European sources, and from Arab documentation in the Middle East, Asia Minor and Central Asia. Nonetheless, in what accounts we do have, there can be little doubt that the witches were tied in with the pagan rites of old ... Jews, Saxons, Germans, Scandinavians, Slavs, and Celts were all supposedly guilty of it.

Unlike the Roman Catholic Inquisitors and court scribes of Western Europe, Russian Orthodox clergy saw little reason to put pen to paper about the customs of witches. Why should they, when just about everywhere they looked they could find practicing sorcerers who had local parishioners and demi-pagans endlessly knocking at their door looking for remedies, talismans, curses and the like. This scantily recorded Russian literary tradition (which contains precise details that predate by several hundred years demonological beliefs that emerged during the Inquisitions) makes it all the more interesting to find a widespread belief in demons (even specifically named demons) in villages from Arkhangelsk to the Urals and as far south as the Ukraine. From mediaeval documents we know that they believed in demons a thousand years ago, and still do so today. This is without parallel in the modern West. How did such a commonality of demonological beliefs come about without an accompanying literary tradition? The answer comes as no surprise - the highly evolved Russian demonology was spread about by word of mouth; by town and village folk and the large number of practicing witches and wise folk of the countryside.

For all I know there may be an extensive range of witch trial documents in Russia slotted in among other standard court documents, but at no time during the nine to ten years that it has taken me to compile this project have I found a written study on Russian court trial procedures between the Middle Ages and the modern era. If they are available they will need to be scrutinised at length.

Does political correctness have a place in historical studies?

Margaret Murray is not the only scholar to be harangued by those who have adopted a "politically correct" stance in relation to the witches. Montague Summer's translation of the legal tome *Malleus Maleficarum* comes in for a real dressing down by proponents of the "witchcraft never existed" camp. It is variously attacked on the basis of him being a committed Roman Catholic priest, or a notorious Satanist, depending on who you want to believe, or as being a conglomeration of superstitions and old wives tales. In no way do the "witches never existed" faction succeed in denouncing his scholarship or translating skills. After all, being a pre-Vatican II Roman Catholic priest, he had to know Latin before he could graduate from seminarian to priest. They described him as a fanatic, but his attackers seem equally fanatical in their denunciations. What these people fail to recognise is that his book was a translation of existing copies of the *Malleus* from Latin into English. It was *not a book of commentary or opinion*, but the direct translation of a valuable historical document, perhaps one of the most important in the study of later witch trial methodology in Western Europe. But why are they so caustic in their attacks on Summers' *Malleus*, a translation that to the best of my knowledge has stood the test of time? The answer is they needed to assassinate the historical record in order to allow them to weave their elaborate "politically correct" theories, many of which cannot be sustained when held against the legal framework under which the Inquisitions were supposed to be conducted.

Only after rigidly applying some back-to-basics scholarship can we penetrate this hiatus in objectivity, to gain a clearer picture of what actually happened. The scale of legal abuse that they suggest simply could not have occurred

under the regulations prescribed by *Malleus Maleficarum*, for it shows the stringent legal protocols which were set up to aid the Inquisitors in their work. What they neglect to mention is the *Malleus'* rules for when torture could be applied, and the *intense scrutiny* of witnesses by priests in an attempt to discern whether they were bringing false charges against an innocent person. Ultimately witnesses were sternly warned of impending damnation for calumniating.

SOME INQUISITORS WENT BEYOND WHAT THEY WERE PERMITTED TO DO

The "Hammer of the Witches" was not the only instructional text to be used. For example in Spain, Inquisitors were bound by the framework of the *Instruções - Del Santo Oficio*, a manual issued by Madrid to guide agents of the Holy Office. It provided a comprehensive code of ethics and conduct which Inquisitors were to apply strictly, lest they lose their post. An over-enthusiastic recourse to torture was not countenanced by this manual; likely to get an Inquisitor ingloriously sacked in fact! We don't know how many inquisitors risked their careers for the sake of performing clandestine tortures sessions, lacking any official endorsement whatsoever. I would guess that Inquisitors who best fitted this mould were relatively few. Still, some Inquisitors far transgressed the bounds of what they were permitted to do by virtue of their deputisation to the Holy Office. Upon hearing of Conrad's extrajudicial punishments and executions in Germany, Pope Gregory replied "*We marvel that you allowed legal proceedings of this unprecedented nature to continue for so long .. without acquainting us of what was happening. ... we declare these proceedings null and void ... We cannot permit such misery as you have described*".¹¹³² Though in this case, Conrad surprisingly remained off the leash, as it were, until assassinated by some nobles who were next on his hit list.

By scrutinising the views of the "witchcraft never existed" faction more closely, we uncover a very false view of the trials. By their spurious reckoning the law codes within *Malleus Maleficarum* were *almost never adhered to*, with magistrates and vengeful clergy habitually seeking torture and secular execution as the preferred means of dealing with suspects at every available opportunity.

Cohn matter-of-factly states (providing little or no evidence) that "*Torture was employed, and so ruthlessly that many who refused to make a false confession died under it*".¹¹³³ Sidky is another fan of this theory.¹¹³⁴

Not only does the scale of this alleged abuse run contradictory to *Malleus Maleficarum*, but statistical evidence based on case histories. Even more tragically, Cohn's statement presumes that the aim of the Inquisitions was to illicit false confessions. Consider for a moment archival documentation from the Spanish inquisition depicting prisoners uttering blasphemies to escape the privations of the swollen and famished secular jails; to savour the better upkeep provided in the Inquisitor's cells. This is a very different picture from Cohn's, but we don't know how typical it may have been. Such a scholar insists that the penal codes were almost never observed by the judiciary! I find it absolutely ludicrous to suggest that judges had copies of the *Malleus* at the bench, *but never adhered to the prescribed mechanisms of law* contained in it. This manner of scrutiny, once applied to the witch trials as a whole, led to conclusions so wide of the mark, that it is equivalent to preparing for a moon mission, by sending the crew towards pluto. A brief look at some witch trial statistics verifies this.

ESTONIA 1520-1730

Tried (% M/%F) ¹¹³⁵	Executed (% M/%F) ¹¹³⁵	acquittal rate
205 (57%/28%/ 15% unknown)	65 (40%/45%/15% unknown)	68%
making a person ill or maimed ¹¹³⁶	24%	
killing with death magic ¹¹³⁶	21%	
devil-worship ¹¹³⁶	15%	
harming cattle ¹¹³⁶	12%	
harming person or property while ¹¹³⁶	11%	
in vulpine form		
Witchcraft related theft ¹¹³⁶	6.5%	
blasting fields ¹¹³⁶	2%	
libation desecration ¹¹³⁶	2%	
fire-starting ¹¹³⁶	5%	
TORTURE: Commonplace. ¹¹³⁷		

IN ESTONIA THE CONVICTION RATE WAS NOT ALTERED BY THE USE OF TORTURE TO ANY GREAT DEGREE

CONCLUSION: Most trials involved the indictment of male witches. White magic was not on trial, only maleficia. Eleven percent of indictments were made against shape-changers, not for the act of shape-changing, but for property damaged caused while in an altered state. As you will see, the common use of torture did little to lift the conviction rate.

FINLAND 1520-1690

Tried ¹¹³⁹	Executed ¹¹³⁹	acquittal rate
710	115	84%

FINLAND 1665-1684

Tried (%M/%F) ¹¹³⁹	Executed ¹¹³⁹	acquittal rate
474 (11%/89%)	104 (49%)	78%

TORTURE: Little or none.¹¹⁴⁰

SOCIAL STATUS OF DEFENDANT/ACCUSER ¹¹⁴⁰	DEFENDANT	ACCUSER
lower class	69%	35%
burghers	26%	12%
military, clergy, administrators	4.6%	53%

CONCLUSION: Of the 149 defendants most had little or no property. Half of the accusers were clergy, administrators and, to a much lesser extent, soldiers. The relative absence of torture in Finland when compared with the use of torture in neighbouring Estonia, meant a 10%-16% reduction in the number of Finns who would have been executed had they been tried in Estonia. Some 20% of those convicted escaped execution and received fines or flogging in lieu.¹¹⁴¹

NORWAY 1551-1760

Tried ¹¹⁴²	Executed ¹¹⁴²	acquittal rate
863	280	68%

white magic ¹¹⁴²	33%
making a person ill or maimed ¹¹⁴²	16%
killing with death magic ¹¹⁴²	19%
devil-worship ¹¹⁴²	16%
harming cattle ¹¹⁴²	6%
harming someone's luck ¹¹⁴²	1%
infertility and discord in relationships	1.7%
blasting fields ¹¹⁴²	2.4%
fire-starting ¹¹⁴²	.7%

.8% OF SUSPECTS WERE TRIED AND EXECUTED ON THE BASIS OF INFORMATION EXTRACTED BY TORTURE

TORTURE: Minimal usage.

CONCLUSION: Of the 863 Norwegians tried for witchcraft, torture was used in only 4.6% of cases, and of them only .8% were tortured before the sentence was handed down. In other words, of the 32% convicted and executed only .8% died on the basis of evidence obtained by the use of torture! In other words *torture had practically no impact on the verdicts*. One third of the cases involved white folk magic and charges for shape-changing are absent.

ENGLAND 1570-1700

Tried (M%/F%) ¹¹⁴³	Executed ¹¹⁴³	Acquittal rate
474 (11%/89%)	151	68%

IN ENGLAND 90% OF THOSE ACCUSED WERE WOMEN

TORTURE: ?

MANY RECORDS ARE MISSING THERE

CONCLUSION: Most English trial records no longer extant. These figures are based on Essex, Hertfordshire, Kent, Surrey and Suffolk. Of those convicted, 10% received a year in jail instead of a capital sentence. Almost 90% of the accused were women. The acquittal rate was on par with that of Estonia and Norway, and marginally worse than in Finland.

IRELAND 1580-1582

Tried ¹¹⁴⁴	Executed ¹¹⁴⁴	Acquittal rate
approx 200	3	98.5%

TORTURE: Insufficient details

HUNGARY 1520-1777

43% OF TRIAL DOCUMENTATION IS MISSING IN HUNGARY

Tried ¹¹⁴⁵	Executed ¹¹⁴⁵	acquittal rate
932	449	25%

TORTURE: Insufficient details to gauge its impact.

CONCLUSION: Due to a loss of documentation under Turkish occupation, only 57% of the trial records have survived leaving 43% with unknown trial results. In other words we do not know what happened in 710 cases.

FEW ACCUSED WITCHES ESCAPED DEATH DURING THE HUNGARIAN TRIALS

Nonetheless the Hungarian response was very heavy handed. If we add the 24% acquitted of wrongdoing to the 25% who received imprisonment, fines or lesser penalties, this amounts to only 49% escaping a capital sentence. The comparatively high conviction rate in Hungary is probably due to the absence of a defence counsel in most trials. This was a point of deviation from other European trials. You see defence counsels were another groundbreaking innovation instituted by the Inquisition, who felt that a defendant had a right to an attorney, whereas it was commonplace for civil courts to disallow a defence counsel.¹¹⁴⁶ A further 2.4% of the defendants suicided or were killed in prison, or died at the hand of lynchers. As in England 90% of those indicted and executed were women. Catholic clergy took almost no part in these trials. When combined with the impermissibility of a legal defence counsel, this may account for the lack of restraint displayed by the Hungarian authorities.¹¹⁴⁷ As you have witnessed in the preceding statistics witches in some countries were often female, but not always so.

Seemingly sexist comments hounded the mediaeval witches throughout the centuries that followed,

"it is no matter for wonder that there are more women than men found infected with the heresy of witchcraft. And in consequence of this, it is better called the heresy of witches than of wizards, since the name is taken from the more powerful party. And blessed be the Highest Who has so far preserved the male sex from so great a crime ... therefore He has granted to men this privilege."

MALLEUS MALEFICARUM CONTAINS SEXIST COMMENTS

"three special vices appear to have special dominion over wicked women, namely, infidelity, ambition, and lust. Therefore they are more than others inclined towards witchcraft, who more than others are given to these vices".¹¹⁴⁸

Its hard to avoid commenting on the misogynistic manner in which these passages were presented in the *Malleus*. Some see it as proof that the Church had been unjustly persecuting witches because they were women. Perhaps this was a factor in some cases. But how do we reconcile this with the fact that many European female witches were defended in court by men, and, as revealed by Sharpe, the principle accusers of English female witches were frequently other females. More work needs to be done in this area to statistically determine the number of sexist comments made by the judiciary in the trial documents, as also the sex of the accusers in other countries.

IN ENGLAND WOMEN WERE THE MAIN ACCUSERS OF FEMALE WITCHES

We might also consider that some women were falsely accused of the crime by their husbands and shadowy mistresses hoping to wed them, to get them out of the way for ever. Since remarriage was not permitted in Catholic countries following a divorce, witch accusations could have provided an excellent means of getting rid of the old wife, and gaining community acceptance for the new. But against this supposition it should be noted that this hypothetical practice would have been universal to all Catholic countries, which is not the case. One would also think that wives would have some inkling that their husbands had a mistress, and would have been keen to raise the issue in court where their accusers were somehow connected with the husband or the mistress.

What is more, many witches were lonely elderly women. Obviously they posed little threat to society, and may

have been persecuted owing to folk superstitions which typecast them as devilish hags. On the other hand they might have been lonely old women *because they were witches*. As in the Muslim countries, marrying witches was socially reprehensible, and very risky considering that one's life could be turned upside down at any time if one's spouse was indicted for the arts. Kinsfolk would have done everything in their power to dissuade their menfolk from marrying into families imputed to be inheritors of the old tradition. Nor would clergy be keen to solemnise the marriages of suspected witches. Where actual witches did marry, I venture to guess they wedded men unmindful of public opinion, or men belonging to bloodlines similarly immersed in witchcraft and other long standing pagan traditions. But the very fact that parishes kept genealogical records meant that it would have been difficult for them to conceal a factual family tradition of witchcraft. Thus very few witches would ever be able to have a traditional Church wedding, there was too much against it.

Nonetheless the remarriage theory is still worth looking into, as such a practice might be identifiable where the husband speedily remarried. Yet such incidents may not be indicative of a mistress waiting in the background, waiting to step in the moment the man's wife was executed. There must have been a large number of widowed fathers generated by the execution of their wives. Little attention is paid to the social impact of the witch trials on the lives of these men. Just how did they juggle their work commitments and care for their motherless children at the same time. For some the answer would be to live near relatives, others to slide into dire poverty, and yet others would have re-married as speedily as they could. Some would have abandoned the children, handing them over to relatives or nuns.

Even so, I want to draw parallels between Al-Nadim's comments on the practices of the female Chaldean sorceresses and some of the rites mentioned in trial documentation, not to mention the *Malleus Maleficarum*, which distinctly conform to Chaldean magical theories, such as the invocations of devils, the invocation of the divine name, etc. Since there is some evidence for Chaldean witchcraft in Europe, trial documentation for regions indicting unduly high numbers of female defendants should be scrutinised to see if Chaldean-style sorcery was part of the evidence collected against female suspects. Where there is a statistical correlation between Chaldean features in the evidence, and a preponderance of female suspects, then we can probably identify the accused as Chaldean witches (who were mostly female), and regions where the Chaldean arts were practiced.

The innocent victims

The real reason why some academics considered it imperative to portray the witch trials as an orgy of torture was to eliminate factual, historical data. This gave them the freedom to develop every imaginable theory besides the obvious; that some suspects were actually witches. You see, witches were normally tried on points of proof supplied by their own confession, which may or may not have been obtained by torture. In a yet to be quantified number of trials, witches were convicted and executed because they freely admitted that they had been devil-worshippers, or had practiced witchcraft. Others no doubt were innocent.

However in our search for justice, the law has never proved infallible. In every age (the period of the Inquisitions included) innocent lives have suffered along with the guilty. The likelihood of becoming an innocent victim can be attributed to false incrimination, a case of mistaken identity combined with being in the wrong place at the wrong time, and false confessions, buckling under torture, or where a person directly implicates himself by tendering to the authorities incorrect information or inopportunistically phrased statements.

False witness can also be achieved by means of torture, which some have claimed was a standard feature of the inquisitions, and hence the reason why witch trial evidence should be taken with a grain of salt. Recent research has shown that the right to torture was not abused to the extent that Cohn and others suggested. So it is not possible to make a single definitive statement about the scale of torture other than to say that its frequency depended on the country in which the trial was conducted, and the time frame during which it was held.

Torture

Torture is permanently engrained into our mental images of the Inquisition. Many researchers focus on this aspect of the period, elevating it as the tool of choice for social control, and mercilessly used by royalty and the Church. By this means the fantastical being known as the witch was born, with the guidance of clerical

propagandists of course. One of them, Sidky, attributes the most part of the witch phenomenon to “*the effects of hot pincers and boiling oil on the human physiology, forced confessions, sensational show trials, exemplary punishments, and the sociological functions of torture rooms and executioner blocks*”.¹¹⁴⁹ But what he neglects to consider is trial statistics. We know that torture created some innocent victims, this is irrefutable. But with an average rate of 68% escaping state execution, it’s hard to maintain the conspiracy theory. In fact these statistics indicate that witch trials were, generally speaking, conducted with extreme caution, a great many suspects declared innocent before the law. Therefore we might guess that judges were not overwhelmed by a desire to burn witches at the slightest provocation, and seemed content to give them the benefit of a doubt where the case against them could not be convincingly proven. Such measures were no doubt in place to minimise the likelihood of a wrongful conviction.

ACQUITTAL RATES SHOW
THAT THE JUDICIAL
SYSTEM PROCEEDED WITH
CAUTION IN WITCHCRAFT
TRIALS

However, in matters concerning heresy and witchcraft, the church and secular authorities knew that innocent victims were inevitable, but hoped to curb the number of cases where innocents were indicted, by taking every care assaying the evidence, closely examining witnesses, or indeed the applicability of torture. Still, they didn’t want to avoid punishing the guilty for the sake of a few blameless souls, who, at the end of the day, would certainly end up in heaven, having died a Christ-like death, innocent to the last. Despite this there is evidence that some ecclesiastical and secular officers payed scant regard to the concept of innocent victims. During the attack on the stronghold of the Neo-Manichaeian Cathar heretics at Languedoc France, the order was given *to attack everyone living inside the confines of the castle*. When it was suggested that there may be innocent Catholics in there, the reply was to continue with the operation .. “*God will look after his own*”. Considering that the castle was a bastion of Neo-Manichaeism they might have felt that all its inhabitants were either guilty, or guilty by association, or at the very least tainted by the heresy in question.

Returning to evidence for the impact of torture, we will look to Denmark. In 1522 the new Danish King (Frederick) did away with earlier Church laws, declaring that they should no longer be applied. Talion-style legalism was invoked. Now, to obtain a conviction one had to have a damn good case against the accused, and even then it was still possible to discredit prosecution witnesses comparatively easily. Verdicts were made by a jury, and only after this was torture inflicted on the accused. It has been noted that the number of Danes who confessed to witchcraft, of their own volition, without torture, were comparatively few. This suggests that *the application of torture helped to increase the number of confessions in later Danish trials*. That much is self-evident and completely understandable. But did it necessarily mean an increase in false confessions, where the accused was brow-beaten into admitting things they never did? Let’s examine this question in closer detail.

We do have evidence for the improper use of torture in order to gain a conviction, or gaining a false confession as a result of torture. Take the case of Johannes Julius, tried and executed at Bamberg 1628. He noted in a letter sent to his daughter that he admitted to things which were not true, hoping that it would satisfy his tormenters, and cause an end to the intolerable suffering he had endured through repeated torture sessions (including thumb-screws, leg-screws and the strappado).¹¹⁵⁰

“For they never leave off with the torture till one confesses something; be he ever so good, he must be a witch. Nobody escapes, though he were an earl ...”.¹¹⁵¹

TORTURE CAN INCREASE
THE NUMBER OF
CONFESSIONS

In this particular case, we have an opportunity to compare the Church’s version of the trial, with the accused’s. And let me say there is some variation in the two accounts. Still the quoted statement is written from his own perspective; he was innocent, perhaps others were too. Before the date of his execution Julius was convinced that everyone must be also. And for what it’s worth, Earls were marked men unless they were pillars of Catholicism.

A Roman lawyer condemned the use of torture for according to his observations “*many (guilty) defendants because of their patience and strength are able to spurn the torments, while others would rather lie than bear them, unfairly incriminating themselves and also others*”.¹¹⁵² Julius was probably one of these hapless souls.

SOME WHO DIED WERE
INNOCENT

Now we will also look at the opposing stance. Consider this. One of the last remaining adherents and survivors of an ancient religion or mystery cult is on trial. Firstly they have seen many of their creed executed at some stage or other. They have seen what happens when a sect member makes a statement implicating fellow-believers and their entire families. They have seen what impact even a single execution has on their crumbling religion, and on the integrity of the doctrines they adhere to; especially if the doomed person is a priest.

Confessing their cult activities and doctrines to the clergy and secular authorities would have had inherent spiritual dangers also. It was sinful for Magians to speak about the sacred mysteries and teachings of the religion with non-believers.¹¹⁵³ Inevitably the more committed a detained witch was, the more reticent they would be.

That inquisitorial torture often had minimal effect on extracting confessions capable of obtaining a conviction against the suspect is statistically verifiable, for with amazing regularity many who underwent torture changed nothing of their original statement.¹¹⁵⁴ And this is exactly what you would expect to see during the torture of an actual witch. If a genuine witch couldn't keep their mouth shut then they could expect retribution from their own, as was stated in the case of a Scottish witch by the name of Rebecca.

"If shee should discover anything, they all told the said Rebecca shee should endure more torments on earth then should be in hell and the said Rebecca told this informant that shee promised to keep all their secrets; and moreover they all told her, that shee must never confesse anything although the rope were about here necke, and shee ready to be hanged".¹¹⁵⁵

Hence, Inquisitors with more than an inkling of suspicion about a suspect might be prone to doing an additional interrogation session or two, believing the "witch" more obstinate than usual. Perhaps if they gave the thumb-screw an extra twist they might get someone to break, perhaps they might discover a secret circle of old believers. Applied torture, the prosecutors hoped, would loosen their tongues.

If some witches were, hypothetically, sacrificing their own babies, by piercing a needle through their head (as was claimed during French trials) would they tell all? Would they divulge the fullest extent of their religious activities, which others (having a different set of beliefs and moral codes) would call crimes? I venture to guess that a genuine witch would be extremely unlikely to proffer information about their rites, or those of their coven. At least not without a fight. Why would they? They would have everything to lose by openly confessing; they would be burned alive. Worst of all, if they did confess an involvement with the witches then the Inquisitors would probably never let up with the torture, knowing for certain that locked away somewhere in the person's mind was the information they needed to break their organisation even further. Many of these old believers preferred martyrdom than contributing to their own demise, and the collapse of their religion. In this respect they were not too different from the early Christian martyrs. Others, under the influence of narcotics, or through superior mental toughness, stoically endured the torture. As distasteful and pathetic as it may seem, Inquisitors were sometimes compelled to use torture, because in some instances they were unable to solicit a confession otherwise. The reason for this is the nature of the alleged crime, where maelific witches are concerned. Just how do you convict someone who has allegedly been killing large numbers of victims in secluded places, far from prying eyes? There is unlikely to be a mass of physical evidence, especially where the victims are cremated, as the witches were supposed to have done. On top of this there would be few if any witnesses. A modern parallel is afforded by accused mass murderers. That they were ever apprehended and detained is nothing short of a miracle (usually achieved by a streak of good luck and excellent police work). Perhaps they told the wrong person about what they had done, perhaps it was by pure chance that they were seen committing a crime. How often have we seen them on TV laughing and snickering during the trial. What are they laughing about anyway? What is there to laugh about? Is it because they have a sick sense of humour, or because the joke is on us? Is it because they know something we don't? Are there other unknown victims out there that the police have no evidence for, and never will? Would the accused volunteer information about these additional victims if the police had no idea that the suspect (detained for other crimes) was responsible? How different, and more complete, would their testimonies be if the mass murderer had been tortured? As it stands offenders do not have to supply information if it could incriminate themselves. Accordingly police only get true and complete confessions from suspects such as these, where a mass murderer wants to incriminate themself. Where there is no body, no evidence, no witnesses, dubious witnesses, or witnesses who can be made to look dubious, actual offenders can escape conviction. In fact it would be true to say there is no crime! That is despite the fact that they have left a trail of bodies in their wake, who will forever remain missing persons.

False or inaccurate testimonies

Even nowadays there are not a few claims of innocence made inside jail. Some of these have a basis in fact, while others are simply hard luck stories concocted and circulated by criminals hoping to gain an early release. Innocent persons can end up in jail only where there is a compelling case against them; a case built on information sufficient to

convict somebody, but which is untrue. Current theories about the witch trials suggest that some suspects were being convicted due to imprecise and false testimonies. This is absolutely correct; even *Malleus Maleficarum* admits as much. For this reason there is a section of the *Malleus* devoted to witness assessment, including whether or not a known enemy of the accused should be considered an acceptable witness.

REASONS FOR FALSE TESTIMONIES

1. Personal gain A convicted witch might under certain circumstances expect to have their goods and land confiscated in addition to other penalties. These assets would go to the King and the Church normally.
2. Vengeance You could bring charges of witchcraft against a person in order to settle a vendetta or neighbourhood argument. It was also another option for those wanting to rid themselves of their spouse. With their husband or wife executed as a witch they were free to take another lover, perhaps one they had been meeting for some time.
3. Political gain One could eliminate a political or business rival by having someone accuse them of witchcraft.

THE EVIL OF FALSE WITNESS UNDER OATH

False testimonies occur even in this day and age. In the USA, in states where capital punishment is still performed, death row prisoners have been executed protesting their innocence to the bitter end, and only later is it discovered that they were in fact innocent of all blame. This is especially likely to occur when evil individuals seek to misuse the legal system, and twist it to their own advantage. At other times witnesses are genuinely mistaken by what they have seen or heard, and hence tender inaccurate information which can be used to convict a suspect. The only way we can reduce the likelihood of false witness is to repeatedly grill the witnesses. This procedure is followed today, as it was during the Inquisition.

The sad fallout from false or inaccurate testimonies is that prisoners are occasionally heinously executed, and their name sullied, for something they never did. No doubt such instances will continue for as long as state execution remains. That is the great paradox of any legal system; occasionally a wrong judgement will be pronounced. Where actual frame-ups have occurred is the law and the judge to blame, or false-accusers? Clearly it is the false-accuser, whoever they may be.

Let us look at the psychology of a tortured innocent. A blameless detainee is taken into a torture chamber. If before hand they felt their captors wanted to squeeze a false confession from them, they would be even more determined not to give them one. Why? ... pure survival instinct. By giving a false and incriminating statement about themselves they know they will forfeit their life. Even worse than that, they know that their wife (or husband) and children could expect financial and emotional hardship, and even follow-up persecution by the local community. Their family name would now be falsely associated with the arts of witchcraft. This would have a flow on effect to one's larger family, and to ones direct descendants, many generations hence.

No, the innocent man or woman wants to live. All they have to do is maintain their innocence throughout the pain of interrogation, then their pleas of innocence will be vindicated. Sure its going to hurt, but at least they will be alive at the end of it, and their family name cleared of any impropriety. Knowing the grim penalty that would await them, those with the strongest fortitude would have resisted torture to save their lives, though an unknown proportion may not have been so lucky.

Why use the whole torture facade anyway? Why not just draft false confessions, and get an expert forger to replicate the suspect's signature, or make their mark? Why not apply the same means across a whole nation? This convincing argument is yet another that can be used against those who maintain that torture gave life to a tradition of witchcraft that never really existed. If there was an official Church programme to fabricate a uniform body of evidence about the witches, using false-confessions adhering to a specific format (as Cohn hints), it either failed or never was. That is because there are no stereotypical features that can be held up as definitive and universally characteristic of the witchcraft phenomenon throughout Europe over the 500-600 years of trials.

Examining the case of the Knights Templar, we discover that right up until the eve of the crackdown against them, they had no idea what was about to happen.¹¹⁵⁶ The day of their arrest must have come as a real shock, since

most Templars were taken into custody and put to the torture. Whether or not they were held in separate cells in each instance is important, and needs to be established. Nowadays police segregate suspects and witnesses to ensure that those mentioned are not concocting stories, or alibis. In the Templar trials we do know that a group of suspects sharing the same cell devised a uniform group confession.¹¹⁵⁶ Surprisingly their statement conformed to the so-called heretical depravities alleged by the French crown.¹¹⁵⁶

Still conflicting details did emerge the confessions. A variety of statements were made, which only sometimes corroborated each other. The ramifications of this are enormous. For instance if there was actually an heretical Templar idol capped with a single or many-faced head, surely there would be a standard description unveiled under interrogation. But there wasn't. The confessions allow us to reach the following conclusions:

1. Some suspects had seen the idol and confessed as much,¹¹⁵⁶ but most of the Templars knew nothing of it. This seems in perfect accordance with what was stated, namely that only a certain select element within the Templars performed the key rites of the organisation.
2. Why is it that only a certain number of tortured suspects supplied a description of the idol similar to that mentioned in the charges against the Templars? Did their recollections of the prior-mentioned idol only result from the promptings of their interrogators, and if so, why didn't they cajole every other suspect in the same way, to achieve a compelling, nay watertight case? Thus some confessed to having worshiped the said idol, while a great many did not.
3. Guilty and innocent persons were tortured during the repression of the Templars. Attempting to penetrate the secrets of a reticent organisation observing clandestine rites, by means of torture, unfortunately required that all members be tortured. This is tragic. But how else do they get adherents to confess, where there are no witnesses, if not by torture.
4. Some innocent suspects had folded under the weight of the torture and, in the delirium of pain, gave contradictory information about the idol in question, supplying descriptions of an idol which they had thought up, just to get their questioners to leave them alone. Their information would therefore be fictitious, and deviate from the alleged facts by an unknown degree, depending on the level of imagination used to compile the response.
5. But they might also have been guilty, instead compromising the existence of another idol (which did not have the same form as the one which gave rise to the repression), but whose form the inquisitors knew nothing of.
6. The torturers *did not compile systematic false-testimonies using the tools of torture*. If they did, there would be a preponderance of confessions which confirmed the allegations. This was not the case.

THE SUPPRESSION OF THE
TEMPLARS

So what of the other details? Some common themes became apparent. For instance, three kisses were given to their commander, while others received such kisses.¹¹⁵⁷ And Templars wore the pure white shirt and belt of their order, even at night as they slept.¹¹⁵⁷ White Magianism affords striking parallels in this respect. Persians kissed each other on meeting, offering their cheek to a person of lower rank, or kissing the cheek of those of higher rank.¹¹⁵⁷ Those of relatively low rank neither offered, nor received a kiss, but simply bowed or nodded. This was known as the "kiss of peace".¹¹⁵⁸ Every white Magian lived and slept in their holy shirt, firmly trussed about the waist with the sacred belt. Clearly the use of torture here succeeded in producing a certain amount of uniform testimony, a proportion of which was no doubt factual.

Templars were mostly drawn from the aristocracy and foresworn to individual poverty, chastity in the service of Christ and the Holy Virgin. Very often they were well educated also. Through donations and trade the Order itself accumulated vast wealth. Many see the seizure of their financial and land holdings as the primary reason for their persecution and disbandment in 1312. Having lived in the Holy Lands for several centuries it is plausible some brethren of the military order became enamoured with oriental dualistic traditions. In odd instances this may have led to desecrations and even idol worship (in the form of a human skull mounted on a post). But the Order as a whole was probably innocent of any involvement. Notwithstanding those brothers burned at the stake in the preceding two years, the bulk of the defunct order simply transferred to other orders. The Templar Grand Master Jacques de Molay was one of the unlucky ones put to death, but not before prophesying the death of Pope Clement

V and France's King Philip IV. It came to pass exactly as he foretold.

Trial judges were required to use their wide powers of discretion when determining the means that would be employed in the questioning and sentencing of the accused. It might be torture (which could be as severe as the rack, or as psychologically torturous as sleep deprivation), it might be subsisting on bread and water in prison, and apparently one of the preferred methods for obtaining confessions (as contained in *Malleus Maleficarum*) was for a priest to place his hands on the witch's head as a prayer was recited, which was worded in such a way as to provoke tears in the accused's eyes if they were repentant. But they won't tell you about that, because it doesn't fit into the neat stereotype that many academics have tried to build concerning the conduct of the Inquisitors!

For example, it was serious business being a witch, one could easily expect to be lynched if suspected of harmworking on local residents. There are accounts from the early mediaeval era of clergymen having to halt peasants with murderous intent from venting their anger on a captured black magician.¹¹⁵⁹ Whether innocent or guilty of the charges, some clergy tried to protect alleged offenders rather than kill them, perhaps to enable them to get a fair trial, perhaps because they thought they were innocent, perhaps because they didn't even believe in the existence of witchcraft, or in rare circumstances, perhaps because they were part of the same coven.

Nowadays there seems to be an excessive fixation with the use of torture during the Inquisitions. No doubt travesties of justice had occurred during the Inquisitions, where due to political expediency persons were hurriedly tried and convicted for witchcraft. But to suggest systematic abuse of the magnitude Cohn and Sidky suggest is simply a disgrace, especially when there has not been a wide reaching pan-European study into the incidence of torture during the witch trials, nor the inclusion of modern statistics and data concerning the observed effects of torture on the human mind and body. Due to the work of some scholars, the picture is clearer for some countries than others.

Only a systematic study of each and every heresy and witch trial case will uncover the true extent to which magistrates and the clergy chose to deviate from the prescribed methods for conducting trials. Until such time as this study has occurred, we would do well to treat with scepticism the validity of claims that widespread abuse of the system was the norm.

That the complexity of the questions put to witches evolved as the centuries unfolded, is seen by some as proof that the authorities were contriving a new public image for witchcraft. Now they had familiars, now they had witch paps, now they were defiling the Eucharist. Proponents of this line of thought maintain that it was this modification to the nature of questioning that had the effect of altering public perceptions about exactly who and what a witch was. Through these works of fiction arose a hideous, anarchistic being; the witch. These novel images of witchery fed out into the community to the attention of ruder minds, which lapped it all up, like a cat drinking milk. Equipped with this new information the peasantry now became capable witch spotters. From there it was only a short step to an explosion of witch craze mentality, vigilante behaviour, fevered allegations and so on. Society was now free to see in marginal societal elements these same features.

Enhanced public awareness of who the witches were was only partially responsible for the increasing spate of witch accusations. What really led to an increase in the number of trials was the changing times (an increasing faith in Catholicism), the introduction of new legal procedures (which did not recognise vigilante behaviour as a means of attacking witches), and the arrival of newer immigrants who adhered to pagan traditions forced to withdraw from these nations at the time of their conversion. Witches of course had always been there, but the Christianisation of these nations led to a reduced presence. Those that remained were tackled by the time-honoured tradition of community reprisals where they had drawn too much attention to themselves. Most folk already knew of the various folk superstitions concerning witchery, without the Inquisitors having to tell them. As for the change in the kinds of questions put to suspects, inquisitors began learning progressively more about the newly imported lifestyles and beliefs of the witches, heretics and sorcerers, who they had begun encountering once again, several centuries after the Christianisation of their countries. Some of these traditions in witchcraft and heresy were of a type not previously experienced in these countries, while others partially conformed to traditions already known, such as Manichaeism. Consequently Inquisitors were able to pose better educated legalistic questions to accused persons based on their enhanced understanding of who the witches and heretics were.

Witch trials - the death of paganism

The Burning Times should be seen in a far bigger context than the elimination of black and white witches. It was the final phase of the de-paganisation of Europe, which is totally different from the Christianisation of Europe, but which helped bring about the same end. The further we enter the Christian era the more virulent the attacks on the witches became, on the head people of the Old Faith. The fewer that remained, the more devastating their death would be. Witches were put to death in ever greater numbers over diverse geographical regions of the European continent. And as it went on year after year a substantial devolution of religious understanding among the adherents of the Old Faith was under way. Robbed of their books, holy sites and religious teachers, their heavily codified teachings were progressively reduced to crass superstitions as the believers preserved the old ways differently in areas where their scattered enclaves existed.

To illustrate the plausibility of this theory, we will assess what would happen if somebody wanted to destroy a hypothetical organised religion with its own priesthood, holy books, temples and believers. To begin with they would need to demolish the organisational structures that support the faith. Doing so would be a relatively simple matter, requiring only the freedom to use strong arm tactics. Phases associated with the death of a religion include;

1. BURNING DOWN TEMPLES AND DESTROYING RELIGIOUS SITES/IDOLS.

Following this phase, believers could no longer meet publicly. Organisational cohesion begins to break down. Members of the religious group lose contact with each other, as do the priests that help administer the religion. To survive this persecution, adherents must renew connections between believers and religious leaders in secret.

2. DESTROYING THE BOOKS WHICH ENCAPSULATE THE CORE TEACHINGS OF THE RELIGION.

The more extensive the scriptures of a religion, the less likely it would be for devotees to adequately remember what the books once contained. Therefore it would be practically impossible to faithfully reconstruct the religion from what they remembered. If one gathered together 80% of this religion's texts and destroyed them in a single moment, the following day perhaps 80% of the religion would not even have the faintest idea what to believe, at least not exactly anyway, not in the precise manner.

Perhaps for this reason the Magi chose to memorise their scriptures by rote learning. Sure, they could also record their religion in writing if they wished, but by learning their holy writings off by heart, sentence by sentence, they had an emergency reserve of scripture that could be tapped into if the books vanished. Such contingency plans enabled them to bring their religion back to vitality (though not perfectly) following Alexander's book-burning spree against the Magian holy texts. Keeping one's religious/philosophical teachings in books alone makes believers lazy and a religion susceptible to demise if its texts are lost from circulation.

3. KILL OR DETAIN FOR LIFE THE PRIESTS AND PRIESTESSES OF THE RELIGION.

As the teachers disappear, they can no longer guide the faithful as to the true form of their creed, nor can they meet with other religious leaders to help the believers regroup, and re-establish a new and lasting organisational structure.

4. SECRET SOCIETIES ARE FORMED

With their religious leaders gone survivors take to the roads hoping to encounter old adherents. If successful they will have found support in both a practical and religious sense. Perhaps they would choose to settle there in a discrete community, hoping to avoid detection.

During the conversion of Iceland pagan and Christian negotiators compromised for the sake of peace. Though it was agreed that they should become Christian, the pagans insisted that horse meat banquets, infant exposure and the old law codes should still be permissible. These pagan observances were to be acceptable only in so far as they were conducted in private places. But if it should happen that they were witnessed by some onlooker, then charges could be brought against the individual. As a penalty the practitioner became a lesser outlaw. The only possible result of such arrangements is an underground cult following for the old ways. More implacable devotees were thus forced into becoming secret institutions, or lonely isolated individuals, whereas previously they were free to worship the gods of their ancestors in an open and forthright fashion.

5. INITIATE VIGOROUS SEARCHES AIMED AT FLUSHING OUT THE LAST OF THE RELIGIOUS LEADERS, TEXTS AND ORGANISATIONS WHICH HAD ESCAPED THE INITIAL PERIOD OF REPRESSION.

Wherever outbreaks of their activities were found in latter times special efforts would ideally be re-doubled to uproot the last of the religion, thus completing the job, the eradication of an organised religion.

MISSIONARIES ARE
ACTIVE WHILE THE
POLEMIC IS TAKING
PLACE

Where the persecutors were hoping to instal a new religion, intense missionary ventures would be simultaneously sent out into the communities, into the religious vacuum. Converts to the new faith would be offered enhanced rights and social freedoms over and above those of the old faith. As a consequence of this the adherents of the old faith become progressively more marginalised, and reduced in status. Many would be coerced into swapping to the new religion, if only to give themselves a better life.

THE LEGAL SYSTEM IS
DENIED TO MEMBERS OF
THE OLD FAITH

Pagans unmoved by the ministrations of the Christian preachers operating out of Salzburg Germany could expect an immediate fall in social status. At Ingo's banquets converted peasants were treated to the most lavish fare, served from utensils fit for a king, yet the unbelievers were "*forced to sit outside like dogs*". "*Out of my house and eat your food like dogs*" he yelled.¹¹⁶⁰ It is on record that the degradation experienced at such social events caused a great multitude to convert.

PUBLIC HUMILIATION

The situation was much the same throughout Islamic society. Non-Muslim citizenry were termed *Dhimmi*, that is second-rate citizens with no right to legal representation or redress under Islamic law.¹¹⁶¹ Again, suspects were automatically guilty where Muslims brought allegations against them.

THIS HAPPENED IN
MUSLIM AND CHRISTIAN
COUNTRIES

This also happened under Russian and Scandinavian mediaeval law - to avoid the baptismal font meant one automatically forfeited whatever law cases they were involved in. In Iceland the penalty for not bringing a newly born to be baptised was lesser outlawry, and the accompanying loss of social status.¹¹⁶²

The impact of these varied scenarios would have been amplified as time passed by; the religion degenerating daily. So it is easy to envisage how an organised religion could be reduced to a corpus of differently remembered folk superstitions over a large area in but a short space of time, perhaps even less than a decade, depending on the intensity of the persecution and repression brought to bear against the religion.

Without onlookers to objectively record the happenings of de-paganisation, major events could pass without hardly a word preserved for posterity. Such was the case during the Islamicisation of Central Asia and Persia, where we hear of mass-killings (especially of the Magians), but no names, no body counts, no trial records.¹¹⁶³ Still we are fortunate in the extreme that Mediaeval Christian annalists did leave a trail of evidence for the future, albeit one that has been sieved and diluted, till it represented but a watery tincture of what was once known.

You will notice that the rapidity with which such designs can be accomplished is directly proportional to how quickly secular rulers and the military apparatus can be harnessed for such action, and their level of willingness to prosecute and participate in these designs. Whereas operations of this kind would have been impossible at the dawn of European Christianisation, it only managed to grow proportionately as more and more European kings became Christian.

Just as Magianism and pagan Gnosticism were uprooted by Islamic Jihad, so too were European pagans and Magians subjected to the same rigorous systematic de-paganisation agenda. At the end of it all we are left with secret societies, persecuted marginalised members of the community, and increasingly denounced folk superstitions.

In this model one notes striking similarities between the mechanisms of Christianisation and Islamicisation, and surprisingly the de-Christianisation of the old pagan homelands (described in Part I). Succinctly, the aim was to pluck the promoters of the old faith from society by conversion, execution, imprisonment or banishment. Banishment was of course the most humane method of removing their presence, but was inherently dangerous in that they could re-group and multiply elsewhere. The pagan religious leaders were the voices of dissension that fulminated against the rise of the new faith. Sifting through the tumulus of mediaeval European history one sees that Christianisation did not go unopposed by the heathen intelligentsia. They too proved apt at responding with military force against Church property and clergy, as well as re-educating their flocks, to fortify them against the overtures of the new religions.

For example, it happened that 17th Century protestant Swedish witch-hunters asked Estonian witchcraft suspects specific kinds of questions, focusing on whether they had established pacts with the devil, or flew in the

air.¹¹⁶⁴ The nature of this questioning was probably in part based upon contemporary demonological treatises. Yet in cases where torture was applied, the accused rarely if ever alluded to demonic compacts.¹¹⁶⁵ To be sure some interrogation sessions started out with the detainee making mention of the devil, but very quickly digressed, with them confessing to dealings with fairies and wizards.¹¹⁶⁵ The statements they tendered were elaborate to say the least. What we are probably witnessing in these instances, is evidence of citizens still interacting with surviving members of the old pagan priesthood during the 1600's. In an area formerly called Askala (the land of wizards) in heathen times, it is eminently plausible that peasantry remained in contact with their sorcerers, or harboured them during the Christianisation period, when practitioners of the arts were deposed. During that late era their hold over the locals was, it would seem, considerable. And that is because the withdrawal of the Teutonic knights and the Catholic church from the region had allowed them to fall back into the old ways, the wizards free to emerge from hiding. In the year 1667 the protestant monarch of Sweden received a communique from the Church commission of Livonia. It brought to his attention "terrible idolatry and heathen blindness that has power over thousands of miserable souls in this country".¹¹⁶⁵ Further investigations reported that large crowds of Estonians still gathered for heathen festivals on a holy hill, or in groves, and even at the Chapel in Risti.¹¹⁶⁵ That is despite frequent threats that troops and cavalry would be used to break up communal meetings of this kind.¹¹⁶⁵ Nevertheless the assemblies continued as always, until the Estonian holy sites were finally destroyed, in the late 17th Century, early 18th Century.¹¹⁶⁵

During the course of some 12 years, Stuart Clark compassed a unique and robust study of demonological texts produced between the 1500's and the 1800's. Having conducted such a study, he concluded that the dissemination of learned writings on demonology are unlikely to have prompted frenzied outbursts of witch-hunting.¹¹⁶⁶ They did, if anything, reflect views already held by the wider community, for a great many Europeans already acknowledged a lucid framework of dualistic philosophical theory, which explained the forces at work in their life.¹¹⁶⁶ The devil was reputed to mimic the order of the world, his realms and subjects being altogether antithetical to what one found in heaven. These widely held folk beliefs underpinned people's notions of witchcraft at that time; the law and written texts on demonolatrly merely embodied this. Clark further examined the impact that these writings may or may not have had on the European psyche. Unfortunately, due to the cumbersome size of his work, Clark was unable to devote equal space to the ultimate origins of European lore surrounding the antichrist, ritual inversion and other forms of demonolatrly then known ... their origins.

In examining the many examples of witchcraft throughout this book, we must account for one major point. How is it that Western European prosecutors and defendants were exchanging blows over evidence which seems quintessentially Magian, Manichaeian, shamanistic, Dionysian and Chaldean in nature?

Even as the smoke of the anti-Murray gun-play fast dissipates, the possibility of re-opening her door is not beyond our grasp. Though clearly not of the Murrayist school, and in a sense condemnatory of her stance and methodology, the modern English folklorist Ronald Hutton comes to the objective conclusion:

*"Instead of shunting the Murray thesis and Frazerian folklore into an academic cul-de-sac.. there is obvious need now for a proper study of the treatment of ... paganism and Witchcraft in the English speaking world. Only when that work is complete can the significance of early 20th Century British folklore studies be properly understood."*¹¹⁶⁷

To call it a "cul-de-sac" is being kind. Murray's work was in reality flung down a bottomless, seething abyss. And with her demise, any willingness among researchers to probe the factual existence of witchcraft further vanished.

Until this point the study of witch trials has been the preserved domain of individuals dipping and diving out of select accounts; some more thorough and methodical than others. At periodically convened conferences their individual findings have been presented to their peers. But it seems to me that there needs to be a systematic allocation of research projects, one more scientific in nature, looking at each case, dissecting them. Certain scholars are already doing this, each applying a different set of questions. Some are better at doing it than others. Though these studies have not plumbed the fullest possible amount of data contained within the documents, there can be no doubt that their efforts are already allowing us to see things more lucidly. James Sharpe's examination of English witch trials between 1550 and 1750 is an example of what can be achieved.

Perhaps the establishment of an international panel might be helpful in such an endeavour, directing the enquiry process of autonomous academic groups in the many European countries where witches were executed .. countries

like Finland, Germany, England, Spain, Estonia, Latvia, Greece, Russia, Albania, Arabia. This could not even begin until;

1. Each country has determined the precise amount of surviving witch trial documentation in their safekeeping.
2. A uniform yardstick is established against which each and every trial can be examined. This will enable us to establish firm statistics about the trials. The control criteria should not be drafted with any specific theory in mind, but should ideally serve to identify the presence or absence of common traits over diverse regions, during different time periods.

Suitable questions might be ... What were the total number of acquittals in a given country in a given span of years, and what were the reasons for the acquittals? What was the total number imprisoned, or the accused's gender? What were the total number of executions and *relapsae*, plus the social status of the accused when compared with the accuser? What law code or local regulations were in force during the trial? Were the accused tried by villagers, local magistrates, priests, inquisitors or protestant ministers? How often were suspects tortured? What sort of torture was applied to the accused, for how long, and for how many sessions? Were there incidents of unsanctioned torture in a given area? Was torture applied before or after the verdict was handed down? What was the percentage ratio between the number tortured and the number convicted? In other words what effect did the torture have on the conviction rate? Who gave the authority for torture to be used? Did a given magistrate have a reputation as a 'hanging judge'? What sort of defence counsel did the accused have? What portion of the overall number of criminal trials did witchcraft related crimes constitute as opposed to other crimes.

Features of each trial will need to be compiled statistically. Were there references to dogs, milk stealing, familiars, storm raising, riding to sabbaths? Do descriptions of the devil indicate that he or she may have been a person disguised as such? Were there allegations of harming cattle, sheep or horses? Did the accused commit crimes, cause a public disturbance, wreck public property and so on? Was the person accused of divination, dispensing poisons, herbal remedies or amulets? Did they use a cauldron and "broom"? Was there evidence for blood-letting? Where animals were sacrificed were they burned? What is the total number of European witch trials for which prosecution documentation exists? What time periods had no trial documents?

By applying these questions, and many others, we will establish a blueprint for identifying what sort of features were universally common, and which were confined to certain geographical areas only. This will tell us what species of witchcraft prevailed in particular areas, what state of degeneracy it was in during a given decade, and even what family names were connected with a given cult.

The number of individuals tried and executed for unorthodox Christian beliefs may have been enormous. Just check out the following scene.

Chapter 11111

Potential reasons for similarities between Christianity and Magianism

Because the Church and *New Testament* outwardly seemed to have much in common with the scripted Zoroastrian faith, it particularly lent itself to the absorption of Magian Christians, or pagans who still retained diverse beliefs, magic and customs from the old faith of Zoroaster.

Despite this finding, the many points of similarity between Christianity and Magianism (examples raised throughout this book) gave rise to a genuine and cherished belief among the Magian-Christians that Christ was *their* Messiah, not the Jewish Messiah (points probably raised by the excommunicated heretic Marcion in his 2nd Century accusations that the Church had botched the entire message of Christ). To counter this, the Church deemed it heretical to conduct Church services without readings from the Jewish *Old Testament* (which also contains passages pointing to Jesus as the Messiah), as the heretics were wont to do. Furthermore, Rome had to lean heavily on the *Old Testament* when trying to reinforce the traditional beliefs of the Church. For example, in the British Isles we see far-flung bishops writing to Rome about local customs, asking whether menstrual women could enter Church, whether demi-incestuous or step-marriages were permissible, and what should be done about the idols and customs of cattle sacrifice so common there. Catholic responses to these questions normally referred to *Old Testament* passages, and not the *New Testament*, as one should expect from a Christian.¹¹⁶⁸ As in Western Europe, the Eastern clergy (such as Patriarch Photius) also tended to quote from the *Old Testament* as much as they possibly could.¹¹⁶⁹ I suspect the rationale for this was to stress the Jewish component of the apostolic faith.

All the above examples lead to a number of possible reasons for the similarities, points that Zigabenus (a medieval Byzantine heresiographer) and the inquisitors no doubt agonised over once they had begun encountering the heretics eye to eye, and upon hearing what they had to say, the utterings of believers who had been cut off from the Apostolic Christians for a good 1,200 years. Whether the Apostles and the early Church knew of these many correlations and turned them to good effect is scantily recorded, but one thing is certain. By the Middle Ages these alternative Magian views and perceptions of the Gospel story were regarded by the Church as the product of demonic inspiration. And it was more than well enough commented upon by the inquisitors that the heretics had a deep, 'diabolical' understanding of the Gospel, an altogether uncatholic understanding *which they could not proceed to challenge*. This understanding contained teachings which had not been perpetuated or recorded by the churches of Greece and Rome, but probably formed among the infant communities of Persia in the first centuries after Christ. Apparently the heretics perceived a vast weight of additional meanings in the *New Testament*, invisible to non-Magian readers, and which lacked any form of Church approbation, at least in later times.¹¹⁷⁰ Maybe Gospel passages like (NT) *Luke 17:37*, where Jesus says of the end times, '*where dead bodies lie, vultures gather*', or '*Let the dead bury their dead*' (possibly oblique references to Magian exarnation rites, and the impropriety of burials in the soil). St Augustine makes reference to the prophet Daniel's testimony about the anticipated resurrection. '*Many of those who*

are sleeping in the heaped-up earth will rise up, some to eternal life, some to shame and eternal disgrace. Then those who understand will shine like the brightness of the vault of heaven, and many of the just will shine like the stars for all eternity'.¹¹⁷¹

Could it be that burial mound kurgans are the intended meaning of the 'heaped-up earth' mentioned in scripture? In *Dina-i mainog-i Khirad XXVII: 27-31* we learn that many of the Magian faithful preferred to be buried in a constructed 'mausoleum', an 'enclosure of Yima', which took the form of a barrow or mound. Inside this subterranean domicile *their body slept peacefully*, but after some 600 years, 6 months and 16 days they would awaken from their slumber, to live once more. Only when they did they would be free of all corruption, remaining inside the vault for a time, until finally emerging following the period of apocalypse portended by the pagan seers. To this end, a person's remains were interred in a mound, often within a boxed enclosure with grave goods suitable for their post-resurrection existence.

A belief that heroes still slept inside the hills and mountains can be found in numerous places across Europe, well into Christian times. As with the Iranians, it was almost universally believed that these figures were destined to arise during a time of great woe in the world, or to once again defend their race from tyranny and oppression. Ragnarok, or the 'Armageddon' of the Magi, was such a time, the onslaught of the evil legions.

In the Iranian world, the building of subterranean grave-homes was related to a firm belief that the dead came back to life underground. The ideology is laterally related to a topic found in *Vendidad, Fargard II: 1-43* and *Dadistan i Dinik XXXII-XXXVIII*. They talk of the Var, an underground complex built by the ancients, that was the salvation of their people during a past apocalyptic event, an event destined to revisit the world one day. The priests of the Iranians, the Magi, envisaged the future apocalyptic doomsday would incorporate the death of the heavens, and the onset of a Terrible Winter, a precursor to a great deluge that would swamp the earth, and wipe out all trace of civilisation and mankind. The oldest sources mention it as being an endless rain, but this changed later to include a devastating fire-storm from the heavens. At that time there was to be a great battle, in which the holy gods and saints engaged their dark-half in mortal combat, and the serpents of iniquity slain. Endless myriads of demons would relentlessly assault the walls of the highest heaven, warriors of light and darkness struggled in life or death combat. Such was the war of Verethraghna, sweet the blow of victory against the most omnipotent of all demons, Ahriman, and his children. On that spiritual D-day, the bow was to be a highly favoured weapon, together with the spear. In this life, men-at-arms were to build up a store of ammunition ready for this last apocalyptic war in the after-life, and males strove to become expert bowmen, learning archery from their earliest childhood. During the battle, the earth and the mountains (ie; where the demons crashed into the earth) would melt, leaving a new and flattened world. For the task of re-organising and re-populating the earth, the Magi and their people needed equipment and supplies used in daily life, especially goods belonging to their respective feudal social classes. Weapons were layed to rest with warriors, tools with tradesmen, farmer serfs with agricultural implements, plus food, a wife and her jewellery, servants, horses, dogs and maybe a boat or two, depending on one's status.

In Scandinavia and Old Russia, barrow burials died out with the coming of Christianity, so it is fairly certain that mound erecting had a religious genesis incompatible with the teachings of the judaising reformist Church. Mounds only continued to be built during this period in rural areas, so the survival of mound building there can be attributed to the fact that the countryside saw very little missionary activity until the 13th Century onwards.¹¹⁷²

All things being equal, inquisitors were told not to engage in dialogue with heretics, and it became mandatory that priests investigating heresy *had to be licensed*,¹¹⁷³ and accompanied by no less than two tried and true lay members of the Christian community. Perhaps these were only to act as witnesses for any statements made by the prisoner, but they may also have served to 'shield' the priests from enticing heretical commentaries, or to prevent collusion between prisoners and priests who had been won over to their line of thinking, and fallen in behind the heretics.

Whilst the Holy Mass is fundamentally different from Aryan and Zoroastrian pagan liturgies on very many ritual and conceptual points, there also happen to be some awesome scriptural and ritual parallels, some would even call them direct borrowings; especially with regard to certain *New Testament* passages, the equipment used to

perform the mass, vestments, whippings, confession, the seven deadly sins, saints, candle burning during prayer, holy water etc. A number of Magian rites are so closely related to the ritualism of the Church that they are difficult to write off as a mere coincidence.

All we have left from that remote era is a wide spectrum of festive and sacramental observances, the Bible, Eusebius' extensive *History of the Church*, and a few other loose documents such as the *Didache*, the Strasburg papyrus, Hippolytus of Rome, Justin the Martyr, to name but a few. Not everything survived the primitive years, especially so in the Jewish world, where all mention of Christ was eventually expunged from their writings by the rabbinical, anti-Christian alumnae. Even in the early 300's AD, the illustrious Church historian Eusebius flatly exclaimed that neither he nor any other bishop of his time was entrusted with the real meaning of the *Book of Revelation*. He presumed that the meaning would only be cloaked for a time, instead belonging to a future unknown generation. He did, nonetheless declare it apostolic, as did the Church Fathers.

This overwhelming paucity of surviving information from the Church's earliest years may conceal its greatest and most controversial secret. Namely that *Apostolic Christianity was essentially a new religion, yet at the same time a Jewish-pagan synthesis, a merging of two flocks under one faith, and one shepherd.* The Epiphany is merely emblematic of this fusion. Many will cringe at the very thought, though nowadays I feel it is the only comprehensive explanation for such an enormous range of historical, linguistic and archeological controversy. If there ever was a formal link between early Christianity and Zoroastrianism (even just a partial borrowing of customs), the universal Church certainly would not be tripping over itself to admit it, at least not during the Middle Ages anyway. After all, Plutarch's portrayal of Zoroaster altered the perceptions of whole generations, type-casting him as some kind of a super-thaumaturge or arch-wizard, which simply wasn't true. This meant that any formal comparison or association between the two faiths would leave a bad taste in everyone's mouth. Not only that, but specific references to this prophet could have alienated converts who entered Christianity via other doorways, namely Judaism.

A study of some of the earliest liturgies reveals a creeping in of 'heretical' ritual practices during some Masses, especially in the oriental parishes of Asia-Minor, *all of which* appear, at certain points in the service, to confuse or wrongly compare the Mass with the original *Yasna* liturgy (which of course are two different things). The Nestorian practice of addressing part of the Mass to Christ specifically (Christ being for all intents and purposes part of the indivisible trinity), is mirrored in the *Yasna's* liturgical dedications to the *Sayoshant*, the 'Lord of the Resurrection', via the *Srosh Yast*. As in Western Europe we also hear of sacramental chalices brimming with milk and honey. Other explanations for these ritual similarities are few. Maybe some 1st to 4th Century writers, and oriental priests had become confused by elements of the mass, causing it to become corrupted in fringe regions. Perhaps other clergymen had taken it upon themselves to *ad lib* during the service to please the locals. But this was forbidden; Mass had to be performed exactly, in a ritually precise manner, to effect the transubstantiation of the bread and wine into the actual body and blood of Jesus Christ. Priestly training for the performance of Christian eucharistic ritual, a form of ancient mystery, was very precise. In any case, anecdotes bear the indelible stamp of 'heresy'.

In early Christian communities the presumed aim of the following excerpt from (NT) *St Paul in 2 Corinthians 11:3-4, 13-15* was to help believers distinguish between what form of priest and faith was authentic, acceptable and correct, and which were not.

*'For such are false apostles, deceitful workers, transforming themselves into the apostles of Christ. And no marvel; for Satan himself is transformed into an angel of light. Therefore it is no great thing if his ministers also be transformed as the ministers of righteousness; whose end shall be according to their works.'*⁷⁴²

Evidently the rival priesthoods outwardly resembled the apostolic Christian clergy in certain respects.

1. The heretics were also believers in Jesus, but espoused a different Gospel (the story of Christ's life)
2. The heretics had their own apostles.
3. The heretics dressed in attire so similar to the 'apostles' of Christ that they could be mistaken for them. This of course indicates that the 'apostles' of Christ dressed in a special manner. In the writings of

CHRISTIANITY WAS A
JEWISH-PAGAN
SYNTHESIS

ST PAUL SPEAKS OF THE
NAZARENES

Eusebius we learn that Christian bishops were robed and wore the mitre, a tall pointed bonnet in some ways reminiscent of those worn by the higher ranking Magi, also similar to those of medieval Rabbis.

St Paul seems to identify them as Jewish Christians, the Nazarenes.

Are they Hebrews? So am I. Are they Israelites? So am I. Are they the seed of Abraham? So am I. Are they ministers of Christ? (I speak as a fool, ie; in jest). 'I am more; in labours more abundant, in stripes (of the whip) above measure, in prisons more frequent, in deaths oft. Of the Jews five times received I forty stripes save One. Thrice was I beaten with rods, once was I stoned'.¹¹⁷⁴

SORCERERS ARE
CONDEMNED IN THE
NEW TESTAMENT? SOME
OR ALL?

But they weren't the only false-teachers. Sorcerers, perhaps the second wave of 'antichristians', are certainly consigned to hell in Greek versions of the *New Testament*. But which ones? Some? All? It becomes important to look at the exact words used. As you have tirelessly read throughout this book, the world of the magicians and wizards was exceedingly complex in terms of politics, philosophy and ritualism. Terminologies applicable to such figures are all-important, yet treated in a very cavalier fashion by modern translators. The oldest versions of the *New Testament* are all written in Ancient Greek, the evangelists' weapon of choice. Modern bible translations roundly condemn witches, sorcerers and magicians. As you are about to see, ill-informed translation practices put a very different spin on the words found in the original texts, probably deliberately contrived to make the *New Testament* faithfully emulate a pentateuchal exegesis.

GOETIA, RITUAL
DEMONOLATRY

For example *Goes* (from the word *goao*), meant 'a wizard', 'an impostor' or 'a seducer'.¹¹⁷⁵ From this also comes the term *Goetia*, a form of sorcery employing ritual inversion to procure the allegiance of devils.¹¹⁷⁶ This style of black sorcery was otherwise known as the condemned system of demonolatry, achieved through perversion, filthiness and love of demons. The Goetian art differed from ancient Chaldean demon-summoning in that it utilised sordid anti-ritualism to achieve its ends rather than high moral purity (of a sort allegedly known to King David), as in the latter case. To a certain extent the art of *Goetia* is akin to *Yatukih*, an art of black wizardry (as found among the heathen Chaldees) which the white Magi wanted stricken from the face of the earth. Its practitioners were, in their eyes, children born to the great demon himself, not created, but much rather miscreated as incarnate devils. It should be noted that western inquisitorial bodies in the medieval period encountered both *Goetia* and Chaldean interplay with demons on an ever-increasing basis, in addition to white magic. Collectively *Goes* represents a blunt attack only on black witchcraft, warlocks and maelific witches.

DIVINING IN A RAVING
TRANCE

Manteuomai ('to divine', 'to utter spells', with the insinuation that raving is an integral part of this art) is also found in the *New Testament*. This term is related to *mao*, or *mainomai*, meaning 'to rave like a madman'.¹¹⁷⁵ Evidently this form of divination took place during a disorderly, raving hyper-trance, perhaps to the recital of mantras. I will shortly discuss the inveighed rituals that promoted this particular style of prophesying.

WITCHCRAFT AND
HERBALISM

To do so we must first examine the word *pharmakon*¹¹⁷⁵ ('a physician who dispenses remedies', or alternatively 'a poisoner'), which, somewhat incredulously, is nowadays translated in the bible as 'sorcerer' or 'magician'. *Pharmakeia* ('medication') in turn becomes 'witchcraft' or 'sorcery' whereas it should better relate to plants and medicines dispensed by a druggist, whether a chemist or poisoner. Having said that various white witches, sorcerers and magicians were esteemed apothecars who healed a great many throughout antiquity with their ingenious natural cures, yet it is improper to apply *pharmakon* to the latter on a general basis. Are we then to believe that physicians and holistic herbalists are condemned to hell, or is the Bible attempting to decry certain practices known some two thousand years ago, but unknown today?

THE POWERFUL AND
TOXIC PLAND ACONITE

I believe the Bible is alluding to several drugs used by certain factions of Magi, in ritual libations; namely *ephedra* (from whence comes 'speed'), *hemp* (marijuana) and *bisina* (aconite). The mystical *bisina* rite effectively induced a form of near death experience, with the drug poisoning the mortal body so grievously that one's soul was catapulted into the ether, to see heaven or indeed the darkest nether regions. Depending on the dosage received a practitioner might have raved incoherently, and suffered convulsions and even premature death.

As a point of origin for this drug-induced necromancy we need look no further than Eurasia. Professor

O'Flaherty examined the use of the drug in the Hindu world. She equated the use of *visa*¹¹⁷⁷ (*bisina*) with the drink Brahmin ascetics gulped from the poisoned cup of Rudra. It drove Brahmins into a delusional state, allowing their soul to drift up into the etheric winds, on a wind-horse, to walk amongst the Gods. But, the treacherous God Rudra, the poisoner, was both good and bad - he could take the voyager's life en-route to the heavens. So on the strength of this it would appear that *bisina* could potentially cause the drinker to prophesy and chatter incessantly, in a state of ecstasy, blurting out conversation from the hereafter.

Magian scripture speaks of certain devil worshippers in their part of the world, the '*raging ones with dishevelled hair*', the servants of '*the Serpent*', the fury-drinking *Ashemaogha* (as mentioned in the *Avesta* and *Pahlavi* texts).

In the 4th Century AD Bishop Eusebius¹¹⁷⁸ recorded a fresh harvest of 'false-prophets' in Pontus Turkey, Christian heretics who '*raved and chattered*' uncontrollably in a state of disturbing ecstasy.

Bisina was known to Arabs too, further testifying to its Eastern origin. Al-Masudi records one instance of *bish* poisoning. In the cited case it was administered in wine. By his account *bish* is to be taxonomically identified with monkshood (aconite) and normally grew on the Indian sub-continent, as well as in Tibet or in Turkish areas.¹¹⁷⁹

Evidently it was being cultivated and used in pagan Russia too, just as it had been in India and Iran. According to Lozko, the heathen Russes drank a magical libation called *bisina*, made from *bis*,¹¹⁸⁰ a highly toxic plant extract easily able to kill the drinker. As it happens *bis* is mentioned in the Vedic and Avestan scriptures of the Hindu Brahmins and Iranian Magi, and there it is equated with the plant *Napellus moysis* - the very poisonous plant aconite. Magi held that *bis* was '*the height of hemp*' in potency, well used to converse with spirits, or as a necromantic substance that facilitated the summoning of demons and angels. It was as if a door to the other side were suddenly wrenched open, leaving the practitioner open to commerce with good and evil spiritual beings.

The *Primary Chronicle* mentions a pagan Russian magician calling demons while lying on the ground.¹¹⁸¹ We do not know what empowered him to do so. Perhaps it was a gift imparted to him at birth through his bloodline, or a facet of shamanism, but it might also have been prompted by *bisina*. In Old Russian, *bes* meant 'a demon', and *besedovat'* meant 'to talk or chat with something'. Perhaps *bisina* allowed the pagan Russes to talk with demons. For all we know *bisina* users may also have utilised additional equipment in their arts mirrors, crystals or cauldrons of oil or water, in conjunction with the *bisina* infusion.¹¹⁸² This inference is all the more reasonable considering that pagan Russians possessed books on mirror and crystal divination, though we are none the wiser as to the contents of these texts.

These rituals seem to have percolated into Europe from the Asian fringe. So not surprisingly aconite is commonly associated with medieval witches, and appears repeatedly in a number of European witch trials.¹¹⁸³ Prosecution documentation indicates that monkshood was not typically drunk during their sabbaths, but absorbed into a witch's bloodstream through the skin in a controlled manner, after the application of an unguent laced with aconite. After this the witches mystically flew to the other world.

Similar methods were supposedly used by Nostradamus during the Renaissance. He reportedly used an unidentified substance to help him reach heightened states of alternative consciousness, as he peered into a bowl or cauldron of water. The substance he relied on was dangerous, perhaps the highly toxic *bisina*.

We are most fortunate that an original *bisina* ceremony (as performed by witches and magicians) was preserved in the Magian *Book of Arda Viraf*, at a time when their religion was at the point of collapse under Islamic domination. It provides glimpses of the *bis* ceremony, the abject fear associated with the laced tincture, and the spiritual ecstasy and flight accompanying the rite. What you are about to read is an amazing tale about a gathering of wizards at a fire shrine in the highlands of Islamic Iran. Similar clandestine assemblies took place under the nose of Church authorities in medieval and renaissance Europe. There they were vigorously suppressed by witch-hunting authorities especially where witches were discovered flying by the power of aconite-based ointments.

*'there were other Magi and Dasturs of the religion; and some of their number (clearly not all) were loyal and apprehensive (probably signifying that the bisina ceremony was officially frowned upon by the Zoroastrian priesthood, and here conducted only under the gravest of circumstances).'*¹¹⁸⁴

The Dastur high priest commanded '*it is necessary for us to seek a means, so that one of us may go, and bring intelligence*

from the spirits' as to whether the Magi's elaborate rituals, prayers and customs 'attain unto God, or unto the demons, and come to the relief of our souls, or not.'¹¹⁸⁴ In other words to obtain spiritual proofs as to whether the Magian faith was, at that time, good or evil.

Magian believers were summoned from outlying regions to muster at the glorious Frobag fire temple, thought to have been situated in Fars Persia, or Afghanistan. Seven men were selected from among the congregation, seven men good, blameless, respected and true. From this group they singled out one man, a very reluctant Arda Viraf from the Iranian city of Nishapur.

'Viraf, as he heard that decision, stood upon his feet, joined his hands on his breast, and spoke thus: 'If it please you, then give me not the undesired narcotic till you cast lots for the Mazdayasnians and me'.¹¹⁸⁵ The very thought of taking the brew and participating in the spiritual journey left him petrified. He felt comfortable participating in the rite only if they 'drew straws', so to speak, thereby mitigating whatever sin might originally have been associated with the ritual; and if the lot come to me, I shall go willingly to that place of the pious and the wicked, and carry this message correctly, and bring an answer truly.'¹¹⁸⁵

Viraf lived with his seven sisters as though they were his wives. Contrary to Parsee practice Viraf seems to have married within his nuclear family. Perhaps this was once acceptable, however catastrophic losses among the faithful, whether through migration, conversion or other forms of attrition, may have left them with no other option but to tie the knot with immediate family. So his sisters were understandably upset at the thought of him undergoing such a dangerous ordeal.

They said to the high priests *'Should you send him, before his time, from this realm of the living to that of the dead, you will commit an injustice on us without cause.'*¹¹⁸⁶ (ie; if he dies on the other side, our lives will be destroyed). The priests promised that he would return to them seven days hence in good health.

Viraf assented to the conclave's request, and made ready for the mystical odyssey stating: *'It is the custom that I should pray to the departed souls, and eat food, and make a will* (ie; by imbibing the aconite there was every expectation of death); *afterward, you will give me the wine and narcotic* (ie; the bisina).*' The Dasturs directed thus: 'Act accordingly.'¹¹⁸⁷ (Here the ritual is not only authorised by the high wizards, but ordered to proceed). The recipient of the narcotic had to be a safe distance from the congregation to prevent spiritual contamination. *'And afterward, those Dasturs of the religion selected, in the dwelling of the spirit, a place which was thirty footsteps from the good'¹¹⁸⁸**

'And Viraf washed his head and body, and put on new clothes; he fumigated himself with sweet scent and spread a carpet, new and clean, on a prepared couch. He sat down on the clean carpet of the couch, and consecrated the Dron, and remembered the departed souls, and ate food'.¹¹⁸⁸

VIRAF DRANK THE LACED
WINE

Here he performs the three-day dron ritual, normally done at funerals to invoke Sraosha the Redeemer's protection on the other side. *'And then those Dasturs of the religion filled three golden cups with wine and narcotic of Vishtasp* (here aconite is mythically associated with the legendary King Vishtasp); *and they gave one cup over to Viraf with the word 'well-thought,' and the second cup with the word 'well-said,' and the third cup with the word 'well-done'; and he swallowed the wine and narcotic, and said grace whilst conscious* (it probably took effect rather quickly), *and slept upon the carpet'.¹¹⁸⁸*

HE FELL INTO A DEEP
SLUMBER, POSSIBLY A
COMA

Throughout his absence of spirit, a crew of magicians, deacons and Viraf's own next-of-kin stood watch over his inert remains, tending the holy fire, burning incense, reading prayers, chanting. The rite lasted a full week, leaving Viraf comatose for the entire period.

'And the soul of Viraf went, from the body, to the Chinwad bridge of Chakat-i-Daitik, and came back the seventh day, and went into the body. Viraf rose up, as if he arose from a pleasant sleep, thinking of Vohuman and joyful'.¹¹⁸⁹

VIRAF CROSSED OVER
INTO HEAVEN AND HELL

All the onlookers were extremely happy to see him return from the other side alive and in one piece. The Dasturs asked Artay to recount whatsoever he had seen on the other side, his bizarre visions of angels and demons.

But before they set to work they ordered he be properly nourished.

The Dastur summoned a scribe to make a faithful record of his spiritual journey ‘and he wrote correctly, clearly, and explicitly’. The remainder of the *Book of Arda Viraf* is composed of surreal imagery from the kingdoms of light and darkness, so vivid that they would do justice to any of Bosch’s paintings.

In short the Bible’s condemnation of *pharmakon* most likely refers to the ritual use of narcotics (such as those employed in Magian war libations), poisoning in general, and the controversial ceremonial use of aconite in particular. The only other interpretation is that doctors, herbalists and chemists rank amongst the damned. White witches, it seems, aren’t specifically mentioned at all.

As part of its spectrum of boogey-man terminology, the *New Testament* also employs the words *mageia* (‘magic’) *mageuo* (‘to practice magic’), which come from *Magos*, and which means, in the Greek, ‘a wise man’, ‘a Magian’ or ‘a scientist’, ‘the three wise men who came to Bethlehem for Christ’s Epiphany’.¹¹⁷⁵ By no small sleight of hand, the word term *Magoi*, as used in the *Book of Matthew* is mysteriously expanded in English translations as ‘kings’, or ‘astrologers’ when it should really read ‘Magi’. Three Wise Kings in turn becomes Three Wise Magi (ie; white wizards). As a result the lay reader remains oblivious to the true identity and likely religious practices of Christ’s most distinguished guests. In this biblical episode the Magi are not condemned in any way by Mary or Joseph. We don’t see Matthew lead off on a trail of invective like “and that was the first time the godless heretics dared to appear before us”. Evidently certain Magi were acceptable to the holy family. *Magos* now becomes a complicated issue for Christians because the term is found twice elsewhere in the *New Testament*, but unfavourably so.

The first refers to a Bar-Jesus, an Elimas, and then there was Simon the Samaritan. ‘Simon magus’ is castigated as bound for perdition in no uncertain terms. Later Christian apocrypha (eg; the *Acts of Peter*), the writings of the Church’s first heresiographers (eg; Irenaeus and Hippolytus), plus Eusebius record enough of Simon’s teachings to uncontestably prove that his art was unrelated to Magian ceremonials ... he was a pagan Gnostic sorcerer.

Now we must probe the issue still further to ascertain what schools of Magi Elimas and Simon belonged to. Many philosophical camps of Magi existed throughout antiquity. Not only did many not agree with each other’s teachings, some were repulsed and outright antithetical to the magical practices of other philosophers, and especially to the enforcement of the new Sassanian orthodox vision instituted in the 4th Century AD. The Persian Emperor Shapur II’s royal edict for the entrenchment of Orthodox Zoroastrian religious teachings meant royal backing for a repressive crackdown. Insofar as the Magi are concerned not everyone found the changes tolerable. Now ‘different groups, schools and sects’¹¹⁹⁰ had fallen on the King’s bad side.

Μαγιστεία, which specifically relates to the art of the Magi is seldom found in the New Testament, appearing only in the *Book of Matthew* with reference to the Persian Magi (who were spoken of in the most favourable terms), and in *Acts 13: 6,8*. The latter passages read as follows:

“And when they had gone through the isle unto Paphos, they found a certain Magus, a false prophet, a Jew, whose name was Bar-Jesus”.¹¹⁹¹ Here the false Magus seems to be one of the Jewish Magi, and consequently at variance with the Persian Magi on a number of points. This might account for why the apostles saw him differently from the Three Wise Men. Jewish Magi are possibly referred to in (NT) *Acts 19*, though the term *Magos* is nowhere to be seen in this portion of text. “Then certain of the vagabond Jews, exorcists, took upon them to call over them which had evil spirits the name of the Lord Jesus, saying, We adjure you by Jesus whom Paul preacheth. And there were seven sons of one Sceva, a Jew, and chief of the priests, which did so. And the evil spirit answered and said, Jesus I know, Paul I know; but who are ye? And the man in whom the evil spirit was leaped on them, and overcame them, and prevailed against them, so that they fled out of that house naked and wounded. And this was known to all the Jews and Greeks also dwelling at Ephesus; and fear fell on them all, and the name of the Lord Jesus was magnified. And many that believed came, and confessed and shewed their deeds. Many of them also which used curious arts (evidently tomes of Jewish and Greek pagan Gnostic sorcery, black in nature) brought their books together and burned them before all men”.

“But Elymas the Magus (for so is his name by interpretation) withstood them, seeking to turn away the deputy from the faith”.¹¹⁹² The situation is less clear in this instance. Elymas’ name is suggestive of an Aramaic connection, but this doesn’t narrow him down as a Persian, Chaldean or Assyrian.

Panning back several hundred years, from Persia to Judah, we can see some of the unusual philosophical forms

A SCRIBE RECORDED
WHAT HE SAW

MAGIC

JEWISH MAGICIANS ARE
THE POSSIBLE OBJECT OF
THIS NEW TESTAMENT
PASSAGE

adopted by Magians in the far-flung reaches of the former Persian Empire. Professor Thiering describes Simon magus as a prominent head-magus immersed in Graeco-Jewish gnostic magical traditions. Such a scenario is barely surprising. After all Judah had long been under Persian sway in times past, but passed over to the Greeks after Alexander the Great's armies won Jerusalem. Vestiges of both these former civilisations never entirely died away, dwelling, as it were, in Samaria, among the Magian Samaritans of West Manasseh.¹¹⁹³ Simon's Magianism may have been of a more unorthodox kind, a cross-synthesis of Jewish kabbalism and Hellenic pagan gnosticism, liberally immersed in *legerdemain* (the performance of stunning illusions through chicanery and an enhanced knowledge of science), which though marvels, were not considered miraculous in the true sense, though having their outward appearance.

Biblical and pagan gnostics held the spiritual world as superior to the physical. It necessarily followed that Christ's human incarnation was an insolent lie, theoretically impossible since deities and inviolate spiritual beings could never enter the base state of flesh, only daemones. Gods could and did come to earth but only in the spirit. Elsewhere in the pagan world incarnate deities are more familiar to the likes of Hindus, Buddhists and Magians.

Gnostic spiritualism and its gloomy contempt for the physical world, was definitely on the outer with the apostles, something alluded to by St Paul when he said '*every spirit that confesseth not that Jesus Christ is come in the flesh is not of God: and this is that spirit of antichrist*'¹¹⁹⁴ What he is really doing here is giving gnosticism a silver bullet. By default Manichaeism takes the same round to the back of the head.

So Simon Magus is an improper epithet. He is more properly Simon the Samaritan or, as can be demonstrated, Simon the gnostic sorcerer. But in contradiction to this, Simon was supposedly worshipped in the flesh at his temple on the Tiber River in Rome, called *Sanco Deo*, the Holy God.

Nor indeed do we find extensive Christian anti-Magian texts in those formative years. I for one find this very surprising, particularly when you consider that Magi were a Persian priesthood, serving a state enemy of Rome. It seems only certain types of Magi drew the negative attention of the apostles.

Despite these many similarities and theological inconsistencies one thing can be emphatically stated. If the Apostolic Church and Christianity really did owe *part* of their genesis to an admixture of Jewish, Chaldean and Iranian religious thought, resulting from the mass conversion of Chaldeans, Zoroastrians and Zurvanites and their white Magi during the very first years of Christianity, *the truth of it had long been forgotten, seemingly lost without a trace*. It might have been a very fearful discovery during the Middle Ages, if indeed it was not already known within the inner sanctum. So I will now examine compelling explanations for these similarities.

WERE THE FIRST
CHRISTIAN PRIESTS
ZOROASTER'S LONG LOST
FIRE-PRIESTS?

1. The Church priesthood was a long lost branch of the Mithraic brotherhood or the wise white Magi. This argument simply doesn't hold water, mainly because there are just so many fundamental differences in points of doctrine and ritual, unacceptable to conventional Magians. Neither Zoroaster's name, nor the name of any Iranian angel or *fravashi* is represented in the *New Testament*.

DID THE SIMILARITIES
COME ABOUT THROUGH
AN ACCIDENTAL FUSION
OF BELIEFS?

2. The Church was a freak of history, *resulting from an accidental fusion* of Jewish and 'pagan' religion. The process of conversion is a very haphazard thing, especially where it takes place over a broad expanse of the earth's surface across an incredibly long period of time. So this is a very distinct possibility. Nonetheless there are just too many biblical references regarding extremely important concepts found in 'pagan' scripture to deny that there was not at least a formal acquisition of important elements of Zoroastrian dogma by the Apostles no less, and at the highest levels of the Church, during its earliest period. These things were so important that they decided to formally incorporate them into the Church's magisterium (articles of faith). Magian converts were the most likely cause of any accidental fusion of Christianity and Magianism. Looking at the Armenian or Anglo-Saxon conversion experience yields valuable clues as to how the Christianisation of the Magian pagans occurred in Britain and the Caucasus. In Armenia and England *the pagan priests and flamens swapped straight over as Christian clergymen*.¹¹⁹⁵

EARLY PRIESTS MIGHT
HAVE ENHANCED THE
BIBLE BY ADDING
ELEMENTS WHICH WOULD
BE ATTRACTIVE TO
PROSPECTIVE PAGAN
CONVERTS

3. After discovering that the Jews were hardly interested in Christ's message, the Church might have chosen to use pagan 'stage-props', as well as prayers and doctrines that were similarly worded to Magian writings,

as a missionary ploy to opportunistically cash in on the Middle East’s residual Zoroastrians more easily. Again a possibility, but if the oriental traditions found in the Gospel were merely ideological putty to be played with freely, why were they adopted to the point of constituting an official ‘dogma’ or amendment to Christian scripture with Magian phraseology. Magian philosophical concepts and certain portions of Iranian scripture appear to have been reproduced in the *New Testament*. Occasionally these were things recorded in the Bible as being uttered by Christ himself.

4. Perhaps *Christianity itself was an offshoot heresy of the Magian religion*, though I consider this most unlikely. Christianity, or at least a major faction of clerics (including apostles) spent the first couple of hundred years trying to keep the Magi out of the priesthood. For them, the magus, his stars, his floggings and fire temples were in no way fitting intercessors before God, and nothing whatsoever to do with the faith. *At every stage of its history powers within the Church pursued and destroyed the Magi*. If Christianity was a Magian heresy of the first magnitude (which is what the Sassanians saw it as), it seems strange that the Church directed its every efforts toward the unthinkable, the destruction of their groves, fire temples, prayers, and the all-important priestly family bloodlines, who were burned at the stake. In short Christianity, in unison with Islam, dismantled Magianism through public humiliation, introducing laws favouring the new order, all artfully designed to elicit conversions lest they suffer social isolation, poverty and physical attack.¹¹⁹⁶

5. Perhaps the Christian priesthood had been infiltrated by the white Magian-Christians at some time during the early Middle Ages, and the original message of the Church hijacked and obscured by a mist of Magian traditions imported by the usurpers. While there is some evidence for serious Magian incursions into the Church between the 6th and 12th Centuries AD, it should be noted that many of the Magian parallels had been there from the beginning of the Church, enshrined within the scriptures. Unless of course one was to speculate that these ‘heretics’ had rewritten the Bible to suite their tastes. Yet if this scenario were true we would expect to see a validation of Magian views and customs by a brazen mention of Zoroaster’s name, *and an even deeper revelling in Zoroastrian thought and religiosity*, which is lacking. For instance, where are *kustik* belts, sacred shirts, holy porridge, *Haoma* libations, penitential whippings, and sin payments mentioned in the *Bible*? The answer is you won’t find them. Accordingly there is absolutely no chance that such hypothetical textual falsifications ever took place, much less went unnoticed until this very day. If they had done so, these Magians would logically have done far more damage, so to speak, to the texts, rendering them far more Magian in nature.

6. Some fundamentalists will see the Zoroastrian scriptures are ‘a plant by the Devil’ sent to deceive Christians, and vice versa the Bible a vessel of Ahriman sent to decimate the Zoroastrian flock (or what’s left of it).

7. It’s all a coincidence, a product of universal consciousness. I’m not going to even bother commenting on this option. Could this ever be a convincing argument for such a broad cross-section of corroborative material?

8. *Sraosha* and the Jewish Messiah were one and the same person, and as a result, Christianity was carefully designed to cater for the sensibilities of both Jews and pagans (Magians). The Bible tells us that Christ hoped to bring the Gentiles into the Father’s faith. This option is a purely philosophical argument.

9. The Christian faith was a totally new religious vision, *resulting from an official fusion of carefully selected elements of the Jewish and the Zoroastrian faiths*, a fusion which ultimately stemmed from the Messianic beliefs of both religions, fundamental links which may or may not have been apparent to the apostles before they set out on their first missions in the East. What is more certain is the overwhelming reception they did receive once they arrived. For proofs as to whether this occurred during the first two hundred years of the Church, we can look to official Church teachings, historical documents and the *New Testament*, and then compare them with the *Old Testament*, the *Avesta* and *Pahlavi books*. In doing so we find very many things that are almost identical, yet witness the absence of crucially important Magian doctrines and practices (from the *Avesta* and *Pahlavi* writings), which the apostles decided not to include in the *New Testament*, jettisoned as being unacceptable to Christianity, especially their dearest rituals.

THE SON OF MAN

Only the final option appears capable of withstanding sustained scrutiny. Evidence for such a methodology in the formation of the *New Testament* can be found in the *Book of Jude*. In it the apostles had no qualms incorporating a select quotation from the *Book of Enoch*, though the full book of 'Jewish apocrypha' was considered heretical. It conclusively proves that the infant Apostolic Church was willing to authorise portions of nominally heretical sources as part of the Church's beliefs, but beyond that the further acquisition of customs and scriptures from those same sources was deemed heretical and very unholy. Another prominent element of the *Book of Enoch* found pride of place in the main body of the Gospels, namely the "Son of Man" an epithet Jesus himself used in reference to himself. Now the *Book of Enoch* was compiled some time around 200 BC and set in a period after Noah and his sons extricated themselves from the great flood. It therefore predates Christianity and Judaism for that matter. While Kabbalists cared for the text there is no reason to specifically associate it with Judaism since not a single Jewish patriarch is recorded, although Jewish archangels such as Michael, Gabriel and Raphael are mentioned.

This apocryphal apocalyptic text extols the virtues of this Son of Man *"This is the Son of man who is filled with goodness with whom goodness lives, and who reveals all treasures that are concealed, for the Lord of Spirits chose him ... Yes, before the sun and the signs were created, before the stars of Heaven were made, his name was named before the Lord of Spirits. He will be a staff to the good to stay themselves and not fall, he will be the light of the Gentiles, and the hope of those who are troubled of heart ... And so he was chosen and hidden before God, before the creation of the world and for eternity. The wisdom of the Lord of Spirits has revealed him to the holy and the good, for he preserved the good"*.¹¹⁹⁷

The "Son of Man" will be present at the Resurrection, at the side of the Lord of Spirits. Here are but two Gospel references to the Son of man.

"Again the high priest asked him, and said unto him, Art thou the Christ, the Son of the Blessed? And Jesus said, I am: and ye shall see the Son of man sitting on the right hand of power, and coming in the clouds of heaven. Then the high priest rent his clothes, and saith. What need we any further witnesses? Ye have heard the blasphemy; what think ye? And they all condemned him to be guilty of death. And some began to spit on him, and to cover his face".¹¹⁹⁸

"The Son of man shall send forth his angels, and they shall gather out of his kingdom, all things that offend, and them which do iniquity; And shall cast them into a furnace of fire; there shall be wailing and gnashing of teeth".¹¹⁹⁹

There can be little doubt certain aspects of the *Old Testament* were used, in an instructional sense, to identify Jesus as the Messiah, but an even more significant proportion appears derived from Magian sources. But this is never spoken of, mostly for political reasons.

Upon his resurrection Christ spoke to those who went to his empty sepulchre saying; *"Beginning at Moses and all the prophets, he expounded unto them in all the scriptures the things concerning himself (ie; those Jewish scriptural references pointing to Christ's Messiahship)"*.¹²⁰⁰ It was therefore improper for Christians to entirely do away with the Old Testament inside the new faith. Yet by the same token it was impious to slavishly peruse the Torah for all the answers for earthly conduct.

Building further on this argument, if the apostles experienced no disquiet resorting to Enochian phraseology, it is equally plausible they adopted a similar stance in relation to certain aspects of Magian scripture. Hence the countless elements of Zoroastrian thought in the gospel, and analogous sacramental observances in the primitive and medieval Church. And as for why the name Zoroaster does not appear at any time in the *New Testament*; this might be directly attributed to false assertions made by Plutarch and the Greek philosophers that Zoroaster recommended sacrificing to God and the Devil.¹²⁰¹

The *New Testament* provides written proof for a new way of thinking, a sort of fellowship between the pagans and the Jews under the single banner of a common Messiah responsible for saving them from the hungry grave. This might be what St Paul speaks of when he says *"Where there is neither Greek nor Jew, circumcision nor uncircumcision, Barbarian, Scythian, bond nor free; but Christ is all, and in all"* (Colossians III:11). But in practice the heathen converts ended up with the raw end of the deal, ideologically speaking. Jesus evidently did not treat the nearby Samaritans with the same open contempt as mainstream Jewry. On the contrary. The parable of the Good Samaritan is a particularly fine example of how magnanimously good a Samaritan might be to his neighbours.

Elsewhere, in *John IV*, Jesus runs into a Samaritan. At first meeting the Samaritan woman recoils in shock. Jesus is clearly signposted as a Jew, and this demanded little or no contact between them. Instead of being elitist Christ asks her for a drink, and chatted about their common ancestor Jacob. Following Jesus' supernatural visions about her multiple live-in male partners, the woman ran back to her village and returned with a vast throng of potential converts. In a short time many were convinced that Jesus was 'the Saviour of the world', or as I see it one with a role every bit similar to that of *Sraosha*. With respect to the Samaritan nation, Jesus explains to his disciples that, "One man sows, another man reaps." I have sent you to reap a harvest in a paddock where you did not work (ie; where you never preached); others worked there (ie; the Magi), and you profit from their work'.¹²⁰²

What he is really saying, I believe, is that the Magi had sown the seeds of their Iranian apocalyptic and messianic doctrines throughout Samaria in the past, and it was Jesus and his disciples who would reap the full benefit of their crop. Jesus concludes the parable by saying 'the man who sows and the man who reaps will be glad together'. This resulted in the formation of two different Christian Churches, one of the circumcised, the other Gentile. St Paul wades even deeper into the heart of the matter.

*'Even the mystery which hath been hid from ages and from generations, but now is made manifest to his saints: To whom God would make known what is the riches of the glory of this mystery among the Gentiles (ie; the non-Jewish heathens).'*¹²⁰³

*'Which in other ages was not made known unto the sons of men, as it is now (in the form now) revealed unto his holy apostles and prophets by the Spirit; That the heathens should be fellow-heirs, and of the same body, and partakers of his promise in Christ by the Gospel: whereof I was made a minister ... that I should preach among the heathens the unsearchable riches of Christ; and to make all men see what is the fellowship of the mystery, which from the beginning of the world hath been hid in God, who created all things by Jesus ... to the intent that now unto the principalities (heavenly kings, departed princes, magistrates and so forth) and powers in heavenly places (archangels) might be known by the church the manifold wisdom of God.'*¹²⁰⁴

I want to focus your attention on St Paul's term of phrase "this mystery among the Gentiles". Evidently he is referring to a set of sacred gentile mysteries or teachings (traditionally occult (meaning 'secret')), that exist among the Gentiles (ie; Aryan gentiles!), which God had for so long concealed "from ages and from generations", but revealed to his saints on earth. Not content with mentioning it once, Paul yet again refers to "the fellowship of the mystery, which from the beginning of the world hath been hid in God".

That is not to say that everything ran smoothly, or that the full number of apostles were magnanimously in agreement. We get a glimpse of this jockeying for political and theological control of the nascent Church in the *New Testament*.

*'Now I beseech you, brethren, by the name of our Lord Jesus Christ, that ye all speak the same thing, and that there be no divisions among you; but that ye be perfectly joined together in the same mind and in the same judgment. For it hath been declared unto me of you, my brethren, by them which are of the house of Chloe, that there are contentions (divisions and arguments) among you. Now this I say, that every one of you saith, I am of Paul (St Paul); and I of Apollos (St Apollos); and I of Cephas (St Peter); and I of Christ. Is Christ divided? was Paul crucified for you? or were ye baptized in the name of Paul?'*¹²⁰⁵

St Paul was the rookie apostle, a Jew by birth, and a Roman citizen, deputised in a divine vision to preach the Gospel among the *goyem*, the heathen gentiles. In some of his writings he explains his mission.

'But I certify you, brethren, that the gospel which was preached of me is not after man (ie; not a single apostle conveyed this to me). For I neither received it of man, neither was I taught it, but by the revelation of Jesus christ. For ye have heard of my conversation, in time past in the Jews' religion, how that beyond measure I persecuted the church of God, and wasted

ST PAUL SPEAKS OF A SACRED MYSTERY AMONG THE GENTILES WHICH HELPS EXPLAIN THE CHRISTIAN FAITH

IT, LIKE THE EARLY CHURCH, WAS SECRET OR "OCCULT" IN NATURE

PAUL'S MISSIONS WERE CONDUCTED SOME DISTANCE FROM JERUSALEM

it: And profited in the Jews' religion above many my equals in mine own nation, being more exceedingly zealous of the traditions of my fathers. But when it pleased God, who separated me from my mothers' womb, and called me by his grace, to reveal his Son in me, that I might preach him among the heathen'.¹²⁰⁶

To begin with Paul didn't spend much time in Jerusalem, he was busy trekking about the northern countryside talking to pagans of varied traditions - Greek pagan gnostics, Chaldeans and Zoroastrians. His travel itinerary included Arabia and Syria, then back to Jerusalem, where he touched base with Peter and James. There was not another apostle to be seen; all of them, with the exception of these two, had departed the Holy City, and were out preaching to the pagans. *'Now the things which I write unto you, behold, before God, I lie not'*. Peter and James hadn't even left the city! It was as if their Gospel belonged only in Jerusalem. Paul proceeded on his way once again, venturing up into Syria and Cilicia for a very long time, and on account of this *'was unknown by face unto the churches of Judaea which were in Christ'*

'Then fourteen years after I went up again to Jerusalem with Barnabas, and took Titus with me also And I went up by revelation, and communicated unto them that gospel which I preached among the Gentiles, but privately to them which were of reputation, lest by any means I should run, or had run, in vain. But neither Titus, who was with me, being a Greek, was compelled to be circumcised; and that because of false (judaising) brethren unawares brought in, who came in privily to spy out our liberty which we have in Christ Jesus, that they might bring us into bondage'.¹²⁰⁷

PETER AND PAUL HAD A
FALLING OUT

This private council was, as it were, a debriefing, where the rough and ready Paul brought Peter up to speed about what had happened far outside Jerusalem's sway throughout the previous fourteen years, his latest and busiest round of missionary work. Already, with impeccable insight, he could sense the Jewish brethren were trying to exert a controlling interest in how things were to unfold.

"And when James, Cephas and John, who seemed to be pillars (of Christ's faith), perceived the grace that was given unto me, they gave to me and Barnabas the right hands of fellowship; that we should go unto the heathen, and they unto the circumcision (Jews)'.¹²⁰⁸

Appearances were deceiving, as Paul was soon to discover in Antioch. His fellow apostles treated him and his associates differently in public than in private. It was as though he and the other preachers to the Gentiles were being double crossed about the future direction of the Church;

HE WAS ANGERED ST
PETER THE APOSTLE WAS
TRYING TO PUSH JEWISH
CUSTOMS ONTO GENTILE
CONVERTS

'But when Peter was come up to Antioch, I withstood him to his face, because he was to be blamed. For before that certain (apostle) came from James (back in Jerusalem), he did eat with the Gentiles; but when they were come (the Jewish brethren), he withdrew and separated himself, fearing them which were of the circumcision. And the other Jews dissembled likewise with him; insomuch that Barnabas (a preacher to gentiles) also was carried away with their dissimulation. But when I saw they walked not uprightly according to the truth of the Gospel, I said unto Peter before them all, If thou, being a Jew, livest after the manner of Gentiles, and not as do the Jews, why compellest thou the Gentiles to live as do the Jews?'¹²⁰⁹

EFFECTIVELY THERE WERE
TWO CHURCHES IN THE
BEGINNING - ONE TO THE
JEWS THE OTHER OF THE
GENTILES

You can almost hear him speak, his testy, terse words reverberating throughout 2,000 years of Church history. What in the hell's going on Peter? Are the heathens part of our Church or not? What are you playing at? Where are you taking us? This is not what Jesus wanted from his ministers, converting the Church into a Jewish clone. That's the past. Although we are born Jews we're supposed to live like heathen Gentiles! The concept of a Catholic (ie; universal) church was on the line.

What this scripture collectively describes is the makings of a major division in the early Church. It was small at first, but as time progressed, some time between the 2nd and 3rd Century AD, it grew into a schism of dire proportions, so much so that by the time you reach the first universal synod in Byzantium, the Arian, or as I believe

Aryan Christians, were in the absolute minority, and could be picked off at will. The very existence of this synod was permitted by the cessation of Roman persecution against Christians, but paradoxically it arose during the period of Sassanian repression against followers of Jesus. So it is doubtful that Persian prelates were able to attend in any significant numbers. If they did the whole event may have turned out very differently. In that first apostolic generation it was like a snowball rolling down hill, picking up more mass and volume as it gained momentum, rolling on and on, until Judaeo-Christianity prevailed, until at last it comes to an abrupt stop ... in the burning times of medieval Europe.

Paul warned the like; *'But though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed'*.¹²¹⁰ Here he pronounces anathema against Judaisers who do not believe the Gentile has any place in Christ's salvation or his Church. Paul repeatedly drills his readership about the acceptability of his missions to the Gentile nations.

"And the next Sabbath day came almost the whole city together to hear the word of God. But when the Jews saw the multitudes (including quite a large number of Gentiles), they were filled with envy, and spake against those things which were spoken by Paul, contradicting and blaspheming. Then Paul and Barnabas waxed bold, and said, It was necessary that the word of God should first have been spoken to you: but seeing ye put it from you and judge yourselves unworthy of everlasting life, lo, we turn to the Gentiles. For so hath the Lord commanded us, saying, I have set thee to be a light of the Gentiles, that thou shouldest be for salvation unto the ends of the earth. And when the Gentiles heard this, they were glad, and glorified the word of the Lord: and as many as were ordained to eternal life (ie; whose names were already recorded in the Book of Life at the beginning of time) believed".¹²¹¹

From the *New Testament* and bishop Eusebius' writings it becomes clear that Jews were widely seen as a powerful minority group in the ancient Universal Church, by far the greater bulk of believers drawn from converted heathens. As if to convince a disbelieving audience, Eusebius states *'I have received documentary proof of this, that up to Hadrian's siege of the Jews there had been a series of fifteen bishops there'*.¹²¹² These particular prelates were all ethnic Jews, and their religious reign in Jerusalem, however brief, lasted until they were wiped out during the Roman assault. By his testimony the apostles deemed them appropriate for the position of bishop. Here the very presence of a Church in Jerusalem seems to have required persuasive arguments on Eusebius' part. The notional existence of scripture with an overly Jewish flavour seems to have been bitterly unpalatable in certain quarters too. Eusebius tells us that *'...some have found a place in the list (of accepted scripture) for the 'Gospel of the Hebrews', a book which has a special appeal for those Hebrews who have accepted Christ'*.¹²¹³ Eusebius went on to say that this particular gospel was familiar within ecclesiastical circles, but by no means used by all, yet not considered heretical.

Some biblical passages assumed a whole new meaning when viewed from a Manichaean or Magian Christian position. To them, aspects of Christ's teachings could only appear riddled with Magian tradition, expounding the advent of the 'Deliverer'.

'Then spake Jesus again unto them, saying, I am the light of the world: he that followeth me shall not walk in darkness, but shall have the light of life. The Pharisees therefore said unto him, Thou bearest record of thyself; thy record is not true. Jesus answered and said unto them. Though I bear record of myself, yet my record is true: for I know whence I came and whither I go; but ye cannot tell whence I come and whither I go. Ye judge after the flesh; I judge no man. And yet if I judge, my judgement is true: for I am not alone, but I and the father that sent me. It is also written in your law, that the testimony of two men is true. I am one that bear witness of myself, and the Father that sent me beareth witness of me.' To this the rabbis replied *'Where is thy father?'* Jesus said *'Ye neither know me, nor my Father'*.¹²¹⁴

Two points emerge in this passage. Firstly Jesus speaks of rabbinical law as *'your law'*, just as he spoke of synagogues as *'your synagogues'*. Christ then divulges that the Jewish priests didn't know the identity of the Father in heaven. If they did, they would have realised who Jesus was. So far Jesus doesn't sound very rabbinical, especially in his fierce anger toward the temple authorities. In Magian rhetorical speech serpents are mightily associated with

apostasy, for it is into snakes that apostates transformed after death, upon their arrival in the abyss. Christ's condemnation of the Rabbis *'Ye serpents, ye generation of vipers, how can ye escape the damnation of hell'*, might therefore be interpreted as *'You apostates, you nest of apostates, how can you escape the damnation of hell'*.

After listeners at the Temple refused to embrace Christ's message, Jesus said to these Jews, who claimed to be descendants of Abraham:

JESUS CONDEMNS THE
RABBIS

*'Ye are of your father the devil, and the lusts of your father ye will do. He was a murderer from the beginning and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it. He that is of God heareth God's words: ye therefore hear them not, because ye are not of God. And because I tell you the truth ye believe me not ... He that is of God heareth God's words: ye therefore hear them not, because ye are not of God.'*¹²¹⁵

*"Woe unto you, scribes and Pharisees, hypocrites! for ye compass the sea and land to make one convert, and when he is made, ye make him twofold more the child of hell than yourselves".*¹²¹⁶

JESUS INSIDIOUSLY TRIED
DURING THE THICK OF
NIGHT

Jesus retorted that the Jews belonged only to this world. They replied with the comment *'Say we not well that thou art a Samaritan, and hast a devil?'* These same temple priests would later be present at his trial. Christ again scripturally associates with the dark side, for when they sent guards to collect Jesus from the Garden, pending his trial in the thick of night, Christ states *'but this is your hour, and the power of darkness'*.¹²¹⁷ In Magian lore the devil's time begins after sundown.

Jesus was especially inundated by curious natives of Jerusalem on another occasion, wanting to know if he was the Messiah, and hear it from Christ's own mouth. His reply to such an eager crowd is surprisingly blunt. *"I told you and ye believed not ... the works that I do in my Father's name, they bear witness of me ... ye believe not, because ye are not of my sheep, as I said unto you. My sheep hear my voice, and I know them, and they follow me"*.¹²¹⁸

SOME OF CHRIST'S
PARABLES SHIELDED A
SECRET BODY OF
TEACHING FROM THE
UNINITIATED

Jesus' often agricultural parables (eg; (NT) Matthew 13) were clearly intended to reach a certain target audience, 'children of God' who were in all likelihood folk familiar with eastern dualistic traditions. Those who were not his children would understand nothing of the parable of the weeds and the sower, or the sheep and the goats. In fact Christ refused to elaborate upon the full meaning of the parables, for the benefit of his disciples until the many confused listeners had disbanded. After a sermon on the growing of fruit and the mustard seed, the *Gospel of Mark* states; *'And with many such parables spake he the word unto them, as they were able to hear it. But without a parable spake he not unto them: and when they were alone, he expounded all things to his disciples'*.¹²¹⁹ Clearly Christ's teachings were not intelligible to your average listener, and even had to be explained plainly to the apostles when nobody was around.

EUSEBIUS CLAIMS ONLY
JOHN, JAMES AND PETER
(THE THREE MAIN
CHRISTIAN JUDAISERS)
WERE TAUGHT THE
HIGHEST OF THE
CHRISTIAN MYSTERIES

There may even have been a heirarchical distribution of superior mysteries and knowledge among his disciples, but as in the case of Paul, these secrets were passed on to the disciples after Jesus had ascended into heaven.

Almost 1,700 years ago Bishop Eusebius reproduced a small portion of the 8th Book of Clement which states as much: *"James the Righteous, John, and Peter (the three main Judaisers) were entrusted by the Lord after his resurrection with the higher knowledge. They imparted it to the other apostles, and the other apostles to the Seventy, one of whom was Barnabas"*.¹²²⁰ That he sees fit to mention Barnabas by name out of the main apostolic reservoir may go back to the argument between Peter and Paul. In Antioch Barnabas parted ways with Paul, his long time travelling buddy, thereafter abandoning the mission to the Gentiles and joining the mission to the Jews. What caused Barnabas to dump out on Paul. Was it judaising secrets divulged by Peter, secrets known to but a few, secrets in some way contrary to those professed by St Paul?

MAGI SLAUGHTERED THE
DEVIL'S CREATIONS

It could be argued that Christ was only preaching to certain segments of the Jewish community (perhaps Essenes), the remainder finding his teachings too esoteric and unintelligible. The sort of phraseology found in Jesus' sermon seems to reflect Magian ideas about *khrafstras*, or to put it more simply, the children of the devil. Magian scripture alerts us that not every being or creature in this world was born of God. The earth was simply a stage where light and dark forces intermingled, much like a great chess board. The Avestan Persian word *khrafstras* (ie; whatsoever beings and creatures were sired by Ahriman in the Abyss) represented an entirely different range of

created species ... the demon-born who stood in direct opposition to everything good. Their role, their very reason for being, was to bring vexation to the world of agriculture, mankind and the animal kingdom in general. For this reason the Magi were said to 'kill everything with their own hands, except a dog or a man, and they think they do a meritorious thing when they kill ants, serpents, and other reptiles and birds'.¹²²¹ In practice only certain breeds of fowl were killed. Gnats, flies, cockroaches, spiders, mice, moths, snakes, scorpions, toads, lizards, centipedes, worms and the like were all fair game, to be crushed under foot with glee.

Debates between Magi and Rabbis took place infrequently. A hitherto unknown Magus seals his theological dispute with a Jew by discussing the existence of *khrafstras*, enquiring whether or not Jews felt Yaweh was responsible for creating 'vermin and creeping things'.¹²²² His listener answers in the affirmative. Such replies must have left nervously incredulous Magi worriedly shaking their heads. Jesus appears to use a *khrafstras* example from the plant kingdom to explain the origin of good and evil, and their respective fates on Judgement Day, the final reckoning.

'The kingdom of heaven is likened unto a man which sowed good seed in his field. But while men slept, his enemy came and sowed weeds among the wheat, and went his way. But when the blade was sprung up and brought forth fruit, then appeared the weeds also. So the servants of the householder came and said unto him, Sir, didst not thou sow good seed in thy field? From whence then hath it weeds? He said unto them, an enemy hath done this. The servants said unto him. Wilt thou then that we go and gather them up? But he said, Nay; lest ye gather up the weeds, ye root up also the wheat with them. Let them both grow together until the harvest (ie; permit them to mingle in the material world), and in the time of harvest I will say to the reapers, gather ye together first the weeds (the devil's children), and bind them in bundles to burn them: but gather the wheat into my barn'.¹²²³

He went on to explain that 'the field is the world; the good seed are the children of the kingdom; but the weeds are the children of the wicked one. The enemy that sowed them (the weeds) is the devil; the harvest is the end of the world and the reapers are the angels. As therefore the weeds are gathered and burned in the fire; so shall it be in the end of this world'.¹²²⁴

The text has an unmistakably dualistic feel; the existence of a creator-devil, the enemy of god the creator, is clearly attested. Note that the devil doesn't tempt wheat into becoming a weed. Wheat is wheat and weed is weed; they both have two totally different natures. The devil sows the weeds directly, a very different crop to wheat, baleful growths hated by God.

This dualistic phraseology allows us to delve inside Christ's mind, and by implication the mind of the Father who sent him. Here Jesus openly admits that not everybody on earth is born of god ... some are children of the devil. Christ is in effect confessing the existence of another power beyond the "One God", a dark malevolence, also with the abilities of a creator.

Jesus gave his disciples the power to exorcise; 'Then he called his twelve disciples together, and gave them power and authority over all devils, and to cure diseases'. This gift is explained a little further in Luke X: 19-20 'Behold I give unto you power to tread on serpents and scorpions, and over all the power of the enemy (ie; the Devil); and nothing shall by any means hurt you. Notwithstanding in this rejoice not, that the spirits are subject unto you; but rather rejoice because your names are written in heaven (ie; you have this gift only because you are sons and daughters of heaven).¹²²⁵ Now if rabbinical and Chaldean teachings on the Most High were inculcated into Christ's mind this same phrase should have read 'Behold I give unto you power to tread on serpents and scorpions, and to remove the harms that the Father has set against you for your wrongdoings; and he will resolve not to hurt you, and he won't send his servile devils after you'. To this end Christ's exorcisms may have been more white Magian in their underlying principle than Chaldean.

Or think of it this way. Jesus is repeatedly portrayed as an exorcist of unclean spirits and devils throughout the Gospels. If medieval legend is to be trusted Christ's powers of demon-expulsion were allied with David and Solomon's Chaldean-style rites of exorcism. In this case the demons were rebel powers, fallen creations who

disobeyed God's will. Yet enigmatically they are described as obediently under the Most High's direct control. In other words they are controlled rebel spirits with fallen natures, controlled by fear. Under this scheme if god wants to hurt you he says 'go afflict such and such', and the devils go and do his will. Next comes the inevitable sickness and infirmity. In white Chaldeanism it is only through the power of their god-given monarchy and spiritual purity that kings and graced devotees can undo a demonic infirmity sent by the Most High God.

Whereas in the Magian view God made everything perfect, and did nothing evil besides disown the devil's children on Judgement day, or send servants into the world to physically halt wrongdoing. But the Devil, the vexing antigod responsible for all calamity and misfortune desired to harm, kill and pollute God's magnificent creations. By the power of God Magian exorcists hoped to drive off the physical ailments and afflictions invoked by Ahriman the adversary, whether through certain spells, or their astonishing abilities as surgeons and physicians.

Now in the Gospel demons are driven off because they recognise Jesus' power, and are afraid of his ability to destroy them, just as flame applied to a weevil causes it to scamper and burrow deeper.

If, as the rabbis taught, demon-caused maladies were a just punishment, the wish and will of Yaweh, why is that Christ spends much of his mission combating devils and the worries they cause, which, based on current teaching, would have been sent upon the victim by himself anyway? If Jesus is the son of the Father (indeed one and the same as the father), and one who tirelessly vanquishes and banishes the demons responsible for leprosy and blindness, why does he do so, when, according to judaising doctrines, he sent them in the first instance? Clearly Jesus' father and Yaweh may not be identical.

Christ met staunch opposition from the Rabbis for healing a woman incurable for almost two decades, on a Sabbath Saturday. In his own defence Jesus states "*and ought not this woman, being a daughter of Abraham, whom Satan hath bound, lo, these eighteen years, be loosed from this bond on the Sabbath day?*"¹²²⁶ Notice he doesn't say 'this vile sinner who the father has bound for good measure'. Christ felt genuine pity and hurt for god's children suffering in this prolonged manner. By extension the Father was also aggrieved at their state, far from being the demonic cause of their condition, as many have been taught to profess.

As in Magian tradition, Christ healed during the day. As for instance the healing of a congenitally blind man, where he states; '*I must work the works of him that sent me, while it is day: the night cometh when no man can work. As long as I am in the world I am the light of the world*'.¹²²⁷

When it comes to demon smiting, Magian scripture portrayed *Sraosha* as the ultimate demon-killer.

In the *Book of Genesis* we find yet another irreconcilable clash between Judaism and the teachings of Jesus Christ. Yaweh says to Adam "*cursed is the ground for thy sake; in sorrow shalt thou eat of it all the days of thy life: Thorns also and thistles shall it bring forth to thee*".¹²²⁸ In Jewish lore it was Yaweh who fashioned noxious bushes, thorns, weeds etc (which would hamper man's agriculture), and not only them, but Satan himself and a large retinue of demonic vitae.

In the light of the fact that Yaweh is not mentioned in the NT under any of his traditional Jewish epithets I want you to contrast this previous quote from Genesis with what issued from Jesus' own mouth: Jesus is very emphatic ... "*the weeds are the children of the wicked one*". So if Christ tells us weeds came from the devil, and OT tells us that Yaweh made these weeds, what does that tell us about Yaweh, the high God of Judaism?

And I think this is fairly born out in *Revelations XXII*, where listners are unable to change their nature, but to stay just as they are; '*He that is unjust, let him be unjust still: and he which is filthy, let him be filthy still; and he that is righteous, let him be righteous still, and he that is holy, let him be holy still*'. In the end everything would be sorted out, not on any earthly day, but on Judgement Day. God's children and the *khrafstras* were like alien life forms staring at each other over a chasmic void.

You may recall that Iran's ritual intercessors included fire priests (Arthravan) and sacrificers (Magi). It was the role of magus sacrificers to execute all ritual, and indeed penal killings. The more of the devil's creatures a Magian killed, the more greatly heaven blessed them. Rich boons rained down by God's light in answer to their zeal. With each fly squashed, with every serpent crushed, with every criminal executed, the universal reign of the devil's miscreants grew less and less. Light increased in the world. Likewise, in the plant kingdom, agriculture improved the verdant, abundant growth of crops and medicinal plantstuffs, at the expense of weeds and poisonous growths, each ruthlessly weeded out of the ground with a similar level of vengeance. Some schools of Magi (we know not

how many, but probably in the minority), felt that all *khrafstras*, even those in human guise should be exterminated as a favour to the creator. Human *khrafstras* fell into the category of incarnate-devils: homosexuals, negroes, whores, atheists, criminals, evil witches and demon worshippers, including Manichees and (by virtue of the deity's antics) devotees of Yaweh. Having said that we are only talking about fringe elements, for if it were widely accepted that this is proper conduct, not a single Jew would have made it back from Babylon alive. Having said that this very thing almost took place at the hand of Haman who planned to exterminate every last drop of Jewish blood, but was prevented from doing so as Esther the King's wife intervened on their behalf. In the end Haman was hanged on the very gallows he planned for Mordecai. As it stands the Aryan Persian kings had many dark-skinned subjects, and helped the Jews return home to Jerusalem.

While Christ employs *khrafstras*-style phraseology, not once does he recommend exterminating Jews, prostitutes or criminals, or anybody else for that matter. On the contrary. He reached out to them, hoping to spread his wings about them like a mother chicken. Jesus earlier reiterated he had not come into the world to destroy it, but to give everybody a chance to live again after they had died. Vengeful repercussions of this kind would only come to the fore at his second coming, at his spiritual praesidium in the afterlife where he would be like a crushing force ... like falling masonry. Then the casting away, and the burning, would truly begin. The power of his mercy will be great for those who showed mercy in this lifetime. Even prostitutes and criminals could be plucked from the certainty of hell if their faith in him were great enough, for example Mary Magdalene or the criminal crucified beside him on that black Easter Friday. Sin or compliance with the divine will were merely symptoms of whether or not God had his mark on you, of whether the father had given one to Jesus prior to their birth.

Christ himself may have believed in the existence of incarnate demons, a teaching well known to the Magi. Consider (NT) *John* 7:70, in which Jesus exclaims the following about Judas *'Have I not chosen you twelve, and one of you is a devil!'*

Upon the resurrection of Lazarus Christ announced, *'Jesus said unto her, I am the resurrection, and the life: he that believeth in me, though he were dead, yet shall he live: and whosoever lieth and believeth in me shall never die.'*¹²²⁹ Here, and from other portions of scripture, Christ portrays himself as the pre-ordained resurrector, the enemy of death sent down from heaven to save the world from the grip of his tyrannical, chthonic nemesis. He expounded the portentous signs of his second coming:

*'And there shall be signs in the sun, and in the moon, and in the stars; and upon the earth distress of nations, with perplexity; the sea and the waves roaring; Mens hearts failing them for fear, and for looking after those things which are coming on the earth: for the powers of heaven shall be shaken. And then shall they see the Son of man coming in a cloud with power and great glory.'*¹²³⁰

In all, this passage apparently encapsulates features of Magian eschatological lore. As stated previously, John's *Revelations* seems to have prevented the Persian version of Christianity achieving even greater heights of popularity and Church endorsement. Be that as it may, certain clergy throughout various periods felt that this prophecy did not properly belong in the canon. We know this through the writings of Eusebius, himself a former believer in the Arian Christian code. Remembering that the *New and Old Testament* were simply compilations of separate books of Jewish and Christian texts, Christians in different regions didn't always agree on the full number of texts to be included in the canon. In the *History of the Church* III:25 the bishop recorded what were then the essential components of the *New Testament*, according to 4th Century practice:

*'To these (the four gospels, the Acts of the Apostles, 1 John, 1 Peter) may be added, if it is thought proper, the Revelation of John'*¹²³¹ ... Clearly an unspecified number of churchmen felt uneasy about including the final revelation, which they held to be 'spurious'.

For many a reformist preacher the *Book of Revelation* was a very handy thing to have around. Together with Christian holy feasts like 'the circumcision' (which emphasised the Jewishness of 'the Redeemer'), it served a particular purpose, holding back the ancient rising tide of royal involvement within the greater Church. Under their

formula Christ would oppose the kings in that final battle of the apocalypse. For the Old Believers though, *Revelations* might not have inherited a respectable place within accepted scripture. The power of kings therefore remained fully intact, as also the libation rites that gave rise to the Arthurian grail legend, so immensely popular around Europe. Elsewhere in the *New Testament*, the reign of kings is amply defended. (NT) 1 Peter 2:13-17 reiterates Jesus' earlier teachings about obedience to the authorities, stating;

TAKEN IN A CERTAIN
CONTEXT IT PARED BACK
THE POWER OF EARTHLY
KINGS

'Submit yourselves to every ordinance of man for the Lord's sake; whether it be to the king, as supreme; or unto governors, as unto them that are sent by him for the punishment of evildoers (ie; magistrates, soldiers and officers of the king), and for the praise of them that do well. For so is the will of God, that with well doing ye may put to silence the ignorance of foolish men: As free, and not using your liberty for a cloke of maliciousness, but as the servants of God. honour all men. Love the brotherhood, Fear God. Honour the king.'

Miraculous powers, a man-God, a beard, long hair, a sacrificed king, lover of the poor, enemy of demons; some might ask the obvious question 'Was Christ a magus, as the Rabbis alleged?' Well the Magi might not have thought so, he simply didn't have the bloodline. Having said that the last great redeemer *Sraosha* was to be without bloodline, born of a virgin.

Magus-blood was patrilineal. In other words it came from the father's side, but it might also come from the mother if, and only if, her husband had the blood. Jewish blood was matrilineal; you inherited your Jewish blood from your mother. Such was also the case in semitic Chaldeanism.

The issue of Christ's genealogy became of utmost importance in determining exactly who he was, and who he claimed to be. Eusebius wrote on the genealogy of Jesus, so as to clarify any misconceptions that were present in his day, as to the source of the Saviour's blood.¹²³² Much later, in medieval Kievan Rus', the same topic also emerged in the *Epistle of Klim Smolyatich*, a Russian preacher.¹²³³ We might think that there was some need to defend Christ's Jewish genealogy in olden Rus', and this is exactly the sort of Christian preaching that one should expect from the apostolic reformists in a Magian-Christian environment.

Joseph's lineage is technically relevant to Jesus the man, even though he is a surrogate father. Within Jewish society Christ's paternal lineage must still have been considered that of Joseph, despite the matter of his virgin birth. Bishop Eusebius explained why this was so.

*'The genealogy of Christ has been differently recorded for us in the gospels of Matthew and Luke. Most people see a discrepancy in this, and through ignorance of the truth each believer has been only too eager to dilate at length on these passages, So I feel justified in reproducing an explanation of the difficulty that has come into my hands ... The names of the families in Israel were reckoned either by nature or by law; by nature, when there was genuine offspring to succeed; by law, when another man fathered a child in the name of a brother who had died childless. Thus neither of the gospels is in error, since they take into account law and nature.'*¹²³⁴

PATERNITY BY BLOOD
AND BY NATURE

He concludes by saying "In tracing thus the genealogy of Joseph, Africanus has virtually proved that Mary belonged to the same tribe as her husband, in view of the fact that under the Mosaic law inter-marriage between different tribes was forbidden".¹²³⁴

Mary's cousin Elizabeth was a 'daughter of Aaron' and this might lead one to speculate that Jesus was a Levite. Alas the situation is far more complex. A cursory perusal of the situation prevents us from perceiving other remarkable features of Christ's bloodline. The *Book of Matthew* thinks Joseph is significant enough to mention, for Joseph's is the genealogy supplied in Chapter I of the same, not Mary's (whose lineage would be a perfect quote). In *Matthew I* it is recorded as follows;

HIDDEN COMPLEXITIES
ARE FOUND IN CHRIST'S
GENEALOGY

Abraham ▶ Issac ▶ Jacob ▶ Judas ▶ Phares ▶ Esrom ▶ Aram ▶ Aminadab ▶ Naasson ▶ Salmon ▶ Booz ▶ Obed
Jesse ▶ David ▶ Solomon ▶ Roboam (plausibly Aryan female line mentioned) ▶ Abia ▶ Asa ▶ Josaphat ▶
Joram ▶ Ozias ▶ Joatham ▶ Achaz ▶ Ezekias ▶ Manasses ▶ Amon ▶ Josias ▶ Jechonias (taken to Babylon) ▶
Salathiel ▶ Zorobabel ▶ Abiud ▶ Eliakim ▶ Azor ▶ Sadoc ▶ Achim ▶ Eliud ▶ Eleazar ▶ Matthan ▶ Jacob ▶

Joseph ▶ Jesus Christ (adopted son of Joseph, by Mary).

Let me say it has some real surprises in it. Only once in this entire genealogical list does a female enter into the equation, and even then it is likely she is not a Jewess. For instance Obed is the issue of Booz and the Moabitess Ruth. Joseph's side of the family, quite apart from having Kings, had its fair share of miracle workers. Obed gave rise to Jesse who begat David the King over Israel, from who came the great king Solomon the Wise "of her that had been the wife of [the Aryan Hittite officer] Urias (and herself most likely Aryan)". Then there was King Hezekiah (the destroyer of Moses' snake staff) who sired Manasses (who was interrelated with Magi then resident in the same region of Judah).

With respect to Christ's bloodline, and especially in the case of the Kings of Judah, it is traceable to Abraham (born near Ur), patriarchally speaking, yet in a matrilineal sense it takes us back to Solomon, son of King David by Bathsheba (the former wife of the slain Hittite Urias). Bathsheba's genealogy is not spelled out besides her being the daughter of Eliam. If it should happen that Bathsheba's ancestry was Aryan Hittite, as in the case of her late husband Urias, then it was at this point that the Jewish kingship came to share the blood inheritance of the Aryan kings. Such a possibility might help explain why Jesus supposedly had blue eyes, an unusual genetic trait for Semitic Jewry. The whole matter of Bathsheba, mother to King Solomon the Wise, led to the fall of King David's throne, for he acquired her by evil means during a seige of an enemy city.

POSSIBLE, IF NOT
PROBABLE ARYAN
ANCESTRY VIA JOSEPH

2 Samuel 11

"And David sent to (his general) Joab, saying send me Uriah the (Aryan) Hittite. And Joab sent Uriah to David. And when Uriah was come unto him, David demanded of him how Joab did, and how the people did, and how the war prospered. And David said to Uriah. Go down to thy house, and wash thy feet. And Uriah departed out of the king's house ... But Uriah slept at the door of the king's house, with all the servants of his lord and went not down to his house David said unto Uriah. Comest thou not from thy journey? Why then did thou not go down unto thine house? And Uriah said unto David: The ark, and Israel, and Judah abide in tents, and my lord Joab and the servants of my lord are encamped in the open fields: shall I then go into mine house to eat and to drink, and to be with my wife? As thou livest, and as thy soul liveth, I will not do this thing.

DAVID LOST HIS
KINGDOM FOR
CONSPIRING AGAINST
URIAH, A LOYAL
HITTITE OFFICER
SERVING IN HIS ARMY

In other words how could he, as a loyal royal officer, rest easy when the king's house was still vulnerable to attack, and his fellow comrades, his brothers in arms, were billeted out in the field during a time of war). Uriah begged to go back to the front. So David gave him leave to depart the following day, but devised a plan to steal his wife Bathsheba by having Uriah killed in combat.

GOD CHASTISED HIM
FOR THE ACT

"And he wrote in the letter, saying Set ye Uriah in the forefront of the hottest battle, and retire ye from him, that he may be smitten and die. And it came to pass".

In response to David's betrayal of his loyal Aryan warrior, the God of Israel caused Nathan to recite a parable;

"There were two men in one city; the one rich, and the other poor. The rich man had exceeding many flocks and herds: But the poor man had nothing, save one little ewe lamb, which he had bought and nourished up: and it grew up together with him, and with his children; it did eat of his own meat, and drank of his own cup and lay in his bosom, and was unto him as a daughter ... but took the poor man's lamb".

David received a further disturbing message from the prophet Nathan, that rocked his kingship,

"Thus saith the Lord God of Israel, I anointed thee king over Israel, and I delivered thee out of the hand of Saul. And I gave thee thy master's house, and thy master's wives ... and the house of Israel and Judah: and if that had been too little, I would moreover have given unto thee such and such things. Wherefore hast thou despised the commandment of the Lord, to do evil in his sight? Thou hast killed Uriah the Hittite with the sword and have taken his wife ... Now therefore the sword shall never depart from thine house; because thou hast despised me, and hast (greedily and unjustly) taken the wife of Uriah. For thou didst it secretly: but I will do this thing before all Israel, and before the sun".

On the subject of marriage Christ says very little, apart from a brief discourse to some Rabbis about the

irrelevance of marriage in the afterlife. So it becomes difficult to assess what Jesus felt about next-of-kin marriage. Only Paul speaks about the topic (within one's own nuclear family), and in the most vehemently condemnatory manner. All things considered this points us in the direction of Chaldeanism, but a form of Chaldeanism heavily steeped in the teachings of the white Magi.

JEWES WERE NOT ALWAYS
PARTIAL TO THEIR KINGS

The Jewish kingships of Israel and Judah experienced mixed fortunes with respect to the general populace, and the prophets and priests in particular, with whom they were frequently at loggerheads. They initially arose during the era of the Judges, when the seer Samuel installed Saul as the first king of the Israelites.

JEWES WERE RELATED TO
THE CANAANITES

Current theories suggest the Jews were descended from a nomadic desert people known as the Habiru, some of whom entered the service of the Egyptian pharaohs, but later returned to their homeland. One line of thought is they were originally Canaanites and Mesopotamian settlers. This might account for their very early observance of Canaanite traditions, including idol worship. As a conglomeration of tribal entities they colonised, or indeed resettled in the region of modern Israel, during the two centuries prior to the first millennium BC. Independent confirmation of their existence comes by way of Egyptian monumental masonry, which made them of Canaanite stock. At long last they had settled down, establishing some six different ritual shrines, often sporting horned altar pedestals. Throughout much of the pagan world practically identical pedestals were associated with fire-worship, with sacred woods and incenses burned in legless metal bowls mounted upon the altar 'horns'. A similar kind of altar may have been used by the father of John the Baptist, who had been inducted into the priestly order of Abia.

'According to the custom of the priest's office, his lot was to burn incense when he went into the temple of the Lord. And the whole multitude of the people were praying without at the time of incense. And there appeared unto him an angel of the Lord standing on the right side of the altar of incense ... the angel said unto him fear not, Zacharias: for thy prayer is heard and thy wife Elisabeth shall bear thee a son, and thou shalt call his name John'.¹²³⁵

From time to time a prophet emerged among one tribe or other. Samuel was both prophet and Judge, an especially great Seer of precognitive visions from the supreme God, among the Jewish peoples. His mother Hannah had given him to the Sons of Eli, who served as priests. As in the case of the Magi, he wore a sacred white robe, and apron.

SOLOMON HAD SPECIAL
MYSTICAL POWERS

Like the Magi, the Jewish kings, such as David and Solomon, from whom Jesus was descended, were reputed to be priest-kings, and skilled magicians, at least according to traditions extant in the Islamic world during the Middle Ages. *Psalms* and the *Book of Kings* were mightily connected with the wise men of the Jewish monarchy, David especially. Consequently they became preferred *Old Testament* reading in medieval western Europe. Al-Nadim recounts that '*Solomon son of David, for both of whom may there be peace, was the first person to enslave the jinn and the devils and to use them as menials*' ... '*a Persian Jew named Al-Hurmazan ibn al-Kurdul used to write for Solomon the son of David*' (ie; acted as Solomon's personal scribe or vizier). '*The first person, according to the doctrines of the Persians, who made slaves of them (the genii and devils) was (the Iranian king) Jamshid ibn Tahmurath (aka Hushang)*'.¹²³⁶

HIS ART FOR
COMMANDING DEMONS
WAS PROBABLY
TRACEABLE TO
TAHMURATH, THE
PERSIAN KING

It went on to say '*Solomon, son of David ... sat in audience and summoned the chief of the jinn and the devils, whose name was Fuqtus (or Quftus)*'. '*Fuqtus taught him to know the name of each demon, one by one, and also its influence over the sons of Adam*'.¹²³⁶ These Solomon then bound to his service. The *Fihrist* goes on to list some 71 demonic servitors by name, amongst whom was Satan, a demon very low on the pile. This should not be confused with devil-worship however. The *Qur'an* has something to say about this matter, namely that; '*some of those to whom the Scriptures were given cast off the Book of God behind their backs as though they know nothing and accept what the devils tell of Solomon's kingdom. Not that Solomon was an unbeliever: it is the devils who are unbelievers. They teach men witchcraft and that which was revealed to the angels Harut and Marut (Hindu deities) in Babylon*'.¹²³⁷

DAVID MAY HAVE
LEARNED THE CRAFT AT
THE ROYAL COURT

Whether the Muslim testimony reflects an historical reality is another matter, especially since David spent most of his early years shepherding his father's flock. If he did acquire these learned arts, it would have been through Chaldean mentors, or even well-versed relatives, attached to the royal court. Egyptian and eastern connections with the Jewish monarchy were inevitably rather ancient, for Nebuchadnezzar the king of the Babylonians took

ahold of Judah and took many of its inhabitants into captivity, to serve as vassals for his empire. The *Book of Daniel* goes on to say:

*“And the Lord gave Jehoiakim king of Judah into his hand, with part of the vessels of the house of God which he carried into the land of Shinar to the house of his god; and he brought the vessels into the treasure house of his god. And the king spake unto Ashpenaz the master of his eunuchs, that he should bring certain of the children of Israel, and of the king’s seed, and of the princes. Children in whom was no blemish, but well favoured, and skillful in all wisdom, and cunning in knowledge and understanding science and such as had ability in them to stand in the king’s palace, and whom they might teach the learning and tongue of the Chaldeans”.*¹²³⁸

THE CHALDEANS TOOK THE JEWISH ROYAL FAMILY INTO THEIR CARE, AND EDUCATED THEM IN VARIOUS FIELDS

It was precisely at this point that Jewish royalty were inducted in the Chaldean arts. According to *Old Testament* writings certain Jewish seers and prophets gained an enviable reputation at the Babylonian court. *“There is a man in thy kingdom, in whom is the spirit of the holy gods: and in the days of thy father light and understanding and wisdom, like the wisdom of the gods, was found in him, whom the king Nebuchadnezzar thy father, the king, I say, thy father, made master of the magicians, astrologers, Chaldeans and soothsayers: For as much as an excellent spirit and knowledge, and understanding interpreting of dreams, and shewing of hard sentences, and dissolving of doubts were found in the same Daniel, whom the king named Belteshazzar”.*¹²³⁹

ACCORDING TO THE OLD TESTAMENT DANIEL HAD PRIDE OF PLACE AMONG THE KING’S ENTOURAGE OF VIZIERS

It was here that Jewesses interbred with male Magi once Babylon was consumed by the Persians and Medes, giving rise to a party of priestly Judaeo-Aryan Magi of uncertain size, which, owing to differing ideologies on certain points, must have experienced difficulties interacting with Zoroastrian Magians and rabbinical Jewry.

Anyhow Al Nadim describes a system of belief closely resembling ancient Mesopotamian Chaldeanism, inevitably found in the region of ancient Israel. Could it be he was mischief making? The 2,000-year old Qumran scrolls found 40 odd years ago suggest not. Unusual monotheistic teachings of Chaldean origin were evidently in vogue inside the Jewish royal chancellery, upon their emancipation from eastern captivity, perpetuated in tandem by elements of the unorthodox Essene community in the two centuries before the birth of Christ.

THE MOST HIGH GOD IS THE KING OF ALL THE GODS

Hymn 4Q400 mentions the word “gods” (denoted by *elohim* or *elim*). In this scheme the Most High is equated with the “*King of the gods*”. So in a monotheistic context you may ask, just who are these ‘gods’. Angel gods is what the Essene texts chiefly allude to. 4Q403 continues in much the same way, *“Let the Holy ones of the gods sanctify the King of glory, who sanctifies by his holiness all his holy ones. Oh Princes of the praises of all the gods, praise the god of majestic praises”.*¹²⁴¹

UNDER THIS THEOLOGICAL REGIME OTHER SUBORDINATE GODS CARRIED OUT DUTIES ASSIGNED BY THE SUPREME GOD

It only gets better when you read 4Q405, for here we discover that many of these gods are images painted or rendered on bricks in temples and royal chambers. Check this out! *“The figures of the ‘gods’ shall praise the most holy spirits of glory; the floor of the marvellous innermost chambers, the spirits of the eternal gods, all ... figures of the innermost chamber of the King, the spiritual works of the marvellous firmament are purified with salt, spirits of knowledge, truth and righteousness in the holy of holies, forms of the living ‘gods’, forms of the illuminating spirits. All their works of art are marvellously linked, many-coloured spirits, artistic figures of the ‘gods’, engraved all around their glorious bricks, glorious figures on the bricks of splendour and majesty. All their works of art are living gods and their artistic figures are holy angels”.*¹²⁴² The author of 4Q405 did not venture to name the gods subordinate to the supreme being, and so it is my considered opinion he is describing images formed by the telestic art, and most likely of Egyptian or Chaldean origin.

ASTROLOGICAL TEXTS

Even more interesting are the zodiac charts found in Hebrew and Aramaic variants which, apart from marking the moon’s transit though the traditional zodiac or mentioning divine omens associated with lightning, contain physical descriptions of individuals in accordance with their pre-ordained mixture of light and darkness. For example 4Q186 mentions one whose *“spirit consists of six parts in the House of Light and three in the Pit of Darkness. And this is his birthday on which he was born: in the foot of the Bull. He will be meek”.*¹²⁴³

FALSE PROPHETS

The *Thanksgiving Hymns* refer to foreign prophets who posed some danger to Essene teachings, seemingly luring them away from Yaweh ... *“from the mouth of lying prophets deceived by error who speak with strange lips to Thy people and an alien tongue, that they may cunningly turn all their works to folly”.*¹²⁴⁴ Hymn 12 refers to them as *“teachers of lies and seers of falsehood, have schemed against me a devilish scheme, to exchange the Law-engraved on my heart by Thee for the smooth things (which they speak) to thy people”.*¹²⁴⁴ So the Essenes were constantly watchful for ‘the spirit of apostasy’. This can be taken to mean eager to identify latent unorthodoxies with respect to their sect should alien ideologies penetrate the

ESSENES WERE WATCHFUL FOR HERESY AND APOSTASY

community with affiliated eastern non-Jewish brethren. True the Essenes had adopted foreign customs, but this was not to extend to abandoning Yaweh and the Mosaic law, which had to be scrupulously attended to.¹²⁴⁵

*“If a prophet or a dreamer appears among you and presents you with a sign or a portent, even if the sign or the portent comes true, when he says; “Let’s go and worship other gods whom you have not known! Do not listen to the words of that prophet or that dreamer, for I am testing you to discover whether you love YHVH, the god of your fathers ... That prophet or dreamer shall be put to death for he has preached rebellion against YHVH, your God ... You shall rid yourself of this evil”.*¹²⁴⁶

*“Every man who preaches apostasy under the dominion of the spirits of Belial shall be judged according to the law relating to those possessed by a ghost or familiar spirit (qv Leviticus 20)”.*¹²⁴⁷

A full scale massacre of fellow Israelites is recommended where a number have apostasised.

*“Men, sons of Belial have arisen in your midst and have led astray all the inhabitants of their city ... you shall inquire, search and investigate carefully. If the matter is proven true that such an abomination has been done in Israel, you shall surely put all the inhabitants of that city to the sword”. It goes on to say “You shall assemble all the booty in the square and shall burn it with fire, the city and all the booty, as a whole-offering to YHVH”.*¹²⁴⁸

As for foreigners desirous of passing on their idolatrous love of the gods *“You shall utterly exterminate the Hittites, the Amorites, the Canaanites, the Hivites, the Jebusites, the Girgashites and the Perizzites as I have commanded you”.*¹²⁴⁹

MELCHIZIDEK APPEARS
IN THE ESSENE TEXTS

The Essene wise men corniced anti-gentile conflicts as integral to their devotion to YHVH, and a precursor to the end of days, which would see the eruption of war in heaven, as they battled to maintain the integrity of their god and teachings, buffeted by an overwhelming number of gentile nations. Their written apocalypticism features angelic warfare, the principal protagonist being the “Messiah of Aaron”. Upon his arrival, a vast contingent of angelic forces, mustered under Archangel Michael (Prince of Light) or Melchizidek, would set out to make war against the Gentile nations and their kings, against the seed of Shem, Ham and Japheth (see p. 126), culminating in the destruction of Rome. Collectively these nations were termed the ‘Army of Belial’.

ESSENES EQUATED
MELCHIZIDEK WITH THE
ARCHANGEL MICHAEL

It should be noted the Essene use of Melchizidek differs from that found in the New Testament, in that Essenes equated Melchizidek with Michael the Archangel, Israel’s warrior angel and protector. Whereas he was a pre-Mosaic king of Abramic vintage, predating the entire Jewish religious tradition. Even so it is remotely plausible Melchizidek was, and remained, the angelic guardian and protector of Salem, being for all intents and purposes its ancient spiritual and temporal king. This being the case Jews may have adopted their veneration of Archangel Michael from Jerusalem’s traditional inhabitants, for having acquired Salem on a permanent basis, they fell under his guardianship from that time. A premium quality analogy can be found in foreign immigrants to Rome making sacrifice to Romulus, the patron guardian of the Roman Empire. From that time Romulus watched over them, and the empire. Melchizidek was Jerusalem’s very own pre-Mosaic Romulus, so to speak, and Yaweh the original tribal god of the Jews brought into the city from their nomadic camps in the region’s unforgiving and desolate wastes, and who felt his devotions slipping away under gentile influence, whether they be Semitic or Aryan.

MICHAEL MIGHT HAVE
BEEN JERUSALEM’S
GUARDIAN ANGEL

The Essene *War Scroll* mentions angelic military operations during the end times, directed against the ‘wicked Gentiles’;

WAR OF THE ANGELS

*“against the sons of Lud; during the third, against the remnant of the sons of Aram, against Uz and Hul and Togar and Meshah beyond the Euphrates, during the fourth and fifth, they shall fight against the sons of Arpachshad; during the sixth and seventh, against all the sons of Assyria and Persia and the East as far as the Great Desert; during the eighth year they shall fight against the sons of Elam, during the ninth, against the sons of Ishmael and Keturah. In the ten years which follow, the war shall be divided against all the sons of Ham ... during the ten years which remain, the war shall be divided against all the sons of Japheth in their habitations”.*¹²⁵⁰

LEVITES

The Essene Levite contingent played a vital function in the war between light and darkness in the material world, proclaiming dire maledictions:

“And the Levites shall curse all the men of the lot of Belial, saying ‘Be cursed because of all your guilty wickedness! May he visit you with destruction by the hand of the vengeful Avengers! May he visit you with destruction by the hand of all the Wreakers of Revenge! Be cursed without mercy because of the darkness of your deeds! Be damned in the shadowy place of everlasting fire! May God not heed when you call on Him, nor pardon you by blotting out your sin!’”.¹²⁵¹

Through their faith and goodness in everyday affairs the kings and magistrates of the Jewish nation became close to the Most High God, and being in his favour, had the power to command demons. Practically speaking one could order demons to leave a host, freeing a person of possession, curing one of plague, blindness, or any other malady brought on by demons. Being of David and Solomon’s blood, Christ may have held similar powers (as the *Talmud* professes), arts traceable all the way back to King Jamshid ibn Tamurath of Persia. Again this should not be confused with devil-worship, but a spiritual power over demons. With the exception of bloody sacrifices and blood-letting, Chaldean rites were made manifest in the following spectrum of familiar ‘medieval’ ritualism;

‘there are also sacred rites and holy observations, which are made for the reverencing of the gods, and religion, viz. devout gestures, genuflexions, uncoverings of the head, washings, sprinklings of holy water, perfumes, exterior expiations, humble processions, and exterior ornaments for divine praises, as musical harmony, burning of wax candles and lights, ringing of bells, the adorning of temples, altars and images, in all which there is required a supreme and special reverence and comeliness; wherefore they are used for these things, the most excellent, most beautiful and precious things, as gold, silver, precious stones, and such like: which reverences and exterior rites are as it were lessons and invitations to spiritual sacred things, for obtaining the bounty of the gods’.¹²⁵²

Christ’s ritual order, that of Lord Melchizidek, no doubt predated the arrival of the Jews, possessing from early times a quasi-Chaldean nature, but with a highly significant substrata, or foundation of Magianism. Orthodox Zoroastrian texts speak of such wizards though pejoratively, despite the fact they were once the predominant form of Magi in many areas of Iran and its outlying satrapies. It might also explain why Jesus refrains from using the Hebrew word *adonai*, instead choosing the *Abba*.

While the Chaldean art required the spilling of blood to bring about miraculous events,¹²⁵³ the priests of the *New Testament* no longer performed blood sacrifices, since Christ himself was the last sacrifice, the perfect unblemished lamb. A mighty king’s blood had gushed out, a king who had offered himself freely into the arms of death, so as to rise high in the heavens. As it said in (NT) 1 Peter 1, *‘Forasmuch as ye know that ye were not redeemed with the corruptible things, as silver and gold ... but with the precious blood of Christ, as of a lamb without blemish and without spot’*.

This notion of a last great sacrifice, the ultimate royal sacrifice, may have had some appeal to eastern Chaldees, with the result that even more conversions could be achieved, beyond those of the Magians, Jews and pagan gnostics. However, under the new order Chaldean converts were no longer permitted to ritually interact with demons, whether through personal purity and godliness, or via the more ancient condemned system of demonolatry. Clergymen now encountered a problem all too familiar to the white Magi, the unwanted and worrying presence of devilish warlocks.

As Jesus hanged there on the cross, preparing to stare into the face of death, he must have felt very alone. The Rabbis, the Elders, the Roman soldiers, Mary, John and his few followers in attendance were beginning to slip from view as he lapsed in and out of consciousness. Now there was only him, God the Father and death. And it is at such a private moment, in the lives of all men, that we are one on one with the supreme being; everything that we are, everything that we were. It may come as some surprise then that Jesus cried out to his father not in Hebrew (the religious language of the Jews), nor in Pahlavi (the tongue of the Orthodox Zoroastrians), but in Aramaic, a common tongue known throughout Judah, Mesopotamia, Chaldea and Persia. Such then is the significance of the untranslated Chaldean biblical sentence in *Matthew 27:46*, some of the last mortal words of Jesus *Eli. Eli. lama sabachthani*. *‘My Lord!, My Lord! Why has’t thou left me’*. At that, life passed from Christ’s earthly body into the hereafter. Grim omens and miracles followed;

VARIOUS INTEREST
GROUPS STRUGGLED FOR
CONTROL OF THE PAPACY

Perhaps the greatest virtue of the Gospel story is that its many eclectic features allowed it to overwhelm an area of the world amply immersed in spirituality and religion. This syncretic creed had all the makings of a super-religion, if only teachers from these rival faiths would back away, and desist from eulogising the peculiarities of their respective teachings to new converts, because in such a forum one risked alienating varied members of the Church. For the Christian apostles the coming of *pseudoapostolos* (false teachers/ false apostles) must have seemed inevitable and impending, as in fact it was. From this came a sort of siege mentality, which has accompanied the Church until this very day. Being an institution it was always vulnerable to the politicking of powerful competing forces, namely the Jews, Chaldeans and Magi. At various periods each of these parties took their chance to grab the papal throne and control of the Church.

CYRUS THE ARYAN KING
RELEASED THE JEWS
FROM THEIR EASTERN
CAPTIVITY

But the story doesn't end there, becoming stranger still. Earlier in this book I described the Magi's uncompromisingly harsh attitude towards the God of Israel. In the *Book of Ezra* we learn of the Jewish emancipation from Babylonian captivity, at the command of Cyrus, King of the Persians. Every nation held in Babylonian bondage was repatriated to their former homelands. As with most of the pagan kings, Cyrus was eager to patronise the tribal and national gods of other people, so as not to offend any celestial powers that could bring trouble to his dominion. Persian kings had an awesome reverence for prophecies, especially of a holy nature, deeming them to have originated in heaven. For this reason they surrounded themselves with wizards (ie; wise men) of varied schools and ethnicity, including Magi, Chaldeans and Jews. Perhaps due to the miracles, precognitive visions and dream interpretations of Jewish prophets like Daniel, the Achaemenid dynasty seems to have taken a particular interest in the Hebrew God. And so the king financed the reconstruction of Solomon's demolished temple from the Persian exchequer.

HE GAVE THEM
PERMISSION AND
FUNDING TO REBUILD THE
TEMPLE

"Now in the first year of Cyrus king of Persia, that the word of the Lord by the mouth of Jeremiah might be fulfilled, the Lord stirred up the spirit of Cyrus king of Persia, that he made a proclamation throughout all his kingdom, and put it also in writing saying. Thus saith Cyrus king of Persia, the Lord god of heaven hath given me all the kingdoms of the earth and he hath charged me to build him an house at Jerusalem, which is in Judah, and build the house of the Lord God of Israel (he is the god) which is in Jerusalem".¹²⁵⁶

Cyrus was very generous with them. *"Even those did Cyrus king of Persia bring forth by the hand of Mithradath the treasurer, and numbered them unto Sheshbazzar, the prince of Judah. And this is the number of them thirty chargers of gold, a thousand chargers of silver, nine and twenty knives".¹²⁵⁶* Thanks to his munificence the Jewish temple was finally completed in the year 515 BC.¹²⁵⁷

THE ARYAN KINGS HAD
A CERTAIN ECUMENICAL
FLAIR WHEN IT CAME TO
HANDLING THE
RELIGIOUS AFFAIRS OF
SUBJECT PEOPLES

Cyrus patronage should not be misinterpreted as an act of conversion to Judaism, to the exclusion of Persia's native beliefs, simply ecumenism in its finest form, by one of the greatest Aryan kings. After all he had given a small fortune in reward money to an Egyptian who found a replacement for their deceased Apis bull. By looking after the gods of subject peoples he ensured they remained happy and, more importantly, their gods stood in his corner.

Cyrus' ecumenical flair was truly all encompassing, as is evident in his praise of Babylon's 'Lord of the Universe' Marduk: *"May all the gods, whom I have bought into their cities, pray daily before Bel and Nabu for long life for me, and may they speak a gracious word for me and say to Marduk my Lord: "May Cyrus, the king who worships you, and Cambyses, his son, be blessed"'.¹²⁵⁸*

And it is in this spirit that the Persian monarchy treated Jewry as favourably as the king's many other minorities, perhaps even more so on account of their loyalty to the Persian throne when so many satrapies sought to break away from the empire. Some would go so far as to say he had a Jewish fan club. So great an impression did Darius leave on Jewish warriors serving in Elephantine that they wore out the papyri of his immortalising autobiography

through repeated reading. His avid readership needed replacement copies!¹²⁵⁹

With Sheshbazzar (a prince of Judah) at their head, the Jews made it home to Jerusalem, not only materially and financially prepared to rebuild the temple anew, but equipped with eastern philosophies, learned during their exile abroad. Whereas previously their souls were destined for Gehenna, the pit of the underworld (a more Babylonian expectation for post-mortem existence), now Jewish theologians had acquired firm ideas about the notion of a future resurrection, partly through their prophets (eg; Ezekiel), partly due to an accumulation of oriental ideology.

Some of the greatest philosophical mysteries were answered by the discovery of the Dead Sea Scrolls by Bedouin tribesmen in 1947. Evidently a rival Jewish priesthood called Essenes existed outside the walls of Jerusalem. They were party to a dualistic cosmology somewhat similar to early Zoroastrianism.

The *Dead Sea Scrolls* date from the 2nd Century BC through to 70 AD, the year of Jerusalem's visitation by Roman military might and the casting down of the temple.¹²⁶⁰ Being sealed up for that entire period they constitute an invaluable record of unusual religious undercurrents within Judaism. The recovered texts consist of some 800 loose leaf parchments and papyri (500 of which were found in cave 4), nearly all of which were scribed in Hebrew, but also including isolated Aramaic, and more rarely, Greek versions.¹²⁶⁰ Most of the works were religious rather than secular literature, and for this reason no chronicled events are to be found amid the caches, which is a pity.

Throughout its entire 200-year history the Essene holy centre serviced the religious needs of roughly 4000 brethren, though the small number of graves thus far discovered (1,100) do not allow for communes in excess of 200 at any one time.¹²⁶¹

The Community Rule, a Sabbath-observant Essene version of a monastic rule, served to govern the lives of brethren by strict adherence to Mosaic laws, policed and safeguarded via a rigorous scheme of penitential observances (not including scourgings and mortification), the height of which was expulsion from the brotherhood.¹²⁶² Provisions for capital punishment existed (outside of Roman law, and therefore secretly) in cases of defaming Israel, treason and even in cases of demonic possession leading to apostacising behaviour.¹²⁶² Current consensus is they were not proto-Christians, indeed no evidence of Christian symbology was ever found during excavations thus far. Their penitential canon differs considerably from the Magian *vendidad*. If Essenes had drawn some inspiration from Magian or Chaldean teachings, that was about as far as it went. Their home-grown mode of life and regulations therefore differed considerably from that of the Magi.¹²⁶² Essenes adhered to traditional Jewish Kosher laws, ate dressed in clean white garments, but only after purificatory ablutions.¹²⁶³

The Essene commune was frequented by Jewish seers from time to time, for in their *Temple Scroll* the Tetragrammaton is replaced by the first person singular, indicating Yaweh was 'personally dictating' Talmudic precepts of temple worship to the brethren, through some prophet or other. The Qumran *Temple Scroll* goes into the Atonement ceremony in some detail, that is the selection of a sacrificial goat for Yaweh, and the live gift of a goat for Azazel (which carries the sins of Israel out into the desert) after being banished from the temple (as found in the Talmud).¹²⁶⁴

Azazel was one of the four great demonic princes, namely Samael, Azazel, Azael and Mahazael.¹²⁶⁵ His name is found in the Jewish Kabbalistic *Book of Zohar* as the father of sorcery through whom certain aspects of high magic are performed "They (sorcerers) would not have been able to bring them down (the power of the celestial bodies) but for UZZA, AZZA and AZZIEL who taught them sorceries whereby they brought them (the power of the celestial bodies) down and made use of them".¹²⁶⁵ The *Book of Enoch* further describes it as the demonic spirit that taught mankind to manufacture metal goods, and implements of war, jewelry and "the use of antimony, and the beautifying of the eyelids, and ... colouring tinctures".¹²⁶⁵ Azazel therefore seems to have been known since Babylonian times. Agrippa further divulges that Azazel is swift, governing flesh, and in nature a serpent, the prince of deserts who devours the body of the dead. It was, in apocryphal Jewish lore, responsible for the post-mortem corruption of the flesh.

Essenes had a regulated prayer cycle established for sunrise and sunset (also called the 'beginning of the watches of darkness').¹²⁶⁶ It was far simpler than the prayer schedules proposed by Chaldeans, Magians and Christians.

Their traditions were somehow associated with those of Melchizedek (briefly mentioned in their scrolls), but more especially to the sons of Zadok, a Jewish priestly line no longer serving in the temple. In the power play that followed the Maccabean revolt against Greek rule in 169 BC, Menelaus' priestly group prevailed in Jerusalem, forcing the Zadokite priests (the Sons of Zadok mentioned in the New Testament) to withdraw to Ptolemaic Egypt.

PTOLEMAIC EGYPT

There they established a second Jewish temple see at Leontopolis,¹²⁶⁷ itself of questionable acceptability, since, of old, Jerusalem was the only fit and proper place for the celebration of Jewish temple rites. This Egyptian connection might account for some of the telestic and astrological material found in their archives.

A candidate for entry into the Essene sect;

'swears to them terrifying oaths, that he will reverence the Deity, that he will observe justice toward other human beings ... that he will always hate the wicked and struggle with the upright, that he will always keep faith with all others, especially with authorities, since no ruler comes to rule apart from the will of God'.¹²⁶⁸

Dressed in clean white linen they ate a common meal after grace, giving *'homage to God as the sustainer of life'.¹²⁶⁸*

'From the God of knowledge comes all that is and will be... He put in (humanity) two spirits that they should walk according to them until the time of His visitation: they are the spirits of truth and of iniquity (also referred to as the 'angel of darkness').¹²⁶⁹

The dualistic *Manual of Discipline* proceeds to describe the behaviour attributed to either of these spirits, behaviour symptomatic of one's proclivity to one of the spiritual powers.

'for God has set these two spirits with equal influence until the end-time and has put eternal hatred between their division. The deeds of iniquity are an abomination to truth, and an abomination of iniquity are all the paths of truth ... At the time of His (God's) visitation He will destroy the spirit of iniquity forever ... Then God will purge by his truth all the deeds of human beings, refining for himself some of mankind in order to remove every evil spirit from the midst of their flesh'.¹²⁷⁰

As for the species of Jewish dualism espoused by the Essenes, it seems to have resembled early Magianism and Chaldeanism in certain respects. Some key textual phrases found at Qumran resemble those used by Persians and their Magi, as for instance *"The Age of Wrath", "until the determined end, and until the Renewal"* (here meaning resurrection and the chrysalis of created existence, which would mutate into a new indissoluble form, eternally living in the presence of the divine being).¹²⁷¹ This seemingly oriental messianic expectation, newly acquired in the era of Ezekiel, and the high watermark of Jewish spiritual evolution, was a far cry from the morbid subterranean afterlife expected throughout much of the ancient world, which saw mankind separated from the creator eternally, grievously lamenting how *"in death there is no remembrance of thee; in Sheol who can give thee praise".*

Important aspects of their calendrical observances are solar in nature and therefore a divergence from traditional Jewish lunar reckoning.¹²⁷² At this stage there is no recorded evidence of Persian intercalation methods in maintaining the exactitude of their solar calendar over centuries.

Jewish Essenes also professed the existence of an unholy whore in hell, as is evidenced by 4Q184, entitled the *Seductress*.¹²⁷³ Magian doctrines associated with Geh, the great whore and courtesan to the Evil One affords a striking parallel to that found in this Essene passage: *"Her hands are defiled with iniquity, her hands have seized hold of the Pit Her legs go down to work wickedness, and to walk in wrong-doings ... Her clothes are shades of twilight, and her ornaments plagues of corruption ... She pitches her dwelling on the foundations of darkness".¹²⁷³*

Egyptian mythological elements seem to have gained currency, suggesting a level of ideological contact with exiled Zadokite priests serving in Ptolemaic Egypt. The Essene *Damascus document* refers to a portion of the *Book of Numbers* *"The sceptre is the Prince of the whole congregation, and when he comes he shall smite all the children of Seth".¹²⁷⁴* Seth in this case may well be the cthonic deity Sutekh, otherwise known as the Egyptian version of the Devil, the sworn enemy and inveterate foe of Horus and Osiris. For such children are associated with *"traitors"* who *"wallowed in the ways of whoredom and wicked wealth ("wicked wealth" meaning ill-gotten gains or 'black money')".¹²⁷⁴*

Essenes evinced that wicked spirits were tasked with degrading the righteous for their sinning, but not their spiritual annihilation; *"all the spirits of the destroying angels and the spirits of the bastards, the demons, Lilith, the howlers and the yelpers they appal their heart and their ... in the age of the domination of wickedness and the appointed times for the*

humiliation of the sons of light, in the guilt of the ages of those smitten by iniquity, not for eternal destruction, but for the humiliation of sin". This parallels Magian teachings about the sort of salvation they could expect under the Deliverer, horrendous punishment for sins ... yes. Eternal damnation for god's children, no.

THE SPIRITS OF LIGHT
AND DARKNESS

1QS III informs us the God of Knowledge placed all mankind under the prospective lordship of two entirely different spirits, each manufactured by Yaweh. "But the God of Israel and his angel of Truth will succour all the sons of light. For it is He who created the spirits of Light and Darkness and founded every action upon them and established every deed upon their ways".¹²⁷⁷ On this basis the Essenes can not have been absolute dualists, but more likely adherents of a chaldeanised Jewish godhead. Their monotheistic godhead appears as follows;

This can be compared with the very early Zoroastrian perception of the One God

AHURA MAZDA (SUPREME GOD)

SPENTA MAINYU
Also called the Holy Spirit,
begetter of *Asha* ('the Truth')

ANGRA MAINYU
Also called The Spirit of Wickedness,
begetter of *Druj* ('Lies')

The Magian model had two variants; where the spirit of wickedness was the direct creation of the High God (a sort of Zurvanite philosophical bent), and one where it was a sentient unspiritual evil altogether unrelated to the Supreme God, which appears as follows in a more evolved dualistic form;

AHURA MAZDA (CREATOR, LORD OF LIGHT)

AHRIMAN (THE EVIL ONE/ DESTROYER)

MELCHIZIDEK APPEARS
BEFORE THE DIVINE
BEING

In the scroll of *Melchizidek 10:7*, found in cave 11, Melchizidek is said to have 'atoned ... for all the sons of (light and) the (men of the) lot of Mel(chizidek)', taking 'his stand in the assembly of El (God), in the midst of the gods'.¹²⁷⁷ As I have already explained monotheism takes different forms. Where angels and holy beings (some of whom have taken on human form, such as prophets and judges) are emanations of the divine being, they share in part (if not fully) that divinity, but are not separate deities. Angels and genii, are spiritual aspects of the divine being, yet not gods, although they might have powers equivalent to that of a 'heathen' God, with respect to altering courses of events, or communicating between the celestial and terrestrial worlds. Heaven was therefore a very busy place, bustling with countless angels and divine beings, none of whom subtracted from the oneness of the 'One God', or of the Supreme God (as in a God above all other Gods). At first glance Melchizidek seems to have been incorporated into a scripturally-based Jewish monotheistic, polytheistic pantheon, which included angels, judges, kings (eg; Melchizidek, David) and princes. Under Christianity Jesus Christ joined their esteemed numbers, seated at the right hand of the deity, serving as the heavenly high priest (See the *Book of Hebrews*).

JESUS BELONGED TO
THE ETERNAL ORDER OF
MELCHIZIDEK, PRIEST
AND KING

In the Melchizidek text 'gods' is denoted by the term *Elohiym* (Hebrew: 'gods', 'magistrates', 'the very great', and 'angels') being the plural of *Eloahh* (Hebrew: 'God', 'the Deity').¹²⁷⁸ This same philosophy appears to have been reflected in the Greek teachings, in words such as *Arche* and *Archon*, which are laterally related to *Theos*.

- αρχη (arche 'magistrate', 'power', 'principality', 'rule')¹²⁷⁸
- αρχηγος (archegos 'author', 'captain', 'prince')¹²⁷⁸
- αρχο (archo 'to reign or rule over')¹²⁷⁸
- αρχων (archon 'chief', 'magistrate', 'ruler', 'prince')¹²⁷⁸
- θεος (theos 'God', 'the Supreme God', 'magistrate').¹²⁷⁸

JEWRY REFUSED TO
BELIEVE THAT GOD HAD
A SON

This startling information has a direct relevance to Jesus Christ, the historical personage. Jews confronted Jesus with that great burning issue, what they saw as Christ's foremost blasphemy and crime against Yaweh, 'thou, being a man, makest thyself God' (NT) *John X: 33-36*.

'Jesus answered them, Is it not written in your law, I said, Ye are Gods? If he called them gods, unto whom the word of God came, and the scripture cannot be broken; Say ye of him, whom the Father hath sanctified, and sent into the world, Thou blasphemest; because I said, I am the Son of God?'

'Ye are Gods' is a direct allusion to (OT) Psalm LXXXII 'I have said, Ye (the judges) are gods; and all of you are children of the Most High. But ye shall die like men, and fall like one of the princes'. The psalm ends with David's petition 'Come O God, and rule the world; all the nations are yours'.

Jesus draws on Davidic Jewish scripture to explain his divinity. In so doing he is identifying himself not only as one of the divinely angelic judges dispatched from heaven to bring a true form of law over the earth, but God himself, the ultimate judge. In (NT) John VIII: 23 Jesus further explains his heavenly origin and destination to a Jewish audience. 'Whither I go ye cannot come ... And he said unto them, Ye are from beneath; I am from above: ye are of this world, I am not of this world'.

The appearance of Melchizedek in the Essene texts suggests certain elements of Jewry had come to embrace this pre-Abrahamic figure as their very own, or even that the Essenes were not ethnic Jews in the traditional sense, but descendants of Jerusalem's indigenous Mesopotamian inhabitants from before Abraham's arrival, something that would have seen them shunted from the city, and might account for their need of a desert retreat. According to Eusebius Herod burned Jewish genealogical lists to snuff out future Messiah figures, thereby erasing public records detailing which Judaeon families were of Ammonite and Moabite stock. In short we don't know nearly enough about the ethnic component of the Essene sect, but Jebusites were spoken of in the Qumran scrolls and so still alive and well during the era of Jesus Christ.

The Christian writer Bishop Eusebius of Caesaria further mentions Essenes were antichristian, thus precluding them as the earliest Christian fathers, or, at the very least, at loggerheads with the early Christian leadership, including Jesus Christ himself. Eusebius expounded what he knew of the Melchizedek teaching.

'The Lord said to my Lord, 'Sit at my right hand, Till I make Thine enemies the footstool of Thy feet ... From the womb before the daystar I begat thee The Lord swore and will not repent: Thou art a priest for ever Of the order of Melchizedek'¹²⁷⁹

He continues ... *"This Melchizedek is introduced in the sacred record as priest of God Most High (the word YHVH is not mentioned), though not consecrated with any prepared chrism or even belonging by birthright to the Hebrew priesthood. That is why it is according to his order, not that of the others who received symbols and patterns, that our Saviour has been called Christ and Priest with the backing of an oath. And so the record does not state that He received physical chrism from the Jews, or even that He belonged to the same tribe as the acknowledged priests, but that before the daystar (the sun), that is, before the construction of the world, He had his being, and holds His priesthood deathless and ageless to all eternity."¹²⁷⁹*

Bishop Eusebius' efforts compare very favourably with the content of the 2,000-year old scrolls discovered at Qumran. "Abram camped in the valley of Shaveh, which is the valley of the king, the valley of Beth-ha-Kerem; and Melchizedek

king of Salem brought out food and drink to Abram and to all the men who were with him. He was the Priest of the Most High God".¹²⁸⁰ In the Essene writings Melchizidek returns to the fray in the battle of the Apocalypse, redeeming the "sons of light", possessing the lot of Melchizidek.¹²⁸¹ There he gains forgiveness for the disgraced, through divine grace, forcefully removing them from the grip of Belial. But we also find a Melchizidek text in the Egyptian Nag Hammadi codexes, an eclectic conglomeration of Christian and Gnostic apocrypha dating to the 4th Century. The writings were originally ordered destroyed by the Coptic Patriarch Anastasius but buried by disobedient monks until the end of days. Evidently Christians and Gnostics laid claim to the former priestly King of Jerusalem. Somewhat paradoxically the Nag Hammadi writings contain the writings of a prophet called Zostrianos, a mutilated text purportedly originating in the teachings of Zoroaster, but on closer examination found to be Gnostic and Hellenic. The title was clearly penned by individuals who honestly believed they were propagating Magian teachings, or who decided to falsely ascribe them to the Aryan prophet to lend them some authority and validity. The former stance could only have eventuated among mystics descended from Magi left behind as the defunct Achaemenid empire was forced to abandon its Egyptian holdings. Stylistically there is no philosophical connection between their beliefs and Magian practice, unless they belonged to doctrines destroyed by Alexander, which I personally doubt.

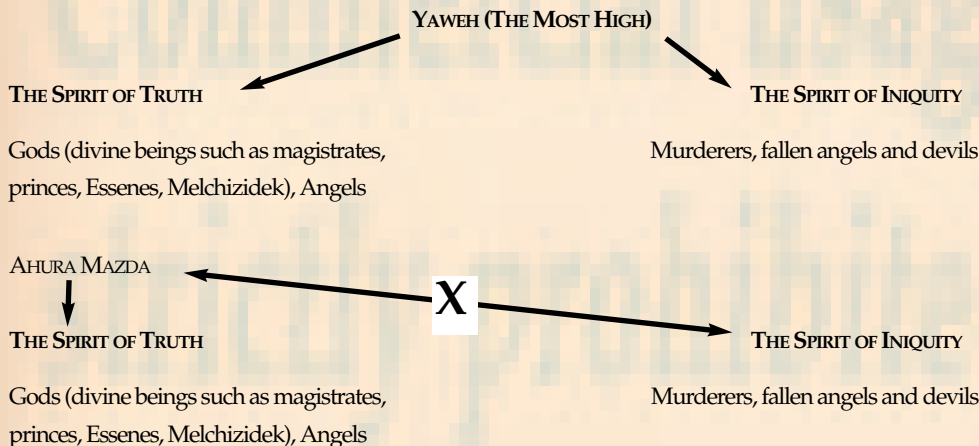

As for the royal house of David, there was definitely more to it than met the eye, if the highly-regarded King Hezekiah's seal is anything to go by. As in Egypt, Persia and Assyria the royal seal of Hezekiah, the 13th linear ancestor of Jesus Christ, took the form of a winged sun disk. He also used a second variant, a typically Egyptian winged scarab.¹²⁸² It should be noted these seals were employed during his period of independent rule, on supplies to help withstand Sennacherib's Assyrian invasion of 701 BC. This suggests an ideological, political, or even familial connection between the royal house of Judah, and those of Egypt, Persia and Assyria. In the ancient world these images signified a dynastic symbolic portrait, and were representative of a given king or ruler's *fravashi* or pre-existent soul bird. The precise form of Hezekiah's seal seems closer to Assyrian variants of the image.

The Jewish prophet Malachi might be alluding to the use of a dynastic solar disc among the Jewish kings, when he pens the following reference to the Messiah: "But unto you that fear my name shall the Sun of Righteousness arise with healing in his wings".¹²⁸³ So with all these wierd and wonderful connections throughout the east it comes as no surprise that the Lord Jesus was described as having brown hair and blue eyes.

Accommodating information found in the scroll of Melchizidek, one sees the Essene vision of heaven, a markedly different proposition to the unencumbered monolithic monotheism of the Sadducees. It can be seen in the following terms;

The classic difference between Magian and Essene doctrine is best shown by comparing the following:

MELCHIZIDEK BROUGHT FOOD AND DRINK TO ABRAHAM PERSONALLY

HEZEKIAH'S SEAL WAS A WINGED SUN DISK

Fig 57. The seal of the Persian King Xerxes

Jewish Kabbalists held similar views on the nature of the damned. The Second Enochian text, the *Book of the Secrets of Enoch*, has an altogether different provenance from the *New Testament*, appearing in Slavic variants owing to their importation into Eastern Europe from Khazaria. The title is dedicated to the patriarch Enoch's journey into heaven and hell, wherein he describes visions of the seven heavens, and the depths of perdition. The abyss of terror was reserved for the unholy ... criminals, the envious, the untruthful, those who 'sin against nature', "*which is enchantments and devilish witchcrafts ... those who corrupt children through sodomy, who perform magic* (I don't know the exact word found in the text)".¹²⁶⁴ The Zoroastrian model is very similar indeed to that of the Essenes.

AHURA MAZDA (THE SUPREME GOD)

SPENTA MAINYU (THE HOLY SPIRIT)

The Holy Immortals (kings, princes, magi, saints), *yazata* genii and angels

ANGRA MAINYU (THE SPIRIT OF WICKEDNESS)

Criminals, whores, killers, warlocks and witches of the dark power and devils

The main difference between the two philosophical systems still remains, as before, differing perceptions of the relationship between the creator and destroyer

The opening words of the King James Bible, bear witness to the primeval connection between Christianity and the great Sun-kings, even into the Early Modern era, and became emblematic of a rift between kings and Vatican reformists. It may also have occasioned the death of Tundale, its author, by fire.

Great and manifold were the blessings, most dread Sovereign, which Almighty God, the Father of all mercies, bestowed upon us the people of England, when first he sent Your Majesty's Royal Person to rule and reign over us. For whereas it was the expectation of many, who wished not well unto our Sion, that upon the setting of that bright Occidental Star (ie; the death of), Queen Elizabeth of most happy memory, some thick and palpable clouds of darkness would so have overshadowed this Land, that men should have been in doubt which way they were to walk; and that it should hardly be known who was to direct the unsettled State; the appearance of Your Majesty, as of the Sun in his strength, instantly dispelled those supposed and surmised mists, and gave unto all that were well affected exceeding case of comfort; especially when we beheld the Government established in Your Highness, and Your hopeful Seed, by an undoubted Title, and this also accompanied with peace and tranquility.

EUROPEAN ROYALTY

SUN-KINGS OLD

I once had it said to me that the Catholic and Orthodox priesthoods are 'all magicians and witches', or 'the closest thing to pagan priests that you'll ever see'. It's an opinion freely-circulating since the Protestant Reformation, which at its height saw Roman Catholics burned to death by their fellow countrymen as witches. From the information presented in this book, you probably realise that such perceptions are not supported by the evidence, though it outwardly appears to be so. Christianity is, after all, a 2,000-year old religion. One point really needs to be stressed: the present Roman Catholic and Orthodox Church priesthoods were predominantly composed of converted pagans, but were not in any way officially allied or affiliated with the Magi. Nor have they ever formally recognised a connection between the two religions. Sure there was a honeymoon period. During the Middle Ages a certain unknown number of clergy were Magian-Christian, Chaldeans or Manichees, but, by the time of the Inquisitions, these were the very 'heretics' the medieval reformist papacy sought to totally eliminate by complete allegiance to the magisterium, life imprisonment, or death at the stake. Especially since the reforms of Vatican II it would be true to say that Catholic priests are the closest things to Rabbis you'll ever see, without actually being Rabbis. Like Islam, which also contains folk-customs that are remaining vestiges of this elder pagan faith (eg; the epithet *Allah* comes from the Chaldean term '*alah* 'the Deity', 'the Most High'), the Church actively worked against the white priests, magicians, their next-of-kin marriage, and in the end exterminated paganism and this other demi-pagan intermediate form of Christianity from the face of the earth. In all of Magian history, rarely had the Magi met a more formidable adversaries than the Christian and Muslim hierarchies, who reduced them to little more than a nifty word for a magician, its true meaning lost.

CHRISTIANITY IS A VERY
ANCIENT RELIGION

In conclusion, the centuries following the death of Jesus Christ generated an unbelievable level of controversy and religious upheaval. On one hand we have converted religious figures like the Rabbi Joseph of Arimathea (who resettled in Roman Britain), a staunch follower of Jesus, and the Three Wise Magi, who promoted the infant Christian Church throughout the Orient. On the other hand we see Jewish and Persian authorities undertaking their own waves of repression against Christian dissidents. During the late Middle Ages times had changed, permitting Catholics and Orthodox believers to go on the rampage in their turn.

Even in our own time, death seems to have had the ultimate victory. The true significance of Jesus Christ, it would seem, finds its greatest fulfilment only on Judgement day, when he presides over a mass-resurrection, turning up to claim his own. At that event he is a sword to the unrighteous, the flock-splitter who leaves the remainder to their father, the demon of the left-hand path. And so the devout hoped;

'To stand before the blessed and holy Trinity and clearly see its ineffable glory and by its unchangeable and overpowering light -the rays of the three Suns- be made resplendent and shine, and to receive the glow and the rays that emanate from there and to rejoice in them, trusting in Christ that if one dies by the law of nature, yet he shall live with Christ in the ages'.¹²⁶⁵

You will note Grigorii's reference to certain "laws of nature" as the cause of mortality. Such phraseology advertises his adherence to pagan gnostic perceptions about aging and death. Rather than being demon-caused (strictly speaking), death came as one's triangles (ie; one's cells) lost their ability to replicate.

'So the triangles composing the food and drink which it takes into itself from outside are older and weaker than those in itself, which are new and break them up and absorb them, feeding the creature on substances like its own and making it grow. But when the root of the triangles (ie; the stem of the cell) is loosened by the many trials they meet in the course of time, they can no longer cut up into their own likeness the triangles of the food taken in, but are themselves easily broken up ... and in the process the creature fails and declines into the condition which we call old age'.¹²⁶⁶ The text was a Platonic pagan gnostic scientific discourse, possibly written around 388 BC.

And the final destination for the 'saved'? A weakening Jesus lets the cat out of the bag as he hanged on the Cross. In laboured breathing the Saviour musters enough strength to succour one of the condemned criminals, to squeeze out the Aramaic "Today you will be with me in Paradise". The precise word found in the New Testament, as used by Jesus, is παραδεισος, a Greek word appearing some three times in the Christian bible.¹²⁶⁷ It was drawn from the ancient Aramaic Persian term *pairadaeza*, which is a reference to the holy, forested groves, in which the Aryan faithful once worshiped the divine being, and in heavenly gardens too, a sort of Garden of Eden if you like. This seems in accordance with what *Revelations* tells us about the luminous god's heavenly city and its gardens, which possess a stream of life-giving water, and the trees of life which dispense their fruits twelve times per year.

Pious and righteous Muslims expect much the same in the afterlife, God willing; *"The righteous shall dwell in gardens watered by running brooks, honourably seated in the presence of a Mighty King".¹²⁶⁸*

Essene Hymn 18 contains features suggesting the Jewish brotherhood of astrologers, deemed heretical by the reigning temple priesthood, held similar notions. It speaks of a heavenly garden paradise, making special reference to a sacred tree whose sanctity was concealed from the world. *"Thou didst set a plantation of cypress, pine, and cedar for Thy glory, trees of life beside a mysterious fountain, hidden among the trees by the water, and they put out a shoot of the everlasting Plant. ... And the bud of the shoot of holiness of the Plant of truth was hidden and was not esteemed; and being unperceived its mystery was sealed. Thou didst hedge in its fruit O God with the mystery of mighty Heroes and of spirits of holiness and of the whirling flame of fire. No man shall approach the well-spring of life or drink othe waters of holiness with the everlasting trees, or bear fruit with the Plant of Heaven, who seeing has not discerned and considering has not believed in the fountain of life, who has turned his hand against the everlasting bud".¹²⁶⁹*

The once-controversial *Book of Revelations*, allegedly written by St John, refers to a heavenly city, otherwise known as the New Jerusalem (so named after Melchizidek's Salem). Eminently-visible Judaising passages have found their way into what some Church Fathers decreed should be the final chapter of the *New Testament*. John's apocalyptic imagery takes the form of a spiritual journey, and no doubt it had certain attractiveness for Jews. The following seems to be a scriptural manifestation arising from the mission to the Jews, but in a fuzzier way, was also

philosophically accessible to Gentiles who knew venerable Magian lore about the heavenly city.

*“And he (one the angel guides) carried me away in the spirit to a great and high mountain, and shewed me that great city, the holy Jerusalem descending out of heaven from God. Having the glory of God; and her light was like unto a stone most precious, even like a jasper stone, clear as crystal: and had a wall great and high and had twelve gates, and at the gates, twelve angels, and names written thereon, which are the names of the twelve tribes of the children of Israel: On the east three gates; on the north three gates; on the south three gates; and on the west three gates. And the wall of the city had twelve foundations, and in them the names of the twelve apostles of the Lamb”.*¹²⁹⁰

Agrippa extrapolates upon the teachings of the ancient holy heroes, which (possibly for political reasons) included apostles as pre-eminent among their number. Being a magician, Agrippa’s words in the following quote describe an alternative perception of the *Book of Revelations*, and its mention of the names of the twelve tribes of Israel.

*“Therefore out of the number of these almost infinite there are twelve chief, viz the twelve apostles of Christ, who (as the exangelical truth saith) sit upon twelve thrones, judging the twelve tribes of Israel, who in the Revelations are distributed upon twelve foundations, at the twelve gates of the heavenly city, who rule the twelve signs, and are sealed in the twelve precious stones, and the whole world is distributed to them: but their true names are these: the first Symehon Hacephi this is Peter, the second Alousi, whom we call Andrew, the third Jahacobah, this is James the Greater, the fourth Polipos, whom we call Philip: the fifth Barachiah, this is Bartholomew; the sixth Johanah, whom we name John: the seventh Thammi, whom we call Thomas; the eighth is called Medon, whom we call Matthew; the ninth is Jahacob, this is James the less; the tenth is Catepha, that is Thadeus; the eleventh Saman, who is Simon the Canaanite; the twelfth Matattiah, who is called Matthias. After these are the seventy-two disciples of Christ, who also themselves do rule so many quinaries of heaven and tribes, people, nations, and tongues. After whom is an innumerable multitude of saints, who also themselves have received divers offices, places, nations and people into their protection and patronage, whose most apparent miracles at the faithful prayers of those that invocare them, we plainly see and confess”.*¹²⁹¹

The *New Testament* continues; *“And the nations of them which are saved shall walk in the light of it; and the kings of the earth do bring their glory and honour into it, and the gates of it shall not be shut at all by day: for there shall be no night there. And they shall bring the glory and honour of the nations into it. And there shall in no wise enter into it any thing that defileth, neither whatsoever worketh abomination, or maketh a lie: but they which are written in the Lamb’s Book of life”.*¹²⁹¹

THE KINGS WOULD WALK
THROUGH THE OPEN
GATES OF HEAVEN

The kings would be there too, unaccused by prelates of wild heresy allegations, the mortal suns taking their inherited place, resting from the tribulations of providing rightful and adequate governance to their earthly subjects. Neither sun nor moon is needed to illuminate the celestial city of massive dimensions, only the golden aura, the white, pure light of god (God is a shining light) and his holy spirit. The *Qur’an* describes Allah’s appearance along practically the same lines as Christians, Kabbalists and Magians. *“God is the light of the heavens and the earth ... Light upon Light; God guides to His light whom He will”.*¹²⁹²

GOD, THE LIGHT OF THE
HEAVENS

The heavenly holy city of the Magian righteous is briefly described in *Farwardin Yast* I:3 *‘It looks like a palace, that stands built of a heavenly substance, firmly established, with ends that lie afar, shining in its body of ruby over three-thirds; it is like a garment inlaid with stars, made of heavenly substance’.* Such was paradise lost.

Looking at things objectively it certainly seems that Christ, King of the Davidic line, and his apostles, were attempting to reinstall the Jewish kingship, a kingship party to Magian teachings. But the priests of that day would have none of it. Not that having their own king was politically disastrous during Roman rule. It’s just they preferred the false king Herod and a bandit to their resplendant Sun Christ. And so they crucified their brown-haired, blue-eyed king, using prevailing Roman law to exact the capital punishment prescribed by the Sanhedrin. The Procurator of Jerusalem, having found Christ guiltless of raising strife against Rome, washed his hands of the whole sorry matter after handing down the death sentence. The trauma of the event came back to haunt him later in life, leaving a suicidal Pontius Pilate with a need to make restitution. So, perhaps at the behest of his wife (profoundly won over by Christ’s miracles) Pilate tried to absolve himself by presenting a case to Emperor Tiberius, that Jesus be declared a god before the Roman Senate.¹²⁹³ He failed.

P i l o g u e

Paganism in our time?

Every tale should have a beginning and an end. So we should ask, when did the last of the pagans die out. Let us now examine what many will see as an unlikely hypothesis - that genuine families of white witches and devil-worshippers have survived into our time, practicing their religions in secret. Though some would call it a non-question, some data directs us to seriously consider that paganism has endured into comparatively recent times. Catholicism is a genuine survival of a 2,000 year old religion and is still here, as is Orthodoxy. Islam is still here, some 1,300 years later. Jews, Parsees and Hindus practice faiths up to several thousand years old and are still here. Why couldn't white (fertility) and black (destructive) paganism have survived into the 20th Century in some cases? Are we so arrogant to believe that Christianity, Islam and Judaism are the only faiths capable of surviving the past 2,000 years?

If there should be any doubts in your mind as to whether Magi were alive and well in Europe even as late as the 16th Century (ie; 300-400 years ago) then ask yourself this question. Where did Bruegel (nicknamed "Hell" Bruegel) see the raised metal defleshing platforms he depicted in his 1562 AD painting of hell, the *Triumph of Death*, devices once used by wealthy Magian dignitaries in Central Asia? Where in Western Europe did he see the roofed Slavic crosses and rotting bodies tied to trees, or the tower with the fire burning brightly on top, in conjunction with these same de-fleshing platforms? (fig 58). Clearly white Magians were present in Renaissance Europe, and by implication the devil-worshipping black Magi were also present, something admirably corroborated by the witch trial documents which were only starting to peter out by the 18th Century.

Some clues may lie in reports that have persisted down throughout the ages, and more recently from stories coming from Europe and the USA in the 1990's. These concern police investigations into a spate of claims by distraught young women, that they had been involved in "Satanic rites" during which they freely offered a child to the devil, a baby whom they, as brood-mares, had carried in their own womb, a child sired by an orgy. According to these reports no evidence of such crimes was ever found. But then again *material evidence* for these rituals was rarely if ever found during the witch trials of the Inquisitions or in the subterranean *Mithraeas* that tourists visit annually in Europe, and upon which parents once lovingly offered their own unwanted progeny to be immolated for the propitiation of Ahriman, the Black God. Naturally the mental well being of the persons involved is open to serious question, but if it could be proven that these incidents actually occurred, then potentially we may be looking at a deluded act performed by *very unhinged people*, or alternatively the ongoing continuity of rites of considerable age, through discrete family bloodlines of equal longevity.

Fig 58. The "Triumph of Death" Note the defleshing platforms

WHEN DID PAGANISM
COME TO AN END?

It has recently come to light that many of these claims were the result of skillful coaching by psychologists trying to make a name for themselves (and milk their clients' medical insurance funds), and the promptings of Christian fundamentalists; and I would tend to agree. If historical accounts can be relied upon, the so-called modern devil worshippers (if they were genuine) would not be in any way afflicted by multiple-personality disorders stemming from "suppressed horrors". After all, they were born into this faith; they loved, worshiped and feared the horned god, the father of the world, in just the same way as a Christian loves Christ. They petitioned their black God for aid, and he was believed to give it.

No, genuine Satanists out in the community would be more likely to remain fairly quiet about their ceremonies, and would probably conduct these rites in such discrete places as cellars, basements, and abandoned mines. They would be unlikely to spill the beans on the identities of their fellow coven members if apprehended by the authorities. Hanging themselves, just as the mediaeval witches once did, would be more their style.

Fictitious reports? Perhaps yes, perhaps no! Take the recent cases of Fred West in England (who hanged himself in jail), and a Belgian (Frisian) Satanic cult, both of which were *taken unaware* by police, after which it was discovered they they had been slaying people, often their own children, in underground basements. Particularly worrying was the Belgian cult dedicated to Abrasax, an Infernal Lord of Ancient Egypt, best equated with Ahriman or Satan. Following a tip-off and *surprise raid*, police found evidence of an illicit trade in unregistered, sold or kidnapped children which were held in abysmal conditions pending their sacrifice.¹²⁹⁴ Yes, *this actually happened*. Blood-filled crucibles, ritual objects, a calendrical document (listing some 18 sacrificial dates) as well as a disturbing letter to a sect member requesting them to somehow acquire another eight individuals for ritual slaughter.¹²⁹⁴ In early January they had been planning to kill a young person in honour of a certain Saint Winnibald, a victim who was yet to be obtained.¹²⁹⁴ It is conceivable this cult headquarters alone was killing at least 18 people per year.¹²⁹⁴ Since it lay undetected for so long, Belgian police are reported to have said that several hundred victims may have met their deaths at that location.¹²⁹⁴ How many such "Houses of Horror" are there out there? If the Belgian 'occultists' were merely deranged copy-cats, or fantasy-Satanists, probably very few. But, if this is an actual survival of dark heathenism, then there may be far more people going under the knife than you think. So how do 18 persons just disappear without anyone knowing or caring? Were they people raised in seclusion since birth to one day undergo a ritual death, or were they, as in the times of pagan Rus' and Arzah, travellers, or even drunks, vagrants, criminals, or disaffected youths drugged and snatched on a chance basis, and nowadays reported as missing persons. Remember, thousands of people go missing annually. *Can we really be so sure* they are all suicides, or troubled individuals wanting to escape their jaded past, or gambling debts, and make a new start for themselves somewhere else? Infrequently we hear of kidnappings where a child or youth is never heard from again. It sometimes happens that police believe that there was no known motive for their disappearance (eg; custody disputes and child slavery), thus indicating that they had perhaps been snatched on a purely random basis. The younger the child, the more worrying a child's disappearance becomes, because we are robbed of plausible explanations as to why it happened. Wild assertions that some evil was afoot, are not too wide of the mark. One Iranian Yast tells us that paedophiles were not welcome at the pouring of the *Haoma* libation under any circumstances. This prohibition was due to the depraved nature of their sexuality. In reality a paedophile loves children in every way, so much so that they lose control of the situation and go beyond the edge of decency by trying to engage them in sexual acts. Deep down they don't really intend to hurt a child, this is an unintentional by-product of their actions. However what I find particularly interesting about the Belgian case is that they were "Satanic" paedophiles who were *killing the children*. This is a significant deviation from "normal" paedophile activity. Moreover they had a long history of convictions for other crimes, and were engaging in the "Satanic" mysteries. These many points, and the seemingly well researched nature of their operation are indicative that they might well have been involved in the continuity of the "black rites" rather than acting upon some "video-inspired fantasy". Newspaper articles mentioned blood-filled containers. Since the blood belonged to animals, I would be interested to find out whether it belonged to cattle, chickens, dogs or wolves, because they are the sort of blood products prescribed for the black rites. One theory that I have read suggests that blood symbolised much more than a being's life, it was the creature's soul. If it should happen that human blood was amongst the collection, these might, based on the theory just mentioned, signify imprisoned souls.

DO GENUINE MULTI-
GENERATIONAL
SATANISTS EVEN EXIST?

A RITUAL BASEMENT WAS
FOUND IN BELGIUM

And just who was this Saint Winnibald, worshiped by the sect with an act of human sacrifice every 7th of January? The mere notion that the cult was making offerings to Saints is, to my mind, indicative that they were actual inheritors of the ancient rites, rather than simply acting them out. This point is not generally known. Obviously the Church has never countenanced the offering up of things other than prayers and good works to the Saints on their feast days. And during the Christian Mass, their many good achievements and life story were traditionally recounted for the congregation to seek solace from, and even to emulate in their daily life. Well, I can think of two possible conclusions.

SACRIFICES MADE TO A
SAINT WINNIBALD

1. According to the religious views of the black Magi, that which is holy must be defiled, in mimicked rites, rites which were of an inverted or twisted nature. Accordingly the human sacrifice performed by these individuals may have been a parody of the Church's actual feast day of Saint Winnibald, where innocent young lives, who had also undergone prior torture, were offered up to the Christian Saint instead of prayers.

2. It should be noted that the true St Winebald's feast day is the 18th of December, not the 7th of January as observed by the Belgian cult. This might indicate that their St Winnibald was a person other than the Catholic St Winebald. But who? My preferred option is that these Belgians had a devotion for a black Fravashi, the soul of a Saint of Evil, an anti-saint, who chose to call himself Winnibald. Mediaeval black witches were often named after saints, so there is an historical precedent. I wonder what this Winnibald's hagiography may have looked like. As an anti-saint his life's story would be rife with tales of heroically evil intent and deed. Perhaps he might have organised and taken part in some gratuitous large scale massacre of innocents, a high level assassination, a famous armed robbery, or something along those lines. Since the Mediaeval magicians are known to have drawn upon the power of the exhumed bones of infamous criminals, necromancers and black magicians, we might ask whether "unholy relics" of this nature were found at the raided headquarters of the sect. The use of "unholy relics" was a parody of the Church's use of the major relics of the Saints, whose holy mortal remnants are normally situated beneath the altar stone, and whose very presence helps further augment the holiness of the Church building in which they reside.

ST WINNIBALD IS NOT
TO BE CONFUSED WITH
ST WINEBALD

Besides investigating the horrors associated with this Abrasax cult, modern Belgian law enforcement agencies have had recurring nightmares concerning a band of balaclava-clad assailants in the province of Brabant (which as mentioned in Part I, Chapter VIII was the home of the Brabancons brigands during the Middle Ages), who are still at large despite having used the same getaway car each time.¹²⁹⁵ In the early to mid-1980's these unknown assailants unleashed a horrific spree of carnage during which, over that period, they shot to death almost 30 people and injured several hundred others.¹²⁹⁵ The motive? It doesn't appear that there was one ... *all of these victims were ordinary people just going shopping when these characters started moving into them with random shotgun fire.*¹²⁹⁵ Were these attackers video-inspired crazies, or might there have been a "satanic" thread behind these killings and maimings? And what about the recent case of the Hungarian protestant minister discovered to have murdered his wives and children, *whose remains were found in a large six-roomed underground basement.*¹²⁹⁶

The riddle of whether or not black paganism still exists today may never be successfully resolved, even if an arrested basement killer confessed to it. How willing would such detainees be to make sworn statements about their activities if they were genuine black pagans? Not very likely! If they do exist the pressure on them to keep silent now would be far greater than at any time throughout the history of the infernally-inspired witches, especially owing to the fact that we no longer believe that black witchcraft exists, or ever existed. Like Fred West, one person involved in the Belgian affair has already suicided. This might just be the consequence of their own guilt getting the better of them, but then again, it might be exactly what is expected of them if they should end up in the custody of the authorities. The accounts of the original witch trials show that the coven head would threaten to kill any witch in danger of breaking their vow of silence about their activities, thus compromising the security of the entire coven. There are instances when they succeeded in killing jailed prisoners who had confessed and recanted, because it was absolutely forbidden for anyone to turn their back on the black god once they had come to him under oath. Take the cases of Rebecca and Alesoun Peirson:

"If shee should discover anything, they all told the said Rebecca shee should endure more torments on earth then should be in hell and the said Rebecca told this informant that shee promised to keep all their secrets; and moreover they all told her, that shee must

LATE MEDIEVAL WITCHES
WERE THREATENED WITH
DEATH AT THE HAND OF
THEIR OWN SECT
MEMBERS

never confesse anything although the rope were about here necke, and shee ready to be hanged."

"Alesoun Peirson was burned as a witch, having gained her knowledge from the fairies, who threatened that "Gif scho wald speik and tell of thame and their doingis, thay sould martir hir".¹²⁹⁷

Witches on occasion appear to have had free and easy access in and out of the jails. In at least one case an escapee freely surrendered to the authorities more impenitent than ever, and was consequently executed of their own volition. One's fellow cult mates, or people angered by the person's crimes, could very easily gain access to the jails also, in order to kill an incarcerated prisoner. Concerning the death of John Reid, an Englishman, in the year 1696 AD, it was said that,

"After his confession had called out of his prison window, desiring Bailey Scott to keep that old body Angus Forrester who had been his fellow prisoner close and secure; whereupon the company asked John, when they were leaving him on friday night the 21th of May, whether he desired company or would be afraid alone, he said he had no fear of anything: So being left till Saturday in the Forenoon, he was found in this posture, sitting upon a stool, which was on the hearth of the chimney, with his feet on the floor and his body straight upward, his shoulders touching the lintel of the chimney, but his necke tyed with his own neck-cloth to a small stick thrust into a hole above the lintel of the chimney".¹²⁹⁸

A PRISONER DIES UNDER
SUSPICIOUS
CIRCUMSTANCES IN JAIL

The surgeon attending the scene declared *he had died of foul play inside the jail.*

These last incidents relate to the behaviour of witches held in custody yesteryear. Nowadays an accused "satanic" murderer (if such things do exist) would have every reason to snicker as he or she sits in the dock. Why? One thing modern black pagans would enjoy (which their predecessors could never have counted on), is a non-belief in their very existence. You see, even if they did confess, few people would believe them anyway, labeling them nutcases. As one Australian homicide detective-sergeant explained to me, a fair percentage of the more macabre killings are carried out by people who are *not even mad; they're just bad; very, very bad!*

Even so admissions of Satanic devotion nowadays are not always reliable. Neo-Satanists are predominantly self-styled individuals so disenchanting by society that they find in Satanism a means of expressing their life-long revulsions. Heavy metal and black metal bands who overtly profess satanism very often admit they are simply "taking the mickey" out of everybody; it's just a marketing tool. Some witches (if they do exist) might get a great laugh out of performing the old rites without fear of apprehension. As stated earlier one ceremony performed by the black witches entailed the trampling of crops with wide boards tied to their feet. A couple of years ago there was a spate of UFO "crop circles" (mysterious circles of flattened crops which some have associated with UFO landing sites) which began appearing in wheatfields in a certain part of England. Not long thereafter a group of hoaxers owned up to the deed and showed a TV crew exactly how they did it. Dressed in black cowed robes, and with boards on their feet, they formed a line radiating out from a centre point and proceeded to walk around in a circle crushing the crops under foot as they went. Were these hoaxers merely a team of pranksters trying to get a few chuckles by deceiving the public into thinking that UFO's were responsible, or were they genuine black pagans hamming it up for the cameras, and getting a real kick out of doing it in front of a prime time TV audience utterly oblivious to what they were doing before their very eyes? Not once in the report was it explained why they were dressed as they were! If a largish proportion of these "crop circles" were being made by actual black witches, then it might be possible to guess the location and prevalence of genuine black witchcraft in a given area by the number of "crop circles" that appear across the countryside. Similarly, where these circles only appear every other year it might indicate that the perpetrators were simply hoaxers. In his 1655 book *Antidote against Atheism*, Henry More wrote;

ARE CROP CIRCLES
PRODUCED BY MEANS OF
WITCHCRAFT?

"It might be here very seasonable to enquire into the nature of those large dark Rings in the grass, which they call Fairy Circles, whether they be the Rendezzous of Witches, or the dancing places of those little Puppet Spirits which they call Elves or Fairies".¹²⁹⁹

CROP CIRCLES HAVE
BEEN APPEARING IN
ENGLAND AT LEAST
SINCE 1655 AD

Thus it would seem that, based on this account, "UFO" circles were appearing in the grass as far back as the mid-1600's AD, during an era when maelific witches were avidly pursued by the secular authorities. If infernal witches are the possible cause of "crop circles", might modern black witches also be responsible for the so-called

“alien abductions” and “cattle mutilation” that infrequently accompany reports of these circles. It’s food for thought. Remember in both the fairy incidents and the “UFO landing zone” cases, men-in-black could plausibly be associated with incidents in which individuals are kidnapped and prodded with sharp instruments, perhaps iron goads. In modern times cattle are found drained of blood, and dairy cows with their udders and teats mutilated. The New Mexico Livestock Board has investigated quite a few cattle-killings. Based on their evidence, a certain amount of it is attributable not to UFO’s, but the activities of disturbed youths, or some hitherto unrecognised cult. Allegedly some families are more susceptible to these “alien abductions” than others (though few would believe them), and are said to be able to show the puncture wounds they received from the sharp instruments which were jabbed into them. I don’t know whether police departments have ever examined the possibility that some of these people are telling the truth, and being abducted from time to time by “men-in-black” who steal blood from them, sacred blood belonging to certain families only. If such temporary kidnappings are actually taking place there would have to be genealogically traceable connections with the mystical bloodlineages of Mediaeval Europe. Perhaps police ought to give some of these claimants a fair hearing, if for no other reason than to prove or discount the possibility that they have been abductees.

Widespread reports of incest within the community might be symptomatic of a diseased society, but could it not also indicate that, in isolated cases, we might be dealing with customs handed down by wizards from generation to generation, and which were necessary to maintain the purity of their family bloodlines?

Consider also the organised crime syndicates, the Godfathers, that are *causing* the strategic crime-waves that afflict our cities. Are these organizations run by people ready to destroy peoples lives, and dismantle the fabric of our society for the promise of billions of dollars in “black” money, which is then recirculated on an equally black market, or are they headed by figures who consider these activities to be an unholy duty? Are the many mafia gangs which strangle Russia, and which are now making their way into America only symptomatic of people trying to survive at any cost, or could the *Garabancias*, the “bandit-priests”, still be highly active, as they once had been in heathen Slavia. So endemic is organised crime in Russia, that special forces cadre are presently being used in an attempt to clean up the streets! I once had it said to me “Do you think that lawlessness and crime can destroy a country”. My answer ““Yes”, a reply directly relevant to the happenings that have dogged modern Russia. The all pervasive lawlessness is slowly but surely exterminating the socio-economic gains of their post-Communist reconstruction efforts. Russia is a land of polar opposites. On one hand you have an extremely civilised, well-educated and industrious race that has managed to maintain the world’s only operational space station. Russians have had to work harder than most Westerners just to survive. Even more amazingly, we are told that citizens have continued working despite not having been paid for a number of months. Their behaviour is truly remarkable in the light of such adversity, and something you would probably never see in Western society. Understandably many Slavs have buckled under the pressure and have looked towards crime as their only means of subsistence, a situation that tends to feed on itself ever more greatly as the situation there steadily worsens. But laying concealed behind it all may be something far more sinister in some cases. I am told that Slavic mafia fraternities bear the tattooed insignia of an 8-pointed star encompassing a glowing eye, an evidently pagan image. I am unaware of how prevalent such tattoos may be, but if they are, then this is the face of Russian crime that I find most disturbing. For behind it lies a pictorial representation of organised criminal enterprise. But is this sort of image purely fortuitous, or evidence that a certain number of the crime syndicates are run by black families? Whoever they are, these blood-sucking leeches, and their corrupted enterprises, are killing a nation, and scaring away the very foreign investment that gives a hope of a better life to ordinary Russian people. The crime bosses also siphon off foreign monies thereby dragging down foreign companies by their web of deceit, and redirect such funds to expand their growing international drug running, crime and prostitution. It will not be until this wave of corruption is stamped out that Russia can look forward to better times.

The commonplace killing of children in the womb, a lust for black money, broken families, the defilement of the world, the extinction of many species of plants and animals, obscene levels of de-forestation, polluted seas and riverways, mass starvation. Some readers will be left with the distinct feeling that the Horned God has finally won his bet against his brother, a bet supposedly made before Ahura Mazda many thousands of years ago, a bet that he could, through the agency of *Angra Mainyu* (the Unholy Spirit) and his special agents the black Magi, make mankind

believe that evil is good and the good evil?

Much of the English pagan revival during the 10th-11th Centuries AD was originally attributable to the still pagan-Christian Norman invaders which took over England, though it had always been there even in Saxon times. For all its attempts to eradicate witchcraft from society, and from the clergy in particular, Rome's efforts seem to have failed in some areas, such as the Basses Pyrenes region during the 1600's, where many of the clergy were practitioners of witchcraft. And at Lille, large witch festivals were held, that were well attended by personages from every walk of life, not the least of which were nobles and clergy of many and varied ranks.¹³⁰⁰

Do not think for a moment that Saxony relinquished the Old Faith all that easily either, for even in the 20th Century AD, before both world wars, some Westphalian menfolk still reputedly knew the precise whereabouts of the old idols.¹³⁰¹

And what possible conclusions can we draw from the following group of Bavarian revellers (fig 59.1), photographed late last century with pitch forks while wearing their goat and bull masks? Are they just a bunch of fun guys looking for laughs, along the lines of modern halloween revelry? Or might they be culturally-aware villagers trying their level best to carry on an enigmatic local tradition handed down to them by their ancestors, simply because it is fun to down around? Or could they be the real thing? Or even just one of them? If they were genuine devil-worshippers would they tell you if you asked them? Obviously they wouldn't, and as a result one could never prove they were black witches. If these were demonolators parading for a box camera then I suspect local 18th-19th Century AD Bavarian police reports would reflect abnormal happenings in the area; harm to livestock (especially cattle), missing persons and so on, perhaps even with a cyclic regularity, an almost ceremonious regularity. If this kind of documentary evidence is lacking then we would do well to regard this gathering as purely innocent entertainment.

SOME PAGAN CUSTOMS
LASTED UNTIL THE 20TH
CENTURY

Fig 59.1

Traditional revelry with an ancient pedigree can be found not only in Lambert Germany, but in Kilorglin, Co Kerry Ireland. The origins of the Puck festival are ultimately unknown, and it continues simply because its a good place to meet friends, enjoy yourself over not a few beers, and trade livestock. It's a great tourist attraction too, drawing visitors from Germany, America, Spain and other such places. Even so what are we to make of reports that in days of yore it was visited by Persians who made the long trip to Ireland to attend it. Some regard their past attendance as mere heresay. But if they did come there yesteryear, one might guess that this was a non-Islamic Iranian presence. Were these persons who wandered about the fair looking up at King Puck with different eyes? Did they have an understanding of the proceedings totally at variance with that of the many Irish fair-goers who wait all year just to go there and have a good time with family and friends?

Fig 59.2 is a 1994 photograph from inside a Sicilian crypt, where for hundreds of years, until comparatively recent times, dead bodies have been suspended in wall niches, in a funeral rite that has all the tell tale features of excarnation. Mausoleums served a similar purpose allowing the bodies to be exposed in stone crypts well free of

Fig 59.2

the soil. Underground mausoleums can be found in France and Germany too.

We hear tell of the Volkhvy in Permian and Siberia even as late as the 19th Century AD.¹³⁰² On the eve of the year 2,000, the Volkhvy Magi are apparently still active in Russia today, primarily in the more far-flung regions.¹³⁰³ But what is so amazing about that; witches have always been a standard feature of everyday Russian village life, and still continue to perform the same function nowadays. One only has to look at the Ukraine's equivalent of the Statue of Liberty, a massive titanium statue fondly called *Kiev'ska Ved'ma* (ie; "the Kievan Witch") erected at the supposed site of Vladimir's original idol sanctuary! Just 100 years ago, peasants in many parts of Russia were still converging to celebrate religious observances before particular holy birch, lime, pine, spruce and fir trees, offering incenses among which was camphor.¹³⁰⁴ In an article recently published concerning the growth of white and black witchcraft in Russia, we learn that witchcraft has reached unparalleled heights of popularity there, so much so that Russian TV channels have their own TV-sorcerers which enjoy the same level of fame as US TV-evangelists.¹³⁰⁵ If "New Age" spirituality is popular in the US, it is nothing compared with the level of acceptedness that it has throughout Russia. In Moscow you apparently need a license to practice "white" magic.¹³⁰⁵ This we may presume is because a number of them help heal the body and minds of their clients, filling the role of naturopath and psychologist. Whereas in the US people often have their own family psychologist, in Russia many go to white witches for health and prosperity, or to black witches who are supposedly well able to exterminate or cripple business rivals by sorcery.¹³⁰⁵ What's changed?

It is perhaps then no small coincidence that since the fall of Communism individuals have come forward in Russia claiming to be blood descendants of the Magi. In secluded provinces they kept their faith in the old ways enshrouded by secrecy, far from the prying eyes of the Christian priests and atheistic Communist officials. It is my understanding the Parsees are presently assessing the plausibility of their claims, especially in the light of their ancient legends, that ancestral believers migrated into Russia.

In examining the existence of black and white pagan practices it would not be proper to say that Germans do this, Irish, Chaldeans and Scandinavians do that, or Slavs are fond of doing so and so, in order to demonise entire cultures. In our search for surviving paganism we must begin by assessing certain families rather than whole nations.

The last reported witch burning in Poland took place as recently as Autumn 1947.¹³⁰⁶ The finer details of the incident are quite interesting, but it is even more notable for its depiction of mob violence, the sort of thing witches had to contend with for much of their history.¹³⁰⁶ Just a few years after WW2 had ended, large numbers of refugees moved about Europe, trying to make contact with friends and loved ones. One such family was the Mayowie (the Mays), one Karol and his daughter Eva, who returned to their very small, unassuming ancestral village at Kamionka, in the Bieszczadach region of Poland. No sooner had they entered the outer limits of the village, than they were seen by a local who ran into the village yelling that the Mayowies were back. At that one hell of a commotion broke out, as angry villagers darted out into the streets, pursued and captured the pair. You see before the war, the Mays had a name for themselves as witches, and now they were here once again in Kamionka. But not for long! The locals bundled them into a house and set fire to it. At the height of the blaze they were amazed that no cries were emerging from inside, only the child laughing. A mood of despondent gloom descended upon the onlookers, all fearful that the Mays were putting a curse on the village from within their fiery coffin. To negate this danger a quick-thinking villager threw a small amount of alcohol into the inferno. At that the girl's insane laughter turned to mortified screams. As if out of some horror movie she burst out of the building, reeling in pain, her hair engulfed by flames. She staggered and fell. As she tried to stand up, vomiting blood, the villagers cried "burn you witch". But she wouldn't stay down. Bystanders yelled to put her back in the house, but all were too afraid to touch her. Various persons ran off to get the necessary implements to achieve this end. One grabbed a cow chain and bound her, as others began hacking into the youngster with farming tools. Meanwhile grimacing faces nearby frightfully interjected, telling the key vigilantes to prevent her

Fig 60.1. Statue of Mother Russia

Fig 60.2. At Christmas time in Slovenia it was customary for a person to dress as St Nicholas (Santa Claus). Surprisingly he was normally followed by devils (*parklji*) that came to punish wayward children.

Fig 60.3. A Slovenian mummer's costume normally worn annually around Christmas time. As with werewolves, the custom might have originated in the Magian *hamaspathmaidyem* festival, when the souls of the *fravashi* saints flew down to earth to visit the souls of the living. As with the Magian tradition, turning them away brought misfortune upon a household, a fond welcome bringing blessings.

from scratching the ground, otherwise nothing would grow there for seven years. Anyhow they successfully plunged Eva back into the burning house, whereafter the roof caved in. And that was the end of it; or so they thought. Shortly afterwards war-weary units of the reformed Polish army, tasked with bringing law and order back into the war-ravaged region, entered Kamionka as part of their duties. Only what they found there was a murder scene in which a man and his daughter were burned alive for being witches, and virtually the whole village was implicated. Disgusted beyond belief, military officers convened a field trial to try the offenders. As a result of this the main ringleaders were shot, and others taken away to serve jail terms. Following tiresome years of war, in a land where Nazi death camps once existed, the angered Polish military unit wanted to efface this whole sorry episode. As a parting gesture, the soldiers were ordered to herd the inhabitants out of the settlement and they then used their weaponry to raze it to the ground. All that was left of Kamionka was a pile of ruins, nobody lived there, nothing grew there. Perhaps justice was done, but then again maybe the young Mayowie girl had the last laugh on Kamionka. I cannot however guarantee the veracity of this incident. Military records should exist somewhere testifying to the correctness of the alleged event, as reported in a polish newspaper of that period, and subsequently reprinted in the referenced periodical.

RELATIVELY MODERN
CASES OF WITCH
LYNCHINGS EXIST IN
EASTERN EUROPE

Just a couple of years ago (in 1997) the Tarasova family of Terekhovo (in Russia) was almost wiped out by locals who went to their home with the sole aim of *killing the entire family*, who they claim were witches who had been summoning anthropomorphic beings to haunt their village.¹³⁰⁵ This is all perfectly understandable in a land where a great many believed in werewolves less than 100 years ago. As recently as the Russian revolution, we hear of a devastatingly effective partisan leader who transformed into a werewolf whenever he was sent out on a mission.¹³⁰⁷ Obviously he only dressed as one, just as the witches once did. In another instance a coven of modern Russian black witches (many of whom professed to be lesbians) explained how they *worshipped a rat*.¹³⁰⁷ But stories of this nature have been going on for some time now. I myself have met a person who claimed his grandfather was burned at the stake in pre-revolutionary Russia for being a werewolf, and another whose Latvian father told them stories when they were children, of the war going on between the white priests and the black priests. And what about the mystical monk Rasputin, the long haired and bearded charmer in black robes who wooed the Russian royal family with his amazing feats? Russian Orthodox believers assert that Rasputin was an imposter in no way connected with their Church. Perhaps they're right.

THE WITCHCRAZE

These points permit one to gain some understanding of “witch-craze” mentality that tore through Mediaeval and Renaissance society. Society’s recognition of the very existence of black witches, and human sacrifice as an act of religious worship, can create widespread fear, loathing and suspicion, which allows for scenarios in which fundamentalists and vigilantes descend into hysteria as they try and rid society of these acts. There can be little doubt that it was the prevalence of actual dualist witches in the Middle Ages that permitted witch hysteria to balloon out of all control in Church (Catholic and Protestant) circles, but more importantly on a street level.

If white and black pagans have survived into the modern era, we must be very quick to differentiate the residue of paganism from true pagans, who have inherited and guarded the secrets of their ancestors. Remember, *it is one thousand years later*. Whereas a thousand years ago it might have been possible to confidently conclude that a person possessing a treatise on astrology and magic was very likely an astrologer or magician (although they might not necessarily have been), it is highly unlikely and ridiculous to assert that anyone who reads the astrology section of their magazine, or has books on herbal medicine in this day and age, is a pagan with a record of unbroken bloodline and religious practice stretching back a millennium or more. This is merely backwash from that age. However we might have cause to ask why it is that modern astrology books often contain the same sets of predictions for a given set of planetary positionings as contained on Babylonian tablets unearthed by archaeologists many thousands of years later.¹³⁰⁸ Does this mean that this same knowledge has been handed down to the present day by persons unknown, who were the actual inheritors of the ancient ways? I believe so.

For those still unconvinced of organised paganism’s factual longevity consider the bands of muslim women who, earlier this century, dressed in mourning robes, and lined the banks of the Nile, to witness archaeologists make off with the contents of emptied pharaonic tombs, as they shipped the royal mummies out of Egypt. Somehow I don’t think their sad wailing indicated they were sorry to see gold and tourist attractions being taken abroad. It is more likely that they were crypto-pagans saying good-bye to the Sun Kings from beneath the veil of

Islam.

And last century Lenormant declared “I think M. Oppert was right in recognizing a trace of the Magism of the ancient Medes in the odd religion of the Yezidis or “worshippers of the devil”, who dwell at the present time (c. 1877) in Irak Adjemy and the north of Mesopotamia; for this religion professes in its doctrines the Mazdean dualism, but in its worship it only renders homage to the wicked principle”.¹³⁰⁹ By a stroke of good fortune I have met Chaldean Christians here in Australia, people who well knew the many Yezidis of Northern Iraq. They worked and lived alongside them in their villages, and studied engineering under them at university. They claim that the Yezidis are basically good folk, and highly intelligent. Their way of thinking reportedly differs from that of ‘ordinary people’. For instance if you stamp on the ground in anger they might threaten to harm you for offending their lord beneath the ground, the ultimately redeemable fallen angel Melek Ta’uz. Owing to their mutual status as minorities in Iraq, Christians and Yezidis have endured Muslim reprisals from time to time, and for this reason both groups regard each other favourably, despite the religious chasm separating them. Yezidis have their own saints too, more likely than not conceptually derived from the Yazata beings of the ancient Magi. One has a chapel dedicated to him, not plush or ornately decorated, but deliberately left in a decrepit state, strewn with the crumbled remains of time-worn masonry. To access the chapel one enters a door chiseled with a serpent motif and magical signs. Their brand of devil-worship emanates from a belief that the devil, will one day return to god’s high favour. Those who were loyal to him throughout the long years of his abandonment would, according to their doctrines, be joyfully rewarded at that time.

You might recall in Part I how I discussed the Quedlinberg reliquary, showing Christ as Lord of the Zodiac,¹³¹⁰ or the mosaic of *Helios Christus* found under the foundations of the Vatican, and in Part II how this version of Christ was known to Magian-Christians in Russia under the name Khres, which evidently stemmed from Keresa, the Magian term for Christ. Similar perplexing symbolism can be seen one thousand years later in a St Andrew Prayer Missal¹³¹¹ written by Dom Gaspar¹³¹² Lefebvre then an abbot at the Abbey of St Andre, Belgium, in 1951. One illustration in the missal depicts Christ not as someone hanging on a cross, *but as the radiant sun* (captioned “Christ, The Sun of Justice”); likely proof that *white Magian* demi-paganism had penetrated the Church in some parts of Europe in antiquity and still continued to exist for a thousand years; into the 20th Century! And as if that isn’t enough, all the signs of the zodiac appear in “the Proper of the Saints” (tables of religious feast days listed on pages XXIV-XXVIII), which as stated was an officially banned practice. The Church has always officially hated astrology (at least since the Middle Ages anyway), so why would this Belgian Abbot have such a prayer missal drawn up, and drawn up in English for that matter? What should we see on the title page? A picture of priests celebrating mass at the altar, an altar from beneath which flows spring water *which is being lapped up by a pair of deer*. This could easily have been a deer scene straight off the wall of a Russian temple, only it wasn’t; it was straight out of one very unconventional Belgian prayer missal published in 1951! What is equally interesting, is that this missal was released (in a manner contrary to Canon law) without a *Nihil Obstat*, at that time a *mandatory* caveat, declaring the work to be free from doctrinal error in the eyes of the Holy See in Rome. My feeling is that the real reason why it lacked a *Nihil Obstat* is that it would never had got one in the first place. It did however have the *Imprimi Potest* of the Abbot, and the *Imprimatur* of the Vicar General of Belgium. So on the basis of this I would suggest that Jesus, the Sun of God has been clandestinely worshiped in Europe for at least the last thousand years, though to an unknown degree. Not only that, but it would appear that rogue elements within the Catholic Church have continued to pass on this old version of the faith much to the disdain of the Papacy. Indeed the hardline *Archbishop Le Febvre was excommunicated by Pope John Paul II*¹³¹³ not so long ago. I am unsure of the details surrounding this incident, but it may have had something to do with him avoiding the papacy’s Vatican II modernisation policies. And could there be anything behind his name Gaspar Le Febvre? Le Febvre happens to be pronounced Le Fay, literally meaning “the Fairy”. His first name is of course drawn from Gaspar, one of the three wise Magus-kings who adored Christ during the epiphany.

The image of the Christian astrologer priest is an ancient and recurring one. Upon the death of Gerard, the early 12th Century Archbishop of York, it was discovered that he had an astrological text hidden within the bed upon which he transpired.¹³¹⁴ By the late 17th Century *not a few ministers of the post-reformation Anglican Church* were still held to be expert astromancers.¹³¹⁴

Around the British Isles one also found sectarians devoted to venerating the planets as gods (perhaps after the Chaldean tradition), and indeed those who held Christ to be the sun.¹³¹⁵ The latter view is best illustrated in the trial of

WILLIAM BOND TRIED
FOR SAYING JESUS IS THE
SUN

one William Bond, who was prosecuted in Wiltshire England for professing that Jesus is the sun, while the apostles were the "twelve houses", the signs of the zodiac.¹³¹⁵

During this same period the Church of England was still prosecuting the so-called cunning men and women, who were deemed living gods in a number of places, and who engaged in astrology and healing, pursuits that can only be described as white magic or witchcraft.¹³¹⁶ These folk were, it would seem, inheritors of an older pre-Christian religious tradition, probably that of the Magi.

WILL THE ISSUE OF
CLERICAL CELIBACY BE
RE-EXAMINED INSIDE THE
ROMAN CATHOLIC
CHURCH?

One of the biggest single issues confronting modern Catholicism is the issue of whether married clergy can be ordained, as they once had been during the first one thousand years of the Church. Considering the many factors which led to the historic decision to ban married priests, and priestly offspring, is there another discrete message behind Pope John-Paul II's declaration that the issue of married ordination is simply not open to discussion? Does this mean that the Church perceives that there is still a pressing danger to the priesthood from the very wizards who provoked the situation in the first place?

According to Frazer, the author of the *Golden Bough* (published at the beginning of the 20th Century), many French folk in his day believed that a Catholic priest who had fallen from eternal grace was the only one capable of performing the black mass, the devil's high rite. Frazer states "Very few priests know this mass (the formal procedure for conducting the black mass), and three-fourths of those who do know it would not say it for love or money". In doing so they would forfeit their eternal soul.¹³¹⁷ He adds "No curate or bishop, not even the archbishop of Auch, can pardon them; that right belongs to the pope of Rome alone".¹³¹⁷

SOME FRENCH CATHOLIC
PRIESTS ALLEGEDLY KNEW
THE OLD RITUALS, BUT
WERE TOO AFRAID TO
PERFORM THE RITES

In essence the damned ritual (formerly known in France as the Mass of St Secaire) entailed the worst imaginable ceremonial inversion of the Catholic mass, with a reversal of the conventional rubric, performed in the dead of night, amid the ruins of a de-consecrated Church that had fallen into a dilapidated state.¹³¹⁷ A black host was a primary ingredient, washed down by a libation of corpse-water, or in other words well-water polluted by the body of a slain infant. This is in every respect an infernal dualistic rite.¹³¹⁷

CLERICAL MISCONDUCT
IS RIFE NOWADAYS IF
MEDIA REPORTS ARE TO
BE BELIEVED

Where Frazer obtained this information he does not say; perhaps it was simply folk superstition. If it were true, then the culprits responsible represented a minute and highly secretive cell within the Church committing the most abominable of spiritual crimes. Members of the Capuchin order were allegedly notoriously receptive to the advances of villagers petitioning them to lay curses on their enemies by this infernal doxology.

In Canada, Australia, Britain and America there have been startling tales of widespread paedophile rape of children living in Catholic boarding schools, and in November 1996 Greek Orthodox authorities saw fit to censure an entire monastery, after it was discovered that the brothers (almost to the last person) were engaging in homosexual orgies. Crippling burdens have begun to dog their sister, the Cyprian Orthodox church. Clergy have been accused of the sexual abuse of nuns (by errant STD infected clerics), carousing with prostitutes, knavish monetary scams, the disappearance of parishioners' donations. As in less happier times, when the Mediaeval "robber-priests" plied their trade, Christian clergy are being spat on by passersby, purely on account of the misdemeanours of a few. A number of Catholic priests have also left their vocations, ashamed to stand in front of congregations because of the numerous child-molestation allegations rocking the priesthood.

So all is not well for the Church. Evidently some ordained ministers were probably never cut out for that kind of life anyway, perhaps pursuing a vocation that their family desired. Others may have lost their faith along the way. But can we really be so sure that this is evidence of the Church's slide into decadence, or are certain instances indicative that our infiltrator friends are still at work all these years later, hoping to land a killing-blow or two on a Church, made weak and vulnerable by the departure of its believers, dazzled by the glitz of fast 20th Century life? Unlike good priests who work quietly in the background trying to make their community a better place to live in, these other souls are pulling in big headlines, and doing unseasonable damage to those who are trying their level best to care for the sick, the homeless, and raise orphans. Now, as in the past, clerical misconduct is an internal matter, with the Ecclesiastical hierarchy left to pick up the pieces, and attempt to reconcile matters to the satisfaction of all aggrieved parties. But the gravity of certain types of misconduct are such that embarrassing police involvement are unavoidable, and greatly warranted for that matter.

Nowadays (as in the past), most people would not be incensed by the presence of white pagan priests, if they are ever discovered; they are exceptionally fine human beings. That is unless you were on the wrong side of the

law or the natural order, because they believed in counteracting "evil" by physical force if need be. They were a criminal's worst nightmare come true. White Magians would be unlikely to receive any adverse public reaction unless they were resorting to their old vigilante lynchings, perhaps killing homosexuals, or even abortion doctors. Slaying or persecuting Negroes might be another of their activities. This could be traceable to *Bundahism XXIII:2*;

"This, too, they say, that in the reign of Azi Dahaka a young woman was admitted to a demon and a young man was admitted to a witch, and on seeing them they had intercourse: owing to that one intercourse the black-skinned negro arose from them".

Fig 61.1. A recently discovered clan wall mural. Note the similarity in their ritual attire.

Fig 61.2. No, this is not a Tennessee Klansman but a depiction of one of the many anonymous Catholic Christians who takes part in the Sancta Semaina procession held annually in Spain, normally carrying large candles and staffs. The festival dates to the Middle Ages.

Might the Knights of the Ku Klux Klan (who dress in white robes and pointy hats) be distant descendants of white Magians that had migrated to America after being hunted down, imprisoned and executed for centuries back in Europe? Well for a start the KKK was an organisation founded after the close of the American civil war. It was, and still is, an extreme display of old-school WASP (White, Anglo-Saxon Protestant) Christian culture. In many areas certain core families lay at the heart of the group, and these were supplemented by affiliated memberships. Is it purely fortuitous that this secret brotherhood is led by a *Grand Wizard* who preaches about the moral decline of America and "good old-fashioned family values" while at the same time killing or disciplining negroes? To many this is excessive if not criminal behaviour, but in their eyes, at least in former times, this is the way you confront evil in the world; a summary hanging here, a flogging there. Is it a coincidence that their customs contain fossilised elements of freemasonry, banned by the latter organisation since the 1830's. Is it a coincidence that they dress in a manner similar to underground elements within the Roman Catholic Church that parade every so often in Europe, and have done so since the Middle Ages? If they were in any way influenced by white Magian morality, albeit in a Christian format, the clansmen would consider it a holy duty to make modern society a better place to live in, performing a variety of useful roles such as doctors, policemen, soldiers, politicians, and pest exterminators. If particular elements within the Ku Klux Klan are descendants white Magian wizards who had converted to Christianity, then why all the secrecy? The best answer is that they have to remain secret; there are so few of them left. And what ones are left (said to be around 3,000) would feel besieged by evil. One can scarcely imagine what fearful thoughts must invade their minds each time they hear of televised homosexual parades, with State and public blessing. Not only would the "decay of society" send them messages that the Devil's time is upon us, but they have to jealously guard their blood inheritance (from people who don't even faintly understand their point of view), fearful that their bloodline will be contaminated by "degraded" liaisons. For this reason their parents would be very choosy about who their offspring married. Genuine white Magians would not be even faintly inclined to join organisations such as the New Church of Wicca, a modern white witch organisation founded this century based on a variety of writings published by Gerald Gardner, a former member of Crowley's Golden Dawn. Instead they would be content to practice the old ways among their own inner circle of believers. I find it intriguing that the KKK should espouse these organisational characteristics and beliefs many decades before the Magian scriptures first became available to even the best Oxford scholars. We must also explain why they congregated in the southern states. Perhaps the old believers had migrated to sunnier climes. Whatever the

case, only a study of their past charters and documents, dating to last century, will confirm or deny a white pagan origin for the organisational nucleus of the KKK

The discovery of genuine black cult activities, if indeed they do exist, would merit the attention of the “secular authorities”, such as the police, when and where ritual homicide could be proven beyond any shadow of doubt, and vigorously prosecuted. No doubt Police would relish the task of pursuing the sort of perpetrators discovered in Belgium, with the same gusto as the militias, Christian priests and Muslims of the Middle Ages, or the white Magi of ancient Iran, Rome, and Egypt. As it stands the FBI has formulated its own attitudes towards supposed incidents of practical Satanism. These are tabled in the *Investigator’s Guide to Allegations of “Ritual” Child Abuse*, released by their Behavioral Science Unit, based at the National Centre for the Analysis of Violent Crime, Quantico, Virginia. FBI law enforcement investigators have established that “Satanists” fall into three categories, disaffected youths, self-inductees, and the so-called Orthodox Satanists.¹³¹⁸ The first group is self-explanatory. The second, the self-inductees, are lone individuals who first became interested in the satanic mysteries by watching videos and reading occult literature. Since a number of them also happen to be hardened criminals, it has been noted that some of them have been using this knowledge to modify their criminal behaviour, so that it faithfully reflects Satanic precepts.¹³¹⁸

Little is known of the last group, the hardcore Orthodox Satanists who have rarely been infiltrated by police officers, and hence there is a relative absence of hard facts about their beliefs and activities.¹³¹⁸ Considering a lack of information either for or against, the FBI generally disregards suggestions that an unknown segment of this group is composed of the so-called “multi-generational” satanists, those who inherited their religion from the remote past.¹³¹⁸ Until now there has been no statistically verifiable connection with organised crime. Where criminality is involved, most exponents of Satanism are found to have committed minor crimes, though major criminal behaviour is known also. And now for the categories of crime that they are supposed to be engaged in, whether individually, or as a group:

- Gang activities and violence¹³¹⁸
- Destruction of property¹³¹⁸
- Religious desecrations and thefts, especially from church buildings and graveyards¹³¹⁸
- Grievously harming animals¹³¹⁸
- Paedophilic interference with children¹³¹⁸
- Kidnapping¹³¹⁸
- Homicide, sometimes in a ritual context, and suicide¹³¹⁸

At the end of the day, whether a criminal is a satanist or not has little bearing on an investigation. After all, a crime is a crime, irrespective of whether or not the offender believes himself to be part of Satan’s army or a “will of God” killer.¹³¹⁸

The history of witchcraft carries dire warnings. Vigilantes really have no place in confronting witchcraft, if indeed it still exists. Late Mediaeval, Renaissance and early modern witch accounts reveal tragedies where drunken “do-gooders” took the law into their own hands, with the result that some old lady got drowned or strung up on a mere suspicion, without there even being an investigation. Vigilantes really were one of the most dangerous elements of the witchcraze phenomenon, the uncontrolled element. The FBI terms the hysteria which gives rise to this behaviour as hypervigilance and paranoia. Where it takes over, a person is in danger of carrying out lynchings, an act intrinsically criminal in nature, by modern standards of law.

DID SOME OF THE OLD
BLOODLINES SURVIVE?

Witches and pagans in the new worlds

With paganism under siege by sweeping religious reforms in Western Europe during the 10th-15th Centuries, and their groves and springs perpetually at risk from contamination, it is highly likely that many white pagans chose to migrate to the New World, where the vast tracts of land gave them some breathing space. Considering the type of customs you are about to read of, it is more than likely that Catholic and Protestant authorities failed in their bid to burn all the family bloodlines that were the life of the old faith. We might guess that black (and presumably white) witches moved to America, and settled on the East coast (in Pennsylvania especially), where folk

recollections about witches clung to the region like a fly to fly paper, and where the notorious Salem witch-trials were held. Wherever one finds large stands of birch and ash trees, particularly golden ashes and Rowans, one might guess these were areas formerly settled by white pagans many hundreds of years ago, during the colonisation of North America. Actually many ashes do grow there, but more than 20,000 have just been cut down due to an infestation of Asiatic wood borers, an infestation that proved too financially expensive to treat.

And in South America, there are a number of Catholic parishes (originally founded by the Spaniards), which are run by lay people who use candles, flagellation, flowers and magic in their services, something which have long been a topic of scandal. This is normally seen as a chance synthesis of Christianity and local pagan practices. However, in a television documentary I once saw, one South American parish's most prized statue was that of Jesus Christ wielding a spear. Is this in reality a Gothic depiction of Sraosha, the tall and mighty-speared god? If so, then some of these dubious parishes might actually have been founded by dissident Magian-Christians, who had fled the European killing grounds from the 16th Century onwards, rather than established by the Catholic Church. To this day voodoo ceremonies have remained active in Northern Brazil, brought there centuries ago with the flourishing trade in African slaves, slaves who did not want to leave their ancient sorcery on the old continent. Traditions with an inherently white Magian flavour can be found in different parts of the former British Empire also.

From the British Isles we hear condemned those who resorted to the second sight, a powerful type of clairvoyance that is inherited through the family usually. What is to some a gift capable of helping others for a price, is to the Church a curse that the faithful should steer well clear of. And by some accounts Poland has the greatest concentration of 'psychics' in the world. It is entirely likely that such reputedly metaphysical powers were handed down through a line of descendants since the Middle Ages, and long before that.

One highly relevant aspect of European witchcraft needs to be discussed, though it is avoided by academics, as irrelevant to studying the history of the witches, the ultimate taboo ... the possibility that white and black witches had actual powers. Of necessity historians must adopt this stance, for they are in the business of dealing with demonstrable facts. Magic and miracles do not fall into this category, because even where the outcome of a prayer or spell is perceived to have been achieved, it is impossible to 'prove' that the words or rituals had a causal effect. However the history of the Magi tells us in no uncertain terms that they were able to utter freakishly accurate prophecies, and had other 'mystical' abilities, some of which were due to their prowess in the sciences. Did they achieve this reputation because their followers and clients were mindless cretins, or because they had successfully and repeatedly proven their supernatural gifts before discerning audiences. With the Magi constituting a certain proportion of the European population might it then follow that certain people nowadays inherited this ancient gift, if it did exist, through the blood of ancient kinsfolk that escaped the pyres of the burning times, whether they know it or not. The 20th Century answer is of course that their audiences were misguided, their minds inflated by fantasy. However in 1988 I had a chance meeting with a fellow who was able to divulge extremely personal information about me free of charge, many things that I alone knew. He just came straight out and told me what colour tie I wore on a significant day of my life. That he even guessed the memorability of this day was intriguing enough. He told me of five different places I would live over the next 8 years (providing precise descriptions of features peculiar to these dwellings), only one of which I had any say in acquiring. His utterances concerning these and very many more things were not the best out of 200 guesses, but one extremely accurate reference to my past and future after the other. In fact he was even able to correct me about my recollection of particular happenings. My question to him was obvious "How in the hell did you do that". Since this occasion I have had cause to wonder about the possibility that there are people out there who can actually see the future. Surely I am not the only person to have encountered someone such as this. That is not to say that this person was a Magian, in fact he claimed to be a born again Christian, and that the power came from the Holy Spirit. I have only his word for it, still that does not prevent me from pondering over how such a thing can happen.

Claims of paranormal skill are certainly not peculiar to Christians. Clairvoyants are regularly sought out by a great many people from all walks of life too. They do so in most cases because these individuals are often, if not sometimes, able to recount remarkable and extremely detailed information about the querant's past and future life. Of these many querants, some will re-visit clairvoyants and seers to be re-assured, with a need to hear something good about their future, and will grasp at anything they say as believable. Others will do so because a perfect

stranger has recalled things that were sufficiently accurate to negate the scepticism inherent in us all. As accurate as the abilities of some may be, I hazard a guess that few if any are so good that they can predict lottery numbers, numbers that would enable them to become millionaires and retire from doing readings at \$20-40 a consultation. Paranormal activity is hard to measure by any standards, just as one's personal experiences are not easily shared with others. If you are in pain, you cannot share that pain with an onlooker, or a doctor. They merely see signs on one's face, wincing, a contorted brow, trembling, crying and the like. Just because we cannot experience what another feels does not mean it does not exist; their pain, their horrors, their joys do exist, and they are real to the people involved, despite the fact that you cannot 'prove' this to someone else. The same could be said for love, hate, greed, jealousy; how can we measure the degree to which these things dwell within us, how can we quantify them with known scientific methods? Clearly we can't, yet they are factual and unconstrained dimensions to human experience.

In a past context we hear that the pagan Norsemen believed that gifted individuals could make their soul leave their body (in the shape of an animal), and dispatch it to a distant geographical location (like Iceland) to verify specific details. ... details which were only later confirmed by direct contact with the same location. Odin was reputedly able to curse his enemies, or bring his friends victory in battle, just by a touch of his hand. Such tales have a very direct relevance to the witches, who were tried on the basis of their preternatural abilities and beliefs.

And then there are the many professed miracles of the Middle Ages. In each and every case historians are compelled to interpret them as works of literary fiction, yet in more recent times we had the Catholic mystic Padre Pio whose stigmata were so large that a book could be read through them. The wounds lingered for years and were assessed by two doctors, one of whom was an avowed atheist. The holes disappeared without scarring hours after his death. If, and I stress if, this is true, then his wounds defy the normal constraints of science and physical existence. By implication it might be remotely plausible that some of the more amazing claims of mediaeval miracles had some basis, despite the fact that this can never be proven. These and a host of other stories are easily shrugged off as lies and primitive superstition unbecoming of the 21st Century, that is unless you yourself have been exposed to such happenings. In mentioning these points I do not seek to prove the unproveable, phenomena that not everybody has witnessed, despite the multitudes who have.

Nowhere is the perpetuation of Aryan observances more obvious than at war cemeteries and cenotaphs in Europe, and the former colonies. For example Australians and New Zealanders were imbued with the martial spirit from the time of their nationhoods, ever on guard to protect the needs of King, country and Empire. As was common in Europe up until the start of this century, many young lads rallied to their King's cause, and freely gave their lives in far away lands they probably knew little of. These were ordinary people from every walk of life, often farmers, cattlemen, tradesmen and teachers who, once a war was declared, fairly ran to the recruiting offices upon hearing the news, only to find them swamped by lads seeking to enlist. They picked only the best, at least initially.

In Melbourne, Australia, we have the Shrine of Remembrance, which was built to commemorate our war dead, our fallen sons. The edifice has a magnificence that would do justice to any of the old pagan temples. On the 11th of November each year, at 11 o'clock (the time of the World War I armistice) the rays of the sun flood down through a specially designed aperture, that only permits the entry of sunlight at that time and date annually. Thence the light of peace descends into the Shrine's crypt, and illuminates the memorial stone commemorating their sacrifice. There is an air of reverence about of the place, one could say an inherent holiness. Outside, the eternal flame burns as brightly as ever, a sentinel to their memory, guarded not only by armed officers, but by specific legislation that ensures an unflinching gas supply.

On ANZAC day (April 25), the yearly holiday dedicated to remembering our war dead, many thousands of veterans and citizens gather before dawn at the shrine to pay homage to the sacrifices of our past men at arms. Prayers and hymns are recited at the assembly. As the sun's morning rays approach the darkened horizon a lone bugler plays revile whereby their souls awaken, standing to, as watchmen ready for duty. Not long thereafter comes the haunting "last post", seemingly laying to rest their souls from the privations of battle. Then, at a solemn moment in the proceedings, we hear a saying well known to Australian ears .. *"at the going down of the Sun, and in the morning we will remember them ... Lest we forget"*. Only hours later old comrades gather to march line abreast to the shrine, accompanied by pipers and drummers. Held respectfully aloft are the banners and colours of extant and

defunct units, not to mention the badge of "the Rising Sun", the insignia of the Australian Imperial Forces.

Inscription from the grave of Harriet Chatfield, buried 1859, on the Isle of the Dead, Port Arthur, Tasmania.
"Her soul to who gave it rose. God led it to its long repose, its glorious rest. And though the mother's sun has set its light shall linger round us yet. Bright Radiant Blest".
 Lord R. *Inscriptions in Stone -The Isle of the Dead Port Arthur, p. 29*

Various elements of Aryan flag-lore live on, though it is hardly likely that any of us understand its origin. It is standard practice around the world, that national flags are hoisted skyward to the recital of a national anthem, which is arguably the hymn of one's people. The reverence with which this is done is especially noticeable during military flag raising ceremonies, normally timed to coincide with sunrise and sunset, or at military funerals. Traditions surrounding unit flags and banners seem steeped in the ancient mystique of the Aryans. I myself took part in a ceremonial parade in which the Queen, Her Royal Majesty Elizabeth II, presented a new set of colours to the Royal Australian Navy. The flag itself was not couriered out from England. Instead Prince Philip and the Queen made a journey to the other side of the world, to present the new flag in person. And let me say it was an extremely lavish and prestigious ceremony.

In many countries the armed forces are the last bastions of that ancient warrior spirit, and real sticklers when it comes to observing inherited military and unit traditions.

If you asked the average Australian what all these customs really meant (ie; their origin and purpose), they wouldn't have the faintest idea. It's just the way things are, a manifestation of culture perpetuated by most if not all, by the force of habit alone.

Evidently the ways of the Aryan had spread abroad to many a country, but as the march of time progressed mercilessly their meaning dissipated. Fewer and fewer people understood the ancient customs and traditions which had built their respective societies. The last practitioners of the old faith saw their world crumbling around them year by year. The "unadulterated" paganism which the old believers knew and loved, suffered its greatest setbacks during this 20th Century and is unlikely to have survived past the 1940-50's on any large scale for several reasons;

1. The advent of electric stoves and gas ovens would have devastated the home hearths, the last refuge of the holy fires that once burned across the length and breadth of Europe. It could be argued that this only resulted in the disappearance of certain hearths, since true believers never abandoned their home fires. Only those who did not fully observe the old traditions would have swapped over to gas and electricity.
2. Widespread "spiritual" and "ecological" defilement caused by conversions and the polluting discharge of heavy industry.
3. The introduction of compulsory state school education, which demolished piece by piece the so-called superstitious beliefs of the pagans, which were actually religious observances. One can only wonder how much paganism died in the mind of a young child forced to sit in the corner of a classroom wearing a white pointed dunce's cap to humiliate them.
4. The most damaging attack on the old ways has come by way of political correctness, the doctrines of the Post-Modernists, that have been so well endorsed by Western society, lapped up by individualists like a cat drinking milk. They amount to a massacre of the old ways. Now it is no longer fashionable to base your life around your family and the state. What really matters is personal wealth, careers and other status symbols, as well as whatever else makes you feel good, whatever the cost.
5. Two successive generations of menfolk who taught the old ways to their children lay dead on the European battlefields of World War I and II. These closet pagans, the most loyal and the best, would have been some of the first to enlist, ever eager to join the thick of the fighting. Amid the indescribable carnage they died by the thousand, bearing arms in heroic struggle, whether Englishmen, Frenchmen, Latvian, German, Italian, Ukrainian or Russian, to name but a few. Probably for this reason only a select few Westphalians knew where the idols are still hidden this century. Before 1914 however those wise to such matters would have been far more numerous.

The Aryan Swan Song

In the late 1800's European monarchies enjoyed power and prestige greater than at any time in their history, existing side by side with republican "reformed" governments such as those epitomised by France and the USA. Their colonies dotted every corner of the globe, allowing scientists, explorers, aristocrats, entrepreneurs to play the world stage. Underdeveloped peoples came to enjoy the fruits of westernisation - new building techniques and technologies, health care, language. In return these lands yielded manpower and valuable natural resources that fuelled Europe's astonishing industrial growth. Underwriting such imperial splendour stood vast armies and navies, the devoted disciples of their kings. Wilhelm II's speech at a military oath-taking ceremony in Potsdam, on November 23, 1891, typified the mood of the era, an age stretching back long before William the Conqueror, into the parched deserts of Iran and Central Asia. "Recruits of my Guards Regiment! You are assembled here from all quarters of my realm in order to meet your military obligation and have in this holy place sworn loyalty to your kaiser even unto your last breath. You are still too young to understand all of this, but little by little it will be made known to you. Do not bother yourselves too greatly about all this but trust in God, now and again say an "Our Father," which has many a time renewed a warrior's courage". (Version 1, according to the Breslauer Lokalanzeiger). Here he appears to allude to the coming revelations being unearthed by

orientalists of every persuasion (historians, linguists, archaeologists and philosophers). Academia was at last filling in some of the major gaps in historical understanding, the chapters erased by the inquisition were coming into broad daylight.

England, Germany, Austria-Hungary and Russia may have been the zenith of earthly power, but few realised the dire magnitude of the industrialised slaughter about to be unleashed on an unsuspecting world. In that day swordsmanship and musketry had given way to zeppelins, aeroplanes, heavy howitzers, gas, bombs and machine guns. Yet for all this, the ancient elan still remained, goading Europe's youth into a gargantuan mincer during campaigns of staggering intensity. Cavalry, the chivalrous face of European warfare since time immemorial would swiftly become obsolete. On the 4th day of August in the year 1914, on the eve of the Great War's outbreak, Kaiser Wilhelm steeled his people for battle. *"Remember, the German people are the chosen of God. On me, the German Emperor, the spirit of God has descended. I am His sword, His weapon, and His vice-regent. Woe to the disobedient and death to cowards and unbelievers."*

The impending conflict, the primordial Aryan trial by arms between kings, was eagerly awaited by European gentry; the great test of true manhood. Hitler was just one of many to hurriedly enlist once war was declared. He even personally attended the Kaiser's public oration in Berlin. As he professed in *Mein Kampf*, the Germans were one heart with their Kaiser. The rest is history. WWI; total dead 15 million, slightly more than half of which were military. The Great War took more than just a generation, it dismantled imperialism.

The year 1945 marks the end of Aryan civilisation. In effect the Third Reich was the ancient order's last great turn out, prior to its emasculation after World War 2. The story begins in a Germany gripped by chaos. On November 10, 1918 Imperial Germany awoke in shock after four long years of war ... Kaiser Wilhelm II had been forced off the throne by a cartel of conspirators (the so-called "November criminals") and hounded into exile in Holland. Caesar was no more. Amid the ferment and privations of war-torn German society the provocateurs installed a new form of government to replace the Kaiser, abandoning the ancient monarchy in favour of a Democratic Republic, the Weimar Republic. The catastrophic political developments were but a pretext for the signing of an armistice that would put an end to the Great War, which was signed only a day after the King was deposed. The conditions of the treaty were heavily stacked against Germany, in fact so costly the life of their nation would be crippled for some time to come.

The seeds of the next war were planted. With respect to the Versailles treaty reparation payments, Germans were not only compensating their former enemies but effectively paying for the bombs and bullets that killed their sons. On top of that they lost land. Whole regions of Germany were sliced off the fatherland, disbursed as spoils of war. With these tracts of land came a number of ethnic Germans who didn't always fit into the racial composition of their new parent country. It was with a need to rectify injustice that Hitler would later embark on war, aiming to undo the crimes of the "November criminals", the authors of the humiliating armistice treaty.

With the forced abdication of the Kaiser, and the foundation of the Weimar Republic, Communists, emboldened by the Russian Revolution, made their grab for power in Germany. But on April 30 1919 a 20,000-man counter-revolution ensued, orchestrated, funded and armed by the Thule Brotherhood (an anti-Semitic, quasi-masonic fraternity founded in 1912 AD). It was they, a conglomeration of nationalists, lawyers and those of the blood, who organised the foundation of the German National Socialist Worker's Party (ie; Nazi Party) as a means of combating the red menace. Only the de-mobilised patriot Hitler, army elements and members of the National Socialist Worker's Party stood in the way of the rebels.

At the start of it all Hitler was just a front man for a variety of special interest groups, all of them counter-revolutionary in nature. The times were such that only a common man could be trusted by Germans, and win over the affections of workers entranced by the leftist cause. Such a figure was Adolf Hitler, an Austrian patriot who served in a Bavarian infantry regiment (under King Ludwig III of Bavaria) during the Great War. While at the front he received the iron cross twice, first and second class, the nation's highest awards for gallantry. Adolf, the consummate German nationalist was shot and gassed during the course of the war, yet remained undaunted by his country's reversals in fortune, even when those around him faltered.

He was still recovering from the gas injuries when the armistice was signed. After the demobilisation he lived the hapless life of a homeless war veteran, deeply embittered by Germany's defeat and left to scrounge a meagre

Adolf Hitler originals (as found on www.fpp.co.uk).

Judging by the masterful quality of his work Adolf, the artistic genius would have made a fine career artist had others given him the chance, in a variety of media. Destiny took him along a very different pathway. Nowadays verifiable Hitler originals sell for a pathetically low \$20,000. I believe they should be valued at nothing less than \$US 1,000,000 each. The times are such that bidders and art connoisseurs are too afraid to put up their hand, for fear of being branded a Nazi. The persecution and demonisation extends even to his artwork.

Hitler's happiest days were spent not in war or Jewish pogroms, but with Albert Speer, planning new cultural and artistic delights for the German people. The essence of the man always remained that of a patriotic artist.

existence. His excellent and even acclaimed paintings failed to sell, so he went into politics. Some felt he had a gift for reaching out to his fellow countrymen. They weren't far wrong.

The Fuehrer had a lot of backing from interested parties at home and abroad. Much of it was mustered via the Thule Order by Professor Karl Haushofer (Hitler's personal vizier) if you are to believe modern historians. This particular gentleman, versed in five languages and described as "shady", served his nation as a general in the Great War. Later he became German attache in Tokyo. After the 1914-1918 war he taught geo-politics at Munich University, and became a life member of the "Luminous Lodge" and the "Thule Society", both of which were considered irregular Masonic orders by western standards. To a degree what they say is true. Haushofer and his son Albrecht were highly-educated occultists. In their case occult actually means "secret" or "hidden", it doesn't carry the connotation of evil and wickedness. In these men one finds individuals knowledgeable of Europe's secret history and underground networks, a history you've just read about over the past 1,000 pages.

In those turbulent post-war days Hitler found himself on the military payroll, investigating varied political groups by attending their meetings. One assignment entailed a gathering of right-wing nationalist workers. It was here that Hitler came face to face with men who thought the same way as he. From that time he ingratiated himself with its membership, delivering polished rhetoric on a plethora of subjects of political and racial significance. On top of that he provided them two invaluable propaganda tools - a new flag to rally under, bearing the ancient symbol of the swastika, and *Mein Kampf*, Hitler's life story, the story of an Aryan man struggling his way through life against all odds. Hitler would take Germany to new heights, fostering the advent of a new man, the Aryan, the height of physical and spiritual evolution.

Eventually the Weimar Republic faded in strength, providing an opening for the NSWP. Later fate delivered Adolf the vaunted role of Chancellor, and after that sole dictator of the Third Reich. Left-wing rebels had by now been fully suppressed, and so some semblance of order returned to the troubled nation. Whereas fathers could only feed their families with difficulty previously, ordinary people began to enjoy an exalted standard of living. Germany embarked upon her intended path to glory ... intermarrying government, heavy industry, private enterprise, scientific research and an all-pervasive patriotic zeal which bound the nation together as one, like superglue. Governmental improvements and foreign money (esp American) saw the Reich go from strength to strength. While the world suffered through the Great Depression, one country, Nazi Germany, powered ahead into uncompromising financial glory, even the lowly.

What happened after these years of growth could be a shock to nobody. In *Mein Kampf* Adolf had set out, chapter and verse, the direction he wanted to take the country in ... war. It would be a march to war akin to the "Drive to the East" of the Teutonic knights. As Hitler (a tried and tested soldier) had it, fortune favoured the strong. The weak would inherit nothing in this world. Such were the lessons of his childhood. Germany would once again embrace its

Hitler's painting of St. Mary and a blonde white caucasian Jesus. Hitler hoped to model his virtues and actions on Christ the warrior, revered by Germanic and Celtic peoples since time immemorial (see part I of this book). He saw himself as playing a vital role in the eschatological plans of god, and sent to actuate the same.

Right: Hitler at prayer.
Far right: Cardinals join high Nazi officials in a spirited salute.

ancient warrior spirit, following the lead of the Prussian Junkers (military aristocracy). Only in this way, he felt, could she reach her full potential. Adolf was influenced by several writers and artists who fed him inspiration and the very ideas he would use to govern the Third Reich. Hitler and his undying devotion to Darwinian survival-of-the-fittest ideologies was ripe for conquest. So came the invasions of Czechoslovakia, Poland, France and the Low countries. British forces were kicked back across the channel. The world could only watch on as Hitler gobbled up Europe.

Fig 64.1 Non-German Europeans volunteered to serve the Third Reich, an unknown number overjoyed by the idea of participating in a renewed Aryan civilisation. These were just some of the many Dutchmen who signed along the dotted line, of their own free volition.

The Fuehrer was intent on prosecuting a war against Communism, though his hatred of the Slavic peoples followed a close second in terms of motivation for his invasion of the USSR. Considering the abuses being perpetrated by the Soviets against religious bodies Hitler was likely to get a measure of support from German religious authorities too. Certainly the Catholic and Lutheran Churches would be willingly cooperative for his plans to attack the heartlands of atheistic Communism. Germany was, after all, a very religious country at that time.

So came Operation Barbarossa, launched on the 22nd of June 1941 against the better judgement of Hitler's generals. Barely 11 months previously the General Staff first became acquainted with Adolf's plans for a full invasion of the Soviet Union. In that time they had to secretly mobilise a full 120 divisions for the task without alerting Stalin to their plans, to which even more were added.

There are important reasons why the 3rd Reich only lasted 12 years instead of its intended thousand year duration. Hitler's skewed understanding of the Aryan legacy led Germany down a cul-de-sac of no return. He extolled the virtues of Aryan civilisation, and the race that made it possible, yet misunderstood the crucial precepts of paternal Aryan inheritance. Through his shaky racial goggles, the inhabitants of surrounding nations were robbed of Aryan ancestry in Germanic eyes. Slavic cousins became untermensch. Anglo-Saxon brothers in the USA and UK became a devious enemy. It may seem like a small point, yet Hitler's undereducation alienated millions of potential allies and recruits. One only has to look at the way the Reich mishandled General Vlasov and his thousands of anti-Communist Russian and Ukrainian forces. Men and women handed Reich forces flowers as they entered the Ukraine, welcoming them as liberators from Comrade Stalin, yet Hitler never sought to properly integrate them with the German army. This was just one of many grave miscalculations, which cumulatively led to the fall of the Third Reich, and worse still, for the demonisation of the word 'Aryan'. Another reason Hitler's Germanic theology failed to take root in Holland, greater Scandinavia and England (to name but a few places), is his failure to grasp the rigid adherence of these respective cultures to the primordial Aryan social matrix. In particular I refer to their allegiance to kings, earthly lords obediently served for 1,000 years+.

Fig 64.2. Hitler's idol, the great Prussian monarch Frederick Barbarossa, here depicted participating in a masonic ceremony at the Potsdam Lodge in the late 1700's. Note the sphinx on the wall ... it's something you won't see in a 20th - 21st Century masonic lodge.

Hess flew to Britain in 1941 seeking to broker a ceasefire and peace terms. The invasion of the Soviet Union was forthcoming, leaving important Reich officials squeamish about an open western front with so many assets to be deployed in the east. Germany wouldn't get any joy from their Anglo-Saxon cultural and genetic brothers though. The simple truth is no king (as Teutonic as he may be) can stand by and watch another ruler annihilate his own citizens. They would be answerable before god for allowing something such as this go unchecked, for allowing the strong to roast the weak. Reigning Teutonic royal houses fled occupied Europe, mostly finding sanctuary in England. Those that could anyway. The Danish royal family was held under house arrest in a tower. Since time immemorial civil atrocities have always been the hallmark of a despot, a devil king, who it was the duty of kings to oppose, to fight to the death, even if it were to lead to their own demise. No Aryan lord, despite his stark difference of opinion with the Jews on theological grounds, ever hoped for their utter extermination, neither in Persia nor Europe. This turned out to be the very reason why reigning elements in England refused to negotiate with Hitler, why they refused to shut down the western front and grasp the olive branch Rudolph Hess ferried to the Duke of Hamilton in Scotland, under advice from Haushofer.

In the beginning much of Europe's aristocracy was besotted by what Hitler was planning. It seemed as though he was devising a Pan-Eurasian Aryan Empire stretching from Japan to Europe, which included Stalinist Russia. The Communist order, like no other, stood in direct contradiction to everything the old order was. It was the antithesis. The socialist marriage of convenience had to come to an end if Hitler was to be the saviour of the old order. Even the future king of England visited the Reich for meetings with the Fuehrer, but was compelled to abdicate the throne in order to marry Ms Simpson, an American divorcee. Eventually high calibre international figures were forced to distance themselves from the Reichsfuehrer despite, in some cases, their own private thoughts.

Hitler's fall from grace was pronounced in western circles, I believe, when it was discovered the Reich was liquidating Jewry, or that some figures planned the fall of Christianity in order to replace it with a heathen body.

Some modern researchers presently advocate Hitler was not responsible for ordering a systematic extermination program for the Jewish race. There is some evidence, in *Mein Kampf*, suggesting he was not nearly as anti-Semitic as other party organisers, at least in earlier days. Speaking of his arrival in Vienna, a vagabond Hitler described his lack of concern for what he later called the Jewish problem. *"I will not say that the manner in which I first became acquainted with it (the Jewish problem) was particularly unpleasant for me. In the Jew I still only saw a man who was of a different religion, and therefore, on the grounds of human tolerance, I was against the idea that he should be attacked because he had a different faith. And so I considered the tone adopted by the anti-Semitic press in Vienna, was unworthy of the cultural traditions of a great people. The memory of certain events which happened in the Middle Ages came into my mind, and I felt that I should not like to see them repeated"*.¹³¹⁹

Himmler was yet another major player in the party apparatus desirous of doing away with the "Jewish problem". At Nuremberg nearly every major defendant claimed to be acting under a secret Fuehrer order, no evidence of which has ever been found. If it did exist it was only ever conveyed verbally, and if written was destroyed. I furnish here Himmler's very words, spoken to SS chiefs of staff in Posen Poland in 1943. *"I mean ... the extermination of the Jewish race ... Most of you must know what it means when 100 corpses are lying side by side, or 500, or 1,000. To have stuck it out and at the same time - apart from exceptions caused by human weakness - to have remained decent fellows, that is what has made it hard. This is a page of glory in our history which has never been written and is never to be written"*.¹³²⁰

It may sound disgusting to westerners but mass killing was part of the European scenery across two wars. Tens and tens of millions were slaughtered. When it came to knocking off Jews it was just another batch of killings. The soldiers posted to perform this "special work" were at the very least desensitised, and probably in some cases euphoric about their history-making duties.

I first came across the fundamentals of Holocaust Revisionism in 2004. It was a totally new field for me, I must say. Hearing what I've heard from the horse's mouth, for me anyway, it's hard to argue that some form of Holocaust never happened. But what it has done is caused me to question the purported scale of extermination throughout the former Reich. Being more than familiar with the witch trials the historical issue of body counts is something I'm more than familiar with. It's a very shaky topic, not by asking the question, but due to the amount of vanished documentation one is never likely to see. Every liquidation was to be recorded in a camp *Totenbuch* or death register.

According to Hitler's spurious racial stance, born in the embryonic research of academics like Chamberlain, these Slavs are not Aryans. Why only a hundred years ago Slavs protected their homes with painted swastikas, called *svargi*.

THROUGHOUT HIS EARLY YEARS HITLER WAS NOT AN ANTI-SEMITIC

HIMMLER, A NEO-PAGANIST, WAS VERY INTERESTED IN THE ULTIMATE FATE OF THE JEWS

KILLING HAD BECOME SO MUCH A PART OF EUROPE'S DAY TO DAY SCENERY

JEWS WERE JUST ONE MORE GROUP TO HAVE THEIR SECURITY PLACED IN EXTREME JEOPARDY

Totenbuchs were frequently destroyed in the closing phase of the war, leaving only one intact for the Mauthausen camp (1939-1964). Its figure of 35,318 deaths (whether by execution or other means) left people scratching their heads at Nuremberg, with the camp director increasing that number to 65,000.³²¹ Did Ziereis (hanged by the Poles in 1947) execute another 30,000 off the books siphoning victims' assets for his own personal gain? Did he kill another 30,000 as a favour to buddies in the SS? Did the Nuremberg tribunal force him to jack up the figure under some sort of a plea system? Or was he boasting? The Mauthausen scenario was no isolated incident. Hoess' testimony concerning Aushwitz shows, once again, how figures float about on zephyrs. Hoess cites 3 million Aushwitz killings at Nuremberg (where he escapes sentencing) but deflates it to 1.5 million (when tried under Polish law and facing the death penalty). That's a 1.5 million discrepancy further confounded by a Soviet on-site estimate of 4 million, or Reitlinger's guesstimate of 900,000 (which factors in those who died of starvation).

My opinion, without any disrespect to Jewish citizens, is let's put some sacred cows under the microscope. Let's distil as much factual history out of this sorry event as possible. Let's get archaeologists on site to assay the physical evidence in and around the death camps. Let's also find out about Soviet POW's, gypsies, homosexuals, criminals, traitors etc. How many of them were put to death also?

Quite apart from that, Hitler made an unexpected departure from the original plan to make a Pan-Eurasian alliance encompassing Germany, Communist Russia and Japan. Germany, in one foul swoop, was spontaneously led into a war with the Soviets, their racial and linguistic brothers the US and UK. Nazi Generals were in awe of what the Fuehrer had just done. He was a unilateral force, a runaway train that had dragged the entire nation into a two-front war against the major military empires of the known world. But to a certain extent the war unfolded in a way not of his choosing. He could not control the alliances that eventually unfolded between the UK, USA and their ideological enemy, the USSR. The Wehrmacht and SS, whose fighting spirit and loyalty can never be doubted, were led along the path of decimation. On top of that the word "Aryan" was desecrated, nowadays becoming a byword for tyranny and evil. This may be the greatest crime of all. It was, as Hitler said, the spirit and heart of advanced civilisation, holiness and culture, but it ended up being the consummate tool of infamy (at least in the western media).

THE YEAR 1945 BROUGHT AN END TO THE REICH

It is eastern Germany in the year 1945, the famished Nazi army is in utter disarray and on the run, as a practically non-existent Luftwaffe cedes invaluable airspace to the overwhelming firepower of the Allies. Everything is in short supply ... sleep, bullets, rations; the methodical organization that so characterized the Reich had broken down, nothing seemed to work any more. Despite the astonishing capabilities of Germany's amazing new V1 and V2 rockets and jet fighters, their air power seemed doomed. In that year Germany endured the very worst. The predominantly Anglo-Saxon forces of the Americans, British and Commonwealth directed their deadly weaponry against their Germanic cousins aiming to destroy Hitler's Aryan utopia once and for all. The bombing of civilian centres like Dresden hastened an embrasure of defeatism, fraying the stoic Germanic will, slaying a hundred thousand non-combatants at a time, burned beyond recognition, irrespective of age. All this of course came in retribution for civilian bombing attacks pioneered by the Luftwaffe on London and Coventry. As if by some miracle Cologne cathedral escaped major damage in that crazy world of free-falling unguided ordinance which chewed up Germany's industrial capacity and residential districts. It was as though the Three Wise Kings threw a protective mantle over their holy relics, the cathedral itself, one of the greatest Christian relics of all.

Fig 66.1. Hitler says farewell to Berlin's last line of defenders, including Hitler Youth fighters. Fairly soon thereafter Adolf put an end to his life, going down with the Third Reich, as so many Germans did. They died in glory for what they believed in.

Meanwhile to the East the horizon was filled with a locust plague of Communist forces racing toward Berlin at breakneck speed, each to the last driven by Stalin's insatiable need to have the Red Army raise a hammer and sickle over the Reichstag, thereby signifying the fall of the Third Reich, and the end of 'Fascism'. Only then would come the acquisition of new Communist subjects throughout Europe as the USSR annexed half the continent, so heralding the Berlin airlift and a Cold War that enthralled the globe until 1989. Soviet losses were immense in those final few months of 1945 as Commissars drove their infantry to reach their goal, as Stalin demanded, before the annual party congress of that year. The Reich's home guard troops were now at the forefront of the desperate and futile battle to defend the fatherland, and seemed resigned to fight 'til the death. What an unlikely bunch ... old German gentlemen and boys, Aryan Swedish freedom fighters and

Fig 65.1. Soviet Red Guardsman advance on the Reich capital. They were eager to avenge the destruction and loss of life their people suffered back in the Soviet Union. Communism was more about the annihilation of our ancient cultural heritage. An angry, famished working class was merely a tool to achieve these ends. Left-wing social theorists and philosophers could not have reached their objectives without harnessing the masses.

Frenchmen took up positions around Berlin and Hitler's bunker, bidding farewell to an increasingly unnerved Fuehrer. Meanwhile teenage Hitler Youth cadre donned camouflage fatigues and bandoliers of ammunition for what would surely be their final battle, and the closing scenes of their brief lives, as they made ready to fire their small arms and artillery batteries into the advancing forces. The Wehrmacht and bewildered remnants of the SS were in an advanced stage of route, sprinting to surrender to the Western Allies foolishly thinking they would receive some form of clemency. Stalin's Organs unleashed withering artillery rocketry upon Berlin's eastern defensive positions. The boys were brave in the extreme. They knew they would die, they knew their Fatherland, their Aryan civilisation, was on the verge of total collapse. Still they fought on, as many could scarcely embrace a non-Hitlerian world. As Reich forces evacuated from Germany's frontal positions they sometimes pleaded with the youngsters to abandon their posts, and come West to surrender, where they might be of some use to the future nation. Few heeded their petitions, the blood and soil oath foremost on their minds, leaving the ground stewn with the remains of Germany's fast-perishing youth.

In the closing hour of Adolf's life, at 4 am on the 29th of April 1945, Hitler wrote his final political testament. It did not concern, as in a normal will, his material possessions. It concerned the people and European economy of the future. Some would call it a last minute propaganda grab.

"I have left no one in doubt that if the people of Europe are once more treated as mere blocks of shares in the hands of these international money and finance conspirators, then the sole responsibility for the (future) massacre must be borne by the true culprits; the Jews". "After six years of war which, despite all setbacks, will one day go down in history as the most glorious and heroic manifestations of the struggle for existence of a nation, I cannot abandon the city which is the capital of this Reich. Since our forces are too meagre to withstand the enemy's attack ... I wish to share my fate with that which millions of others have also taken upon themselves by remaining in this city". It goes on to say "Many of our bravest men and women have sworn to bind their lives to mine to the end. I have begged, and finally ordered, them not to do so, but to play their part in the further struggle of the nation".¹³²²

Here, I believe, Hitler openly admits his prior knowledge of the uncontestable liquidations of European Jewry (on whatever scale). No surprises here in a world where Wehrmacht deserters were freely shot. Hitler deliberately kept many of his political enemies and 'traitors' 'on ice'. They were executed in the streets of Berlin in the closing days of the conflict. The extermination of Reich enemies was bound to accelerate toward the end of the war. As Adolf stated, if Germany was not allowed to survive, he would drag Europe down in flames. Logically this included Jews amongst others. Hitler proceeded to reorganise the entire Reich government, assigning posts to those he saw fit. The Fuehrer then suicided, along with Eva Braun, ordering that his body be cremated. Hitler did not want a massive propaganda spectacle associated with his demise. Better he do away with himself than give Soviet forces the glory of finishing him off.

Field Marshall Keitel's surrender on May 7, 1945 signalled the final downfall, not only of the Third Reich, but of any pretence toward the establishment of a European Aryan society. So came the Nuremberg trials during which the leading lights of the Third Reich were condemned to death by hanging or sentenced to life-long jail terms, which some ultimately escaped by suiciding. Such were the grim times foreseen by the ancient Norse seers, or the Gotdammerung ... the slowly unfolding war between the Gods.

HITLER HOPED TO USE THE ENGLISH ROYAL FAMILY TO ARRANGE A TRUCE

VERY EARLY IN THE WAR THE SOVIETS NOTED HITLER WAS IN REAL TROUBLE

THE DE-ARYANISATION OF EUROPE

There was to be unprecedented "struggle and slaughter" brother against brother, ruined kinship lies, "great whoredom (promiscuity); axe-age (warfare) ... wind-age (perverted seasons), wolf-age (crime) ... before the world crumbles: no man shall spare another" ... "The sky seemed to fall suddenly to the earth, and fields and forests to sink to the ground, all things were disturbed, and the ancient chaos came again ... the world rushing to universal destruction".

Who knows. Had Hitler not embarked upon his master plan for war so hastily, and mended his disregard for diplomacy, Germany would probably have become an economic and nuclear superpower of the first magnitude. Had he spent more time at cocktail parties with kings, prime ministers and presidents instead of priming his weapons he might have made Germany more friends than enemies. Considering the astonishing technical developments taking place inside the Reich it's fairly certain the first man on the moon would have been a German astronaut with a swastika on his space suit, sometime in the 1950-1960's perhaps.

Rudolph Hess' unauthorised stand-alone mission, a hair-raising peace flight to Scotland, aimed to put an end to the war with England. He couldn't pull it off. Too many members of the British government were against any form of negotiation with the Reich. An official approach was even made to the British royal family. Secret documentation located after the war, and disavowed by the royal family in 1957, describe the tone of communications between the Nazi foreign ministry and the Duke of Windsor, then holidaying in Lisbon. Hitler, it seems, was hoping the Duke would intervene to bring about peace between Germany and Britain, and bring a halt to the carnage. The German communique stated, "*Basically Germany wants peace with the English people. The Churchill clique stands in the way of this peace*". It further divulged Germany's desire to invade Britain as a result of the prior ceasefire refusal. Ribbentrop tossed them some further incentive; "*Should the Duke and Duchess have other intentions, but be ready to collaborate in the establishment of a good relationship between Germany and England, Germany is likewise prepared to co-operate with the Duke and to arrange the future of the Ducal couple in accordance with their wishes*". (Shirer, W. *The Rise and Fall of the Third Reich*, p. 790.)

The Duke was overwhelmed by the content of the clandestine contact. "*The Duke (of Windsor) paid tribute to the Fuehrer's desire for peace, which was in complete agreement with his own point of view*". He was asked to intervene in the peace-brokering process, something he would gladly have assented to if only he were in the position of king. "*However at the present time he must follow the official orders of his Government*". Hitler's last avenue was to bluff the Soviets into a peace agreement, saying Britain was finished. But this came to nought as British bombs fell on the German capital during Molotov's meeting. As the Russians perceived, Hitler was playing poker with a hand full of nothings. The bear trap had just sprung. Germany was going down. It was only a question of when, and how many would die in the process. At the 11th hour he needed more than triumph of the will, he needed others to share his vision.

It could have been a golden age. But in the end Hitler not only sealed the fate of his Aryan subjects, but, once footage of Auschwitz and similar camps was screened, torpedoed the very notion of a positive Aryan spirit, a spirit that designs, invents, solves, devises, creates and builds. At the Nuremberg trials it was stated 'this must never be allowed to happen again', 'this' for all intents and purposes meaning the persecution of Jewry and more importantly the existence of an Aryan European Reich. Yet how do you achieve such an objective when, as you have already seen, the truth of Europe's Aryan legacy is there for all to see. Firstly one must remove all reference to the word Aryan from the communal mind, as demonized as it had become, then water down the nature of the Aryan nations by intense migrations from Africa and Asia. This is what is meant by de-nazification.

After Nuremberg western left-wing academia seized the moment to accomplish the very thing a massive Soviet army was unable to. They did so practically unopposed, which I find quite astonishing. Assisted by pernicious re-education programs our young were cleverly diverted from such things as their Aryan/Indo-European origins and allegiance to the crown, softening Commonwealth societies for the coming assault on the very existence of kingship throughout Europe itself. If only they can destroy an institution present in Britain since the arrival of Saxon sailors and immigrants, who filled the power gap left by an exodus of Roman forces. Their

greatest dream will be consummated. It would be true to say that monarchy never truly recovered from the English civil war (actuated by judaising, puritan elements within the English parliament).

What happened in places like Australia is analogous to the resettlement of aboriginal children, where a new generation is removed from the influence of the elders in order to truncate their cultural origins and expression, and inculcate them with a new. The last great link is snipped.

The final salvo against Aryanism appears to be the 'Holocaust denial' trials and an agenda to round up former Nazi servicemen using personnel files jealously guarded by the CIA since the end of WW2, throughout the Cold War.

What is Holocaust Revisionism and why are people being jailed for thought crimes in the 21st century? Looking deeper into the matter one discovers there is no single platform or agenda amongst WW2 revisionist historians, each gravitating toward an area of research they feel most comfortable with. It is not a right wing cartel, much rather a mutual support group running the gauntlet of institutionalised power-wielding bodies. For example the industrial chemist Germar Rudolph, who was arrested in the USA pending deportation, critically re-appraised the writings of Fred Leuchter Jnr, an execution specialist well versed in gas chamber technology, and employed throughout the US jail system. Leuchter is not a Neo-Nazi, simply an independant authority called in to examine the Auschwitz site with an expert's eye. His basic findings, based on physical evidence and known corpse combustion rates, concludes that the chambers and crematoria were incapable of disposing of 6 million individuals. Rudolph's tribulations, no his punishment, for delving into the forbidden works of Leuchter, have not fully unfolded yet. They will have a flow on effect to his wife and child also. Such are the hidden victims of the persecution thrust.

Others believe surviving film footage of emaciated captives merely depict the masses of Jews and other POW's who died in the camps from typhus or malnutrition as the Wermacht's supply lines shut down toward the end of the war. By their estimation, somewhere along the way these suffering victims mutated into Holocaust gassing victims.

The one thing revisionists have in common is their research deliberately or inadvertantly overturns orthodox accounts of the second world war, much of the latter hastily compiled amid the smokey aftermath of war and in the lead up to the Nuremberg trials. Unlike regurgitated mainstream academic theora and mantras, revisionism does not attract massive pay cheques and book deals. For their troubles revisionists can expect to live on the run, their families live in fear, they have their houses bombed (making them a so-called national security risk!), be freely misquoted, and lastly relentlessly chased by government officials and Jewish extremists/justice vigilantes ... all this in 'free' western countries. Irrespective of their credentials they will never teach in schools. David Irving, a once highly-regarded historian on WW2 with access to an enviable pool of primary source data was disowned by the establishment, and had his reputation destroyed, by appearing as a guest witness in Ernst Zundel's Candian trial. Irving was shocked at Zundel's data, professing that Ernst's research has massive implications for the history of the Holocaust. Nowadays David has security cameras trained on his home, is refused access to a number of countries and has suffered significant financial losses in the vilification attacks he has received. At the time of writing a German judge sacked Ernst's attorney, threatening to charge him with the same offences as Zundel, since he intended to supply revisionist data for Zundel's defence. Either the data to be used in Zundel's defence is intrinsically criminal, or the proven Neo-Nazi affiliations of his attorney mean the presentation will be criminal in nature. Whereas a non Neo-Nazi fielding the same data may not be guilty of the 'crime'. This contentious matter is still being resolved.

At the time of writing (17 November 2005) David Irving was arrested in Austria, and Germar deported from Chicago to face trial in Germany, within days of each other, suggesting a coordinated attack on revisionism. Welcome to Black November. The same week an Islamic fatwah was issued against Her Majesty Queen Elizabeth II.

The virulence of the attacks is, I believe, totally unwarranted. There seems to be an unwritten insinuation that the mere release of 'revisionist material' (ie; advanced research) concerning Indo-European/Aryan history and Holocaust revisionism will motivate a new and even greater holocaust. This circular logic falls down in many places; sort of like saying 1+1=26. Firstly with new racial vilification legislation freshly pushed through parliaments around the world, a second round of killings is unlikely to ever eventuate.

Secondly, free western citizens are innocent until proven guilty. Under the new regime of changes data cannot, of itself, incite murder unless it is worded in such a way as to unambiguously rouse

THE ERNST ZUNDEL
TRIAL

society toward persecution and violent hysteria. It is my understanding that revisionists do not fall into this category. Nor do I.

If Zundel is doing prison time for re-evaluating the number of Jews killed by the Third Reich, then I must be equally guilty of a crime for examining the death toll arising from the European trials of witches and heretics (without malign or knavish intent I might add). And if one or both of us are guilty then all thorough historians are equally guilty. For it is in the nature of historical enquiry to remember and, if necessary, improve our knowledge of the past. Sometimes this includes ploughing through some of history's sorriest chapters.

After this same war we witness the excommunication of any and all old-school Catholics who did not wish to submit to Vatican II's judaising reform agenda, a saga that repeatedly raises its head with cyclic regularity over the past two thousand years. These traditionalist Catholics celebrate mass the old tridentine way and still regard Rome as under the control of Zionist heretics. The Vatican has condemned them to hell. They reciprocate the anathemas.

On top of that modern internet and book distribution control mechanisms hope to limit the re-education value of a new class of invigorating revisionist literature. We also have intensive and repressive governmental and educational initiatives, fueled by advisories issued by hate-filled lobby groups.

Irrespective of the many gypsies, political prisoners, POW's and homosexuals put to death out of a hitherto unknown human toll of between 20-35 million WW2 deaths, a single group of victims, and one group alone, appears to have effectively harnessed the media, urging tireless replays of certain footage. Out of America's many minorities, they, and they alone, have their own department.

At the end of it all western culture meets a grim road block of cultural saboteurs, blocked websites containing quarantined authors, and an endless entourage of traitors desirous of destroying their own origins and faith, in order that we may embrace a nihilistic quasi-totalitarian world view.

The Death of Aryanism

The drastic social upheavals of the later 20th Century seem to be Western society's conscious and subconscious attempts to dismantle the role-based society, the Aryan formula for social harmony, our guiding beacon for a good 4,000 years. Now we are evolving into a society without clearly defined roles, especially where women and men are concerned. Females have at last entered into the historically male-dominated Brotherhood of Arms and the police, while males stay home on paternity leave. Priesthoods are running out of seminarians, and monarchs are on the way out. Now the sanctity of keeping one's word means little. Exclusive clubs, brother and sisterhoods are being challenged and split asunder. The care of the aged, under Aryanism the responsibility of the family, is now suffering under the weight of the nuclear family's ignominious demise, and all of the negative shockwaves that flow from the disintegration of even one family. Social cohesion and senses of public duty have given way to individualism and general community indifference. Even the "working class" is being rapidly made redundant by the inroads of technology and automation.

Where this will take us all is a big mystery, for this is untried ground we are treading. Certainly in days of yore white elements of the community would have thought our modernisations perhaps a little weird, or even a recipe for confusion, disaster and chaos. But, then again, their world seems just as strange to us.

While there were certain unsavoury aspects of Aryanism, and in particular I refer to their propensity to engage in warfare, I cannot help but think of the many good things which they gave as a legacy to the future, especially the importance of sticking by your own family and friends at all costs. *In this respect modern western society is certainly missing something.* We may have space probes surveying Mars, miracle medical cures, a global village and the Internet, but deep down the West is rotting. What have we become - *a people who reward their parents by putting them in a home for the aged*, lands of disrupted marriages, children who pay no heed to their parents, *employers and employees with no loyalty to each other.* This dishonourable behaviour is capable of coming back to bite each and every one of us.

Aryan feudalism perished as caste and class were thrown to the four winds by revolutions, with citizens somehow believing they were all born equal. The former status (caste) is immovable, the latter (class) movable. Caste and class are two different concepts. Both are inherited at conception, and in some cases were seen as the

ARYAN FEUDALISM

product of divine will. As old fashioned as they may be, these concepts are vitally important to a properly balanced nation. In saying that I mean caste is something you're born into depending on your actions in a previous life. In this lifetime one's present caste is to be accepted as a reward or punishment, but accepted and lived to the full nonetheless. Whereas under a class system an individual may be born of a lower social class but escape this station in life through education, windfall, good luck and opportunity. It's a very basic concept - nobody is born equal. People are raised in rich, middle-class or poor families. Some will be adopted out at birth, others orphaned, yet others will only have one parent rather than two. Most will have to struggle for life, others not.

Notwithstanding this, Westerners live and die in a fantasy world where they see, what seem to be, ordinary people hitting the big time. We are not equal in terms of opportunity either. Because of this most of us will never escape the bonds of lower status, nor will they make a transition into the rich and famous category. The likelihood of fame and fortune is in part an illusion, an extremely evasive and elusive hare granted to the odd person, but never the majority. For this reason some choose to follow childhood dreams, embarking on extensive and costly tertiary studies. But if everybody does this who will milk cows, pour cement, lay bricks, stock groceries or cart refuse?

Perhaps owing to ubiquitous Marxist rantings Westerners are taught to rebel against people in authority, thinking that it will somehow raise them from a lower social condition. Shooting or exiling the wealthy did very little to improve the station of individuals in Communist countries. All it succeeded in doing was to remove from public view the only individuals the lowly could financially compare themselves with, unfavorably.

At the end of it all work is what propels nations into the future. Who wants to be a worker? The simple answer is nobody. And will most people be workers? Yes, probably every day of their life! Will they enjoy doing it, and make the most of it? Or will they beat themselves up daily, asking why they were never allowed to ascend a mystical ladder of progression to society's next highest level of rank and fortune?

Caste and class were integral to the Aryan lifestyle. They are in part a state of mind, being resigned to blind acceptance, a tacit acceptance of social condition, but they permit the existence of a fully functional society. Aryans embraced their station in life with fond acceptance. As an example there's a very real difference between a tradesman and craftsman - it is their mindset. The craftsman is totally absorbed in what he is doing, he understands fully what he is ... a maker of wooden objects. He knows he is not, and never will be, a corporate financier who drives a porsche and get a 1,000,000 bonus for enhanced company performance. He caresses the timber searching for imperfections. At that moment his life becomes a joy. An Aryan soldier is one who strives to master military science, rather than somebody performing a service for cash alone. A soldier is not what he does, it's what he is!

If one were to choose between the two, class is clearly the better option since it still accomodates the wild card of "hope".

Far from being sub-moronic, the well-honed Aryan mind created social constructs which allowed for gratification in everyday life. Still, one day, they might be something different, if god, or the gods, are smiling.

The other option is to internalize revulsion to one's position in life, always dreaming of stardom and bountiful riches (as shown on TV). For some, suicide, drug and alcohol abuse are the inevitable result. It's far better to embrace the reality of the life you're ultimately born into, at least until something better comes along.

Already in western society we see the detrimental effects of individualism and multi-culturalism to enlightened patriotic nationhood. Ghettos or ethnic enclaves form in response to local community needs, eroding the unity of a country. They form due to the racial, linguistic and religious needs of minorities. Muslim communities form around Mosques, Jews synagogues, Buddhists stupas. Even greater problems arise when wealthy and/or influential proponents of certain philosophical systems aim to export them to other regions of the globe. International Communism was to be born in bloody global revolution. The present-day Islamic revolution is supposed to spread across the earth, taking root wherever Islam has higher than average local representation, but is not governed by Islamic law. They further aim to destroy Islamic royalty (eg: the House of Saud), who are renowned for giving their subjects a sensational standard of living. On September 11, the USA, the primary exponent of the multicultural experiment, got to witness first hand the unforeseen consequences of opening your society to the entire world

ARYAN SOCIAL CONSTRUCTS ASSISTED STABILITY

MULTI-CULTURALISM DILUTED THE HEGEMONY OF ANGLO-SAXON CULTURE

The down-side of religious fervour

TOO MANY PEOPLE HAVE
DIED IN THE NAME OF
POLITICS, RACE AND
RELIGION

Politics, racial supremacy and religious fanaticism have all taken such a heavy toll on humanity; who is free from blame? Pagans conducted their human sacrifices (whether as a beatification or penal killing). Jews suffered the destruction of Jerusalem which saw one of the worst single massacres to have ever occurred in the history of warfare, with the legions of Titus slaughtering most of the population; supposedly around 1,100,000 people according to Josephus (this is probably not a reliable figure, given the size of the original city). Though if you could sum up their collective suffering over every preceding century, you could not even come close to understanding the grief caused by the annihilation of a purported 6,000,000 Jewish men, women and children by the swastikered Nazis during WW2, Nazis who, to a certain degree, misread what Aryan religion was really about.

Some advocate Adolf Hitler was the architect of the Holocaust. He stood up, persecuted Jews, incited German society to expel Jewry, while behind closed doors orchestrating their liquidation behind the confusion of war. The truth is altogether different. No person has the ability to incite such a persecution unless their society is already receptive to such ideas. Hitler, Goebels and the like were merely spokesmen for widely-held anti-semitic views present long before the Middle Ages. Members of the Germanic Thule Order, evidently filled with fury over modifications occurring inside Freemasonry, probably decided to settle accounts with the Jews in the background. These changes, initially brought about by the Duke of Sussex, took place in 1830, following the close of the Napoleonic wars. It amounted to a total overhaul of the craft and a recalibration of their entire ritual handbook. From that time delving into the craft's early origin was strictly forbidden by London's United Grand Lodge. The genuine secrets were deliberately buried. And so a lot of little fish got caught up in Hitler's dragnet too ... gypsies, Jehovah's Witnesses, Freemasons, homosexuals, Jews, traitors. Researchers need to go back over surviving administrative minutes generated during Thule assemblies to determine what agendas were being discussed by their brethren. It should make very interesting reading.

ISLAM HAS DEVASTATED
MANY CULTURES

And during the first centuries after the birth of Islam, Muslim armies had by far become the most accomplished religious threshing machine ever to walk the planet, devastating cultures in Africa, Asia Minor and India, and exterminating Zoroastrians.

THE CHURCH HAS DONE
LIKEWISE

Early Christians were martyred on a large scale by Romans, vindictive Rabbis and others. A millennium later many pseudo-Muslims were executed in early medieval Cordoba, that is secret Christians who pretended to observe the Islamic devotions of their overlords, but later decided to come out of the closet. They fully expected to greet the executioner's sword for apostacising from Islam, but a good many made the leap toward martyrdom as a matter of principle.¹⁸⁷ But in time the Church, secular authorities and over-zealous medieval Christian peasantry had a fair amount of blood on their hands, *all centred in this regrettable phase of Church history*. For the past failings of these ancient members of the Church, a mitred Pope John Paul II sought atonement before God in March 2000, during mass at St Peter's Basilica. Some say the gesture was insufficient, yet by the same token the events are up to a thousand years old, and it is difficult to embrace the notion of corporate blame for those happenings. Likewise modern Germans cannot be held responsible for the holocaust. Most weren't even born.

THE DEATH OF
ZOROASTRIANISM

In talking of the killings of witches, Jews and heretics it is vital we keep them in perspective though, for at that time they were only the tip of the iceberg when it came to the summary execution of criminals; rebels, conspirators, thieves, counterfeiters, rapists could all be hanged on the spot if caught in the act, or, as we know from western accounts, taken for sentencing at the *private gallows* of some landed baron. We should spare a thought for the pagans, and what happened to them. For it stands as a plain warning to us as to what can happen when society turns against segments of its own community, who have fallen from favour, punished for even being born. Despite everything that has happened to the Jewish race, it certainly seems they are the second most persecuted of the major religions. The unfortunate honour of being the most vilified creed belongs to a certain component of the Aryan nations, the Magians, Zoroastrians, and their descendants the Parsees. The sum total of devastation directed towards them throughout history has reduced them to a mere 130,000 survivors and the number of staunch adherents is rapidly diminishing, bordering on extinction. The original demographic dimensions of the religion is unquantifiable, but in the millions, and reaching a good part of the earth's surface. Even so it is not fair to claim that

THE ARYAN SOCIAL
MATRIX IS EARMARKED
FOR EXTINCTION

the demise of Zoroastrianism was entirely attributable to killings. Many abandoned what they once held sacred, whether willingly or to enhance their social standing in the new world ushered in by the Christians, Jews and Muslims.

Europe's royal houses were especially vulnerable to the spectre of chaos too. Driven by the revolutionary zeal of their formerly-adoring subjects, the social pyramid turned upside down. Living in a state of ideological captivity between pro and anti-reformists, besieged by their own subjects, Persian and European royals were herded from their thrones like wild beasts, sometimes living on the run. By the Renaissance young nobles were spied on, or burned alive by the inquisition, even little children. The chilling events flowed on into recent times, with the abdication of Kaiser Willhelm and the depraved murders of Emperor Franz Ferdinand and Czar Nicholas II, their wives and children by a Serbian nationalist and Communists. The sickening, punishable and demonic act of regicide.

The most perplexing phenomenon of all is the widespread abandonment of European kingship, which hastened in the decades following the first world war. While it is true that imperial aspirations were the primary cause of the Great War, the second world war proved we did not need royals to bring us over the edge, into the abyss of war.

Twentieth century royals, the very descendants of historical monarchs found in this book, are of varied faiths, whether Catholic, Orthodox, Church of England or Lutheran. They are noticeably in the forefront of international cultural, charity and aid efforts, visiting victims of calamities. They foster environmental programmes designed to save both flora and fauna, which is a pressing issue for our planet. In speaking of the Australian situation the caveat "royal" can only be used under certain circumstances. We have royal zoos, royal hospitals, royal penitentiaries, a royal society for the prevention of cruelty to animals, royal wildlife funds, royal charities, royal military and police forces, and royal commissions into legal impropriety, especially where politicians are concerned. And who can forget the royal agricultural shows where adjudicators get to walk around and judge the most impressive wool, livestock and garden produce, awarding prizes for pumpkins big enough to be carted in wheelbarrows. Royalty endorses and embodies notions of truth, justice, care for the sick, care for the needy and unfortunate, and the discovery of falsehood, especially where it has come to roost in government circles. Despite representing something good in society, royalty has been increasingly subjected to gutter-press attacks which intrude upon their very busy philanthropic lives in a most vile way. For at least a century Marxist interpretations have prevailed, portraying them as nefarious, exploitative, blood-sucking parasites who bleed the public purse. Could it be that these comments came from atheistic pedagogues whose mostly-Jewish secret police crushed religion and infamously liquidated over 20 million Russian citizens as though they were mere insects?

Even so, the age of kings was doomed by rebellion, the new mark of sanctity, the beginning of the end coming with the French revolution, and the storming of the Bastille. A reign of terror came over the land, leaving the state guillotine running red with the blood of loyalists. Ecstatic crowds watched on as Sun King Louis XVI and his queen were guillotined, leaving their 10-year-old son to die a lonely and miserable death in a light-starved, solitary prison cell. Thence came the English civil war of bitter memory, which saw English kingship enter a state of virtual captivity, Charles I beheaded, and their ultimate powers of discretion in many ways neutered by the parliament. Across Europe it was as though King Arthur's subjects conspired to kill him off bodily and ideologically, together with Merlin and the old ways. Then we have the American Revolution which saw the colonials oust British rule in 1776 (for political and economic reasons), plus a host of hispanic uprisings.

The final years of Czarist rule in Russia saw justifiable paranoia emerge in royal circles, reprisals against saboteurs, particularly after the assassination of Alexander II, not to mention flourishing anti-semitism. Religion clearly featured in the battle.⁷⁹⁶

Czars had to be continually informed of happenings outside the palace, the many incidents of subversion. An Interior Minister, Mr Ignatyev conveyed the following dire news to his majesty, Alexander III; "In St Petersburg there exists a powerful group of Poles and Yids which has direct control of the banks, the stock exchange, the bar, a great part of the press, and other areas of public life. Through many legal and illegal ways it exerts an enormous influence over the bureaucracy and the general course of affairs. Parts of this group are implicated in the growing plunder of the exchequer and in seditious activity".¹³²³ In layman's terms what he's really telling the Czar is "Guess who's really in control of Russia".

Ignatyev's observations hit the statistical bullseye. Jews such as Lenin, Marx and Trotsky orchestrated the new

The late Czar Nicholas with his entire family ... all murdered in cold blood.

upbeat Communist illuminati, mobilising the impoverished masses for revolution and mob rule against Europe's ancient Aryan social matrix. Their grab for power was financed by Germans keen to get Russia out of the war and free troops for deployment along the western front. This ill-conceived plan would later come back to haunt Germany only a few decades later. What emerged out of this was a Bolshevik revolutionary council overwhelmingly run by Jews, with only a token presence of Russians and Caucasians. With the Bolsheviks now in control the royal family was captured and spirited away, held under house arrest by the revolutionary guard. Lenin gave the final order for their liquidation, dashing all hope of a Czarist return. The family was led down into a cellar and shot.

The death of the Russian royal family was not wholly politically inspired.

This is proven by a slogan daubed on the wall of the cellar in which Czar Nicholas and his beloved seed were shot to death and bayoneted in cold blood by Jewish executioners. It did not read "Long live the revolution", or "Proletariats of the world unite". Instead it made reference to the murder of Belshazzar, the last king of Babylon, who had offended the god of Israel. Throughout these harrowing ordeals there were those who stood ready to defend their kings to the death, just as Harald's personal retinue once did at the battle of Hastings, where each, to the last, fell. Loyalist warriors of the Czarist White Guard fell very much into this category, fighting a rear-guard action against the Bolsheviks from Europe to Vladivostok. Yet there has been no shortage of those racing to bear arms against the royal houses. The ultimate cause of the demise of royal power was, I believe, an upswing of secularising and judaising within Christian society, coinciding with the medieval Church reform process and the great protestant reformation. With it came the millennia-long contempt of monarchy so central to Judaism and rejection of 'divine right'. The rabbinical Talmudic books of Zohar are quite clear on the matter. They call for the destruction of the gentile princes, and a rejoicing in this, so that Israel can be freed of their influence. Be that as it may such subliminal ideologies were kept in check by frequent *New Testament* references to kings as agents of the divine being, tasked with bringing law, order and peace to the world. Evidently royalty had a place in the old order and the new. Add to this the steady exertion of leftist ideologies throughout the primary, secondary and tertiary school systems. This latter group was particularly devastating to the old world order, imperceptibly re-modelling fresh batches of students along left-wing lines.

Communism found its greatest expression in Joseph Stalin the classic narcissist who made himself comptroller of the entire Communist apparatus, appearing at the hub of a rotating wheel of state power (comprised of three major components, namely the Red Army, the Communist Party of the Soviet Union and finally the NKVD/KGB), which turned at a speed of his choosing. Periodically he ensconced his grip on power by patronising each of these elements in turn, in order to purge the ranks of the remaining power-holding bodies. This resulted in show trials and massive body counts among otherwise loyal Communists. With the fall of the USSR and unprecedented access to Soviet archives, a new generation of authors are examining the true nature and atrocities of the Communist gulag system where between 30-60 million Russian citizens are alleged to have been executed or worked to death. Alexander Solzhenitsyn is but one of them. Stalin (Mr Steel), this former man of the cloth, mutated into one of the most fiendish killers the world has ever known, or may ever hope to know. Perhaps his gravest crime was to steal from children the opportunity to look up into heaven, and wonder about the possibility of an afterlife other than the industrialised 'utopia' he had prepared for them and the hungry grave that shall claim us all soon enough. From the perspective of the Christian Church, whether Catholic or Orthodox, Lenin and Stalin were an infernal duo, with Lenin dwelling in the lower depths of Hell and Dugashvili still lower, considerably lower. Both these figures were instrumental in destroying the ancient Aryan order, with priests and kings foremost on their hit list. By their guiding hand the social matrix turned upside down leaving the masses to denigrate their kings, the earthly ordained of god in both Christian and pagan tradition. Christian religious were singled out for special treatment.

During the Communist purges only a few hundred Russian priests out of 51,100 were saved from incarceration, exile to Siberia, or liquidation, and the fate of 94,000 nuns remains uncertain. Nor would there be any monasteries,

STALIN WAS GUILTY OF GREAT BUTCHERY AGAINST THE RUSSIAN AND UKRAINIAN PEOPLE

THE BRITISH MONARCHY STILL HAS SUPPORT, BUT THE NUMBER OF REPUBLICANS IS GROWING. SOON THEY WILL BE THE MAJORITY IF IT IS PUT TO A DEMOCRATIC VOTE

hospitals, convents or Church schools. Barely several hundred of the estimated 54,000 parishes escaped decimation (including cathedrals converted into an olympic-size swimming pool or chapel of Atheism), meaning that under comrade Stalin (the ex-Georgian Orthodox seminarian!) the Russian Church had almost ceased to exist by 1939.¹³²⁴ These anti-clerical atrocities were but a prelude to the happenings of the Spanish civil war where priests were dragged out into the streets to be shot.

It certainly seems there are those who feel they cannot rest peacefully until they have entirely destroyed the existence of royal families, partly on account of their ancient pedigree and status. In doing so they plan to replace them with kingless parliaments and republican senates. Such a time was spoken of by St Augustine, and in mediaeval myths concerning the demise of kings, and their role as defenders of society against the inroads of the great demon, who would one day turn society and everything dear upside down.

At functions in Australia, until comparatively recent times, it was not uncommon to see the average party-goer charge their glasses and drink to the health, reign and long life of the Queen. Now you are hard pressed to see this, other than among the most devoted royalists. Republican moves are afoot to abandon our monarch as head of state, but were thwarted in a national referendum on the matter. Nevertheless forces are again remustering for another crack at Her Majesty, both here and back in England, where attempts to remove the House of Lords met with failure. With pro-Monarchical opinion now lower than 50%, many of whom are elderly, commentators are predicting the fall of the Windsors (ie; the Welf bloodline), especially over the next decade, when many citizens will have passed on. Such an eventuality was beyond all comprehension or belief barely 100 years ago. It's like thinking of Ancient Egypt without Pharaohs! Apart from the interregnum ushered in by Cromwell's treacherous slaughter of Charles I, has there ever been a time when Britain was not ruled by one of the Celtic or Germanic royal blood, or a caesar?

The arguments for retaining kingship are varied. Kings inherit their symbolic station through birthright, and this provides a modicum of state stability, except where a monarch dies but cannot be replaced by the normal order of succession. Kingship is apolitical. By the ancient laws of kingship monarchs are required to justly rule their subjects without fear or favour. They do not need to curry favour with the rich and famous to get their bum on a seat. They do not have to elicit party election funds and other kickbacks. Their retention goes beyond simple politics. As you have already seen, where Christianity is concerned there is a religious imperative for keeping them on the throne. They are installed by god, and have a special connection with the heavenly lord. This is proven by the fact that princes and princesses cannot become kings or queens until the performance of a sacramental anointing and coronation, which elevates them from a secular representative of the royal house to an earthly representative of the divine being. The good and wise kings will surely walk into heaven according to the Christian bible. But what will be the fate of those keen to do in their king for no perceptible reason, to anonymously plot their downfall with ballot paper and pencil, as surely as if they had a sword or poison in hand. Will these backstabbers waltz past St Peter with impunity, as the apostle waves them through the pearly gates with a sly wink? It's an interesting theological question. During the Middle Ages this sorry situation was clearly foretold, merely a symptom of the end of days, of the decline of spiritual faith, of the atheistic age of Antichrist.

If monarchy does go out the back door, as seems likely, is it not possible that native-born royal candidates can stand for presidential office? It's my understanding the Bulgarian king was duly and democratically elected as that nation's president. Or is the institution totally out of keeping with the notion of a purely secular state? Do people even care? That many don't drives home the magnitude of the social reversals promoted over the past 40-50 years.

In *The Forbidden History of Europe* you have witnessed the life and death of our pagan ancestry, which occurred largely through conversion. All of us were born of pagan stock and attitudes, including our royals. Czar Nicholas of the Romanov dynasty, like his predecessors, employed the two-headed eagle emblem as the Russian royal insignia,

ROYAL TOASTS ARE NO
LONGER IN VOGUE

Fig 67.1. Masonic flag allegedly taken to the moon

Fig 67.2. Edward VII in masonic regalia.

Fig 68. Lodge in Vienna. Wolfgang Amadeus Mozart, the gifted orchestral composer and musician, is seen seated on the left in full regalia

one coincidentally used by Hittite Kings of ancient Mesopotamia.²¹⁰ As mentioned, this device has been firmly associated with certain elements of the European royal houses (see p. 271). But was it just a well used symbol, or did it carry the same meaning it once did among the Hittites? It is hard to say. The two-headed eagle is still in use nowadays on the Albanian and Serbian flags, or the coat of arms of the Russian parliamentary *Duma*.

A less well known example of the double-headed eagle is used by the supreme council of the Masonic brotherhood. This very motif was sewn onto a flag and carried during the first moon landing by Buzz Aldrin, aboard "the eagle". It was surmounted by a glowing triangle (which normally contains an eye), and bore the caption "*Supreme Council of the 33rd degree, Southern Jurisdiction, USA*". What all this means is anyone's guess, though I must hasten to add that I cannot vouchsafe this is a true account of the "other eagle's" lunar landing, and instead recall here only what was recorded in *Time Life*. In that same publication we also find a painting depicting one of Czar Nicholas indirect blood relatives (the Queen's great grandfather British King Edward VII) in full masonic regalia, wearing a golden medallion with a depiction of a triangle and a shining eye in it, almost identical to the capstone of the pyramid on the Great Seal of the USA. This may not be purely coincidental, for a number of US Presidents had been Grandmasters of the Masonic Lodge, such as George Washington whose masonic apron is emblazoned with a golden sun-eye. Thomas Jefferson and Benjamin Franklin were accomplished gentlemen in science and alchemy, and like so many presidents after them, brethren of the craft.

Collectively these pieces of artwork indicate that ancient sympathies were still current within various European monarchies and the US government as recently as six generations ago, but such a claim could only be made if the parties involved had cognisance of the original meanings associated with these same symbols. Whether the secretive Masonic brotherhood understands the importance of the insignia is unknown.

Having loyally served in Her Royal Majesty's armed forces I would not dare to presume the attitudes of my own Queen beyond what is already known, namely that she is a devout Christian, and the head of the Church of England. As with all of us she has a pagan ancestry, and as a linear descendant of Prince Albert of Saxe-Coburg and Gotha, one purer than most, genealogically speaking.

For some time now there have been accusations Freemasonry is trying to take over the world. I can tell you this is surely not the case, in fact it is dying out, catastrophically so. As with so many Churches, one only has to look at the number of lodges closing down due to insufficient support from the young. Having examined the varied streams and orders within the craft I am of the opinion that it is as ancient as Freemasonry claims. Owing to the level of secrecy enshrouding the craft, a secrecy born in the inquisitorial persecutions, a number of urban myths abound. It does not include infernal goat sacrifices. It does not include idol-worship. Having said that changes came about in the early 1800's which reduced the craft to a purely symbolic institution and certain orders rejected as 'irregular', and by implication disregarded by the new Masonic order as suspect and unholy. Nowadays its main attraction is to perform acts of charity, and for older men seeking companionship, especially single elderly men who have the opportunity to dine out every day of the week if they really want to, or simply have a beer with friends rather than sit home rotting in front of the TV.

It goes without saying that human beings will disagree on important matters of faith and doctrine until the end of time. And that's perfectly OK. As an Australian, I am privileged to live in a free society where Buddhists, Hindus, Muslims, Jews, Christians, Taoists and a countless number of sects (yes, even witches!) live side by side, working and living together in relative harmony. Irrespective of the religion, well-stoked pyres, nooses, incendiaries, high explosives, and high velocity rounds have never been good preachers, for a creed is more likely to be lauded for its good order, words, manner and charity. Peace must be a goal we strive towards.

And so, dear reader, the age of kings and wise folk draws to a close in our day, backlit by the failing, obscured light of the creator as it descends below earth's horizon. The pure light of heaven, now throttled by unbelief and materialism, shall, with its departure from the world of man, leave nought but infernal gloominess and organised

chaos as we contemplate that which we so gleefully destroyed.

That brings me to the disturbing video footage constantly beamed around the world nowadays. The execution of aid workers (whether in Iraq or Somalia) represents a significant deviation from everything the Muslim creed professes. They were non-combatants. They were there to help re-build the country, to return life back to normal for women and little children; not fight. Add to this the bombing of thousand-year-old Churches in Iraq and you soon realise things are more out of control than they have been over the past millenium, with hothead zealots hoping to march fellow believers into a wider Jihad.

For those of you who have come to understand Islam as an orgy of wanton destruction, the heart of Islam is supposed to be founded upon somewhat different pillars of faith; *“The righteous man is he who believes in God and the Last Day, in the angels and the Book and the prophets; who, though he loves it dearly gives away his wealth to kinsfolk, to orphans, to the destitute, to the traveller in need and to beggars, and for the redemption of captives; who attends to his prayers and renders the alms levy; who is true to his promises and steadfast in trial and adversity and in times of war. Such are the true believers”*.¹³²⁵

As a rule Muslim military strikes are normally only ever undertaken as a retaliatory response, against criminals or enemies attacking Muslims because of their religion. Once the killing cycle starts it is difficult to stop, for the *Qur’an* requires ‘an eye for an eye’ payback to avenge each and every death. It is a personal duty for kinsmen to pick up the gauntlet. Other than that, there are very few passages in the *Qur’an*, identifiable as an open incitement to warfare. These passages mainly refer to a period some 1,400 years ago, when the emerging Muslim faith fought battles against idol-worshippers in their region.

“Those that make war against God and His Apostle (Mohammed) and spread disorder in the land shall be put to death or crucified or have their hands and feet cut off on alternate sides, or be banished from the country”.¹³²⁶

For a start it’s impossible to argue that westerners are conducting a punitive war against Islam. If this were so western nations would not have Muslim allies of any description. They would probably have warships off the coast of Saudi Arabia with the grid coordinates of Mecca and Medina permanently programmed into their shipboard nuclear delivery systems, ready willing and able to convert Islam’s holiest meeting places into irradiated piles that would glow for a thousand years. Such is not the case. Nor would they entertain the construction of Mosques on their own home soil. The *Qur’an* also calls for a certain level of restraint in their military activity.

“Fight for the sake of God those that fight against you, but do not attack them first. God does not love the aggressors. Slay them wherever you find them. Drive them out of the places from which they drove you. Idolatry is more grievous than bloodshed ... Fight against them until idolatry is no more and God’s religion reigns supreme. But if they desist, fight none except the evil-doers”.¹³²⁷

And what should we see but civilians repeatedly targeted in more recent attacks. Bombings in shopping malls, cafes, outside polling booths, you name it. Where does this sort of behaviour fit into the *Qur’an* I ask you?

As we further enter the nuclear age this sort of religious militarism gives rise to new and more disturbing trends for global terrorism and warfare. Along the confrontational Indian and Pakistani frontier, rocket systems for nuclear warheads draw religious names like *Shariah* (ie; Islamic Law) and *Agni* (ie; the Hindu fire god). Here we’re not witnessing atomic weapons controlled by governments with purely secular ideals, but radioactive religious fireballs just looking for a day and a time. The reciprocal killing cycle can really jump up a few notches.

The *Qur’an* also provides avenues for peace. When peace returns to parties warring or in contention, it is seen as a gift from God. *“It may well be that God will put good will between you and those with whom you have hitherto been at odds. God is Mighty. God is forgiving and merciful”*.¹³²⁸ Perhaps Allah shall deign a more or less lasting ceasefire throughout the Middle East.

With so many irreconcilable forces at work this book reads like a horror story, a testament to human intolerance at its very worse. Having said that, it is impossible to record the sum total of good deeds performed by folk faithful to these creeds. For the ordinary person, they assuage the unrelenting vicissitudes of an otherwise unforgiving world. Healing of the sick, comfort to the dying, mercy to the guilty, care to the mad, learning to the young,

parenting to the orphan, companionship to the incurable.

Keep your eyes peeled for those who forcefully assert there is no primeval connection between Europe and the Orient in terms of cultural inheritance and shared traditions. Stand back for a moment and assess the validity of theories disingenuously denying the reality of cultural importation conjoined with the Eurasian migrations. Could it be that an invisible forcefield guards Europe's eastern parts, erasing Asiatic thought and practice from the minds of any and all immigrants, from the millions of steppe invaders who traversed the region looking for a new European homeland? If there was it certainly failed in the case of the Khazarian Jews who entered Europe in significant numbers, together with their language and religion. This scholastically bankrupt prognosis, where disseminated in an environment cognisant of new developments, forms an integral part of the veil of falsehood, that shields the European mind from its Aryan past.

The political (left-wing and anti-Aryan lobbyists) and religious (Islamic and Judaeo-Christian fundamentalists) suzerainty of the presently ruling powers guaranteed that a site as monumentous as Ecbatana has, at the dawn of this 21st century of 'enlightenment', never received the due attention of archaeologists. For god's sake the 38 hectare site is the conceptual equivalent of an Aryan Washington DC; that's how important the place was. Now that there has been a change of heart in Tehran the exploration must continue at a brisk pace. In the region of Persepolis and Pasargadae (the old Persian capitals) the Bulaghi dam is nearing completion and is due to flood the area for perpetuity in early 2006, and with it any opportunity to reconstruct this vital period of Eastern history in the political heartlands.

Predictive archaeology dictates that the upper level of Ecbatana will display signs of catastrophic destruction which led to its depopulation. It was never built upon from that time forth, and one might guess the gutted remains of the wizards' city gained a taboo reputation throughout much of the Islamic period. Beneath it should be

An untold number of texts written on clay tablets, and possibly even parchment or cloth. They will have been composed in a variety of languages, and there will probably be evidence of Greek, Chinese, Sanskrit, Babylonian, Assyrian, Egyptian characters.

The oldest Christian churches ever built, all of which will show signs of being deliberately razed. There may even be historical documentation referring to Jesus Christ.

As many sets of human remains as possible to fuel future DNA analysis in the determination of the physical characteristics of the original Medes, and the overall racial composition of the city's inhabitants.

Taking into account the relative paucity of Persian artifacts (ritual equipment especially) this inevitably generated a vibrant black market in illicitly excavated and fake artifacts up until now. One only has to consider the princely sums collectors are prepared to pay, up to 1.5 million dollars in some cases. The only way to combat these upsetting events is turn to Ecbatana with renewed vigour. Perhaps, after suitable evaluation, newly excavated items ought be sold to collectors with very fat cheque books. These monies might then further fund continued excavation activity.

Yet it is deeply troubling to learn we might see a range of valuable objects disappear from museums very soon. In the wake of recent surprise allegations that up to a third of Israeli artifacts were 'forged' by unscrupulous Jewish specialists, researchers must redouble their efforts to assess each and every item. This fiasco had the effect of casting

doubt over the work of all preceding archaeologists (eg: is any of it real?). We must be careful not to easily discard objects that had previously been declared genuine. I think atheistic academics, where they are believed financially incorrigible, are of special worth in this emotionally charged religious environment, acting as a control mechanism when competing Jewish, Muslim and Christian ideologies collide in the evaluation of artifacts and data, plus oversee the conduct of especially controversial laboratory tests to ensure everything is above board, and no particular faction is able to 'cook the books'.

I think most readers will be rightly disgusted by this whole sorry episode, and the perverse attempts to bury one of the most crucial chapters of human history. So remain alert for news of library fires, book seizures, disappearing archaeological items and newly debunked historical texts. Collectively they're a dangerous mix which spirits away or vaporises evidence piece by piece. Who knows, we may even discover the identities of those aiming to maim the historical record for their own purposes. Then watch these dark reptiles of falsehood slither out from the shadows onto open ground, where their nefarious exploits are plainly visible in the light of day.

But, then again, I suppose there is another option, one some of the world's finest minds will ask you to believe; namely there were no wizards and witches, they are only a myth for gullible people, and the stuff of novels. Moreover the word Aryan is inappropriate to use at any time ... an artificial Nazi construct. And Christianity ... why it's an extension of Judaism of course!

The author's racial background.

Father's side: Anglo-Saxon (mixed with blood traceable to Scandinavia in the 1400's) and Scottish entering Australia via the American colonies in New York state. Some French Canadian blood. Rumoured to be related to Lawrence of Arabia.

Mother's side: Irish with a perceptible Spanish influence. Scottish and English.

Political bent: For most of my life I've been a working-class patriot and anti-Communist. Some will call me a right-wing conservative

Royalist

Freemason

About the Author

The author, hereafter referred to as "John Smith", studied at an Australian university in the early 1980's. Thereafter he served in the Australian Navy where he studied to be a linguist and communications specialist. Around 1990 his first wife died of a heroin overdose leaving him a child to look after. He left the navy, remarried and found gainful employment in a police department. Several years later this marriage broke down for a variety of reasons leaving him a total of three children to raise. In 1990 he decided to embark upon a career as an author, hoping to make a few dollars on the side for his struggling family. Ten years later, in the closing months of 1999, the author released his work under a certain title, receiving book reviews in the Australian and the Ontario Globe and Mail. The promotional website received 250,000 hits over the following year and a half. Distribution was impossible to obtain for the title though, effectively preventing its circulation in the UK and USA. Around that time the author was working 60 hours per week catering for his family. After that his children were told how evil their father was; that he was a "total loser". His kids lost all faith in him and left, under complicated circumstances, to live elsewhere. In 2004 Smith attempted the release of two paperbacks, cut down versions of his original 1,000-page work. These were entitled *The True History of Wizards and Witches* and *Christianity's Greatest Controversy - Prelude to Genocide*. Again zero distribution, again practically non-existent sales, again a financial loss, and the threat of bankruptcy. He now works in a quasi-industrial environment, but is pleased to know this document will be in mass circulation for some time to come. "Smith" received his history doctorate in 2005.

The following is a quote from the 1999 release. It turned out to be very prophetic. Pay attention to the underlined portions.

"After all this time, this is a story that needs to be told, and I am under no illusions I will be widely vilified and condemned by many quarters, for even daring to compile a work of this nature. Indeed it has already started. Publishers refused to handle it; "it's an esoteric book", "Nobody is interested in this kind of book", "limited appeal", "just how did you get into this anyway", "who put you up to this"? Others said "I hope you don't tell anyone you work here", "your life will be destroyed for writing this book", "this is white supremacist propaganda" or "I sense the emergence of the Antichrist". Comments like these betray what I always suspected would happen from the very beginning, that my work would suffer from ignorance, and that well-placed people would try and prevent it from ever being released.

Some will regard this title as bordering on a pagan missal, others a gross heresy about to re-afflict the world, others an infernal

Satanic Testament, a sermon penned by the “Antichrist from down-under”. Others will see it as an apologetic for Roman Catholicism, others a Protestant attack on Catholicism. But they are all wrong; this is a history book, plain and simple, a look at the unsanitised history of mediaeval Europe from both sides of the fence. Through this comes a more complete understanding of those happenings. I got into it by starting to write a book about pagan Russia ten years ago, and like a detective asked one too many questions, and followed as many leads as I could. Undistilled the truth is blinding, so the sheer frankness and novelty of the information portrayed herein will prove too unsettling for many, perhaps tearing down some of their ill-founded or pre-conceived notions concerning the era. For them the best solution is to close their eyes, ignore it, and hope that it will go away. But it will not go away. Since our distant past, this information has always been there, and will continue to be until the end of time unless cruder minds hope for a return of the book burnings days of old, to cleanse it away, once and for all.

We need not fear a greater understanding of the past, for it can help us understand exactly who we are as human beings, and where we are heading. If one were to take a person of 40 years of age and erase the first 30 years of life from their mind, the subject would lose cognisance of their childhood, their adolescence and the early adult years. This amnesia would rob them of an understanding of who they once knew, and what sort of a relationship they once had with others. You would rightly assume that such a person had a personality disorder, because they don’t understand who they are, or why they are as they are. They just walk around being themselves day in day out, scratching their head from time to time, wondering “why is it so”? If one were to ask a Christian, Jew or Muslim what came before their respective religions they might say pagans. Rarely indeed will someone be able to recount creditable facts about the pagans. Yet it never dawns on them that these pagans were our ancestors, each and every one of us. A mere 30 to 40 generations have passed since 1,000AD”.

In 1999, prior to its millennial release, John Smith was seriously considering burning everything he had ever written in the preceding decade, a ten-year period he often slept only four hours per day writing or researching material. In brief he thought about the wider consequences of releasing his research.

As you may have seen on the title page, this book exists in two formats, one a traditional history book, the other a right-wing version. You may ask what possessed Smith to diverge from a history book about Aryans to an Aryan history book? This took place late in the year 2004 AD ... four years after its aborted release in 1999. Basically it was when he realised the consequences of not circulating the text. By not disseminating to the public, various parties would get away with the same blue murder, as they’ve done for some time, manipulating the masses in a very insidious way. He had a plain and simple duty to the people ... to tell the truth.

No one single factor tipped him over the edge, coaxing him to politicise his history book, something he never originally planned on doing. The main reason was to provide a clear reference against which readers can gauge the “right-wingness” of the original title, the true basis for its original condemnation. Other than that:

- 1 When he perceived certain individuals knew all about this, that this was not a major discovery, and they were hiding it from their citizenry to give themselves free reign behind the scenes. True democracy cannot exist in an intellectual void. True democracy offers people a right to make decisions, to vote according to their will. Censorship steals something valuable from the people, the right to deliberate based on a measured assessment of the facts. You take away the facts, you take away their decision-making power, you take away democracy.
- 2 When he discovered his brake hose sliced through after his car spun out of control.
- 3 When he found out his wheel nuts had been undone by person’s unknown, thereby endangering his entire family.
- 4 When he saw certain interest groups having a controlling interest in western academia and the “free press”.
- 5 The piecemeal demonisation of white Anglo-Saxon culture, almost as though they are the sole cause of the world’s many evils. There is also an unspoken absolute, that Anglo-Saxon = racist=white devil etc. This is despite the fact that the white countries have invited peoples from every corner of the globe to live in the nations they very often built from the ground up, frequently under appalling climatic conditions.
- 6 Not just the acceptance of homosexual life paths, but their open glorification by many and varied means.
- 7 Witnessing the overt anti-Aryan activities taking place in western society.
- 8 When he read the *Protocols of the Elders of Zion*, arguably the greatest engine of anti-Semitism ever written, and an indispensable reference work for Nazis everywhere. It has been declared a forgery, devoid of all credibility. In the USSR possessing a copy was punishable by death. What gave the Protocols their awesome power is that an original copy was held in a sealed case since the early 1900’s, while the Protocol’s contents spilled out into European history with unbelievable carnage. The Dead Sea scrolls,

undiscovered in a cave for a good 2,000 years, tell us of an anti-gentile program in Jewish supremacist quarters. The Protocols already told us of these things a full half a century before the scrolls were found. Whoever wrote the Protocols seemed to have an intimate understanding of what would soon unfold in Europe.

- 9 Empty places of worship.
- 10 Book stores. A book store owner once told me they saw an original copy of *Mein Kampf* on sale for \$0.20. Considering my repeated reference to “Aryan” and my depiction of swastikas the original history book was absolutely worthless as a saleable commodity in western society, in their opinion, that is despite the fact it contained valuable information about ancient witchcraft, which was at that time a very hot seller. The truth is somewhat different. *Mein Kampf* is currently 3,800th on Amazon.
- 11 Book distribution control mechanisms. Very few published titles ever make it onto the shelves of major book stores. I am reliably informed only 30 out of every 270 titles are embraced by chain stores (ie; 11%). The remaining 88% normally belong to small independent publishers. This can send them into bankruptcy. The writings of Zundel and Rudolph were banished to banned websites.
- 12 An inability to get book reviews. Most papers will not review “small press” titles unless they come with a large advertising budget. One argument is, why should they do it for free?
- 13 Most international publishers favour ‘minority literature’ (ie; African American, Feminist, Jewish etc). Mentioning the word Aryan unfortunately does not bring you under the aegis of such a category. Amazingly Llewellyn Publishers (who specialise in occult literature) refused to carry this or other works, declining to say why. Having spoke to them they seemed very chuffed receiving a manuscript.
- 14 The “A” factor. Smith has been called Mr Devil and the Antichrist for writing a history book. Does this mean I am one step lower than Hitler? I’m not sure.
- 15 Last but not least the level of treachery against the crown in his own country.

You will note the distinctive anti-semitic hotspots permeating the *Forbidden History of Europe*. These are, without any shadow of a doubt, an integral part of Europe’s former identity.

Here stands a chariot-borne Eirene, a winged angel cognate with the Roman angel of victory (Victoria). Nowadays her effigy is proudly found atop Berlin’s holy Brandenburg Gate, in an exceptional sculpture known as the Quadriga. Noteworthy is her standard, an ancient Celtic-style cross, the perimeter formed by a victory garland, surmounted by the Prussian eagle, a symbol of teutonic imperial power. Understandably it has a special spiritual significance to Germanic peoples, wheresoever they may be found across this earth’s broad surface. Quadriga has pride of place in Europe’s Indo-European cultural extravaganza.

May this book stand as a glorious testament to the inestimable greatness of Europe’s Indo-European and Aryan cultural origins. The philosophical foundations of Europe were heroically defended to the death by fascist forces in WW2, but ultimately defeated by re-education (western and communist), indifference and cultural amnesia. Their struggle and sacrifices will always be remembered.

In light of the West’s pervasive apathy, Aryanism demands a fitting tribute against a background of cultural holocaust. Something this grand should never be allowed to fade into obscurity without the fanfare it rightly deserves. I only hope this title does it justice.

Is this the end?

Appendix I

CITIES, TOWNS AND WATERWAYS

Key events in the Rise and fall of the Rus' state¹

In the following time-line we learn of the principle events which impacted upon the foundation of the pagan Rus' State.

825 Arabs gave the Khazar military several very bloody noses.

833 The Khazars built the town of Sarkel on the Don River with assistance from the Byzantines (at that time their allies). This fortification was probably founded to reinforce Khazarian control of estuarine Southern Russia, to limit the movements of Rus' shipping into Khazarian region. For this reason the Greek Christians felt it profitable to aid them in such an adventure.

838 A mysterious group of Swedes was found trading in Tsargrad (Constantinople) claiming to be from Rus', an almost unknown place. They were kept under house arrest, then sent to the Carolingian Emperor, Louis the Pious and returned home only after some considerable amount of time. When apprehended they were apparently en-route to Baghdad, via Georgia to trade.

840 Rus' troops attacked and occupied Amastris, inflicting great carnage on the inhabitants

852 Danish troops attacked the Baltic Kors (Kurland) and Novgorod, thus severing this northern Slavic stronghold from any allies to the South. They did not leave Novgorod until tribute was paid and even then they refused to remove troops stationed on the main road heading south.

Rurik raided the North Sea area, experiencing mixed fortunes in England, Germany and Friesland. Rurik then turned his eyes to raiding in the Baltic Sea.

855 Rurik heard of the spectacular successes of the earlier Danish raid against the Slovene and Kurlanders, and contemplated similar military campaigns. But this was only a prelude of greater things to come - Rurik sought bigger prey. Rurik planned to invade Constantinople (the largest city in the East) from the North by using a combined force of Rus', Finnish, Slavic and Varangian troops. To facilitate the building of such an army, Rurik had to resort to skillful diplomacy. His big opportunity came once he was invited into the eastern Slavic lands by the Rus', Finnish and Slavic tribes to settle the long-standing feuds which were tearing the region apart. Larger numbers of Rus' Varangians began pouring into Rus' along the waterways, securing whatever Slav villages lay along their banks. The pacification of these Slavic tribes had to take place quickly, for the Byzantine navy would be preoccupied with the Venetian warships in the Mediterranean for only so long. Wasting no time, Rurik moved straight on to Kiev which was at that time ruled by the Magyar overlord Amos. There they defeated the Magyar troops, annexed most of Malorus and set up the would-be capitol of the Rus' federation of eastern tribes.

Askold and Dir (relatives of Rurik) plus a large number of troops then contacted the Rus' expeditionary war group, which had been permanently sited at Tmutorokan on the Kuban river from an unknown date, in readiness for the impending attack. Here they organised the siege needed to cripple the greatest city in the world. By that time Tmutorokan (the ancient homeland of their Gothic, Bulgar and Alanic forefathers) had acquired the status of a military nerve centre. Overall this appeared to be a revival of the old Roxolani (Ros-Alan) alliance. It is unclear whether Bulgar troops were stationed in Tmutorokan at this point, but certainly Alano-Bulgar interaction was taking place far to the north of Tmutorokan, deep inside Russia.²

860 Dir and Askold launched the grand attack on Tsargrad (the Russian name for Constantinople) with a sizeable flotilla of warships overflowing with troops. Constantinople held its breath, fearing greatly the carnage that the pagans would inflict on their city and outlying districts. According to legend the shroud of the Virgin Mary was walked around the walls of the city by the Patriarch, an act which was said to have unleashed maelstroms on the sea and in the heavens, freak storms which sunk the bulk of the fleet about to assault the walls. The attack, now a terrible shambles, was called off and the survivors retreated back up-river to the lands of the Rus'.

Other remnants of the flotilla, vengeance in mind, set about raiding Byzantine coastal and island monasteries, looting anything of value and putting virtually every clergyman to the sword.³ The havoc which they inflicted on the monasteries calls to mind the deadly level of destruction which the Norsemen inflicted on monastic communes in Ireland, Britain and France.

861-863 Persistent low-level skirmishes between Rus' and Byzantine forces took place.

861 This was the supposed year of the Khazar polemic, during which Christian, Muslim and Jewish holymen were invited to attempt to convert the pagan Khazar ruler to their faith. Judaism is reported to have been adopted as the new state religion in Khazaria. Other evidence places the polemic as early as 740 AD.

862 Many Tmutorokan Russes adopted Christianity in this year after seeing the terrible losses which took place during the ill-fated 860 AD attack. According to Vernadsky, many of the troops who survived this attack perceived that these losses were inflicted upon them by the Christian God.

Land disputes remained unsettled between the warring Slav and Finnish tribes. Armed inter-tribal clashes among them resulted in such heavy losses that their many chieftains were forced to gather around the bargaining table. The chieftains of these major northern tribes assembled at Novgorod, where they signed the earliest Rus' federation pact. It was agreed that all of the constituent Rus' tribes would be united into one nation and ruled over by prince Rurik. All tribes were to support this rulership with a promise of taxes, equipment and tithe troops. The southern tribes agreed to join in this union only after much debate, "pork-barrelling" and strife. Tributes were from this time emptied into the coffers of the Velikiy Knyaz' (Grand Prince), collected using bands of battle-hardened Varangian tax collectors.

864 The Bulgarian Khan Boris converted to Christianity, though many of his subjects remained committed pagans.

866 The Tmutorokan Rus' negotiated a separate trade and friendship treaty with the Byzantines.

868 Further trade and friendship treaties followed, but again, only the Christianised Rus' were involved. The first Rus' bishopric was placed in Tmutorokan itself. The Pechenegs were subdued.

St's Constantine (Cyrill) and Methodius met the Papacy seeking the right of prayer in the Slavic tongues instead of Latin or Greek. The Pope heartily agreed and bestowed this unique honour upon them, an honour not shared by Christians in other parts of the world. After a life of evangelising the Slavs, St Cyrill went to live in Rome until his death.

873 Rurik died and Oleg became the de facto Velikiy Knyaz' of the Rus' by virtue of his fosterage of Rurik's son, Igor'.

875 Moravian emissaries of the German Church convinced Dir and Askold to promote the ideals of Christianity amongst the Rus' tribes; both of them converted. In Russian cities Christianity gained slow but steady acceptance.

878 Oleg heard that some survivors of the ill-fated 860 attack on Tsargrad had converted and were making plans to construct parish churches in the heart of Kiev itself. He mustered a force of northerners (Varangians, Chud, Slovene, Ves, Krivichi and Meryans) and marched on Smolensk and Lyubech. These cities were seized and occupied. Next he turned his eyes on Kiev, planning to tackle the city's defenders under Askold and Dir. The city garrison collapsed and the heartlands of the southern Slav tribes became occupied by the northerners; Christian ringleaders were executed or banished from the city's perimeters and Christianity's chance to become the religion of Kiev fell to pieces until the conversion of St Vladimir I. All Christian adherents were persecuted at around this time and had to carry out their worship in secret.

879 Oleg became greedy for war booty. He murdered Askold and Dir and usurped command of Kievan Rus', together with all of its levied footmen, victuals, horses and other currencies of war.

886 Buoyed by fresh victories, Oleg sought to drive the Magyars from the south-western grazing lands of the Rus' and expel them across the Bug. Oleg also made war against the Magyars tithe tribes, the Tivertsy and the Ulichians, and defeated them only after having sustained some very heavy casualties. Both of these tribes were forcibly annexed by Oleg and became part of the Rus' tribal federation. Though barred from the pastures of southern Rus', Magyar horsemen were easily able to keep the Rus' infantry at bay, and thus maintained their sovereignty of lands lining the Bug and Dnieper rivers.

887 Oleg ordered his victorious combatants to fan out East and West of Kiev, to conquer each and every tribe that they came across. The eastern Slavic, Polyanians, Radimichians and Severians submitted to him and became reluctant components of his rapidly expanding grand principedom.

Loose bands of Pechenegs began turning up in the grazing lands of southern Rus'. At this point in time the

Pechenegs were largely non-hostile, even friendly towards the Rus' and took advantage of the political disarray occurring across the south to slip into these tribal lands unannounced. These were only the probing frontal spearhead of the Pecheneg hordes then residing further to the East, near the Don.

At roughly this time Vladimir-Rasate reinstated paganism as the religion of Bulgaria and made contact with the Magus princes of the Franks.

The Magyars were forced further westward into the best part of Moravia, under the weight of the Bulgarian settlers and newly arrived Pechenegs (from Central Asia). Hostilities there remained fierce as the realisation of a permanent Magyar presence dawned upon Bulgar and German alike. Fighting erupted between the Bulgarians and Magyars. The Bulgarian Tsar used the services of hired Pecheneg cavalry to put pressure on the Magyars, making them flee onto the Great Steppe. Consequently, Magyar settlements were rapidly dislodged.

904 Arab forces entered Albania and the Byzantine Balkan provinces. There they besieged and took Salonika. Sensing that the Byzantine army has its hands full trying to expel the Arabs, the Bulgars took the opportunity to march in and seize southern Macedonia.

907 "The Sage" (Oleg) moved his forces downriver by ship and got the troops to pull all 2,000 vessels from the water once they had reached the prescribed staging place. Mass slaughter of rural townfolk ensued there, without the faintest mercy. In a move designed to negate the effects of Constantinople's harbour chains (which blockaded the entry of naval vessels to the city), Oleg ordered that wheels be placed on these vessels, thus converting them into land-ships. In unison with Rus' cavalry, these amazing vehicles then sped in for the attack on Tsargrad, under full sail power. Within moments of the first sighting of the land-ships, the Byzantine commanders realised that thousands of Rus' barbarian infantry were bearing down on the city at high speed. Shocked beyond belief, Constantinople's garrisons surrendered, and the Emperor agreed to pay Oleg tribute in order to stave off further attacks by the Rus'. A full trade agreement was forged between the Byzantines and the Rus', thus allowing Rus' merchants the right of passage and trade within Tsargrad.

911 Further trade agreements were struck between Byzantium and the pagans from the north. Varangians and Rus' fighting men were now invited to serve as the emperor's personal bodyguards.

912 Oleg died of snakebite, as prophesied (or conspired!) by his magicians.

With his death the Drevlyanians rebelled against the rule of the Velikiy Knyaz'. All tax collectors, Varangian guardsmen and those of the Rus' political apparatus were banished from the Drevlyanian tribal lands. Igor' became Velikiy Knyaz' and ushered in his reign by having the Drevlyanian insurrection violently quelled.

Pecheneg hordes took advantage of the political disarray and moved into the Rus' lands en-masse. However thanks to Igor's military stratagem, the invasion by the Pechenegs was stunted for the time being.

Sensing the high state of battle-readiness among his exceptionally well equipped infantry, Igor' began to make plans for the further expansion of Rus' territorial assets. Accordingly he undertook military actions in Anatolia, Georgia and Armenia, all of which did not succeed.

After arranging safe passage for his expedition with the Khazar Khagan, Igor' sent a flotilla of Rus' troops along the Volga so that he could begin troop landings along the Caspian coast, not far from Baku. He planned to give battle to the Azeris along the coast, and then march inland across the mountains to invade neighbouring Armenia and the Georgian territories. Although the venture proved to be highly profitable, in terms of war booty, they were unable to sustain any of their hard won gains. On its way home to Rus' the invasion fleet was ambushed on the Volga by treacherous Khazar forces lying in wait. Igor' enlisted the aid of Pecheneg mercenaries and Norsemen to renew the conflict with Tsargrad.

920 Upon hearing reports that the Pecheneg hordes were beginning to swell in even greater numbers, Igor' decided to wage war on them, hoping to teach them a few manners, and some good hard lessons.

930 Zoroastrian uprisings occurred throughout the Middle-East to honour what they believed was the 1,500th anniversary of Zarathustra's death. Mecca was ransacked and the rock of the Ka'aba stolen. By the time the 80-day Bahrain coup had ended, Zoroastrians had been absolutely decimated, causing the survivors to convert to Islam, or flee elsewhere.⁴

941 After heavy losses of trained men and equipment, Igor' regrouped as many forces as he possibly could. Using sound military reasoning, he hired a considerable number of Pecheneg horsemen to augment his

reconstructed army, thus giving him something that the Rus' had always sadly lacked, a sizeable mobile and very deadly attack force.

Igor' next mounted a two-pronged attack on Byzantium; against Anatolia and then Constantinople itself. The Rus' exacted a frightening toll on the farmlands of Byzantium, sacking them many times over. This range of plundering operations saw them once again face Byzantine troops on the field of battle. Byzantine provincial garrisons succeeded in halting the Rus' advance into Anatolia (Turkey) long enough for reinforcements to arrive from Constantinople and neighbouring provinces. The Byzantines disembarked marines and other troops in the area and succeeded in ejecting the Rus' from Anatolia. To counter the magnitude of the attack on the city's seaward side by the ship-borne Rus', the Byzantines launched greek-fire, causing the Rus' fleet to quickly rout, weighed down by heavy losses. Igor' reorganised his demoralised troops almost immediately and after having petitioned the booty hungry Varangians for some extra military muscle, they marched off to assail Constantinople *once again*. The Byzantine military caught wind of the Rus'/Varangian/Pecheneg invasion and saw the wisdom of a diplomatic solution. Realising how close they had come to losing their city last time, the Byzantines sued for peace and offered the invaders expensive presents, plus very favourable trading rights for the Rus'.

Having received their portion of the Byzantine peace tithe, the Varangians shifted to Tmutorokan to organise other military campaigns in the Azeri territories. Whilst the rest of the Rus' soldiery returned home to their tribal lands, the Tmutorokan Russes and their Asii (Alanic) allies were most obliging to the Varangians and sallied forth to enact the invasion plans of the ambitious Tmutorokan prince, Oleg. They took Berdaa easily and were preparing to use it as a base for all of their military operations in the Caucasus when Muslim Boud Persian forces came to the aid of the Azeris. They surrounded the campaigners and inflicted a punishing toll on the invaders from the West.

944 Igor' signed a peace treaty with the Byzantines.

945 Igor' was murdered by the Drevlyanian. Ol'ga, his wife, ruled Rus' until his son Svyatoslav reached manhood. Ol'ga took vengeance upon the Drevlyanians with horrific reprisals, and brought them under her total command. Uniform taxation laws were designed by her in this year.

955 Ol'ga became a Christian. The Varangians made trouble concerning the sudden interest in Christianity and under pressure from some exiled Norse priests⁵ and Volkhvy started a mass civil campaign aimed at denouncing Christianity. The pagan resurgence continued in earnest, thus giving rise to the temple building programmes.

962 Khazars marched on the Crimea to fight the Crimean Goths and their allies the Rus' who were located there. The Khazars still forced the Severians, Vyatichians and Polyanians to pay tribute to the Khazar Khagan. Khazar and Magyar troops remained stationed in these tribal zones to maintain effective control over these peoples. Upon reaching manhood, Svyatoslav assumed control of Rus', but unlike his Ol'ga, paganism burned proudly in his veins.

The German Bishop, Adalbert and his entourage came on a mission to Kiev, on behalf of Otto I, attempting to bring Ol'ga into the cultural orbit of the Holy Roman Empire. It is believed that the Rus' prince Yaropolk, was baptised via the Roman rites as a result of this mission. Adalbert's party was attacked by persons unknown, who killed his retainers; Adalbert barely escaped back to Germany with his own life.

965 Svyatoslav found out the Khazars were extorting monies from his own Slav subjects and went to war against them. Svyatoslav placed the Russeson war footing and began his series of military victories *unprecedented in all of Russian history*.

Knowing that the Jewish Khazar Khagan had pulled his best troops away from Khazaria's northern frontier to fight the Rus', the Islamicised Volga Bulgars took the opportunity to free themselves of the Khazar yoke. Volga Bulgar horsemen began ejecting Jewish occupation troops from the whole area, and acquired as much Finnish territory as they could lay their hands on.

967 Svyatoslav invaded Bulgaria, seizing land and imposing tribute upon the locals. He shifted his court to Pereslavl, the place he loved, and from there reigned over his rapidly growing empire. Perhaps he believed that from Pereslavl he could blockade much of the trade flowing around the Black Sea, setting himself up as some kind of commodity broker, and the de-facto ruler of northern Bulgaria. The Bulgar Khagan contacted the Pechenegs and coerced them into withdrawing back onto the steppes to attack Kiev, inciting them to lure away the very Rus' forces

which were then occupying the Bulgarian heartlands.

968 Pecheneg horsemen assailed the walls of Kiev. The Slav Severian tribe dispatched their best territorial troops to help man the battlements of the Kievan city state. The city's garrisons, once bolstered by the arrival of the Severians were then able to prevent the Pechenegs from taking and occupying any portion of the city proper. The Pecheneg horsemen were then bloodily repulsed out into the farmlands of the nearby provincial villages.

A comet appeared in the sky over Rus'; deformed births multiplied, thus portending coming tragedies.

The four Bulgarian Cometopuli brothers (the sons of a Count and his prophetess wife, and so-called because they rose to prominence during the arrival of this comet) launched campaigns against Byzantine assets in the vicinity of Macedonia.⁶ They seized much of the Balkans and Greece, Macedonia and Albania, plus all of Thessaly, the meeting place of sorcerers. With the strategically important Larissa citadel captured, and in the hands of the Bogomil-sympathetic Cometopulis, pagans probably had free access to Mt Olympus, the sacred mountain of their ancient fathers.

St Ol'ga dispatched riders to convince Svyatoslav to return to Kiev and expel the now brazenly bold steppe-tribe back out to from whence they came. Svyatoslav rode back to his mother's aid at great pace and with many Bogatyr's. The Pechenegs felt the pressure of this offensive and buckled immediately, rapidly exiting the best farmlands of the Russes.

St Ol'ga passed away and was buried, leaving Svyatoslav to sort out the power-brokering between his three sons. To his eldest, Yaropolk, he gave the rulership of Kiev, to Oleg he gave the lands of the Drevlyanian (the Varangian tithe land), and to his youngest son, Vladimir, he entrusted Novgorod itself. The Novgorod tithe to the Varangians was raised ten-fold and due to the silver shortage which this provoked, coins became debased.

After extensive consultation with his best diplomatic and military advisors, Svyatoslav sought to bring about a serious collapse in the Khazarian empire. Rus' forces left southern Rus' and moved far to the North-East, into the fringes of the Volga Bulgar territory and then thrust rapidly southwards, easily penetrating the puny frontier defenses of the Khazars in this part of their empire. Svyatoslav's generals looted the lands of the (now Muslim) Volga Bulgars, and seized its capital (Bulgar). Rus' troops then marched on Itil and Sarkel which were major Khazar cities. The Rus' established occupation forces to control these parts of Khazaria and extracted tithes from the Jews that would give added prestige to Svyatoslav's newly won military achievements. The back of the Khazar empire had been broken militarily, although the Rus' permitted them to survive as a political entity.

971 The Greeks and nominally-Christian Bulgarian rulers made a non-aggression pact and turned on Svyatoslav forcing him to yield the captured territory. This transpired at the battle of Silistria, where most of his Magyar and Pecheneg auxiliaries deserted in the face of battle, on account of Greek treachery. Svyatoslav's routing footmen retired to his fortress, all the while being ridden down relentlessly by Byzantine cavalry under John Zimescs. Therein the Rus' underwent a gruelling 65-day siege after which time a treaty was signed that allowed a staged release of the garrison's defenders. Svyatoslav and his retinue were decimated by Pechenegs whilst escaping back to Kiev along the Volga river after this campaign. The Vyatichians and Radimichians proclaimed their independence from the Rus' federation and ensured their tribal integrity by beefing up the size of their tribal armies.

975 Paulician heretics were ejected from Anatolia and re-settled in Philippopolis by the victorious army of John Zimescs.

977 The Varangian Voevoda (war leader) Sveneld caused an incident which turned Yaropolk against his brother Oleg. Oleg's forces faltered on the battlefield and took to flight, finally holing up in the fortress at Ovruchi. There, in the thick of combat, Oleg died in the moat. After hearing of his brother's untimely demise, and sensing Yaropolk's attempt to seize all of Rus' for himself, *Vladimir fled overseas to muster support amongst his Norse friends.* Yaropolk proclaimed himself Velikiy Knyaz' of all Rus'. Vladimir returned home to Novgorod with a sizeable number of "Vikings" and set off to give battle to Yaropolk. Yaropolk was assassinated, thus forcing his army to capitulate over to Vladimir.

978 Vladimir became the ruler of all Rus' and adopted the title Khagan instead of Velikiy Knyaz'.

981 Vladimir invaded the Polish border area, and annexed considerable land, including Cherven and Peremyshl.

983 Vladimir subjugated the Prussian Yatvagi (Sudovian) tribe in a bitter fight to the end. Perhaps around a thousand prisoners were taken to Kiev and offered as war sacrifices to Perun. Vladimir then turned his army against the seditious Vyatichians and Radimichians who were still able to field a respectable force against him. Their stand proved to be in vain. Vladimir had forced them back into the Rus' federation.

985 Vladimir went to war against the (now Muslim) Volga Bulgars using his lightning fast Bogatyr' cavalry and paid Uz and Tork horsemen. He then signed a non-aggression treaty with them, thus creating a feeling of mutual trust and understanding.

986 Byzantine generals organised insurrection against Basil II, the Emperor of Byzantium, and proclaimed the Anatolian provinces as their own. Meanwhile, Basil was busy giving battle to the Bulgarian invaders and so requested Vladimir's military assistance. Vladimir agreed to help but made any such assistance conditional. Rus' troops allowed the Byzantines to maintain order once again. To reinforce his previous demands, Vladimir invaded Cherson in the Crimea and sat there until Basil acceded to his demands.

987 Vladimir, in consultation with his great council of boyars, decided to abandon paganism in favour of a new faith. To this end delegations were sent from the Jews (from Khazaria), the Western Christians (from Germany), the Muslims (from Volga Bulgaria), and the Eastern Christians (from Constantinople) to convince the pagan Russians to adopt their respective creeds. It is also noteworthy that the Khazars sought to abandon paganism in precisely the same way. Their conversion to Judaism resulted from the justly famous Khazar polemic, which is thought to have occurred in the year 861 AD (or 740 AD). After hearing the various sermons presented by each of the representatives of these religions, Vladimir recommended sending Russians on a fact finding mission to each of their main religious centres to gain a clearer picture of the societies which stemmed from adherence to these faiths. The events of these conversion missions were fully described in the *Primary Chronicle*.

988 Vladimir forged a peaceful alliance with the Byzantine Emperor and married his sister. Vladimir now adopted Christianity and decided to introduce it as the national religion of his subject peoples. Rus' then minted its first gold coin under the Khagan Vladimir I, not unlike the Byzantine golden bezant, but with his image on it.

Vladimir returned to Kiev with many clergymen and issued an edict commanding all (city) Rus' to muster on the river banks in the biggest towns so that they could be baptised as Christians. The Volkhy were banished and all temples and outdoor sanctuaries were destroyed. A massive Christianisation scheme was initiated by Vladimir, who proposed the construction of churches in as many places as possible, as well as works of charity to help the poorer peasants. He commanded that all wealthy Rus' be educated by the Church and that with few exceptions all of them were to seek to learn to write in the cyrillic script which was to be adopted as the official alphabet of the Rus'. The scripts known to the Volkhy fell into disuse from this time on.

990 Now on friendly terms with most of the nations which surrounded Rus', Vladimir turned his forces against the menacing and numerically superior Pechenegs that possessed the southern reaches of the Rus' grasslands. Skirmishes between Rus' and Pechenegs took place on an ever increasing basis.

992 Wishing to display their military might, the Pechenegs attacked southern Rus'. After months of bitter fighting, they were successfully outflanked and buffeted from the area.

995 Vladimir turned back a horrifyingly intense invasion of the lower Rus' lands by the Pechenegs. The days of the sword returned in full.

997 A council of Pecheneg Beks (chieftains) urged more arrogant and vicious attacks on the Rus'. Invasion forces were rumoured to be in excess of 100,000 horsemen. The fighting continued for some years with hardly a lull in the fighting. Both sides kept feeding more and more combatants into the battle as time progressed.

1000 The year 1000 AD saw the formation of Christian bishoprics at Belgorod (near Kiev), Turov, Novgorod, Chernigov, Vladimir, Rostov, and Polotsk took place in 1,000 AD.

1014 Bulgarians under Tsar Samuel were soundly defeated by the superior tactics and forces of the Byzantine army under Emperor Basil II, at the battle of Belastitsa in Macedonia. Basil blinded almost all of the 15,000 prisoners, leaving only one man in every hundred with a single eye, to lead them back to Bulgaria. Samuel died of a broken heart.

1015 Boris the Christian Khan of the Bulgars, continued the good fight against the western hordes of the Zoroastrian and Manichaean Pechenegs. The "evil menace" from Central Asia had not yet been held in check, and

only seemed to grow in size as time went by.

The death of St Vladimir I occurred in 1015 AD. His body was said to have been snuck out past his guards for a hasty burial, presumably to facilitate the politics needed to select a successor. Svyatopolk promptly usurped regal power in Kiev and had his brothers the princes Boris and Gleb assassinated (who together with St Ol'ga, St's Boris and Gleb would become the pre-eminent Orthodox Saints of Kievan Rus'). Meanwhile their brother ("the accursed") Svyatopolk acquired a reputation as the new Cain.

1015-1019 The Novgorod (Yaroslav)-Kiev (Svyatopolk) war was the major event of this five year period. The whole of Rus' society became polarised, with all of the northern tribes falling in behind Yaroslav, and the remainder behind Svyatopolk. The stage was set for a bloody civil war, one that in the fullness of time would partition Rus' with immense hatred.

1016 Rus'-Byzantine forces carried out major offensives, seeking to liquidate the Khazar empire once and for all.

1017 Rumours began circulating that Vladimir I had not really died, but had reverted back to paganism under his old title "Vladimir, the Ardent Sun". This sparked the year of the great church burnings. A good many Christians and pagans died in tit-for-tat reprisals and the pagan rumour was that he saw out the last years of his life as a novice in a special pagan occult monastery in the Balkans which he founded in order to gather together the itinerant and banished Volkhvy, shamans, heretics and sorcerers of the pre-Christian era. Known as the "Imperishable Monastery", it is thought to have been situated in the mountains of Albania.

1018 Boleslav, the Catholic King of Poland united with Svyatopolk's forces and readied for battle against Yaroslav's troops, just near the Bug river. The banks of the river were lost to the Poles, thus forcing Yaroslav into retreat. In the wake of these losses, Yaroslav sailed to Scandinavia, and returned with a small Norse army.

1018 Yaroslav arrived back in Novgorod and amassed a large number of soldiers, a mix of Varangians and Novgoroders, compelling Boleslav to retire back into Poland. With the Poles out of the way, Yaroslav set off to assail the now vulnerable Svyatopolk and assumed power, following his brother's humiliating rout. Svyatopolk fled, seeking the protection of Pecheneg clan Beks. Thereafter Mstislav waged a lengthy and very costly war against Yaroslav.

Eymund's Saga provides the Norse perspective for their participation in the 1018 AD civil war between Yaroslav and Svyatopolk. The Varangians in question were a mercenary outfit plain and simple, that was their sole interest in coming there.⁷ They hoped to generate enough conflict in Rus' to ensure that one of the wealthier princes would enlist their services in return for good pay, food and lodgings.⁷ To this end Eymund ceaselessly prodded Yarisleif into military actions against his brothers.⁷ The names of the Russian kings (princes) involved were incorrectly recorded in the saga as Yarisleif, Borisleif and Vartilaf, thus indicating that the Saga's author was not paying too much interest in major details.⁷ It should have read Yaroslav, Svyatopolk, and Mstislav, with the added warmongering of Boleslav the Polish king.

1026 The division of Rus'; West of the Dnieper went to Yaroslav (ruled from Novgorod), and East of the Dnieper went to Mstislav (ruled from Chernigov)

1030 The fall of Khazaria was completed. Poles revolted against the Christian authorities following Boleslav's death. Clergy, and any nobles connected with them were slain on a very large scale, and many of the churches destroyed.

1031 Taking advantage of the disarray prompted by the Polish anti-Christian rebellion, Rus' troops moved into Poland and repatriated many Poles to Rus', supposedly as captives. Polish territories which had formerly been under Rus' control were re-taken in the Wendish-Rus' border region, and settled by these expatriate Poles.

1036 Mstislav died leaving no heir apparent. Yaroslav (the Wise) shifted his power base to Kiev, united Rus' into one nation again and then ruled it as Velikiy Knyaz'. Yaroslav signed the *Russkaya Pravda*, whereby all legal power was standardised and centralised - legal jurisdiction was to rest on princely thrones. This signified the beginning of the end for all chiefdoms in Rus'

1043 Another Russo-Byzantine war took place. As in previous engagements the Rus' fleet was decimated by the Byzantine navy, punished by the Greek-fire which rained down upon their vessels from above.

1051 Hilarion was called upon to be the Metropolitan of the Russian Church, and the power of the Church

was placed in Kiev.

1054 Yaroslav the Wise died.

The year 1054 AD saw the great split between the Orthodox churches and the See of Rome, primarily over the Filioque, but also concerning inherited religious customs practiced in both the East and West. Thus began Christendom's 900 year period of deep shame; appalling rhetoric and behaviour was witnessed on all sides.

But, while their respective Church hierarchies remained in mutually states of anathema, there was no shortage of western suitors seeking marriage to the Russian princesses, including Otto III, Emperor of the Holy Roman Empire. In the same year as the Roman-Byzantine schism Novgorod refused to pay the Varangians their tithe and Svyatoslav raised the price of salt, causing violent uprisings. The Varangians left sworn service to the Rus', and departed the country.

1058 Prince Izyaslav finally vanquished the Prussians that resided in the area that would one day become Moscow.

1067 The "great fire of Novgorod" savaged the Northern city state. Meanwhile in the Caucasus, Armenia fell to the bellicose Muslim Seljuk Turks.

1071 The Byzantine campaign to dislodge the Turks from Armenia failed miserably. At Manzikert, the bulk and pride of the Byzantine army was utterly decimated by a small but well concealed Seljuk force. The glory and prestige of Byzantium never recovered.

1076 Under their Sultan, Malik Shah, the "Muslim fundamentalist" Seljuks captured Jerusalem, Asia Minor and Syria. Within the Holy City there were reprisals against the local infidel population, but even so, many eastern Christians found the promise of fair treatment under these Turks if they were cooperative. Western pilgrims suffered great indignities, and the Holy Sepulchre was sacked by the Mohammedans.

1095 Unable to sit back endure the Seljuk outrages against pilgrims any longer, the First Crusade was officially announced by Pope Urban, at the Council of Clermont. Christian kings mobilised numerous bands of willing volunteers, equipment, provisions and livestock and set off toward the Middle East.

1096 The not-so-welcome army of Crusaders marched through Byzantium, causing not a little strife.

1097 The council of Russian princes took place at Lyubech where the problem of persistent Kipchaq insurgency forced them to reluctantly form a loose bond of friendship amongst their feuding principalities. The attempt could hardly be seen as a great success, for sporadic skirmishes took place between rival Russian forces at the slightest provocation.

Catholic Christian soldiers made their way into Asia-Minor expelling the Turks where encountered. The Seljuks re-grouped their forces at Antioch, but were besieged there by a vastly superior force of Crusaders. There Bohemund I prepared a long siege. While the Crusades served to unify Christendom, it had one very unhappy consequence for its leaders. Previously warring Muslim factions all came together, united under the banner of Jihad (Holy War), ready to repulse the Christian invaders that had come.

1098 With the Seljuks at war with the Crusaders, the Fatimid Arab forces took Jerusalem from beneath the noses of the Turks. Meanwhile Antioch surrendered to the Crusaders. With the Seljuks neutralised, the Crusaders then had to make war on the Fatimids which held the Holy City.

1099 Jerusalem fell to the bedraggled forces of Christendom.

1113 Serious civil disobedience flared up in Kiev. Thereafter, Rus' disintegrated back into the petty principalities of old and reunited briefly for one last time during the reign of Vladimir Monomachus. His death ushered in the ultimate demise of Kievan Rus'.

Soon, the Mongol hordes began appearing in the eastern precincts of Rus' and a cloak of darkness descended upon the Russian people, one that in the course of the next 200 years would cost them dearly.

1237 In the year 1237 AD a vast host of Mongol horsemen and siege engines under Batu Khan, rode into the pathetically disorganised and squabbling principalities of what was once called Rus'. Between then and the year 1240 AD, the Mongol Tartars tirelessly subdued city after city and extracted a great toll in terms of lives and wealth.

Kiev, great in all of Rus', was decimated by the Mongol holocaust. Its magnificent Churches, library and once-busy workshops utterly destroyed. Once the Mongols had finished with it only a few hundred dwellings remained, and the streets lay choked with bones and piles of pestilential corpses.

Meanwhile, amid all this carnage, the Swedes took the opportunity to attack Novgorod, the Baltic and Finnish areas, while the German Teutonic knights went into action throughout the Baltic. In one way or another Muscovy and the Russian Principalities remained under constant oppression until Velikiy Knyaz' Dmitriy's victory over the Mongols at the fateful 1380 AD battle of Kulikovo Pole. The offensives launched by Tsar Ivan III Groznyi (Ivan the Terrible) finally ousted every menace from Russian soil, and heralded the rise of the Moscovite State and the ascendancy of Russian Orthodoxy as the "Third Rome" following Tsargrad's fall.

Appendix II

Pagan names

Church sources tell us that pagan first names were no longer acceptable in Christian Russia. They were recorded as uncanonical and therefore unfit to use as a name for any true Christian. What was it about these names that made them so detestable to the Christian authorities? They seem nice enough.

Firstly it is possible to perceive that the pagan Slavs were known by titles that reflected the role they played in society, or their personal qualities.

Secondly there is an inherent dualism in them, one side inclining towards supreme goodness (good thoughts, good words and good deeds), and the other side which focused on killing, fury and wrongdoing. The good however predominate. The existence of these white and black names is extremely important, firstly because it shows the early Russian Church fully understood the differences between the white and black Magi; this is no great surprise, books like *Malleus Maleficarum* tell us as much from a Catholic perspective. Many accounts of the witches in the later Middle Ages show the Church regarded the white and black Magi in a totally different light. However, while they did not seek to diabolise the white side of pagan religion, the Church did not want to endorse the views of the white Magi either. In the end whites suffered with the blacks.

The prohibition of names which referred to a person's earthly duties like soil tiller, helmsman, husbandman and words like Bratan and Bratko seem very strange ... *what possible religious threat could these names pose to the Church?* Such words cannot in themselves be regarded as evil, and in many cases these names carry concepts which could easily apply to any pious Christian. The most likely answer is that the early Christian clergy in Rus' was attempting to de-programme the class-based and brotherhood-based society which they had come to shepherd. They tried to eradicate such names because they embodied the class notions espoused by the Magi. What this points to is that the Church might have been trying to create a society in which class was of no great concern. If this is true then *their social motives and agendas were the exact opposite of what theorists on the Mediaeval social structure have been telling us for so long.* As incredulous as it may seem, the Church was not trying to forge an elaborate system of feudal plot farms from which they could exploit all and sundry, and stuff their pockets full of money at the expense of the impoverished farm labourers who sweated in the fields. Under the patronage of the Russian Christian priests all workers now came under one banner *krest'yanin* (which is the Russian word for peasant). Thus the average citizen was no longer a plot-farmer, but a *krest'yanin*, or Christian. Their names no longer reflected the type of work they did, or some pagan office, but were replaced by names of christian significance

Lastly, the Russian pagan names frequently have a parallel Iranian name, something you would expect to see in a Magian context. The Iranian names provided here have been, or continue to be, used by the Parsees, and were sourced from DOSABHAI, *History of the Parsis I*, London 1884.

For reasons described in Chapter IX (p. 458), I have translated Mir as "fire", though it embodies several other concepts also.

Bereza

"Birch". It may however have come from the Magian name Berezavant ("exalted").

Bik

“Bull”

Bozh

“God” or “a god”). It is to be compared with the Iranian name Khudavandeh (“God” or “Lord”)

Bogdan

“A gift from god”. Perhaps derived from the Persian Baghodat (“Created by God”), or Khudabakh (“Gift from God”).

Bozhok and Bozhko

“Little god” or “Dearly loved god”

Bogumir or Bozhimir

“The fire of god”. Perhaps a slavisation of Adarhormazd (“Fire of God”).

Bogorod

“Born of God”?, or “The son of a god”?, or “Of the family of God?”

Bogolip

“Lime tree of God”

Bogoslav

“Glory of God”. Perhaps a slavisation of Farnbag (“God’s Glory”), which also happens to be the name of Sassania’s great Farnbag fire temple, which was maintained by the Zoroastrian nobility and priesthood.

Budimir

Perhaps from *buda* + *mir*;

“a cabin fire”

Budivid

Budivid probably came from *buda* + *vid*. The Old Russian and Old Slavonic *vid* meant “appearance”, “face”, “form”. It originated from the Old Indian *Vedas* (“knowledge”) or the Avestan *Vaedah* (“a possession”).²

Its Russian meaning may have been “something having the appearance of a cabin”. But in pagan times it might also have meant “a cabin owner”, or even a hut wherein people learned things, perhaps even the vedas themselves.

Buyan

“A rowdy fighter or warrior”, perhaps even beserker. The Russian name originated in the Bulgarian. But if for instance it came from the Turkic or Mongol *bajan*, then it would have meant “wealthy”.³ A possible Magian equivalent would be Jangi (“Warlike” or “Brave”), or Pahlawan and Pahalvan (“a hero”, or “a warrior”).

Vishezor

“One who sees higher”. Perhaps a Slavic variant of the Magian

name Kurush (“Far-sighted”).

Viter

“Wind”.

Vognedar

“One who gives presents to Agni (ie; the holy fires)”.

Gradimir

From *grad* + *mir* ;

“City fire”.

Granislav

“Glorious verses”. As you may recall from Chapter V, *Grani* can be equated with Aryan religious verses known to the Magians and observers of the *Vedas*.

Gulyaiveter

“Walking wind”.

Dalemir

(“Distant fire”) Dalemir resembles *Darimihir*, a popular Iranian colloquialism for a fire temple “*Dar -i-mihir* (“Gate of Mithra”)”.⁴

Derzhikrai

“One who holds to paradise” or less likely “hold the frontier or border”.

Dorogomisl

“One who thinks of dear things”.

Dobromisl

Dobromisl meant “Good Thought”, or “one who thinks well of things”. It should be stressed that “Good Thought” was an important archangel of the white Magi. Dobromisl might have come from the Magian name Bahman, meaning “good mind”.

Dogodko

“One who takes guesses”.

Dolya

“Fate” “fortune” or “a lot”. Perhaps *dolya* meant a lot-caster or astrologer. The individual might also have been named after the goddess *dolya*). It can be compared with the Zoroastrian name Bakhtafid “blessed by good fortune”.

Dovgan’

“Up to the fire”, perhaps meaning one who walks up to the fire, perhaps bringing gifts.

Zemovit

“Land weaver”?

Zlotodan

“Gift of gold”. Perhaps related to the Iranian Zar (“Gold”) and

Zaran (“Golden”).

Zoremir

If Zoremir was derived from *zorit’* + *mir*, then it meant a “fire-destroyer”, “fire-devastator”, or “destroyer of the peace”.

Zemomisl

From *zemlya* + *misl’*, thus meaning “Thought of the land”

Zhdan

“One who waits [in expectation?]”

Zhivko

“Lively one”.

Lyubomir

“Fire of love”, or “One who loves the fire”

Mezhamir

“A forest-fire”

Miroljub

“Lover of peace” or “Lover of the Fire”

Miroslav

“Fire of Glory”. Perhaps a Slavicisation of the Magian name Adarkhordad (“Fire of Glory”).

Molibog

Molibog perhaps comes from *molit’* + *bog*. Since *molit’* means “to pray” or “to entreat”, then Molibog meant “One who entreats god”, “One who prays to god” or “One who cries out to god for mercy”.

Odinets’

The one?, or a priest of Odin, or a follower of Odin.

Orimir

If it came from the word *or’* (“a horse”) then *orimir* meant “a horse fire” or much less likely “Or’s fire” (ie; the fire of the god Or). To this end Orimir can be favourably compared with Adargushnasp, the name of the Magian warhorse fire, which was maintained by the military.

Ostromir

If *ostromir* came from *ostrov* + *mir* then it might have meant “an island fire”.

If it came from *ostrog* + *mir* then it was a fire that burned in a roofed wattle and daub hut, a fire-house perhaps.

Alternatively Ostromir may have been an agglutination of *ostriy* + *mir*, and if so it might have meant “a keen or strong fire”. If *ostriy* originated in the Greek, then its original meaning was “a mountain-top fire”, or “a fire lit on the heights”.

Prodan

“one who was sold”, ie; a slave.

Radevoi

“a soldier” or from Ryadovich “a peasant plot farmer”.

Rad or Radko

If the name *rad* came from the pan-Slavic word *rad* (“glad”), it probably meant “One who is glad”.

Considering the amount of Magian data in Olden Russia *Rad* and *Radko* might have been related to the Iranian word *Rad*, which means “a Magian fire pontiff”. Perhaps *Rad* or *Radko* applied to a Magus-Pontiff, or in other words a Magupat.

On the other hand they may have been related to the Magian name Khorram (“happy”).

Radimir

If Radimir came from the Russian *rad* it probably meant “Fire of gladness”.

If it was derived from the Iranian *rad* it may have meant “a pontiff’s fire” or “a high priest’s fire”.

Radi is also found in the Bulgarian and Serbo-croat. Considering that *radi* was cognate with the Old Persian *radiy* or the New Persian *rai* (both of which meant “for the sake of”);⁷ it might even have meant “for the sake of the fire”, or “for the sake of peace” .

Considering that Rai was the name of Zoroaster’s birthplace, and also the Russian word for “paradise”, a Radimir might also have meant “fire of paradise” or “Rai Fire” (a holy fire that could trace its ancestry to a vahram fire that once burned in Rai, Persia).

Ratomir

“a Warrior-fire”.

Radusha

“Happy spirit”. Evidently derived from the Magian name Rushad (“One whose soul is joyous”).

Radogost

“Happy guest” or named after the Wendish pagan god Radigast or Radigost).

Rostichar

The Russian pagan name Rostichar could be derived from a number of words;

Rost (version I, which is related to {a} “growth”, or {b} “height”), and *Rost* (version II, which is related to the German *Rost* meant “an iron stand upon which a kettle is placed”, or “a grille or lattice which protects a fire”).⁸ To this word was appended *char* (“a spell”, “sorcery”), *chara* (“a cauldron”), or *charka* (“a cup” or “a goblet”).

Thus we gain the following possible interpretations;

Built on Rost I {a}: “Cup of growth”, “Growth-spell”,
“Chalice of growth”, “Cauldron of growth” and “Growth-
sorcery”

Built on Rost I {b}: “High-cup”, “High-chalice”, “High-
cauldron” and “High-sorcery”

Built on Rost II: “Cauldron on the cauldron-stand”?

Considering these aforementioned possibilities it might also have meant “a high-wizard” or Arch-Magus, which may have been the Slav term for a Magupat.

I most favour “chalice, cauldron or cup of Growth” or “growth-spell”. This accords with descriptions of the fertility ceremony performed by a Polish pagan High Priest on Rugen. During the rite he performed a ceremony with mead and a sacred cake which were used to implore the gods to bestow an abundant harvest during the following agricultural season. All of the potential interpretations listed against Rostichar need not necessarily have been separate in nature.

Rudik

“blood-red”, or “red”. Perhaps drawn from the Magian female name Argavan (“red”).

Ruslan

Ruslan was a heroic Russian name derived from the Turkic *Arslan* (“lion”).⁹ It is to be particularly associated with Alp Arslan, the name of a legendary Turkic Khan. Without question it is related to the Magian names Arshan (“Hero”) and Arshama (“Having the might of a hero”).

Svara

If from the Russian *Svara* it meant “hostility” or “enmity”, “a quarrel”, or “a wrangle”.¹⁰ Under these circumstances *Svara* meant “quarrelsome one”, or “hostile one”

If it was derived from Old Icelandic and Old Saxon words meaning “an answer” or “to answer”, *Svara* might have meant “one who answers”, or in other words a “soothsayer” or “seer”.

Svarg

“Svarog” or “sky”.

Svetozar

Svetozar probably comes from *sveto* + *zhar*.

Sveto was cognate with *svet*, *sveta*, *sveto* (Bulgarian, Serbo-croat, Slovenian), *svntu* (Czech), *svietu* and *sventa* (Polish), *sventas* (Lithuanian), and *sventa* (Old Prussian), which meant “a saint”, “saintly”, “holy”. They were pre-Christian words that came directly from the Avestan *spenta* (meaning “holy” or “saintly”) or *spanah* (meaning “sanctity”).

Zhar means “a fire”, “a blaze”

Therefore *svetozar* would have meant “holy fire” or “holy blaze” and by implication the concept came by way of Persia.

Svetokol

Probably from *sveto* (see above) + *kol*. Since *kol* means “a stake”, or “a picket”, *svetokol* probably meant “holy stake”, or “holy post”. This might be a reference to a sacrificial stake which was used to kill offerings, or a sacrificial post which horses and cattle were tethered pending their ritual sacrifice.

Svyatoslav

From *svyatoi* + *slav* it meant “holy glory”, “glorious saint” or “holy Slav”.

From *sveto* + *slav* it meant “holy glory”, “glorious saint” or “holy Slav”.

Considering that Svyatoslav was a staunchly pagan prince who dressed in a pure white smock I incline towards “glorious saint”.

Svyatopolk

“Holy regiment”, “Glorious regiment”, or perhaps even “Regiment of the Saints”. Probably Magian in nature.

Semibor

Semi might have come from *sem’ya* (“family”), or *semya* (“seed”) *bor I* “assembly, gathering, meeting, collection, tax, harvest, gathering of s.t.”.¹¹

bor II “pine forest”, or “coniferous”.¹¹

bor IV “graveyard”.¹¹

Therefore the most plausible translations are;

sem’ya + *bor I*: “Family gathering”, “Family assembly”, “Family harvest”

sem’ya + *bor II*: “Family pine forest”, “A family pine grove”

sem’ya + *bor IV*: “Family graveyard”

semya + *bor I*: “Seed gathering”, “Seed collector”, “Seed harvester”

Slovnisha

Perhaps derived from *slovník* which means “a word list”. This person might have been responsible for recording or remembering lists of words; genealogical lineages perhaps.

Smeshko

If it came from *smes’* “a mixture”, or *smeshat’* “to mix or blend” *smeshlo* would have meant “The mixer” or “the blender”. In a Russian Magian context *Smeshko* could well have denoted the Magus who fulfilled the office of *Havanan* or *Rathwiskar*, the crusher, strainer and mixer of the *Haoma* libation.

If *Smeshko* came from *smekh* it might have meant “A joker”, “A comedian”, “One who laughs”, or perhaps even “An actor who performed divine comedies”.

Sobimir

Derived from either *sobor* “a council” or *sobirat’* “to gather”, “to collect”, “to prepare”

Based on *sobor + mir* it probably meant “a council fire”

Based on *sobirat' + mir* it perhaps meant “fire-preparer” or “fire-collector”. Such a person could have been equivalent to the Magian *Atarevaksh*, a priest who prepares the fire on ceremonial occasions, and spends most of his time gathering wood at other times.

Stanimir

From *stan + mir*.

In Russian and Bulgarian *stan* (and slight variants of it) meant “a camp”. In Serbo-croatian it meant “a building”, “a stock enclosure”, “a home”, “a dwelling”. In the Czech *stan* meant “a tent” (of both *palatka* and *shater* types), as was also the case in Poland, where we find *stan* (“a tent”, or “a place”). These words were ultimately derived from the Old Persian *stana* meaning “a place”, “steadfastly”, or “a stall (for livestock)”.¹²

Therefore *stanimir* probably meant “a camp fire”, “a fire inside a livestock enclosure”, “a home fire”, “a fire inside a tent”. Due to a conceptual connection between *stan* and *shater* in the Czech language we might guess that *stanimir* also referred to fires that burned inside pagan cupola-towers.

Stoimir

Perhaps a *Stoimir* was a perpetual or eternal flame, also called “Fire of the centuries”? Alternatively a *Stoimir* was a fire maintained by each heathen Russian military *Sotnia* (a hundred-man military formation) and their *sotnik* (a pagan Russian centurion).

Sudash, Sudevoi, Sudilo

These three names relate to courts and legal judgements, and might have been used by individuals who played important roles in the pagan Russian legal system.

A Magian equivalent would be *Dad* “Law” or “Justice”, or *Dadgar* “judge”.

Sudemir

Sudimir seems related to *sud I* “a court”, “a verdict”, “a trial”, “a judgement”, and *sudit'*, “to condemn”, or “to convict”.¹³

In either case *sudemir* probably meant “a judgement-fire”, “a court-fire”, “a verdict-fire”. Such a flame seems reminiscent of the ordeal fires used by the Brahmin and Magi to try offenders, who were made to carry hot iron. Perhaps *sudimir* pertained to an official who maintained the “justice-fire”, and oversaw the fire ordeals that were requisite in certain court cases.

Sudko

“a judge”? “a lot-caster”?

Tvorimir

If *tvorimir* came from *tvorit'* (“to create s.t.”, “to do s.t.”) + *mir*, it perhaps meant “a fire-maker”.

If it came from *toorog* + *mir* it would have meant "fire-curds".

Khvalimir

From *khvalit'* + *mir*.

Khvala meant "praise" and "thankfulness" and *khvalit'* ("to give praise to s.t. or s.o.").

Thus *khvalimir* probably meant "One who gives praise to the fire", or perhaps even "praiser of peace".

Khoriv

If *khoriv* stemmed from *khor* then it probably meant a "choir singer" or "a dancer". Alternatively it may have come from a number of Magian names.

Chornotur

"Black Auroch".

Shchek

Somebody named after Kii's brother.

Yavolod

Cognate with the Norse name Havaldr.

Yakun

Cognate with the Norse name Hakon.

Yarilo

So named after the Slavic god Yarilo.

Yaromir

"Radiant fire" or "Spring fire".

Yaropolk

If Svyatopolk meant "holy regiment" then Yaropolk meant either "Furious regiment" (from *yariy*), or less likely "Spring regiment" (if it came from *yara*).

Yaroslav

If Yaroslav stemmed from the word *yarkiy* it meant "Bright Glory". But if it came from *yariy* then it might have meant "Glorious fury", "Glorious violence" or "Glorious frenzy". It could also mean "Spring Glory" (if it came from *yara*).

Yarchik

"puppy".

FEMALE NAMES

A number of Magian female names are derived from words for flowers, such as the rose and the violet.

Bogolipa

"lime tree of god" or "the lime tree goddess"

Bogushka

"a dear goddess" or "little goddess"

Bozhedara

"she who gives things to god"

Bozhena

"divine"? "a Goddess"

Vira

"Faith"

Vlodimira

Female variant of Vlodimir.

Vognedara

Female variant of Vognedar.

Dana

Named after the Slavic Goddess Dana, who may in turn be related to Daeno, the name of a Magian ashavan.

Dobroslava

"Glorious good".

Domorada

"A happy home".

Zhiroslava

Probably derived from *zhir* + *slav*, in which case it meant "Glory-fat". Such a person might have been tasked with churning the holy butter which was used to fuel the holy fires.

Zvenislava

Probably derived from *zvenet'* + *slava*. Therefore Zvenislava probably meant "glorious bell-ringing" or "glorious bell-ringer"

Zirka

"Star". Perhaps related to the Magian female name Nekakhtar ("of good stars").

Zlata

"Golden". See Zlotodan for the Iranian variant.

Zoryana

"Morning star".

Kalina

"Guelder-Rose". Perhaps equated with Banugul ("Rose-like Lady").

Kvitka

"Little flower".

Polyana and Poleva

This most likely means a woman of the fields.

Rada

She who is glad. Female pontiff?. Perhaps equal to the Magian female name Farkhonda (happy or fortunate).

Radislava

Glorious gladness? Glorious pontiff?

Radomira

(Fire of gladness. Female fire pontiff).

Radoslava

(Glorious gladness, Joyful glory).

Rogned' and Rognida

Difficult to translate, but there is a connotation that these words are concerned with horns, perhaps drinking horns.

Rostislava

"Glorious heights? or the height of Glory?"

Rostichara

Female version of Rostichar. It perhaps signified a high-priestess

Svitogora

"Holy mountain".

Svitozara

"Holy Blaze".

Slava

"Glory". Equal to the Magian female name Franak ("Glorious").

Sudimira

Female variant of sudemir.

Tvordimira

Perhaps a female variant of Tvorimir.

Tsvitana

Meaning "bedecked with flowers" or "a flower woman". To be equated with the Magian female names Gulbanu ("Flower-like Lady"), or Gulandam ("Having the form of a flower").

Khoroshka

"The Good"

Charunya

"A witch", "a sorceress".

Yaromira

Female variant of Yaromir.

These are but a small selection of names.

Appendix III

Rus' society

In the absence of written diaries, it is difficult for historians to faithfully reconstruct many facets of daily life in a supposedly non-literate heathen society. Russian Church documentation, Arab sources, archaeology and linguistics are often the only things we can rely on, and even then grey areas still exist. In this appendix we will examine the social hierarchy of pagan Rus', their political order, inter-personal relationships, sexuality, the places they lived, taxation, trade, transport and military infrastructure. Throughout this book you have been presented with information which revealed a Magian and Indo-European aspect to Rus' society. In this Appendix I will repeatedly draw upon Avestan and Vedic scriptural references as an aid to understanding the true significance of many things that are already known about the pagan Slavs.

Castes

As mentioned on p. 15, Aryan society was broken down into various social classes, which are still present in India today, in the form of the caste system. Admittance to one of the Aryan classes was by birthright only, a hereditary and unalterable inheritance bestowed by the creator¹.

*"He who was begotten by an Aryan on a non-Aryan female, may become (like to) an Aryan by his virtues; he whom an Aryan (mother) bore to a non-Aryan father (is and remains) unlike to an Aryan."*²

*"Those who have been mentioned as the base-born (offspring) of Aryans, or as produced in consequence of a violation (of the law), shall subsist by occupations reprehended by the twice-born."*³

The pagan Celts had a caste based society⁴, as also the pagan Saxons. Adam of Bremen recorded that it was a capital offence for Saxons to marry outside of their social grouping⁵. This was to preserve the purity of the respective tiers of Saxon society. We know of the Irish caste system from various points outlined in the legal codes known as *Crith Gablach*. One's caste determined their station in life; the sort of goods they could own, the kind of house they lived in.⁶

Classes

In Mesopotamia though, the Magi held to a similar social matrix, but it was more class-based than unalterably hereditary in nature.

*"The four classes of the religion, which are priesthood, warriorship, husbandry, and artisanship"*⁷

Iranian social structure comprised of elaborate kinship ties and duties, but, unlike the Hindus of India, it seems they drifted away from the Aryan concept of hereditary vocations, though by and large people would automatically be born into a certain lifestyle.⁸ Therefore, the Iranians were not confronted by religious taboos preventing social mobility.

"The sage asked the spirit of wisdom thus: "What is the business of the priests, warriors, and husbandmen, each separately?"

The spirit of wisdom answered thus: "the business of the priests is to maintain the religion properly: and to perform the ceremonial and invocation of the sacred beings well and with attention, and the decrees, decisions, custom and control, as revealed by the pure, good religion of the Mazda-worshippers. To make people aware of the goodness of good works: and to show the way to heaven, and the danger and avoidance of hell.

"The business of the warriors is to defeat the enemy: and to keep their own country and land unalarmed and tranquil.

"And the business of the husbandmen is to perform tillage and cultivation; and, to the extent of their ability to keep the world

invigorated and populous"

"The spirit of wisdom answered thus: "The business of the artisans is this, that as to that work which they do not understand, they do not bring a hand to it: and that which they well understand, they perform well and with attention: and they demand wages lawfully".⁹

pagan Russian society is much closer in nature to the Magian vision, rather than than the Vedic. This becomes evident by analysing their military levying procedures. In pagan Rus', petty Princes, Boyars, and chieftains supplied not only money, horses, victuals, and arms to the Grand Prince, but peasants. These peasants farmers were trained in the military arts, and became professional men-at-arms for a minimum 20 years period of engagement. If Vedic Aryan caste ethics were in any way prevalent there, then such levying would have been not only unnecessary, but unholy since peasants belong to a lower caste than warriors. By inference the remainder of society was class-based instead of caste-based. That is not to say that the Russian royal Magians had abandoned their long standing belief in the next-of-kin marriage. Royal status was still conferred by birthright alone, the Magi, their Kings and princes obtaining their lordship and/or magical intercessory powers, as always, via the sacred blood which ran through their veins. Perhaps for this reason the Russian Volkhvy Magi married among their own kind. It was one of their most fundamental duties. Volkhvy post-nuptial festivities were nothing like that of the Christians, or of the Zoroastrian fire-priests either. During the wedding feast attendees turned into wolves, burst into the streets, and ran off into the forests, living there night and day.¹⁰

"The five Chieftainships"

Christian society owes much to Aryan conceptions of authority, the patriarchal society brought into Europe with the Indo-Iranian migrants, and Aryan Indo-Europeans before them. Before we look too much further into ancient Russian society we will explore the roots from which their social structure sprang; the Magian doctrine of the "Five Chieftainships". From the Iranian Aryan *Avestas* and *Pahlavi Yasna XIX Bako*, which followed earlier Vedic lore, we learn that authority among the Iranians rested upon five tiers of "chieftains", each of which possessed its own dual military and religious duties. This gave rise to a society that was basically feudal in nature. Feudalism was already an integral part of Eastern European society long before the arrival of Christianity, a feudalism administered by chieftains of varying status. Ascending from lowest to highest these chieftainships were;

A house-chieftain	He who ruled over his family - the man of the house
A village or clan chief	He who ruled over his clan
A tribal chieftain	He who ruled over related clans
A prince	He who ruled over tribes
The great prince or High King	He who ruled over all the tribes. This post, the greatest chieftainship, could also be held by a high ranking Magus, also called "the supreme Zarathustra".

Each chieftainship entailed a secular and religious duty, to rule over those under their sovereignty, and to offer prayers and sacrifices on behalf of those under their stewardship. These rulers were accountable before God for the manner in which they governed their peoples. It was the holy obligation of their subjects to be obedient and loyal to their fathers, chieftains, princes and kings, and the lands they ruled over, which were sanctified by their respective reigns. Thus, white Magian society was well organised and very nationalistic, a reflection of their dearest values, a sacrosanct love of God, King and country. Though one's neighbours might also be Magian, armed conflict with them was a foregone conclusion if their Magian monarch, clan or family head was despotic, unjust or an oathbreaker, for the sacred nature of their reign was defiled. Magian society was characterised by a common priesthood and faith across whole boroughs and nations, a religion littered by manifold local divine beings (all beneath the might and majesty of the beneficent Sun), yet one which allowed for rampant nationalism, and internecine warfare under certain circumstances.

Magian feudalism

Feudalism, which we feel inclined to view as a phenomenon of the Middle Ages, has had a very long history. From authors such as Herodotus we learn that class-based and caste-based societies were the prevailing forms of social structure among the Aryans, Greeks, Egyptians, and Magi.¹¹ The Sanskrit word *Varna* means both “colour” and “caste”, thus indicating that in the remotest phase of the Vedic era, the castes might well have been organized along racial lines, consisting of segregated racial groups, based on the colour of a person’s skin. The moment a baby issued from its mother’s womb, it inherited a specific niche in society; it would live and die with the status it had earned as a birthright, whether great or small. Whether Indo-European society was caste-based, like their eastern counterparts the Aryans, is unclear. One thing is certain, once we enter the pagan era, for which we have written records, society was largely class-based, while the nobility and royals alone seemed to be concerned with the importance of bloodline. Perhaps society was originally caste-based, but later shed inherited social status in favour of permissible social-mobility. Or alternatively the Aryans were originally a class-based society, but adopted the precepts of caste in Asia for reasons of racial purity alone.

It is difficult to gauge the extent to which the more archaic populations of say the Bronze Age observed a caste-based lifestyle, as opposed to a class-based lifestyle. This might only be proved by correlating various distinctive grave cultures that seem to display features which indicate a certain class, with the genetic testing of skeletal material unearthed in excavations. Of particular interest is any evidence which shows that endogamy (incest) was practiced within the nuclear family unit, because this may well be indicative of the Magian next-of-kin marriage. Gimbutas does mention that some sites excavated in Eastern Europe display endogamous features.

During the Middle Ages princes and lords had a god-given duty to justly rule and adequately protect whomsoever lived beneath their dominion. So they established their own militias and fortifications to fulfill this duty and, as Lords, acted as protectors for all levels of society. In Christian times the nobility sponsored their own personal clergy, financing and guarding these fledgling parishes. Such was the shape of the Mediaeval Church in most parts of Europe. However from the 12th Century onwards, in Western Europe at least, private parishes founded by royal sponsorship were banned. Earlier you learned that lay parishes fell from grace because the means by which they were acquired and administered was essentially pagan. In churches and monasteries the old ways were as lively as ever, concealed by a polished facia of Christian virtue, until the time of the Holy councils which put an end to it all. But during the pagan era, in the far East, nobles were guardians for the Magi, who had an equivalent role to Christian clergyman in very many ways, *performing their esteemed sacral functions for a particular tribe*, while being themselves part of a larger kin-based divine priesthood and intelligentsia. Peasants and artisans were guaranteed of their dutiful concern also, for they formed the backbone of society’s manufacturing capability. As war threatened and hostile troops closed in on a town or city, peasant workers and artisans retired to the safety of the castle, where the lord gave them protection and upkeep until all danger had past. The common perception of the Mediaeval plot farmers as little more than the degraded and abused chattels of all-powerful barons, who became prosperous by exploiting them for everything they were worth, may outwardly seem to be correct. But if the teachings of the Magi were in any way present among the people, then the truth was altogether different; the farmers were not the lowest rung of the social ladder, but some of the most valued of all individuals, because they sustained the lives of the living, which were sacred to their maker. This might explain the very pragmatic and prudent approach of the nobility in protecting them during times of calamity. Although soldiers were in theory dispensers of death to the unjust, like the farmers, the soldier was primarily a protector of divinely forged life and keeper of the peace, not through the plough, but by blade of iron.

In modern society the true worth of (often poorly treated) workers is measured by their money earning potential for the mega-corporations, but the inescapable fact is that every level of society is important for the overall welfare of that same society, from the least worker to the greatest of Kings. *Everyone* in some way played a vital role, and was, when all is said and done, vital to the running of society. If there was no one to milk a cow, or till the fields, then children went hungry. In the aftermath of the 14th Century Black Death, which drastically culled the European population and destroyed the workforce, humble manual labourers, agriculturists and pastoralists came to realise their immeasurable worth to the nobility, and owing to their scarcity gained newly found bargaining power with which to achieve greater rights and entitlements for them and their families. When workers and artisans were crippled, so was their society.

*S*ocial status

In Rus' citizens fell into one of three basic social groupings, each related to their degree of personal liberty; the unfree, the semi-free and the free. Apart from bastards, concubines, their offspring and born slaves, it was possible to be socially mobile, depending of course on your financial means and assets. Thus a person's social status adequately reflected their *present financial situation*, and *current legal status*, which were liable to change under circumstances of good fortune or financial calamity.

KHOLOP - THE UNFREE

The *kholopy* (a Slavic/Baltic term) consisted of slaves, concubines and bastards, and had no legal status, or rights of inheritance, nor could they carry a weapon, or participate at a *Veche* gathering.

SMERDY - SEMI-FREE

This fairly sizeable group consisted of bonded freemen dependent on a landlord or craftsmen for their livelihood. *Smerdy*, literally meaning "the ones who smell" (of sweat and toil) generally lacked any financial independence. Normally they were legally bound to work the fields of their landlords for a small fee. The word *smerdy* (sing. *smerd*) belongs strictly to the Slavic and Baltic tongues. A close phonetic parallel exists in the Persian word *Merd* or *Mard* which means 'a man', though Fasmer disregards it as a source.^{11a}

MUZH OR LYUDIN - THE FREE

Muzh and *lyudin* were financially independent freemen, with their own range of personal assets, means of income, and were legally entitled to be called a man, hence the term *muzh* ("a man"). *Muzh* is derived from the Old Indian *manus* and the Avestan *manush*, which later mutated into the Gothic *manna* and the Old Icelandic *mathr* (all of which meant 'a man').^{11b} Ultimately this is where the English word 'man' comes from.

The Russian words *muzhchina* and *mushchina* ("a man") are unusual in that they refer to something of male gender, while the word form possesses a female ending. This deviation from normal Russian gender classification laws suggests an unusual process for the word's acquisition. My belief is it was related to *mushkinu*^{11c} a defunct Babylonian term, abandoned for all but legal usage, and signifying 'free serfs'. It survived Babylon's demise only to end up in Darius' tablet of laws, and therefore used in litigation procedures throughout Magian Iran. That *mushchina* is derived from the Old Russian legal classification *muzh* leaves open the possibility that *muzh* is a fossilised Magian legal term preserved in Achaemenid, Parthian and Sassanian society since Babylonian times.

*T*he socio-political order of heathen russes

The socio-political structure of heathen Rus' was not dissimilar to the monarchies and caliphates of Europe and the Middle-East. The one major difference between Rus' and these other societies is the profound level of influence the Volkhvy exerted over the masses, gods who walked among men, the consorts of the celestial and infernal deities.

Even during the Christian era, everything remained largely unchanged except for the fact that leaders took advice from ecclesiastical authorities such as the bishops rather than the old pagan priesthood. Officially the Volkhvy were relegated to the ranks of fugitives and treated as little more than outlaws. Yet all the while, the village folk and the nobility gave them shelter, so much so that the Christian authorities were unable to curtail their activities throughout the countryside. With the main cities under Church rule, it was only possible for them to remain operational in the cities after 996 AD if their true identity and profession remained concealed from the authorities, largely by masquerading as devout Christians and then living double lives.

RULERS BY BLOOD

It is hard to imagine why the beginnings of such a major nation as Russia should be enshrouded in so many question marks. It is ever so tempting to accept without question the *Primary Chronicle* account of the arrival of the Nordic Rurikid Rus' royals in the lands of the Finns and Slavs. It is about as straightforward as you can get .. Or is it? That Rurik was a Norseman, perhaps even Riorik (of Jutland) is to my mind beyond question, and yet there are other shreds of surviving data which set the groundwork for a most amazing reconstruction of pagan government in early Rus', a reconstruction which intimates that there may be a lost shred of Norse history available to the discerning eye.

At the head of the political tree was the Grand Prince (*Velikiy knyaz'*), or alternatively Khagan, depending on the ethnicity of the ruler. At no stage did any ruler of the Rus' tribal federation ever go by the title of king, which was the standard royal title among the Norsemen. This further complicates what could easily have been a fairly straightforward *Primary Chronicle* account of a Norseman, his two brothers and his kin settling amid the Eastern Slavs. If Rurik was a Norseman, then how is it that he was known as a Knyaz' (prince) rather than a king? Why did other members of the Rus' royal family utilise the title of Khagan, which was a rank typically found in Khazaria and Central Asia among the Turks? From Rus' very inception, the Khagan or Velikiy Knyaz' possessed supreme executive power, and exerted steady control over the usually unruly Slavic tribes, as well as the many other domains conquered by the Rus'. Besides the members of his own royal family, there were other officials who could influence him in his decisions, such as the bogatyr's, the Volkhvy and Boyars, each of which held a large amount of power. Thus, the Grand Prince was unquestionably the most important factor in maintaining a coherent conglomeration of multitudinous power wielding bodies and tribes. Without one man with the authority to impartially resolve the never ending streams of disputes and feuds, Rus' would have fallen apart at the seams.

The most enduring problem which faced the house of Rurik was that no formal rules or edicts existed dictating the seniority of members of the royal family. If a Grand Prince died his successor was determined by the personal choice of the outgoing monarch, or brinkmanship; survival of the fittest. For this reason Rus' degenerated into separate feudal principalities in the 11th Century, as prince vainly fought against prince for the crown. Members of the royal family even allied themselves with the Poles to settle grudges with their recalcitrant brothers.

During the Muscovite era, Slav royals adopted the double-headed eagle as their device, the insignia of the Romanov's, which had apparently been brought into the area by the Turks. The Imperial two-headed Eagle originated in Mesopotamia, and later found its way to ancient Rome. Following the fall of the Roman Empire, it was also employed as the standard for Russian, English, German, and French royal bloodlines. Today it can still be found on the Albanian flag. Even the "Chi-Rho" insignia once used by Constantine was supposed to have been a product

of Assyria, where it was slung around the neck as a protective device.¹²

It is also significant that Rus' Princes continued to use Sun or Fire-names during the Christian era, and this reveals the true extent of their demi-pagan Christian leanings, if not blatant paganism. These names were formally declared uncanonical by the Russian Church, and were thus unacceptable as Christian names. The Rus' princes were believed to possess the secret powers and knowledge of the Magi, a point further reinforced by the use of the trident as their heraldic device, and a possible link with the Merovingian dynasty of Magus-princes who ruled the Franks prior to the coronation of Emperor Charlemagne.¹³

Rus' royals lived a life different from other men, their duties and public image reflecting ancient notions of royalty, the very ones found in the following passages from the Aryan book *The Laws of Manu*.

"I will declare the duties of kings, (and) show how a king should conduct himself, how he was created, and how (he can obtain highest success). A Kshatriya (man of the warrior caste), who has received according to the rule the sacrament prescribed by the Veda (ie; the rite of coronation), must duly protect this whole (world)..."¹⁴

"And, like the sun, he (the King) burns eyes and hearts; nor can anybody on earth even gaze on him. Through his (supernatural) power he is Fire and Wind, he Sun and Moon, he the Lord of justice (Yama), he Kubera, he Varuna, he great Indra".¹⁴

"...hence it is prescribed (in the Sastras that a king shall possess) a fortress. Let that fortress be well supplied with weapons, money, grain and beasts of burden, with Brahmanas, with artisans, with engines, with fodder, and with water. Let him cause to be built for himself, in the centre of it, a spacious palace, (well) protected, habitable in every season, resplendent (with whitewash), supplied with water and trees."¹⁵

"Let him appoint a domestic priest and choose officiating priests; they shall perform his domestic rites and the (sacrifices) for which three fires are required".¹⁶

The lesser royal personages were granted minor provincial thrones in accordance with their standing and seniority. Lesser princely thrones were situated in each major tribal grad, and within these domains they bore the highest administrative office. As such the princes were entitled to extract taxes from the people on their own behalf. Disputations arising from the ascension of certain members of the royal household at the expense of other likely candidates were settled by the Velikiy Knyaz'. Normally the veches (ie; the democratic tribal councils) or elders of all subordinate and tributary tribes convened to find out what the people's thoughts were on the potential of certain successors. Widespread refusal of candidates by the people normally meant that the throne would pass onto someone with a closer rapport with his subjects. Rus' princes and princesses often married Magyar and Bulgar royals, and during the 10th Century the Scandinavians were deemed the best suitors for Russian brides. Due to the size of the pagan Slav royal harems, it is possible that up to several hundred blood princes and princesses were born annually, though this cannot be confirmed. As you will have read, widespread intermarriage took place between the Frankish monarchy and Slav royals from Rus', Poland and Bohemia during the Middle Ages. These consanguine marriages came to be viewed by Roman Catholic clergymen (such as Adam of Bremen) as especially forbidden,¹⁷ a vehicle for the transmission of equally forbidden heretical pagan conceptions of Christ and the Christian faith.

Strabo tells us a little about the sleeping habits of the Persian kings; *"They (the Persians) are governed by hereditary kings. And he who is disobedient has his head and arms cut off and his body cast forth. The men marry many wives, and at the same time maintain several concubines, for the sake of having many children. The kings set forth prizes annually for those who have the most children; but the children are not brought into the presence of their parents until they are four years old. Marriages are consummated at the beginning of the vernal equinox; and the bridegroom passes to the bridal chamber, having first eaten an apple or a camel's marrow, but nothing else during that day".¹⁸*

PRIESTLY BLOODLINES

With their main seat of power in Tmutorokan, the lands of the Roxolanian and Bulgarian forefathers, the esteemed Council of Doctors exerted unimaginable power. Venerated as true gods, and the most highly accomplished of all the Volkhyv, they were the greatest link between man and the demonic, earthly and celestial

gods. Volkhvy of this magnitude held great influence over the minds of the people and were generally perceived to hold the prosperity and well being of the economy and the masses in their hands. When deliberating upon matters pertaining to nature, the gods and the elements, the Grand Prince would most likely adopt the views and recommendations of the Volkhvy. Volkhvy, being as learned as they were, had sources of information at their disposal, whether written teachings, or intelligence gleaned through overseas contacts (especially in the Caucasus, Middle East and Central Asia). This allowed them to grant advice to the Princes, with an interesting perspective.

Herodotus tells us pagan Egyptian priests formed up into separate Colleges, each of which served its own deity.¹⁹ pagan Gnostic philosophers follow their model. The Rus' Magi also founded colleges dedicated to particular gods. The most famous of these was the College of Doctors, which served the Tmutorokan idol.²⁰ Yet this structure would soon break down, the demise of the pagan temples and their white and black gods guaranteed by St Vladimir's adoption of Christianity. The number of senior Volkhvy Magi (probably including a *Magupat Magupatan*) who managed to escape and go to ground, is not known. No doubt they did not take the demotion from god to peasant quietly. These were the most likely candidates for the crown of the supreme Bogomil anti-pope and his apostles, who, according to legends popular during the Middle Ages, were preparing the covert infiltration of the Church in both the east *and* west. Shortly thereafter, Rome dispensed with married clergy and demanded celibacy, perhaps a last ditch attempt to lock Magian bloodlines out of the Roman priesthood, as was occurring in other outlying places, such as Wales.²¹

Being highly skilled in the mystical arts and fortune-telling, Kolduny sorcerers were often able to subvert the advice given to the Grand Prince, by the Volkhvy and other parties. The Grand Prince quite regularly had a willing ear for them, and for this reason, there was probably a great deal of jealousy towards the petty sorcerers by the other power brokers, the Volkhvy in particular. Being a court astrologer under the Rus' princes might have been as precarious as it was in Babylonian times, though we cannot be sure. Back then the diviners regularly reported to their monarch, informing them of every detail indicated by the stars, be it unknown plots, the outcome of royal negotiations, illnesses, military campaigns and so forth. One Babylonian tablet read "*In deep anxiety, I have nothing to report*".²² As with the Mediaeval alchemists, astrologers were eager to please their wealthy royal patron, highlighting successful predictions wherever possible, and cunningly shunting into the background those which failed.

WARRIOR BLOODLINES/ FRATERNITIES

The military class formed the backbone of the Kievan State, for in the brutal mediaeval world, no race could exist for long without men ready to bear arms in defence of their race and ruler. Accordingly, those who formed this segment of Rus' society could expect to have a drastic impact on the fortunes of their nation, depending of course upon the way in which they were employed in the field. For a full account of the warrior class, see the section on military structure (Appendix III).

MERCANTILE BLOODLINES

Arguably the most influential group outside the reigning royal family were the *Boyars*, nobles of comparable status to lords or barons. Their political clout, wealth and influence over the clan and tribal chieftains within their sphere of control, necessitated they be kept on side most times. That the term Boyar comes from the Turkic via the Danubian Bulgar tongue convincingly illustrates the large scale Bulgarian presence colluding with the equally Magian pagan Russian aristocracy (formerly of Scandinavian extraction).

In typically Magian fashion the Boyars owned vast herds of stock and enormous landed estates, which had been confiscated or bought from the increasingly impotent tribal chieftains, or even bestowed by the Grand Prince for favours rendered. Traditionally the tribal heads of power, the chieftains, were the primary figures of authority in the era preceding the rise of the House of Rurik. With the advent of this royal line, the hereditary chieftains became little more than dignified minions of the princes, Khagans and boyars. As one of the controlling forces behind the formation of the Rus' State during the 9th and 10th Centuries AD, the boyars installed themselves as the defacto rulers of the land and its people, largely through their control of the chieftains, the agricultural sector, plus their ability to throttle the movement of trade goods throughout their respective regions. Considering the sort of mercantile ventures being conducted by the Bulgars, into Iran and Central Asia, it is likely the Boyars frequently had extensive high level contact with the old countries, whether directly, or through European and Asiatic traders. And

so the princes wisely feared their true might, especially since many maintained well paid and equipped private armies. Without a loyal council of Boyars on side, the federated Rus' tribes would have become embroiled in divisive factional disputes that would have left it impoverished, hungry and practically ungovernable.

Fortunately, the ranks of their council were composed of power-thirsty splinter groups, who often aligned and realigned themselves with other internal factions for their own personal gain. This, and the relative loyalty of the Varangians, prevented them from usurping power.

Foreigners also congregated around the royal court, the emissaries, vassals and consorts sent to the Rus' princes from time to time, primarily by western and eastern European monarchs, Arabs, Khazars, Greeks, Pechenegs, Persians and Volga Bulgars. They supplied the Velikiy Knyaz with communiques from abroad, bearing words of friendship, advice and warning.

Tribal/village structure

Chieftains and elders played lead roles in governing the villages. Knowledgeable in the languages, dialects and the customs of the constituent Rus' races, these personages represented their own tribe when dealing with princes, boyars or other dignitaries, putting forth their best interests in the royal presence. Without their timely reminders concerning tribal sensibilities, negotiations would have become bogged down from the very start.

RULERS

Boyar (ruler by wealth and birth)

Chieftain (ruler by birthright)

UPPER AND MIDDLE CLASS

Merchants

Freemen craftsmen

Freemen landowners

LOWER CLASS

The working populace: Peasants

OUTCASTS

Slaves, exiles, brigands, bastards, and drifters.

LOCAL RULERS

The boyars were an obvious regional control mechanism, a link connecting town and village existence with the higher levels of power in Kiev. Given that many of the Bulgars were Magian they probably had religious duties to perform in the villages, together with the Volkhvy, their frequent companions.

Village activity was regulated by the Veche democratic assemblies where freemen voted alongside chieftains, boyars and other dignitaries. During all law trials, banishments, war council meetings and in other times of crisis,

such as the invocation of food and water rationing, the *veche* convened to determine the tribe's course of action. This form of government was also known to the Saxons and Norsemen, and collectively the assemblies of these three races had some level of interaction. For example Slav dignitaries are known to have appeared as speakers before Saxon assemblies.

The elders (the heads of the clans), were respected older folk, entrusted with the oral history, laws and genealogies of their tribe. Many villagers came to them seeking the wisdom of the ancients, for their memories were alive with the epic blunders and victories of generations long past. In all matters religious, the *vozhd'* would consult local Magi for advice, especially so when the elemental gods and demons had adversely treated their village community. So during times of economic hardship caused by the loss of stock to frost, or crops to hail, the Volkhvy busied themselves determining why the calamity had occurred, and how to remedy things between mankind, the gods and the demons. All the while free-lance Chaldean sorcerers, the *Kolduny*, acted as advisors to the *vozhd'*, though on a more secretive level, since their powers of prophecy had the ability to refute any seemingly sound advice tendered by the village wizards. For this reason, *Kolduny* were probably held in personal disrepute for political treachery. Just the same, many people of the village would have cause to visit them, particularly after the birth of their children, or to enhance their station in life via sorcery.

With the coming of Christianity the boyars or chieftains gave cursory attention to the advice of the Christian priests who presided within their area. Though in practice the Volkhvy magicians were never far from the horizon, in many cases harboured by their old friends, the powerful and not-so-devoutly Christian Boyars.

THE UPPER AND MIDDLE CLASSES

The upper and middle class of Rus' society consisted of merchants, landowners, public dignitaries, religious figures and heroes. As stated in the *Primary Chronicle* the upper class and merchants who travelled abroad were entitled (and required) to carry their own seal, which was normally worn around the neck as a pendant. These were engraved with a distinctive image, and used to safeguard the integrity of any overland communiques sent by outrider or foot courier. Merchants who did business abroad were permitted the privilege of a silver seal, and boyars' merchants carried the much revered golden seals, normally reserved for boyars, princes and those of royal blood. Silver and golden seals could not be struck (or acquired) without the prior approval of the grand prince or one of his deputies. Without a seal or a certificate from the Volkhvy, merchants and their crews would not be permitted to make trade journeys to Byzantium in the South.

Freemen merchants peddled their wares locally, or in other regional village. Some even travelled to quite distant trade centres, such as Tsargrad, Gurganj, Bolgar, the Caucasus and Baghdad. In pagan times however, their trade caravans travelled the hot and dusty roads of Central Asia and Arabia, searching for the sacred woods and perfumes so needed by their dearly loved gods and holy fires. This made the traders important to a village's economy, and to their religious life, supplying everyone with necessities, luxury goods and commodities unobtainable within the village's environs. Accordingly the merchants had a greater than normal personal wealth owing to their often profitable dealings. Freemen craftsmen had their own households, workshops and slaves, and performed skilled tasks for the *vozhd'* and other village folk in return for payment of some type. Journeyman and apprentices were often members of a *bratchina* (brotherhood) or guild (a trade or craft fraternity). It is not known whether their guilds only came about with the arrival of Christianity. Certainly the concept was known to the pagans also. Be that as it may the guilds were important segments of the mediaeval Russian communities, and archaeologists have established that craftsmen tended to congregate in certain areas. These fraternities possessed their own merchants who cheaply acquired bulk consignments of raw materials commonly needed by guildmembers. Membership of a specific guild guaranteed cheap lodgings in any *gorodok* (town) or *grad* (city), at other guildmembers' houses, or at any premises owned specifically by the guild. It also allowed the purchase of tools and trade goods at reduced prices. Independent freeman landholders made a up the remainder of the middle class, making a living by selling a large portion of their produce locally, or to neighbouring villages. Some estates were run by farm managers, or farm co-owners known as *siabry*.

THE LOWER CLASSES

A typical Rus' village mainly consisted of abundant slave and peasant labour. Slaves were acquired by purchase,

captured in battle, or inherited from father to son. Peasants were not officially slaves in name, but the poor folk, field workers and husbandmen of the village. They received a wage, albeit an extremely modest one, and probably had most of their lodgings and food catered for in return for their work.

Peasants were totally dependant upon chieftains and boyars for their protection and means of survival. Females were charged with the production of cloth, tapestries, farm chores, child raising and cooking, while the men worked the plough teams, felled timber, raised stock and hunted. We might think that their lives were probably fairly arduous, but we can infer from the following Magian passage, that these plot farmers were essential to the existence of Magian society, and *very highly regarded*, despite being worked hard by masters who gained merits for making them do so; *“the performance of agriculture is like that when some one is performing the ceremonial of the sacred beings, and it is necessary to maintain much respect for agriculturists; it is also necessary to keep trouble and strife far from them.”* *“For it is declared in revelation, that, as to every one who replants a shrub, while that shrub or tree exists at the place, every good work that every one, who eats of that shrub, does in that state of repletion becomes the agriculturist’s, just like those which are done by his own hand. If anyone orders it (ploughing and agriculture), just as that good work occurs much new repose and comfort reach his soul. As to corn and grain and whatever they sow, it is just like this, because, as regards every one who eats wheat, barley, and other grains, and performs duty and good works, they become those of the sower of those grains, just as those which are performed by his own hand. Because, for the life of mankind a crop was necessary, the creation of a creator after the sacred being, the most high, owing to the work of the agriculturist. For every one who eats anything dies, therefore, as regards that person by whose work the life of mankind is established, it is necessary to consider him valuable and precious.”*²³

While there is no doubting the powers of destruction, the true power of life is that even while disease, pollution and disorder murder the biosphere, it can re-grow, even more so with man’s kind help. Agriculturists played a leading role in the battle against the Lord of destruction by replanting flora and crops, thereby thwarting Ahriman’s apocalyptic attempts to emasculate regeneration on an ever increasing basis. Life is subtle, and so its true power often passes unnoticed when compared with incidents of destruction and death, which are all too easily focussed on, due to the trauma they evoke. The practice of planting a tree on the birth of a child was and is still practiced in Eastern and Western Europe²¹.

Slaves fell into two main types; the *cheliad* who was tribal property, and the *rob*, who was the legal property of one specific owner. They entered bondage in a number of ways. Some were purchased, others had broken legal contracts, or defaulted on payments to their financiers and were therefore bound to work for their creditor as a slave until the debt was made good. Still others were war prisoners compelled to work for their captor until their relatives paid the required ransom demanded.

And on the fringe of Russian society were miscreant elements; the outlanders, or *izgoi* as they were commonly called, who had been expelled into the forests and steppes, for past almost irredeemable transgressions against law, order and the powers that be. The word *izgoi* (meaning “a social outcast”) was derived from the verb *izgonyat’* (“to banish” or “expel”). Therefore the very word *izgoi* implies that a typical pagan Russian banishment ceremony entailed a formal *chasing away*. Since the Rus’ pagans were ruled by Magi, we can infer that (in “white” settlements at least) banishment took place after a white Magus recited the Curse of the Wise (known among the Iranian Magi as the *Yazad* Curse), and in Christian times it would have taken place after a secular edict by the authorities, or perhaps once a sentence of excommunication was handed down by the local Christian clergy. A similar custom might have been known to the Celtic Druids. Under druidic law banishment was the highest penalty that could ever be inflicted on a person, a much heavier burden even than death. In Ireland the offender was expelled from their community by all and sundry (including friends and relations), and chased from the perimeter of the settlement at great speed. The person had to run for dear life, hurdling fences, creeks and bracken, for to their rear was an angry mob intent on catching up with them, often carrying weapons and tools. If the person proved to be too slow and was caught, then they would die then and there, killed by their own kin. The ranks of the *izgoi* were filled with the spiritually unclean, such as the devil-priests, and both pitiful and lawless breeds (the bankrupt, brigands, convicted criminal offenders on the run, and *Mithradrugs*, those who lied unto Perun and lived). As exiles they were truly the pagan damned, struck from the tribal heritage *for all eternity*. Many of these figures no doubt congregated around the settlements of the black families, and black Magi, who were probably the only Volkhvyy who would openly deal with them. As you will have read, these pagan priests were the equivalent to crime-

fathers, with their own congregations of thieves, robbers and highwaymen. In the chaotic turmoil of Rus's clan and civil warfare their testy brotherhood of criminals found gainful employment in piracy, brigandage, sedition and assassination plots against merchants, clan chieftains, princely dignitaries and the white Magi. Adam of Bremen spoke of the Slavic and Baltic pirate bands which, together with the vikings, plied the Baltic. They lived in communes along the coast, from which they set off to lay waste to Baltic merchant shipping or coastal prey. Accordingly there was a deep level of mistrust for drifters, especially those of a rival tribe. They could be anybody, perhaps even the worst of people, nay, even living demons. Upon arrival at a new location, travellers could expect to be quizzed by Volkhvy intent on discovering where they were from, and where they were going.

Cities in Rus'

The Norsemen referred to Russia as *Swithjod hinn mikla* (Old Norse: the Greater Sweden, or Sweden the Great), or in the period following the "Call of the Varangians" *Ryzalandr* (Old Norse: Land of the Russes). Throughout this book you have continually seen evidence for Scythian expansionism into Europe and Scandinavia, via Russia. For this reason I postulate that "Scythia" was the original etymology of the Norse term *Swithjod* ("Sweden"). If this is a suitable etymology then Sweden was formerly known as *Swithiod* ("Scythia") and Russia continued to be known by its ancient title "Greater Scythia", *Swithjod hinn mikla*. Such a perception was present during the Middle Ages, for the medieval churchman Adam of Bremen referred to Scandinavia and Slavia collectively as Scythia.

Another Norse name for pagan Russia was *Gardariki*, the "land of enclosures", the "land of forts". This mention of enclosures is a reference to the ubiquitous walled fortifications which studded the landscape, and perhaps even the boundary fences which encircled their groves. Considering the level of Magianism in Russia Slavic fortress walls may have had a sacral meaning, I believe, and were supposed to emulate the Magi's heavily fortified heavenly city *garodoman*, which was patrolled by the holy warrior-saints. Norsemen used a similar term for their settlements *gard* (which means "a city"), and every Russian city was called a *gorod*, or *grad*. In a Magian context this perhaps indicates that the Russian and Norse forts were earthly fortresses of the righteous.

Other Norse titles for Russian cities are very interesting, none more so than Novgorod (Slavic: New City) which the Norse called *Holmgardr* (Old Norse: Island City). For interest's sake Novgorod had a population of around 20 thousand during the 11th Century AD, which only increased to about 50,000 on the eve of the Mongol invasions.

Kiev was called *Koenugarthr* (Old Norse: City of the King) by the Norsemen. Another Old Norse word which seems linked to that of Kiev is *Kuronggarth* (Old Norse: "a boat enclosure" or "an anchorage"), which due to a play on words gave rise to the legend of Kiev being founded by Kiy the ferryman (the mythological founder of Kiev). Certainly Kiev was the mustering point for merchant vessels which, during the period when trade treaties existed, annually departed to peddle their wares in Constantinople.

Living conditions

Kirpich', the Old Russian word for "a brick" comes from the Old Turkic *kirpiz*, the Tatar *kirpic* or the Azeri word *karpic*, all of which mean "a brick".³⁹ This confirms that certain aspects of Russian bricklaying did not start until Mongol times. What term applied to the white ashlar blocks used by the Bulgars to build fire temples and fortifications in Russia, Bulgaria and the Caucasus as early as the 9th and 10th Centuries is unknown. It seems to have been lost. Prior to that dwellings and temples from wood were built throughout Slavia.

Russian words for building materials show a degree of commonality with the Germanic and Scandinavian milieu. *Dver'* meaning "door" has Germanic, Greek, Baltic and Norse equivalents and is derived from the Old India *dvaras*. The Russian word for "a nail" *gvoz'd* has Germanic and Scandinavian correlations. *Okno* meaning "a window" is of Slavic or Baltic origin, and as discussed probably represented the eyes of a building. Russian words for "a shingle" (*dran'* or *dranka*) come from the words *drat'* and *deru* "to tear or strip something", and share a common linguistic genealogy with the Lithuanian *dirti*, the Latvian *dirat*, the Old Indian *drnati* ("to break", "to snap", "to split"), Avestan *dar-* ("to split s.t."), *dero* (Greek: "to tear", "to break", "to slit").³⁸ Perhaps the Greek and Russian etymologies have preserved a connection between their shingle-making, and the techniques of ancient shingle splitters. Tools usually carry indigenous names, for instance the Slav word for "a chisel" is Slavic in nature, and the word for "saw" carries Slavic Germanic, Anglo-saxon correlations.

Most Russian settlements possessed main thoroughfares of the "corduroy" variety, that is roadways made from

two parallel tracks of wooden beams overlaid crossways with split logs, which provided a stable surface. Corduroy roads provided an adequate running surface for sledge runners, or magical “snakes” as they were often called. Considering that these roads frequently sank into the muddy ground over long periods of time, they were constantly being rebuilt, positioned over the previous layer. To what extent road gangs headed out into the forests to expand the network of northern roadworks to other cities and river portages is unknown. In settlements of the far north, these roads or walkways were hemmed in by posts that supported hide awnings. These temporary corridors were erected seasonally (depending on the severity of the winter), allowing townsfolk to make their way around the village within the comfort of a covered walkway.⁴¹

Sanitation was also factored into the design of their settlements. Sewage, waste water and melting snow was taken away from major buildings by hand cut wooden drainage channels, covered in bark, though generally speaking these were only affixed to civic buildings.

TYPICAL NORTHERN HOME (IZBA)

Izbas were rectangular, sunken, wooden-walled homes possessing stone hearths. These single-roomed dwellings were of either log lattice or wattle and daub construction, fixed to four corner foundation posts. More often than not they had a dirt floor, but sometimes boards were nailed into position. Sleeping lofts were set against one wall, and accessible by a ladder. This allowed people to sleep nearer the ceiling, where much of the heat accumulated. Roofing was commonly made of shingles, wooden planks or thatching. Burying the roof under piles of earth and turf was another common and fairly ancient northern practice, which combated the cold by exploiting the natural insulation afforded by the earth. These rooms normally contained the family hearth. The Rus’ penchant for beautiful colours, saw them embellish their houses, boats and temples with grandiose and precisely executed murals, most wonderful to behold. Many painted their shingled roofs red. Indeed the Rus’ word for “beautiful”, *krasiviy*, was derived from *krasniy*, meaning “red”.

CRAFTSMENS’ DWELLINGS

Craftsmens’ dwellings followed the northern izba design but had a small adjoining room which served as a workshop or shop front, and sometimes they even had a holding yard to house livestock or a client’s horse.

AFFLUENT DWELLINGS

Multi-storeyed constructions, complete with balconies and porches were not unknown in pagan Rus’ and were frequently found on rural estates or within the bounds of a city’s mercantile quarter.

STOCK YARDS

In the towns, cities and villages, most homes had their own adjoining fenced yards, to keep stock from wandering off, and to keep them under constant surveillance (for fear of thieves). These were usually in the form of rail and picket fencing, a style that is still in use throughout Russia today.

HOUSING ON THE STEPPES

With timber in such short supply, the southerners preferred to use the semi-sunken *khata* construction method. These were square or circular huts founded on a pit dug roughly a metre or more into the ground. The ground level edge of the sunken home was built up with stones or other available materials. A central support post was erected and roof support beams radiated outward from this post and were attached to the above ground wall section. These were then covered in thatching. Wattle and daub homes existed there also.

MARSH HOUSING

In marshy areas sunken rectangular huts were built with clay walls and floors on the highest possible ground to escape flood damage. Ovens and food storage areas were also made of clay composite materials.

I will now put forward an imaginative reconstruction of what typical Slav households looked like during the Middle Ages based on archaeological finds, folklore, history and ethnographic analysis. Since rural Russian life in much the same as it was 1,000 years ago in certain respects, with women weaving or embroidering similar folk designs and patterns, and men in some places building corduroy roads and homes like the Mediaeval Russian, the

reconstructions can be marginally tempered by ethnographic analogy. For example vessels and household utensils from the Persian Achaemenid period were produced in a simplistic manner using stone and clay, but were enlivened by crafting handles in the form of birds and animals.¹⁴⁹ Where they excelled in particular was the production of carved seals, plus exquisite metal work, to be worn as jewellery, or to adorn the dinner table.¹⁴⁹ The latter luxury goods were embellished with animals and balanced aesthetic geometric designs.¹⁴⁹ In these connections, we can draw immediate parallels not only with Slavic goods, but Germanic, Scandinavian and Celtic handcrafts. As in Persia, Slavic jewellery and artifacts featured horses, duck beaks, and webbed feet.

SLAVE QUARTERS

People of such low status could never own their own living quarters and instead were accommodated in an area set aside by their master for their billeting. This would be in an isolated corner of the house, in a stable or in a separate building, apart from the master's abode. Not being legal people, slaves had very little discernable furniture and would make the fullest possible use of buckets, firewood and the like as tables and seating. They used straw and thatching as a comfortable sleeping mattress and covered themselves with sacking or old cloth and bark during the sleeping hours. They relied greatly upon the body warmth of other members of their family group, especially during the colder months. Although this built close bonds between them it created health problems such as parasitic infestation.

Slaves received their weekly rations by their owner. This usually consisted of oats, wheat and various vegetables. They supplemented this meagre food allotment with small game like rabbits, pigeons or whatever they may have caught outside their working hours, together with berries, nuts or a vast array of vegetables that could be found growing in the wild. This food usually took pride of place within their living area, located in a relatively clean place for all to see. It was not uncommon for slaves to steal more than their given quota of food from their master and it would always be hidden in a safe place, secure from the prying eyes of their owner.

The main living area usually had a pounded dirt or clay floor, though a scattering of straw would be scattered about if they had it to spare. These people had a small cooking hearth as their main source of light and utilised small chips of lit wood (usually pine wood) as makeshift candles. Often under such unremarkable living conditions, the slaves sought to beautify their otherwise drab surroundings with various handcrafts. Such artworks usually consisted of toys and statuettes, whittled from wood, carved utensils and smallish tapestries.

Spindles could always be found in a slaves quarters, since the women were required to turn out a predetermined quantity of flaxen or woollen cloth monthly for their master, and their own personal use.

Slaves were never allowed to own weapons, nor would they be permitted to bear arms, even during a raid on their village. A slave's living area was often littered with farming and cleaning utensils, as well as pans and pots for their master's cooking. Slaves might have had a pet cat, or bird perhaps. Most of their clothing could be found folded in certain corners of the room and if they were lucky, they might even own a small handmade wooden box to hold their few personal possessions.

PEASANT HOUSING

The peasantry formed the bulk of the village folk; they were free, yet their financial status was such that they did not have the means to live a life independent of land owners, chieftains or boyars. Although they received a small amount of payment in the form of extra food, coins or beads, they probably fared little better than the average slave financially. Peasants lived in quarters that had been allotted to them by their boss, and usually shared that accommodation with another blood related group of peasants. If need be, they would be told to share with strangers.

THE SLEEPING AND LIVING AREA

A large clay or stone oven with a flat top was prominent within the room, and in it most of the baking was done. The oven was the most precious thing they owned. Not only did it harbour the fire of god and the spirits of their ancestors, but it served as a sleeping platform during the long drawn out winters and allowed them to benefit from the warmth that permeated through its walls. Normally though, they slept on sturdy racks built onto one wall of the dwelling, or on benches arranged about the stove. Peasant women took great pains to ensure that the fire was stoked at all times, not only to keep warm, but to ensure that the Domovoi (which lived at the back of the oven), and the

spirit of the Creator, did not leave them forever. There would also be a large table and bench chairs capable of seating a family, which had been crafted from logs. Most of the family's activities occurred in this room, where mother or grandmother spent much of their time at the table preparing food for the hardworking family members, baking and so on.

Peasants had a number of cast iron pots for the cooking of stews and soups, as well as pans for the frying of bliny (Russian pancakes similar in shape to the Magian sacred Dron buns). They had knives for portioning meat, and clay or wooden bowls and plates for eating food. A poker and a small hand shovel would have been located near the main oven to ensure that the area was clean and free from charcoal and ash. There was a long spatula for taking bread from the oven and a mill stone for processing the grain before mixing the dough.

PROVISIONS

Foodstuffs might be stored in earthenware pots. As in Achaemenid Iran, Slavic and Baltic pottery was bland and unimaginative; crude even.^{149a} Peasants also had several woven baskets in their abode which contained their allotment of grain, such as millet and rye. These were used to make bread, sacred *kashlya* (porridge) or any other baked foodstuffs. The grain was collected daily from the village granary by one of the children. Peasants often ate freshly cooked fish or small game, which had been killed as the opportunity arose, and this was usually eaten that same day. Many peasants shared their extra food with other families who had none. This gift was always reciprocated when the other family had been blessed with some good catches. There would always be berries and nuts for them to eat during the warmer months, and foraging for them in the forest was often a job for the children to carry out in their spare time.

LIGHTING

Most peasants saved whatever animal fat was carved from the slaughtered game and melted it down into a liquified, waxy material, which would burn similar to a candle when a wick was inserted into it. The "candle" wax would usually be held in a small clay urn with the wick supported by a piece of wood or wire. Additional lighting was supplied by the hearth and small chips of ignited kindling. Animal fat candles threw out a pungent smoke as they burnt, and so the women made bags of lavender and other herbs to take away the acrid smell of the animal fat candle smoke. Their main room had dirt floors and the use of animal pelts as floor coverings was probably frowned upon by poorer families, since they were valuable commodities. Those who did so were viewed as being extravagant, or well-to-do by their peers.

POSSESSIONS

Women folk tried to beautify the living area, often embroidering lovely linen wall hangings if time permitted. Woodcraft items such as *matryoshki* (dolls) or painted plates and toys could be found in various states of completion also. Usually, the grandfather would spend his available time painting, making and decorating them. Wood-craft tools could be seen on a shelf somewhere. Such tools were used in the service of their landlords, and handy for home duties.

There were also buckets in which the washing of eating utensils and clothing was done. Grooming equipment such as combs and brushes saw frequent usage, particularly amongst the younger girls who plaited and braided each others hair. A bucket of drinking water with a ladle sat within ready reach of all. Usually the family owned its own goat, which kept them supplied with milk and cheese. Peasants made butter and cheese for themselves and their landlords. Peasants stowed their good clothing, jewellery and other valuables in one or more chests.

There was always a spindle and baskets of wool or flax in a peasant abode, but neither the wheel nor the wool belonged to the peasants. Women were required to make yarn for their master and then weave it into cloth if they had the skill. In return, the master allowed them to keep a certain portion of cloth for the family's use. Family members dressed in woollen and linen clothing, although the woollens were their better wear. Birchbark or bast footwear was commonplace among the peasantry. Patchwork cloaks, made from the pelts of animals the menfolk had killed on trapping and hunting expeditions were usually hung from wall pegs. These were shared by those family members who were required to work outside during winter.

There would be a number of herbs and other natural medicines in the home for use as remedies in colds and

other illnesses and infirmities. For their more complex health needs, they went to the village Volkhv/a.

Peasants were not allowed to own any weapons besides their hunting bows and butchering knives. In times of war, the *vozhd'* trained the menfolk in the use weapons, and issued them with weapons from the *vozhd's* armoury as the hour of affray neared.

MIDDLE CLASS HOUSING

The freemen, craftsmen and land holders were relatively wealthy and usually had a number of serfs in their employ, plus several slaves. They normally had a business premises (or a workshop in the case of craftsmen) which also served as billeting for the slaves. Peasant workers were provided with their own abode (where possible), rented from their employer. As a rule workshops adjoined the craftsman's house.

Although craftsmen had more money at their disposal, they were still less well off in comparison to the landowner, once raw materials and rental on offshoot properties was paid for. Landowners required their peasants and slaves to live in huts assigned to them. These huts may or may not have been within the confines of the village proper and certain groups of families were assigned to the full time care of outlying farming properties. Many of the craftsmen and landowners preferred to live in the villages or cities for their own protection. Very little cleaning equipment, tools and foodstuffs could be found cluttering the living quarters of the freeman, since the slaves were tasked with their timely removal. The freeman's sleeping area was warmed by an ornately decorated stove designed to provide a comfortable and radiant warmth. In those bigger homes they might have had more than one hearth. Each extra hearth was a sign of prestige, and required a permanent commitment to feed it. The freemen might have slept in slightly wooden beds covered by a sheepskin underlay. For extra warmth, woollen blankets and furs were used as bedding during the night. Children might normally have bedded down in another room, which was usually partitioned from the main parental living area by an embroidered curtain. A lengthy table, and a number of chairs were used to seat guests upon their arrival. Numerous well crafted shelves adorned the walls.

At supper or mealtimes, metal bowls of berries, fruit, cheeses, sausages and meat were placed on tables for freemen to sup on. Carafes of wine and mead stood on the main table. Lighting was plentiful, in the form of wax candles, which were held in clay candle stands of various shapes and descriptions. Slaves ensured that wax drippings were cleaned away daily. Some houses might have had a time candle burning, which was changed by slaves every three hours. Pieces of art decor graced various parts of the house; perhaps bronze or brass statuettes of various description, paintings or colourful wall hangings. There would normally have been a large brass or ceramic water urn and ladle for the whole family to drink from. Most of these families had a dog for security reasons and maybe a pet bird. Chests were used to hold the better part of their finery, clothes, cloaks, boots, belt, etc.

In a heathen household, there was probably a small shrine dedicated to one of the gods. There you would find small carved *bolvany* of their ancestors, or even a modestly sized effigy of their family's *prashchur'* (patron god or ancestor). Christian homes would sometimes have had an icon reverently placed in a prominent corner, but at the very least there was always a cross, or other similarly blessed items inside. Floors were normally boarded and covered with woven carpets or bear skins.

The menfolks' personal armour and weapons were kept either on a wooden stand or in a chest, and a sword and shield hung ever ready on one wall, to greet unexpected attack. Freemen normally had a good saddle placed carefully in one corner of the house together with harness and reins, and a favourite hunting bow and quiver of arrows was slung unstrung from wall pegs.

MERCANTILE LIVING QUARTERS

Merchants enjoyed an opulent standard of living, and had most of the perceived mod-cons at their disposal, like carpets, perfumes and glassware. Their lives revolved around administrating their personal wealth and affairs, and officiating in matters pertaining to their public office. Furnishings were numerous and they had a number of tables and chairs crafted from expensive imported woods. Usually, their beds were extremely comfortable and sure to be draped in fur blankets and linen or silken sheets of the finest handwork. They had several hearths, one of which was used solely for cooking. Sometimes the wife was responsible for the cooking of foods, instead of slaves and peasants, since the risk of being poisoned by one's competitors was very real. Merchants' tables were often well stocked with many exotic fruits, vegetables and meats which they used to tempt the taste buds of guests. Any type of alcoholic beverage you care to name could be found in well-topped silver carafes. Guests drank only from silver goblets in

their company. Weapons and armour of fine craftsmanship could be found adorning the walls of a merchant's feast area.

UPPER CLASS HOUSING

The astonishing living quarters of the chieftains, boyars, the royal family, princes and the Grand Prince were usually laden with wealth and affluence largely undreamed of by the vast majority of people in olden Rus'. Their massive entourages of slaves and peasants added further to their lives of excessive indulgence, allowing them to partake of finer things, such as education, politics and history, or sports, like hunting and racing. Their study area usually accommodated the scribe's account ledgers and records, and perhaps held hand written books or stacks of wax tablets on diverse topics.

The average wealthy home had several hearths designed to heat the rest quarters throughout to perfection. These stone hearths were of fine craftsmanship, intricately chiselled with a plethora of diverse motifs which were probably the subject of many a discussion during the entertainment of guests and consuls.

Their beds would usually be fashioned from the rarest woods, perhaps imported from as far afield as China and India, and embellished with exquisite carvings. Mattress were usually of goose-feather stuffing and covered by skillfully embroidered silken sheets spun from the silk mills of the Chinese Empire. Massive sable pelt blankets provided luxuriant sleep with heavenly warmth. Even in their sleeping quarters it was possible to find a great table hewn from interesting timbers, fashioned with great care. There were seats aplenty also, covered with sumptuous materials brought in from the looms of Bokhara or Samarkand.

Somewhere in the main dining area was a pitcher and bowl filled with washing water. The washing bowl was hammered from either silver or gold and perhaps inlaid with gems. During pagan times such bowls were receptacles for water from the holy springs, which they could use to wash away their defilements. Jugs of wine and mead could be found interspersed throughout the household, together with silver trays, goblets, eating bowls, finger bowls and the like. Food of every description was placed at strategic areas about the house, and meals but a finger snap away. Large wall tapestries adorned most walls and, as a rule, they depicted the greatest feats and adventures of the master of the house. Silver edged wall mirrors catered for the vanity of the family and guests alike. Tapestries were the work of either skilled slaves or peasants under their employ. There would always have been a silken entry curtain at the entrance to their seductively scented sleeping quarters. Statuettes of all shapes and sizes were ostentatiously displayed along the walls and on tables. A typical heathen household might have had battle or hunting scenes, and griffons, horses, dragons or other creatures depicted in wall reliefs. Rich folk would most likely have commissioned a Bolvan to stand watch over the inside their main living area, made of carved and inlaid wood, or polished stone. In a Christian household an icon of considerable value was placed respectfully aloft and small pictures of other saints were situated in some corners of the house.

The floor was normally of highly polished wood, carefully maintained by slaves. Several bearskin or arctic fox skin rugs would have been used to cover the floor, or perhaps even some fine Persian rugs.

The master of the house had his favourite armour, weapons and shield stored in a neat and orderly way upon a stand in the sleeping quarters. He took pride in his falcon and favourite war dogs, which would have roamed freely about inside. Falcons usually perched in the main eating area of the house. In pagan families that firmly adhered to the rites of the Magi, these dogs and falcons also had funerary applications for the high born.

Taxes

As is evidenced by the following passage, Aryan kings had a birthright and duty to levy taxes from their subjects, and re-directed the monies towards projects of their choice, with the aim of fortifying the societal infrastructure of their realm.

"As the leech, the calf and the bee take their food little by little, even so must the king draw from his realm moderate annual taxes".⁴²

SECULAR TAXES

From the moment of Rusia's foundation, the Grand Prince or Khagan required large-scale funding to construct

a workable government. These monies came from two separate areas. By far the greatest level of finance was gathered from each tribal prince, who was required to supply given quantities of men and equipment for the Grand Prince's service. The petty Princes in turn obtained much of this wealth by subjecting their subjects to further taxation, or via business dealings.

The principle tax was the Velikiy Knyaz's *Polyudie*. The *Polyudie* was a pre-945 AD Winter hearth and plough tax introduced by Ol'ga, set at 1 silver grivna. Tax collectors started levying the tax around November, and supplied each person with a wooden tally showing that they had paid their silver to the Grand Prince. The higher ranking Rus' citizens were exempted from having to pay the lesser tax. The Velikiy Knyaz' also earned further revenue via the toll bridge or ferry tax, the river tax (which was applied to all vessels journeying south to Tsargrad), the fur trapping tax, the loot tax (which was a certain proportion of a soldiers war booty), and the Inn tax (which was a surcharge on lodgings).

The custom of paying a portion of your booty to one's military leader was observed in pagan Rus', and is probably traceable to Aryan times. Consider the following Aryan text;

"Chariots and horses, elephants, parasols, money, grain, cattle, women, all sorts of (marketable) goods and valueless metals belong to him who takes them (singly) conquering (the possessor). A text of the Veda (declares) that (the soldiers) shall present a choice portion (of the booty) to the king; what has not been taken singly, must be distributed by the king among the soldiers".⁴³

The Legal System

ARYAN LAW

In the *Law Books of Manu*, the *Narada* (which were recorded in Sanskrit only between the 5th-6th Centuries AD, but encapsulated the pre-existing orally transmitted laws) we find the essential features of Aryan law. Being Aryan, the civilisations of the Hittites, Hurrians and Mitanni would also have followed the same if not similar laws. Whether this differed from Vedic Aryan law of the 1st to 2nd millennia BC is uncertain. As it turns out it is very much like the law systems still in use today. Aryan law reflected the "superior" nature of their people, and their domination of weaker races.

"Men of the Sudra caste (ie; the low-born), who proffer a false accusation against a member of a twice-born (Aryan) caste, shall have their tongue slit by (the officers of) the king, and he shall cause them to be put on stakes".⁴⁴

Law was above all a manifestation of the truth, which was the highest form of existence.

"If truth and a thousand horse-sacrifices are balanced against one another (it will be found that) truth weighs more heavily than a thousand horse-sacrifices".⁴⁵

ARYAN PERJURY

For the Aryans nothing was more heinous than the act of false witness, especially during a law trial. Not only would it see you worthy of damnation, but it could consign your deceased ancestors to the flames of the underworld, to share in your punishment.

"Speak truth and discard falsehood. It is through truth that thou shalt attain heaven. By uttering a falsehood thou wilt precipitate thyself into a most dreadful hellish abode.

And in the hells the merciless attendants of Yama, endowed with great strength, will cut off thy tongue and strike thee with swords; constantly. And attack and pierce thee with spears, while thou art wailing helpless. When thou art standing, they will fell thee to the ground and fling thee into the flames. After having sustained thus for a long while the acute tortures of hell, thou shalt enter in this world (reincarnated in) the horrid bodies of vultures, crows, and other (despicable creatures).⁴⁶

"Thy ancestors are in suspense, when thou hast been appointed to give evidence (reflecting in their minds): Will he conduct us (into heaven) or will he precipitate us (into hell)?"⁴⁷

MAGIAN PERJURY

The Magi were similarly concerned with the preservation of truth's purity. Disreputable behaviour was intolerable by any citizen, much less the judges, who were to be above reproach. For this reason King Cambyses strove to maintain orderly conduct among his judges in particular. In one case he had a miscreant law-man bashed to death and flayed. Thereafter his skin was used as a covering for the seat of judgement that he formerly sat upon, and upon which his son was to sit.⁴⁸ In Sassanian times, the Magi were granted the highest positions within the legal system, within which they acted as judges. Then as now contracts formed the backbone of the civil and judicial system and were extremely elaborate, possessing six forms.⁴⁹

One of the most common legally binding agreements among the Magians was the "word contract". A verbal contract was more than sufficient to seal most undertakings, for to break such a compact, was the worst conceivable transgression against God's law, which is the truth. One shudders to guess the dire penalties inflicted on the oath-breaker.

"Which is the the worst of the sins that men commit?" The good, beneficent Ahura Mazda answered, "There is no sin worse than when a man, having given his word to another, there being no witness but myself, Ahura Mazda, one of them breaks his word and says, I don't know anything about it there is no sin worse than this".

They also had the "hand contract" (a spoken contract which is sealed by a sign such as a handshake), the "Sheep contract", the "Ox contract", the "Man contract", and the "Field contract".⁵⁰ For Magians this field contract was the most formal of official agreements. We do not know to what extent it might have resembled the Russian custom of solemnising certain contracts by placing a sod of field earth on once's head.⁵¹

The horror attached to breaking any one of these contracts lay not so much in the fact that it was unlawful, but that the souls of all your kinfolk up to 9 times removed would suffer in hell for between 300 and 1,000 years.⁵² Sinners were called Peshotanu, or in other words those who must pay for the crime with their own body, *which was offered to the Magi to be flogged or wounded in accordance with the law.*⁵³ For example;

"The very first time when that deed has been done, without waiting until it is done again.

Down there the pain for that deed shall be as hard as any in this world: should one cut off the limbs from his perishable body with knives of brass, yet still worse shall it be.

Down there the pain for that deed shall be as hard as any in this world: should one nail his perishable body with nails of brass, yet still worse shall it be.

Down there the pain for that deed shall be as hard as any in this world: should one by force throw his perishable body headlong down a precipice a hundred times the height of a man, yet worse shall it be.

Down there the pain for that deed shall be as hard as any in this world: should one by force impale his perishable body, yet still worse shall it be".⁵⁴

They had extensive legal texts intended to clarify points of law. For instance the *Nikadum nask* contained a thorough treatment of assault, and its many and varied forms, and the atonements.⁵⁵ The Magi also treated non-believers differently in their court system.⁵⁶ They were as unlikely to receive a fair trial under the Magi as any pagan would be under a Muslim or Christian court system.

Russian law

Until the formulation of the first recorded set of uniform Russian laws, that would apply to all of the Rus' tribes (called the *Russkaya Pravda*, literally "the Russian Truth") in 1036 AD, the right to judge, sentence and punish a man was carried out in the village *Veche* forum, or the area in which the offense was committed. Every legal case was presided over by a Volkhv judge and a prince or chieftain, in unison with the law-speaker. From one Arab account, we learn that in pagan times, the Volkhvy wolf-Magi were known to have served primarily as the judge, jury and executioner.⁷³ They not only sentenced but hung law-breakers. Wolf-Magi were also found among the Balts, as judges and punishers. If stories of the Livonian (Baltic) werewolves are true, then these wolf-priests employed

scourging rods,⁵⁸ to paint defaulters with the bloody redeeming stripes left by the blows.

Further clues to the origins of pagan Russian law can be found in the Old Russian word for “the Law” (*zakon*), a word similarly employed by other easterners/Central Asians such as the Khazars, Magyars and Pechenegs, as well as residents of the Medieval Balkans and Eastern Europe like the Serbo-croats, Bulgarians, Czechs, Poles, Slovenians.⁵⁹ The question of why Christian authorities chose to call their newly promulgated laws “The Russian Truth” needs to be examined, because the terminology seems heavily steeped in Aryanism and Magianism, despite the fact that it was coined during the Christian era. For instance the Russian word for “an oath”, *rota*, stems from both Avestan and Old Indian words,⁶⁰ thus signifying that its original meaning may subsist within Aryan (Vedic or Avestan) Law.

Though they were formed independently of each other, Vernadsky noted the existence of many similarities between Slavic, Saxon and Germanic law. He attributes these likenesses to “*general conditions of life, in social organisation, as well as in tribal mentality at a given stage of the historical progress of each of the two ethnic groups, rather than that of a conscious imitation on the part of either of them*”.⁶¹ In my opinion there can be little doubt that these similarities were ancient indeed.

Further evidence for the pagan origin of Russian law can be established by comparing Magian and Aryan law codes with the amended pagan laws drafted by the Russian Church, of the post-conversion Kievan Rus’ era. In the case of Iceland the especially heavily regulated laws are symptomatic not of barbarians, but a highly moralistic pagan society, one in every way intent on justice and fairness.

RUSSIAN LAW DURING CHRISTIAN TIMES

Christian Rus’ had two kinds of judicial system; one the secular courts (where civil and criminal crimes were tried by secular lords) and the other the Ecclesiastical courts, (in which priests, or more likely bishops presided over religious crimes which presumably included heresy, but mainly ‘crimes against the divine majesty’, such as promiscuity, giving birth to bastards and so on). For instance, in Russia, witchery, sorcery and varied pagan superstitions were subject to articles contained within the Church’s *Nomokanon*, otherwise called the *Kornchaya Kniga*, “The Rudder”.⁶³

At the head of the judicial system was the Grand Prince. His role as the primary judge in the land is found echoed long prior to that in the law codes of the Aryans

“Therefore let a king, after having seated himself on the judgement seat, be equitable towards all beings, discarding selfish interests and acting the part of (Yama) Vaivasvata, (the judge of the dead). Attending to (the dictates of) the law-book and adhering to the opinion of his chief judge, let him try causes in due order, adhibiting great care.....Avoiding carefully the violation of either the sacred law or the dictates of prudence, he should conduct the trial attentively and skillfully. As a huntsman traces the vestiges of wounded deer in a thicket by the drops of blood, even so let him trace justice”.⁶⁴

In the period following Vladimir’s conversion, he made every endeavour to make his reign one of Christian clemency and beneficence. *But due to his soft and forgiving approach towards wrongdoing, the level of lawlessness and banditry grew out of all proportion.* The Bishops incited Vladimir’ to meet the robber bands head on, and punish whomsoever had been apprehended for these crimes, but only after they had received fair trials under the law. As a result of this request, Vladimir’ determined his own course of action in solving the problem; his independently concocted solution was to abolish bloodmoney (the *weregild*), then, as suggested by the bishops, to gather armed forces and pursue the brigands.⁶⁵ This account is an extremely important one, for not only does it reveal the role played by bloodmoney in the law enforcement process of the pagan Rus’ legal system, but that it possessed a religious basis, rooted in Magianism.

But against this, the Old and Middle High German terms for “blood money” were *wergelt*, the Old Icelandic *verr*, the Gothic *wair*, the Latin *vir*, the Latvian *vyras*, the Old Russian *vira*, all of which intimate that the money is in compensation for the loss of a man, and all of which ultimately stemmed from the Old Indian word *viras* (meaning “a man” or “a hero”).⁶⁶ This would mean that its roots lay in Vedic lore.

You see, lawlessness spiralled out of control in the years following Vladimir’s conversion for two main reasons. One was his apprehension that physically punishing the criminals would have compromised the most cherished tenets of his new faith. This the Christian priests put to rest by explaining that he had a god-given duty to bring to

justice and punish unrepentant malefactors, and to show mercy against the righteous. Thus he resolved to act against the criminals. But now the only thing standing between the bandits and their physical punishment was the bloodmoney. Since bloodmoney had been present in the pre-conversion era, it would be amiss to suggest that criminals went unpunished during those times, but much rather they could escape physical punishment, and walk free, simply by paying a portion of their loot to the prince and the aggrieved family. The number of bandits running about the countryside unpunished *was therefore caused by the existence of the blood-money payment*. Criminals could easily and legitimately escape physical punishment for their crimes by paying the requisite fee or fine in reparation. Vladimir's decision to ban blood-money, was re-fashioned by the priests, who recommended he bring it back in, so that the money which came to him through the payment of fines could be directed towards procuring weapons and war horses to fight against the Pechenegs and other heathen enemies, then swelling in great numbers on the steppe.

Bloodmoney permitted a killer to walk freely if he paid a blood price to the Prince (this portion of the fine was the *Vira*) and the family of his victim (the family's compensation payment was known as *Golovnichestvo*).⁶⁷ Whether the exact circumstances under which *weregild* was payable varied under pagan and Christian Russian law is impossible to say, certainly there were provisions for family vengeance, which would have been sought on many an occasion. During the early conversion era it is plausible that only a handful of crimes might have been punishable by death, and fines the norm. But, following the reign of Vladimir' the courts which the Church ran, which were convened in addition to the secular courts of the princes, started to countenance harsh punishment for transgressions of the law, by resorting to the old pagan punishments then current in the secular law system, including trials by ordeal (dunking, trial by combat, the carrying of red hot iron), whippings and massive fines. In a Christian village, the local *svyashchennik* or pop would help adjudicate in matters where the Church had been affronted by sins of a very serious nature. Death sentences and serious penalties (once handed down) were usually enacted by the secular authorities.

The *Chronicle* goes on to suggest that, with the reinstatement of the *weregild*, Vladimir' *returned to the mechanisms of law practiced by his forefathers*. This tells us that the legal system of the early Russian Church was in all likelihood based on the old pagan law codes. The case was much the same elsewhere. When Ireland converted from paganism, St Patrick sat on a council which examined the pagan laws to determine which laws were in accordance with the Christian faith, and which were unacceptable. As a result of this the laws of post-conversion Ireland were slightly amended, but largely the same as what they were in pagan times. The Christian laws, as contained in *Senchus Mar*, were supposed to have been composed by the mystical utterances of God's Holy Spirit, but revamped by St Patrick to make them more applicable to a Christian community.⁶⁸ Macalister regards this recollection of the Irish law's genesis as utterly profane, since the laws were essentially of pagan origin, and wrongfully attributed to the Holy Spirit by the dangerously misguided scholars of the past. That Christian law in Ireland began life as pagan law is not in doubt. But an alternative explanation is that these were Aryan/Indo-Iranian legal codes first devised by *Spenta Mainyu* (ie; The Holy Spirit), but which had to be vetted and manicured by St Patrick to more faithfully reflect the values of the Apostolic and Catholic form of Christianity. Comparing Magian and Christian law we can guess that the number of changes required would have been relatively minimal. Indeed St Patrick deemed only a few changes necessary. Bearing this in mind we will now examine some of the law processes in force according to Magian and Vedic law, and which may well have proved to be the basis for Mediaeval law in Russia, both before and after its Christianisation.

PENALTIES

A number of the penalties listed below, like whipping, monetary fines, and more especially the ordeals of combat and hot iron seem related to penalties and judgements listed in the book of Aryan legal codes known as *The Law Books of Manu*, or *The Vendidad* which was a law canon of the Persian Magi. Bodily mutilation were probably preformed in Russia, as they were in Western Europe, during both pagan and Christian times. Many pagan laws continued on into Christian times. This was certainly the case in Ireland, where St Patrick and other clergy chose to retain much of the old druidic legal system, but with slight modifications that would make it more palatable to the Church.⁶⁹

According to the Aryans "the Law" was inviolate, and offenders could expect a rendezvous with the King's punishment as a consequence of their actions. Punishment was therefore extremely harsh, because it held Aryan

society together; and thus the infliction of grievous punishments came to be seen as extremely holy. Yes, punishment was a holy act, it purified the body.

“Punishment is (in reality) the king (and) the male, that the manager of affairs, that the ruler, and that is called the surety for the four orders obedience to the law. Punishment alone governs all created beings, punishment alone protects them, punishment watches over them while they sleep; the wise declare punishment (to be identical with) the law. If (punishment) is properly inflicted after (due) consideration, it makes all people happy; but inflicted without consideration, it destroys everything. If the king did not, without tiring, inflict punishment on those worthy to be punished, the stronger would roast the weaker, like fish on a spit; The crow would eat the sacrificial cake and the dog would lick the sacrificial viands, and ownership would not remain with any one, the lower ones would (usurp the place of) the higher ones. The whole world is kept in order by punishment, for a guiltless man is hard to find; through fear of punishment the whole world the enjoyment (which it owes)”⁷⁰

BANISHMENT

During a typical banishment ceremony, the village was called together to witness the expulsion, which has previously been discussed. This public sentencing was designed to let the townsfolk recognise the offender, or to humiliate, or say goodbye to whoever was being disowned by the clan. This assembly of onlookers then proceeded to chase the person from the settlement at great speed, armed with weapons. If the banished person was ever captured in the area from whence they had been expelled, the locals would arrest, try, punish and perhaps even execute the offender. It is highly likely that they were tattooed or suffered partial bodily mutilation as a visible sign that they were a banished soul.

THE DEATH PENALTY

Under Magian law criminals might be handed over to a Magus for execution, or to a warrior to be slain with arrows. In Rus’ the situation is less clear.⁷¹ In pagan Rus’ if a plaintiff was unable to avenge the victim’s death, then the Volkhv or chieftain would choose the manner of execution. During St Vladimir’s reign death penalties were commuted to banishments, but shortly after his death, capital punishment was restored. A person could suffer strangulation, hanging, beheading, be burned alive, be buried alive, be flayed alive, be gutted, or even drawn apart between two horses or trees.

The Russian Church probably burned a large number of people at the stake for religious crimes. But whether it ever reached the heights of the great witch burnings throughout the various dioceses of western Christendom, is unclear due to a lack of documentation. Certainly there would have been infinitely more pagan priests in Rus’ than in Western Europe. Apparently it was quite easy to “get cooked” in those days ... St Avraamij of Smolensk only narrowly avoided death by fire, just for reading the “forbidden books”.⁷² White Magian retribution against criminals was often swift and pitiless; frequently it permitted the immediate lynching of brigands and other serious offenders, or worse.

“it is necessary to practise great abstinence from committing theft and seizing anything from mankind by force.” “And if he shall steal three dirhems and two dangs, it is requisite to cut off his right hand. If he shall steal five hundred dirhames, it is requisite to hang him”.

“And if, on the spot where people capture him, he makes it convenient to return four things in compensation for one, when they have fully understood, as they capture that person who is committing highway-robbery, that he makes it convenient, they may kill him at once.”⁷³

MONETARY FINE

For some offenses it was the custom that money be paid as compensation to each party. Part of the money was given to the chieftain, whilst the remainder was passed on to the victim or victim’s family, before the court. After 989 AD, 10% of fines went to the Church and 90% to the Knyaz’. A small portion of the prince’s fine monies collected might have ended up being shared with the local druzhina members, the local chieftains, or town Veche. All fine monies were retrieved from the offender by a *Vernik*, or blood money collector.

DISFIGUREMENT

The Aryans thought nothing of bodily mutilating criminal offenders as both a punishment for the transgression,

and a deterrent to other would-be sons of lawlessness.

“Manu, the son of the Self-Existent, has declared ten places of punishment, which should be (selected) in punishing members of the three (lower) castes; a Brahman should remain uninjured always.

*(Those places are) the privy parts, the belly, the tongue, the two hands, and, fifthly, the two feet; as well as the eye, the nose, the two ears, the property, and the body. After carefully considering the (nature of the) offense, the place and time, and after examining the ability (of the offender), and the motive (by which he was actuated), he shall inflict these punishments”.*⁷⁴

Mediaeval penalties were very, very harsh, and probably followed Aryan precepts, at least conceptually. Under certain circumstances part of the convicted criminal was to be hacked off or mutilated as a permanent reminder! People were blinded by the use of a red hot iron rod, their tongue could be cut out, or hands, ears or feet lopped off. Very often the *Knut* (a very heavy whip) was the primary instrument of justice.

AN EYE FOR AN EYE

The plaintiff was permitted to commit the same offense as was committed in the first place to the guilty party, or hand-picked kin. Under pagan Prussian law the only remedy for a murder was a revenge killing on the perpetrator, or one of their kinsfolk.⁷⁵

IMPRISONMENT

Pagans often imprisoned wrong-doers. The most celebrated of the Magian penal detention centres was the so-called “*Prison of Oblivion*”. Whomsoever went there would languish until their death, and to even speak an inmate’s name in the outside world merited death. The *Nikadum nask* mentions holding pits containing serpents, where the number of snakes was altered to suite the heinousness of a convict’s crimes. Considering Boniface’s description of the Christians held captive by the Wends, the Western Slavs certainly did so, and via linguistics we might guess that Russian pagans were partial to it also. Vasmer believed that the Russian word for a jail *Tyur’ma* came from the Old French *Torn*, in opposition to the Altai, Kirghiz and Tatar word for a prison (*Turmo*).⁷⁶ Whether their prison pits were modelled on French variants or cruder Turkic holding pits is therefore difficult to determine. Even during the Christian era of the 1200’s, pagans were so prolific in Russia that they kept the priest Avraamij of Smolensk incarcerated for three years^z (without any hope of rescue). This was in retribution for his attempts to chop down some of their idols which were still in public use some 200 years after Russia’s official conversion. Avraamij only escaped by successfully converting his captors. Such a desecrater would normally have been executed by pagans, but as in the case of the Frisian King Ragobod, perhaps they cast lots for his fate, which returned a verdict that he should not be killed, but imprisoned.

During the Christian era heretics were often cast into a pit and subjected to repeated refutations of the heresy espoused, until final recantation was achieved. During this period of interment, the prisoner would be held in irons and fed bread and water, if lucky. No recantation was to never see the light of day. A certain proportion of Russian heretics would have been burned though.

RITUAL SACRIFICE

In pagan times criminals were handed over to the Volkhy and hung by the neck from the bough of a grove tree. Others were taken to a forlorn peat bog, draped over a black rock, and sacrificed to dyemon gods, or simply drowned in the bog.

ORDEALS

Under Vedic and Magian law, defendants and accusers could undergo an ordeal to prove their innocence, or the truth of their claims. No jury was required, for this trial method relied solely on the belief that god would pronounce judgement during the trial ordeal. It was believed that nobody false could survive the ordeal without damage to themselves. In Magian society ordeals were witnessed by the high priest, who stood near the place of ordeal uttering prayers and spells for the efficacy of the event. The most common Magian ordeals were the Ordeal of the Sacred Twig, the Ordeal of Heat,⁷⁸ the Ordeal of Over-eating,⁷⁹ Ordeal by walking on a water-filled bladder

containing instruments of wounding,⁸⁰ and the Ordeal of cold.⁸¹ The barsom or heat ordeals were recorded in the *Nikadum nask*.⁸²

The trial of hot iron is better described in the Aryan law codes. A ball of metal was heated by a smith, leaves were placed on the defendant's hands, and he was to carry the incandescent iron a full nine metres. By some coincidence the Old Norse trial of hot iron was roughly similar, and required the person to carry the iron nine paces. The hands were examined for scarring, which served as god's verdict.

It was a belief of the Aryans that one who is unjust, or untrue could not win in battle. To this extent an ordeal of arms might be sought as a remedy for injustice. During a trial by arms the plaintiff and the accused faced each other in mortal combat, at a place predetermined. The winner was assumed to be the one who was victorious, since Perun or God had judged in their favour. It was also a Magian custom that a man could take the goods of another, and proclaim to be the new owner of those goods if he underwent an ordeal of combat and came through unscathed.⁸³ This reminds me of the Norse duellers who made a living by seizing other people's goods and then meeting them during an ordeal of trial by arms. If they won, they legally got to keep whatever was at stake. In such a way the acquisition of those goods was not illegal, though perhaps morally questionable.

The white Magi maintained that the heat ordeal was best suited to trials concerning witchcraft, or circumstances in which a person was gravely suspected of a crime, for which his accusers had no compelling evidence.⁸⁴ Similar ordeals survived the transition to Christianity, and continued to be used by Christian authorities, especially in witch trials. However *Malleus Maleficarum* provides cautions saying that witches have some way of coming through the ordeal unscathed. In the West, during the Christian era, consecrated baptismal water was employed in Trials by Ordeal, where the water itself would declare the drinker guilty or innocent. The Ordeal was a legal trial also performed by both the Aryans and Magi, during which the accused was placed before the scrutiny of the gods rather than the judgements of a mere jury.⁸⁵

If guilty the water condemned the accused (perhaps by afflicting the offender with misfortune or sickness). The notion that holy water was capable of dealing out punishment to wrongdoers can be found engrained into the Magian psyche, as is evidenced by the Iranian scriptural passage on p. 455. Dunking was another Ordeal method. But ultimately the original Aryan Ordeal of Water required the accused to enter the water. Next an archer fired 3 arrows into the distance, and at that moment the accused submerged himself beneath the water. At that the archer dropped his bow and ran off to find the second arrow, then ran back to where he fired the shot, with the arrow in hand. If the person was still submerged in the same spot by the time the runner returned, then he was innocent. Much the same rational applied during witch dunkings. If water, which was pure, rejected the witch due to her unholiness, then she was guilty.

Land

CLAN LAND

The exact dimensions of clan land holdings were usually well known to the local populace, and were often delineated by markers such as tree scarring, ploughed ditches and rocks. The Aryan texts state that boundaries should be marked off by burying broken pottery sherds along the boundary. Where no physical markers existed, the local clan elders provided the solutions for any land disputes. Each portion of clan land was owned by a specific family, who normally resided in a fortified homestead. Families were charged with the upkeep and protection of their land on a day to day basis, and tribal troops were brought into the area only in the event of serious transgressions by rival tribes. Any activities upon a man's land had to be with the consent of the owner, particularly with regard to felling, grazing and hunting. Local fish stocks, water ways, burial mounds, peat and iron ore deposits might have been common reasons for feuds.

TRIBAL LANDS

Clan land holdings collectively formed what was known as tribal land. Chieftains and tribal bodies were responsible for resource management and resolving grievances of a more serious nature arising between feuding families. The centre of tribal lands was always a fortified city known as a grad.

PRINCELY LANDS

The major city of every tribe had a petty prince, or someone of equivalent status, loyal to the dynasty of Rurik, as the head authority. The walled city-states of Kiev and “Novgorod the Great” were esteemed above all others; Kiev exceeding Novgorod in prestige, wealth, food and power. Only the greatest princes could ever have hoped to share in the inheritance of their immense might.

TMUTOROKAN

Tmutorokan was situated across the sea from Cherson in the Crimea, and was once home to Alans, Jews, Goths, Bulgars and Ros. Though ruled by a senior Rus’ prince (Khagan), it was not Rus’ tribal territory strictly speaking, but rather land shared with their former Roxolani allies, to allow the business of besieging Tsargrad to continue. There you would find militarily cooperative Alanic folk, with small cultural groups of Goths and Khazars, not to mention a permanent garrison of Rus’ Druzhina infantry many thousands strong, and their families,⁸⁶ plus several thousand well paid Pecheneg mercenaries and a few hundred Bogatyr’s. Tmutorokan was a centre of religious tolerance, containing synagogues, the greatest College of the Volkhvy, and the first Christian archdiocese of the Russes. How diverse could you get. The location was moreover strategically vital to the Rus’ since it blocked any unauthorised entry into the Sea of Azov and hence the great Rus’ rivers.

Trade

In the year 648 BC Babylon produced yet another first, one with which we are still familiar, commercial banking groups and pawn stores. Some commentators believe the funds managers in question were Jewish based upon the family names Iranu and Egibi. Traditional Persian lending practices with respect to food and clothing were interest free, according to custom, if loaned goods were repaid within a year.^{86a}

The word for “trade” or “market” in the Old Slavonic, Old Russian, Bulgarian, Serbo-croat, Slovenian is *trg*. These words are related to other words which carry the same meaning, such as *trh* (Czech), *targ* (Polish), *turgus* (Lithuanian), *tirgus* (Latvian), *torg* (Old Scandinavian), *torg* (Swedish), *torv* (Danish), *turku* (Finnish). These are probably connected with the Mongol word for “silk” *torga*, and the Old Turkic *turku* (meaning “a stop-over”).⁸⁷ What we have here is evidence of wide scale trade contacts between Scandinavians, Slavs and the Turks of Eastern Europe, Central Asia and Siberia. These words may even betray the existence of an extensive pre-Christian trading block in the northern world. The Old Russian word for “a market” *bazar* (with the earliest written example of the word dating to 1193 AD, though it may go back even earlier) is the same as the German *basar* and the French *bazar*. These words evidently came from the Persian *bazar*, perhaps via the Turkic words *bazar* and *pazar*,⁸⁸ or perhaps directly.

Merchants usually banded together and formed expeditions. In this way they could share the cost of freight, mercenary fees and so forth. In the wake of the later treaties between the Byzantines and the Rus’, special arrangements were made with small numbers of certified merchants to make their trade journeys into Byzantium and to Tsargrad proper. Tsargrad (now called Istanbul) was a city of incredible proportions, much larger than any place a Russian could ever hope to visit in a life time. With a rough population of 500,000 its bustling streets were teeming with traders from every corner of the globe. Tsargrad was located at the nexus of trade routes from the Chinese Empire, the technologically advanced Arabic countries, Rus’ and the other Scandinavian countries, Northern Africa and Western Europe. Again, it was only as a result of a treaty with the Emperor that a small and select group of Rus’ traders were permitted trading rights there. In prior years the pagan Rus’ were simply not allowed to visit Constantinople. So prolific was the volume of trade moving through its gates that it was perhaps the economic hub of the Dark and Middle Ages. Its wealth and military might were eyed suspiciously by the envious Arabs and Europeans at every stage. Northern Rus’ traders preferred to do business in the east, in the markets and bazaars of the Volga Bulgars, which were busy with Arabs laden with fattened purses, and spice or silk merchants from the Far-east. Foreign traders of Germanic and Saxon stock also brought business aplenty to the north and east, via their small trading vessels which cruised the waters of the Varangian Sea (Baltic). Southerners

placed most of their vested commercial interests in the Byzantines to the south. Only those traders with the silver seal (and who came with plenty of furs) were allowed the right to buy and sell goods there. All Rus' traders had to leave Tsargrad by the Winter and pay duties on silk (50 golden bezants was the maximum purchase) and other goods being exported. When there, Rus' had to be unarmed and escorted by Byzantine troops at all times.

TRADE WEIGHTS AND MEASUREMENTS

The commonly used measurements in Rus' are marked*. Some were used only by craftsmen; eg; dola and zolotnik were used by silversmiths and those with lapidary skills.

MEASURE	METRIC	US/IMPERIAL	ORIGIN OF THE TERM
Chetvert*	.5 ha	1.3 acres	Old Indian
Desyatin	1.0 ha	2.7 acres	Latin, Avestan, Old Indian
Sazhen*	17.5 cm's	7 in	Slavic
Vershok*	4.4 cm	1.7 in	Slavic
Versta*	1.0 km	.6 ml	Balto-Slavic, derived from the Old Indian
Pud*	16.3 kg	36.1 lb	Balto-Slavic, derived from the Latin
Chetverik	26.24 lt	.7 bu	Old Indian
Chetvert	.54 hl	5 bu	Old Indian
Vedro*	12.3 lt	3.24/2.70 gal	Slavic
Dola	.4 gm's	.6 grains	Slavic, Scandinavian, Gothic, Gaelic, Persian
Zolotnik	4.2 gm's	.15 oz	Turkic

Metric abbreviations

ha = Hectare kg = Kilogram gm = Gram lt = Litre hl= Hectolitre m = Metre

US/UK Imperial abbreviations

bu = Bushel gal = Gallon lb = Pound oz = Ounce in = Inch ml = Mile

Some Russian, Latvian and Finnish measurements seem to have been of base 10 roots. For example the Finnish and Latvian arm rings were commonly either 100 or 200 gm's and the *desyatin* and *versta* equalled 1 hectare and 1 kilometre respectively. *In other words these pagans were using systems of measurement which closely resemble the metric system devised in 18th Century France!* There do not appear to have been any corresponding Roman, Egyptian or Greek measurements among the Rus' (except for the *Pud*) unless they fell into disuse as the years went by. The *Dola* is similar to the Persian weight measurement known as the *Tola* (used for weighing precious metals).

THE ABACUS

The Russians have had a long history of using the abacus to perform their mathematical calculations. It is unknown what year they first began using it. If they had it before the Mongol invasions then most likely it was an innovation brought to them by the Romans many centuries prior. Otherwise the abacus would have been an invention imported by the Mongol-tartars.

Currency

CATTLE MONEY

The Old Slavic *skot'* ("cattle") existed with slight variation in Bulgarian, Ossetian, Old Saxon, Gothic, Old Czech, Old Norse and Old Frisian and collectively denoted a person's wealth or means, though among the Slavs it particularly infers that large, horned cattle were their primary unit of currency.⁸⁹ A similar situation is found in the Avestan Persian *gaonem* meaning "riches" or "benefits" which has the root word *gao* "a cow", from which we get the English word *cow*.

Owing to the fact that the size of one's herds would have been indicative of one's wealth and status, the Slavs probably jealously guarded their cows from theft, by placing them in corrals and watching over them.

"When they shall sell cattle for slaughter and foreign eating, many cattle - amounting even to a diminution of the

maintenance of Iran- ...are more wretched than a righteous man forced to kill them through a living becoming unobtainable and the fear of death”⁹⁰

From the above text it is quite clear that any Zoroastrian with poor finances, or an empty belly should rather kill their own cattle for sustenance, than sell them off to foreigners not of the same faith. How is it then that Eastern Slavs succeeded in purchasing such livestock from the Zoroastrian Pecheneg hordes which had migrated into the Ukraine. This is a crucial detail, for no genuine Magian would sell a cow to a Russian if they were non-believers.

COINAGE

The Russes did not mint their own coinage until the end of the late 10th Century AD. Following the Christianization of Rus’ by Khagan Vladimir I they began stamping the first truly Russian currency, but even then these gold coins (called *zlotniki*) and silver coins (*srebrniki*) were only an imitation of the Byzantine *bezant*. Before this time, an admixture of Arabic, Kufic (Persian), Byzantine, Roman or Western foreign coinage were in circulation. Many of them had been robbed from graves or looted during the military campaigns against the Byzantines, Bulgarians and Khazars and returned to Rus’ as war booty, or had been obtained via legitimate trading in the East and at Scandinavian markets such as Birko. Western coins such as pfennigs and pennies were also brought to Rus’ with Saxon, Norse and English traders, or with pagan Pilgrims.

In pagan times other currencies were used. *The Rani used bands of linen as currency, not coins or precious metals.*⁹¹ Evidently this is a reference to bolts of linen cloth or even scrolls. If they were scrolls they may have been promissory notes. It is impossible to guess whether this was related to a Persian custom, whereby they made documents from cloth, sewing instead of writing the characters. Dirhems were the most common form of coin in use among the Rus’, many of which were struck in Samarkand, and even Sassania. *The silver dirhem weighed 2.8 gm’s, or 1/10th of an ounce.*

During the pagan era the Rus’ made two types of silver ingots for use as currency. Known as *grivna*, they were not coins as such, but silver bars, and carried no stamp or impression whatsoever. The weight of the “standard *grivna*” was more or less uniform, 68 grammes.

In Old Russian *grivna* technically meant “ring, coin, necklace”, and in the Bulgarian “a bracelet”.^{91a} Clearly they wore their metallic wealth on their person in the form of jewellery, often around the neck. Which makes it noteworthy that *grivna* was in turn derived from *griva*, which in Old Indian and Avestan Persian referred to the neck area.

It is possible a larger “trade *grivna*” existed, perhaps in the form of neck rings and torques, which would have weighed 25 times the standard weight already mentioned. I say this because the *Primary Chronicle* mentions that 300 *grivna* was the tribute needed to cover the cost of Novgorod’s entire Varangian contingent. This sum could never have met the financial needs of the Varangian troops, so I hypothesise that another *grivna* unit may have existed to account for this discrepancy. If there was a larger trade *grivna*, then it would have been used by princes and merchants for trade with distant places. However, it may simply have been that the *grivna* mentioned in the *Chronicle* were of the conventional weight, but the overall tithe sum was topped up with payment in kind such as gems or fur etc.

As you will read in the section on the white rites, the use of dirhems by the Slavs, and perhaps even by the Norsemen, might be linked to the Magian religion, which required sinners to pay silver dirhems in order to be released from their sins. The Slavs referred to such coins as *byelaya*, or “White Money”; in other words it was clean or honest money, as opposed to black money, which was the product of brigandage and crime. In most places silver was the preferred method of payment since they could be utilised for taxes, as tithes, sin payments or blood money. Generally speaking village folk refrained from spending coinage, much rather preferring to barter for goods and services.

So in summation, formal payments could be made using *zlotniki*, golden dinars, *srebrniki*, silver dirhems, bar *grivna*, silver pennies, silver pfennigs, Finnish arm rings, Lithuanian *grivna*, jewellery, multi-coloured glass beads, *veveritsa* (Squirrel pelts), cowrie shells (from India and Arabia) and *rezana* (hacksilver). Hacksilver consisted of snapped arm rings or other silver fragments which were weighed first to determine the true value of the metal before it was accepted as a means of payment. Silver plated lead and copper, or fraudulent scale weights were not unknown. Scratching silver to verify its purported purity, and checking scales were very wise measures in those

days.

The water roads of Rus'

With so much land consumed by great forests, and so few roads, the average Russlander needed a lot of guts to travel between cities over land. In some areas it was perilous due to the number of hostile troops (foreign or tribal) wandering about, the frequency of brigandage, the proliferation of wild animals, not to mention their fear of the magical beasts and rogue elemental spirits who claimed the lands as their own. The danger of becoming disoriented was perhaps even more daunting, especially with the onset of squalls heralding an imminent and potentially lethal blizzard.

The length and breadth of Rus' literally teemed with innumerable fast flowing rivers and labyrinthine creeks. From the very earliest times the Slavic tribes established their villages along these banks. With the spring thaw they put their boats back into the water and made distant journeys in search of trade, adventure, or war. Travel by means of canoe, barge, boat or ship often worked out to be a lot safer. Where roads were lacking, it still remained the best way to move large quantities of passengers and commercial goods. The rivers of Rus' therefore assumed the character of roads, enabling travellers, pilgrims, armies and hefty quantities of merchandise to be moved about with relative ease, and with all speed. They were Russia's ancient super-highways of trade and military conquest, and, as stated in Chapter I, the likely point of entrance for many of the initial waves of Magian refugees.

Boats and ships from all over northern Rus' converged on Kiev annually around June, to meet up with the newly refitted merchant vessels of the southerners, and thereafter left southward for the great journey to Tsargrad. This Rus' trading fleet consisted of royal and private merchant vessels. At Vitichev, the river tax was collectively imposed on all shipping within the convoy, usually not more than a day following embarkation for the southerly trip.

The Dnieper

During peak flooding the Dnieper (known to the Greeks as the Tanais River c. 150 AD) can grow to as wide as 6 miles. This river was the lifeblood of the southerly trade routes and the prime reason for Kiev's ascendancy to political eminence amongst the other tribes of the Rus', for its rulers effectively controlled the lion's share of southward and northward trade movement. At its lower reaches were the two cataracts known as St Gregory's Island and Berezany. At Berezany stood a giant oak, a grove and idols; the most notable being that of Perun.

The Dniester

The Dniester was an alternative southerly passage, more conveniently used by the Ukrainians which inhabited the western borderlands abutting Poland. This river also allowed passage from the Baltic to the Black Sea via the Bug and Vistula Rivers.

The Don

The Don River was the main route leading from northern Rus' to the Sea of Azov and hence the primary link with the Tmutorokan enclave, and the Crimea. Once through the heads at Tmutorokan, the Sea of Azov granted access to the Black Sea, and hence the Anatolian provinces of Byzantium, the Caucasus and Constantinople itself.

The Donets

The Donets was an East-West bridging river, linking the Dnieper to the Don.

The Lovat

The Lovat flowed southward from Novgorod, finally emptying into the Dnieper. It provided part of the most famous of the north-south passages.

The Msta

The Msta river joined the Volkhv to the Upper Volga.

The Volga

The Volga (c. 150 AD called the river Rhos, or Rhas by the Greeks) was the prime arterial route stretching from the far North to the Caspian, and controlled at its point of exit by the Khazar fortress of Itil (at least until the Rus'

captured it anyway). This route allowed direct trade between Rus' and the lands which line the "Silk Road" to the far east, and provided a link between Rus' and the eastern Caucuses. Most of this River was under foreign control at its lower extremities and vigorously policed by Khazar riverboats, never keen to allow the Rus' passage, whomsoever they may be. A Jewish Khazar Khagan, Joseph, feared that the entrance of the pagan Rus' into the great Caspian sea would herald the downfall of civilisation as he knew it, in a type of doomsday scene in which the Russians would trample under foot every decent city in Islamic Persia, Arabia and Central Asia, unleashing their frenzied swords for the promise of silk, spices and silver, silver, and more silver. Perhaps what they really feared was a long overdue payback for the destruction of the Magian homelands.

The Volkhv

The Volkhv (literally "Magus River") was the Viking gateway to Novgorod the Great, since it stretched from Lake Ladoga and the icy north to the actual city itself. Norse longships and merchant vessels would have been a regular sight on the Volkhv. Whether it became known as Magus River because of the nature of the Vikings that used it, or because of the Magi which lived in the area, is unclear. The title is regarded by some as having come from the Finnish word *Velho* (a "Magus").

The Western Dvina

The western Dvina flowed inland from the Latvian coast, joining up with the Lovat.

BOAT AND SHIP BUILDING

Just as the Norse were especially adept at open seafaring, the Rus' were equally skillful in the construction and utilisation of river craft, preferring several main styles. The traditional Slavic monoxyla (meaning "one keel"), was formed from a single large hollowed tree trunk, (attested to in at least one reliable source) and, as a rule of thumb, capable of carrying up to 50 men. One source I have read doubts that monoxyla were hewn from a single tree trunk, but any doubts about this were dispelled by the unearthing of a full-scale one in a Western Latvian bog dating to the closing years of the 4th millennium BC.⁹² Although preserved from decay, its overall appearance had deteriorated somewhat, making the engravings and zoomorphic imagery that embellished the bow sprit, barely discernible or non-existent.

Despite the monoxyla's vast size, it was man-portable and could be carried over portages or unnavigable cataracts. Significantly, these vessels could be produced fairly quickly, thus enhancing their appeal as a cheap, rough and ready mode of transport, especially during war time. The ingeniously simple monoxyla was made by the Krivichians and Dregovichians during the long Winters. In late Autumn, selected trees were cut down and dragged into the communal halls and stock sheds, for the men and children to work on throughout the Winter months of snowy isolation. Each of them had the core removed by adzes, to form a single hull 9 metres long by 2.5 metres wide, which was then decorated by carvers of artistic ornamentation. They were then lashed to one another and slid out onto a frozen lake and, with the coming of Spring, after the thawing of the river ice, the tribesmen paddled them down river to Kiev to be fitted with sail, tackle and sound oars. There they were pounced on by eager buyers. So plentiful were they that merchants normally removed all rigging from their previous monoxyla and then re-fitted them to the new hull, so as to set off on their trade missions each year in what were essentially new boats.

Another type of vessel was styled roughly on Norse designs and of more complex construction than the indigenous vessels that had navigated the river routes for centuries and even millennia. Both of these versions possessed not only trade, but military applications. The Ros warships were reported to have had serpent-head prows. Western Slavs appear to have been better boatwrights than the Eastern Slavs, for Poles set to sea in fleets at least as good as those of the Norsemen, and in 1135 AD a Wendish war flotilla considered itself formidable enough to gather in Norwegian waters, intent on hostilities.⁹³ From the account of Leo the Deacon we learn that the warriors of mediaeval Rus' also used Scythian watercraft,⁹⁴ thus indicating the survival of Scythian technologies, and most likely customs into the 10th Centuries AD. Small dugouts and barges were used by the small-time merchants and clansmen. Barges were usually towed along by large teams of hardy men by ropes which spanned from the river to the riverbank. These gangs (which were known as the burlaks (barge haulers)) worked as a team, struggling

along under the terrible weight of cargo-laden barges, which sat heavily in the water. The pagan Celts also had dug-out water craft and settlements constructed in the midst of lakes.⁹⁵

Military structure

It would seem the military infrastructure of heathen Russia was modelled on ancient Roman and Central Asian protocols. In Rome the vast bulk of the army were members of the quasi-Iranian Mithraic cult, and so the legions were not just an army, but a religious fraternity dedicated not only to their fellow brothers-in-arms, but to war, order, obedience and the State. Russian troops had a similar philosophy, drawn variously from Romanised Goths who had served as auxiliaries in the Roman legions, and immigrants from Persia and Central Asia

THE KIEVAN RUS' ORDER OF BATTLE

The army of Kievan Rus⁹⁶ was be divided into three echelons, namely the upper *druzhina*, the lower *druzhina*, and lastly, the less-seasoned militias and peasant levies. The component military bodies of these echelons are shown as follows in order of their eminence.

FIRST ECHELON - THE UPPER DRUZHINA

Druzhina cavalry and footmen

SECOND ECHELON - THE LOWER DRUZHINA

Varangian mercenaries

Tribal armies - each organised as a *Tysiacha*

Foreign auxiliaries

Boyar *Druzhina*

City militia - one *Tysiacha*

THIRD ECHELON

Seconded tribal units

Village defence militia - one *Sotnia*

Peasant levies

T'MA

The Russian *t'ma*⁹⁷ was equal to a myriad, or 10 *tysiacha*, the rough equivalent of a modern division. The term *t'ma* originated among the Turks and Persians of Central Asia, but under the influence of barbarian cavalry auxiliaries, mainly Alans, later found its way into Roman military usage as a term to denote a large cavalry squadron, known as a *turna*. Therefore it is less clear, from a linguistic perspective, to determine whether their usage of the term entered Russian military vocabulary from Iran or mithraic Rome. Other evidence points to both sources.

TYSIACHA

The *tysiacha* was a 1,000 man formation commanded by a *tysiatsky*, who was the equivalent of a general, known in Rome as a *Chiliarchus* or in Persia as a *Hazarapat*. A *tysiacha* was composed of 10 centuries or *sotnia*.

SOTNIA

The 100-man formation or century was commanded by a *Sotnik* or *Sotskiy*, which translates directly as "centurion". Persian and Roman military formations typically included centuries. A Russian *Sotnia* was composed of 10 *decurions*.

DECURION

The *decurion* was the basic military unit employed by the pagan Russians, a ten-man section commanded by a *desyatnik*. The term *decurion* comes from the Latin *Decuria* which in military terms meant a group of 10 men. Thus the rank *desyatnik* was a Slavification of the Roman *decurio*, a mounted officer in charge of a ten-man section, who traditionally held positions of prominence within the smaller Roman Mithraic assemblies. Ten-man squads were the smallest units fielded in Persian times

First Echelon

VELIKIY KNYAZ'S / KHAGAN'S UPPER DRUZHINA COUNCIL

The federated Rus' war council of the upper druzhina probably included representatives from all of the constituent tribes, especially any *Tysiatskiye* or *Sotniki* allied to the Velikiy Knyaz' via various treaties. It was chaired by the Grand Prince and the *Posadnik* (his personal lieutenant or adjutant), and boasted the finest military minds in all of Rus'. Only the greatest of veterans could expect to join the council. In Kievan Rus', the *Posadnik* and war council retinue were perhaps the third most important group in terms of influence, though in military matters, they would have had sole jurisdiction. This council had massive leverage during the formulation of campaigns against foreign powers and was charged with the strategic deployment of troops ("the Children") on the battlefield. These war leaders were the logistics experts of Kievan Rus', responsible for levying troops, horses, money, food, weapons and armour from all of the tribal clans and Boyars. The wealthiest Russes had to supply peasants to serve in the *druzhina* plus supplies, or else furnish an equal amount of money. This custom points to Russian society being class-based rather than caste-based. If the latter were true only members of the warrior caste would be granted a place in the *druzhina*, which is not the case.

DRUZHINA CAVALRY - THE BOGATYR' (HEROIC KNIGHT)

The cavalry component of the *druzhina* was formed by elite upper class horsemen who had surrendered all other allegiances, in favour of sworn loyalty to the Grand Prince. These were the front-line horsemen of the Velikiy Knyaz's finest vanguard, protectors of the ruling royal bloodline and hence the champions of Rus'. Amongst the people they were an institution unto themselves, who had long given the peasantry the themes for many of the valiant stories told to their children. The *bogatyry*' horseman thus epitomised the epic Russian, or indeed Asiatic hero, a knight displaying superb and fearless skill at arms. This much cannot be denied since the very word is also found in Turkic, Hungarian and Mongolian, a sure sign of a Eurasian pedigree for the Hunn warrior class.

The Rus' Grand Prince's military retinue was created from troops and horsemen such as these, levied from the constituent tribes of the Rus'. They defended the Grand Prince from sedition, enacted his decrees, and guaranteed the integrity of all Rus' borders. Whenever military campaigns were waged against "Mother Rus" by foreign armies, or when the Grand Prince undertook any form of military conquest, the cavalry was mustered to serve their liege. *Bogatyry*'s were frequently posted to worrisome tribal zones to interact with the chieftains as formal emissaries of the Grand Prince. As a result the prince always knew what was taking place throughout his domains and could readily exert full control at short notice if trouble arose.

Most knights were offspring of the same, or people highly placed in society; so they were usually quite wealthy in their own right. They showed an unmistakable air of superiority, and were easily distinguished by their personal courage, honour, and ferocity. On the plains they were an object of fear. As steppe horsemen assaulted Russian farms and settlements, the heavily mailed *bogatyry*' burst forth on his charger in hot pursuit, swiftly hunting down the foe as he retired back out into the grasslands, and cutting down any raider whose pony failed him. As the cream of the Rus' warrior class, the *bogatyry*' heroically reveled in the excitement generated on the battle field; whether mounted or on foot, they led their brothers headlong into victory or honourable death.

DRUZHINA FOOTMAN - "THE CHILDREN"

The elite infantry of Rus' were termed *druzhina* (which when translated from the Slavic indicates that they were not only an bodyguard for the Prince and State, but a brotherly fraternity), otherwise known as "the Children". In fact the English word "infantry" meant roughly the same thing in ancient times, coming by way of the Romans. While some modern books have tended to portray the mediaeval Russian troops as a rag tag bunch of undisciplined rabble, or marauding looters, Arab commentators and the easterners told a vastly different story. In their eyes the Rus' were singularly formidable adversaries, not only on account of their skill in bloodshed, their organisation or physiques, but due to their unbreakable solidarity, which saw their formations march into battle as if they were a single man.¹⁰⁰ The battle ethics of Rus' royal retinues were therefore not too different from those of the

Franks, English, Norsemen, and the Magians. The Magi spoke of their Aryan warrior lifestyle;

*"About the esteem by warriors together, the union of friendship one with the other, obedient unto their commander of the troops, and mindfully resigning themselves to death, there being seen a spiritual reward, without doubt, in the future existence".*¹⁰¹

One only has to look at the outstanding military exploits of the Russes against the civilisations of Khazaria or Constantinople to realise they were far from amateurish. Like the Roman Legions, the mediaeval Rus' *druzhina* infantry attended to the matter of logistics. In both Rus' and Rome, troops took to the field armed not only with rectangular red shields (similar to Roman shields see fig 69.6), javelins, and armour, but with an array of encampment tools which were used to erect defensive encampments.¹⁰² Like the Romans they could hurriedly form "a shield *burg*" under unfavourable circumstances.¹⁰³ This defensive drill probably resembled the Roman tortoise-formation, and was used to encompass the women and baggage with a wall of interlocking shields capable of fending off a hail of incoming arrows. As in the Roman legions, suitable Russian youths volunteered for military service, or, in accordance with the prevailing custom, were handed over to the *Druzhina* retinue by their tribe to serve in the army of the Grand Prince for a mandatory 20 year stint. Having completed their service they were released from the binding *druzhina* oath and became freemen. Such were the earliest beginnings of the Russian army. In *Slovo o Polky Igorove* (the account of Igor's campaigning in the Polovtsy wars), we find a passage which says that Rus' men-at-arms were born from "Latin forges",¹⁰⁵ and who caused the earth to quake beneath their very feet. Obviously men are not forged, so this is a reference to the (Latin, or in other words Roman military) training which molded the Rus' warriors. Rumbling earth probably signifies they marched about the country in well-drilled formations. Roman recruiting practices resembled those of the Persians, whose soldiers were levied in much the same way, and served for 20-30 years, until the age of 50, maximum. Persians normally carried woven rhomboidal shields, and their hats were tower-like.¹⁰⁶ There was evidently some Persian influence. One meaning of the Slavic word *stan* ("a military camp") comes from the Old Indian *sthanam* ("a place"), or the Avestan and Old Persian *Stana* ("stand at attention", "a place" or "a location").¹⁰⁴

Second Echelon

LOWER DRUZHINA

The entire lower *druzhina* was composed of troops given to the Velikiy Knyaz' of the day by various tribes as a sign of their fealty. Besides the "tribal thousands", it consisted of paid Norse Varangian troops and foreign mercenaries from places as far afield as Ossetia and Arabia, to name a few. All had respectable fighting experience.

VARANGIAN TROOPS AND FOREIGN MERCENARIES

Norse Varangian forces were supplementary to all Rus' troops and strong insurance against the rapid disintegration of the Rus' federation of tribes due to tribal disputes. These were impartial, highly trained and disciplined foreigners dedicated to the concept of personal wealth and sworn to maintain a united Rus'. They were charged with the defence of the nation, peace keeping when tribal incidents got out of hand, and the collection of taxes for the Velikiy Knyaz'. No political wheeling and dealing was complete without looking for the blessing of the Varangian *Voevoda* (Slavic: literally War leader). A lack of Varangian backing spelt the end of any political designs immediately. Surprisingly, a number of the Varangians were Christian folk, or those who had left the service of the Byzantine Emperor. Sensing new opportunities in this land, many decided to settle in Rus' and brought their families there also. The racial mix of the foreign auxiliaries serving in the Lower *Druzhina* varied from year to year. They could be Pechenegs, Alans, Bulgars, Magyars, or Muslims from Silver Bulgar and Central Asia.

TRIBAL ARMIES - THE TRIBAL THOUSANDS

Tribal troops were thousand-man military formations drawn from the clans. Their duties included maintaining order among the scattered tribal villages, patrols of the tribal border regions, protection for tribal merchants, law and order within the tribal boundaries and combat roles as dictated by the tribal war council. Once, the tribal warlords sought to put every available man and boy under arms in an attempt to give their tribe the military edge over their

neighbouring enemies; that all changed once the princes began exercising their own control. Under the treaty that forged the existence of Rus', all tribes were bound by law to field armies (*T'ma*) no larger than 1,000 in number. These were the tribal home guards and they were duty bound to aid any fellow kinsmen or tribal ally under attack from external forces. In practice the manning limitations were a farce and it became almost impossible to police this policy. This task fell to the Varangians and *druzhina* infantry (The *druzhina* were the Grand Princes personal retinue of warriors) based in these tribal zones. Furthermore, the cheating on troop numbers must have led to frequent inter-tribal spying, with *vozhd's* everywhere eyeing their bordering tribes suspiciously.

Tribal troops were always the wild card in any disputes arising between the various tribes. Detachments of *druzhina* troops were garrisoned there as observers, tax collectors and ready deployment forces. At Rus' frontier locations and tribal hot-spots they were based in even greater concentrations. The arrival of substantial *druzhina* formations in a given area normally deep trouble, signifying a state of virtual martial law or an impending military campaign by the Grand Prince.

CITY MILITIA

Every major city had its own organic military capability which was drawn from the tribal armies, and which was led by the reigning petty prince whose throne was situated therein. City militias were usually a thousand strong, and perhaps each garrison formed the nucleus of what could even be termed a tribal military district. In major conflicts they entered battle formed up by their city of origin ie; the Novgoroders, the Kievans, the Suzdalians etc.

BOYAR DRUZHINA

Boyar *Druzhinas* were owned and maintained by any Boyar with sufficient political influence and prestige; these were quite literally private armies sworn to protect the interests of their employer. The Boyar business magnates were keen to maintain well paid, billeted and armed troops, not only to protect their caravans or to guard their backs and assets against scheming business rivals, but to act as a bargaining chip that could be placed on the Grand Prince's table during war time.

Third Echelon

TRIBAL FOOTMAN

Tribal troops not only manned the major cities and towns, but helped bolster the local village militias during times of trouble and armed strife.

VILLAGE DEFENCE MILITIA

Permanent town or village militias were subordinate to and augmented by the tribal regulars from time to time. On the steppes and vulnerable frontier zones, permanent 100-man detachments commanded by a *Sotnik*, were stationed at towns and villages. Their primary function was to form the village defence detachments, and retard an enemy's advance, thus allowing levies enough time to muster and deploy in full battle order. Duties formerly undertaken were military patrols of the village, law and order, feud invoked raids on a neighbouring villages, maintaining wall defenses and forming tracking parties which looked for lost townfolk, insurgents, wild beasts etc.

OPOLOCHENIE

Opolochenie were peasant levies rallied at the village level, for use in policing and sentry duties. Levies supplemented the permanent village militia.

Armour and weapons

Russians had various types of armour; mail corslets and hauberks, vambraces (arm-guards), greaves (shin-guards), leather and mail coifs, as well as the standard conical helmet (mostly without nasal guard). Their tall pointed helmets were of a type commonly found throughout Persia and India, and to a lesser extent even resembled those of the Assyrians (See fig 69.5). The only other parallels to them can be found in a small number of bronze age Celtic helmets (which themselves may have been subjected to the same influences). Pagan Rus' shields

Fig 69.11. A comparison of Norse Vendel armour with Persian styles (Top Right and mounted rider). A particularly obvious similarity is the full-face mail veil.

were normally of rounded wooden construction, but large rectangular shields were also used on an unknown scale.

Their hand weapons were clearly the product of both eastern and western influence, and included axe-hammers, battle axes, broad swords, daggers, flails, flanged maces, lances, long swords, maces, sabres, spiked clubs, bows, boar hunting spears, hand axes, javelins, slings and spears and slung maces (a lead ball with thonging attached). Metal weapons were made of iron or in some cases copper.

One academic has drawn parallels between armour worn by both Iranians and Norsemen (of the Vendel / 5th Century AD “migration period”), in particular the use of mail, and certain styles of helmet with a mouth veil of mail (See fig 69.11). Thus the whole head was encased in helmet and mail.¹⁰⁷ The presence of expert archers on the steppe, and its favoured status as a weapon of choice made such face protection highly necessary in Central Asia.

Linguistics tells us that there was some Eastern influence for the naming of weaponry, but the majority of Slavic words were home grown.

The Old Russian, Bulgarian and Old Slavonic words for “a shield” is *schit*. This term is related to *shitit* (Serbo-croat), *scit* (Slovenian), *stít* (Czech), *szczyt* (Polish), *scaytan* (Old Prussian), *scutum* (Latin), *skildus* (Gothic) and *sciath* (Irish), all of which mean “a shield”.¹⁰⁸

One Russian word for a spear *drotik* seems to have been taken from the Greek and/or the Persian languages, and appears somehow linked with *darrathr*, the Old Icelandic word for ‘a spear’.¹⁰⁹ The Russian word for a dagger was *kinzhall*, a word of Caucasian provenance. It probably came from *kanjar* (Old Persian for a long, double-edged dagger).¹¹⁰ The Russian word for “a club” (*dubina*) came from the Slavic word for the “oak” (*dub*). Thus Russian clubs were most likely oaken cudgels. *Bulava* (the Eastern Slav word for “a mace”) is phonetically connected with the Czech, Polish, Slovenian, Serbo-croat and Irish (*bolach*) words for the same sort of weapon.¹¹¹

The Slavic word for an arrow *strela* is conceptually connected with lightning on the strength of associated meanings. The Russian/Slavic word for an axe (*topor*) is traceable back to the Old Iranian *tapara*, the Middle Persian *tabrak*, the New Persian *teber*, and the Armenian *tapar*. The same word form has impregnated the Turkic (*tabar*), the Finnish (*tappara*) and the Anglo-saxon (*tæpperæx*), all of which mean “an axe”¹¹².

The Slav word for mail (*Kol' chuga*) originated among the Slavs, and was a composite word meaning iron rings.

Prisoners of war

Combatants captured in the thick of battle and whose lives were spared became the property of the victor. They could be offered at a temple as a sacrifice to Perun, be kept as a personal slave, or, if the captive was from a well-to-do family (especially Byzantine), the person might be ransomed for a hefty price. War-slaves brought with them their own brands of beliefs and customs, which in turn subtly modified the community’s behavioural pattern, eg; Jews captured in the Khazar campaigns ended up ploughing Rus’ fields. Later they invited their relatives to live with them in Rus’. Slav slaves sold by the Muslims as far away as Spain, either directly or through German intermediaries were emasculated as a matter of course before sale. This was the standard practice of the Byzantine and Muslim slave traders¹²³. But why did they resort to such practices? Naturally the inherent brutality of the era is the most plausible factor, yet one cannot help feeling that the new masters might not have wanted Slav males breeding their religion into a healthy state within the Christian and Islamic communities where they were sold. These slaves were usually consigned to the backbreaking toils of the fields. Some however found gainful employment in the military forces of the Caliphate of Cordoba. But in time their power-broking came to the fore, and they became major figures within the Moorish war machine in Spain. This sent tempers aflame as Muslim princes tried to suppress the destabilising and even controlling interests of the pagan Slavic eunuchs in their midst.

Aryan War Doctrine

Since the Zurvanites were devotees of the Daevas, and in particular Indra, I shall briefly explore Aryan war doctrine in an attempt to shed light on what may well have been Slav military behaviour. Peace was a most sorrowful occasion for the ksatriyas (the warrior caste), for in it they found neither valour or fame, nor wealth, nor women, nor indeed salvation (which entailed them gaining a place in the heavens of the Gods, the chief amongst

which was their Lord of warriors, Indra).¹¹² Their duty was not only to defend their people, but to make war happen. Then they could revel in the very reason for their existence; heroic bloodshed, land and cattle seizure, and pillaging booty. War proper could only be entered into with the permission of Kings, so for the most part they engaged in low-scale conflicts, like raiding for the purposes of plunder. This included stealing maidens by capture, plundering luxury goods, and cattle-raids. Chariot riding and cattle-raids call to mind the heroic activities outlined in the Leinster cycle of the distant Irish Celts, perhaps revealing an underlying Aryan substrata as the basis for Celtic/Druidic society. The warrior caste had a role in confronting internal and external strife, and were required to back the king in upholding his administration. Accordingly they were billeted away from the ordinary people, in military enclosures.

In one Indian text, the *Hariharacaturanga*, Aryan warriors are described performing the *Peykkuravai*¹¹³ (which means the “devil dance”) in the wake of great victories, to celebrate the delightful sight of their numberless enemies laying slain on the battlefield. Their heroic exploits can be found throughout the *Puranas*. Battle magic could also be relied upon to vanquish adversaries, whether personal or tribal;

“The votary should remain nude, have the tuft untied, face the south and offer human flesh, blood and poison mixed with chaff of grain, pieces of bone as oblations to the fire ... at the cremation ground in the night uttering the name of the enemy 108 times”.¹¹⁴ What followed after this was a variety of incantations which, it was hoped, would bind and destroy the sacrificer’s enemies.

The tuft referred to in this passage was a hair knot worn by the warriors as a sign of their caste. There are several points of similarity between this Aryan rite, and what details are furnished by Tacitus in his *Germania*. For instance pagan Germanic warriors went into battle nude. One set of remains unearthed there still had well-preserved hair, gathered in a knot on the top of the head. Such a style the Romans termed the Suebian knot. They also performed human sacrifices in connection with their rites of war.

According to the Aryan war prayers known in India victory could be won by summoning the aid of a terrifying goddess with a series of incantations;

“ ... One who destroys all obstacles ... do it quickly...subjugate with your mace. Enter. Dance. Dance. Shake. Make (the enemies) move ... One who is fond of blood, flesh and intoxicating drink ... trample ... cut ... kill ... chase”.¹¹⁵

As brutal as they may have been, Aryan battle codes had a certain sense of honour and order about them.

“Let him not strike one who (in flight) has climbed on an eminence, nor a eunuch, nor one who joins the palms of his hands (in supplication) ... Nor one who sleeps, nor one who has lost his coat of mail, nor one who is naked, nor one who is disarmed, nor one who looks on without taking part in the fight, nor one who is fighting with another (foe)”.¹¹⁶

From this passage we can guess that large scale Aryan battles were simply a sea of one-on-one engagements. In those days a display of cowardice by a soldier was damnable ...

“But the Kshatriya who is slain in battle, while he turns back in fear, takes upon himself all the sin of his master, whatever (it may be); and whatever merit (a man) who is slain in flight may have gained for the next world, all that his master takes”.¹¹⁷

The mothers of cowardly *ksatriyas* would rather slice off their own breasts, regretting the day they ever fed the child upon hearing that they had run from battle or received a back wound.¹¹⁸ Once again we find parallel behaviour displayed by heathen Germans during war. Their kin-based troop units were driven into battle, not by force, but a sincere desire to seem manly in the eyes of their wives and children (who loitered watchfully at the rear of the battlefield).¹¹⁹ Their heathen priests were in attendance, performing floggings and guarding the sacred grove images, which they brought to the field of battle. These were battle relics dear indeed to their war god.¹¹⁹ In typically Aryan tradition wives flopped out their breasts (perhaps scornfully) if their men were losing, and delighted in showing off the wounds of their menfolk to other kinsfolk.¹²⁰ We find a similar story concerning a Scandinavian woman who slapped her bare breast with a sword once she realised they were being defeated and retreating from combat with the Vinland skraelings.

The Scythians and other steppe dwellers were no strangers to human carnage. They took scalps to hang from

their saddles, tanned the skins of their flayed victims and mounted them for display, or turned their enemies' skulls into drinking cups. According to Herodotus, this was the Scythian way of dealing with enemies vanquished, or brazenly offensive friends and relatives. It is fairly certain that similar behaviour was still present in 9th Century Bulgaria and 10th Century Rus'. For example, Svyatoslav and his retinue were said to have been killed returning to Kiev by Pechenegs. His head was flayed and the skull taken and converted into a gilded drinking cup, from which his assailants scoffingly drank their libations. The motto Prince Kuria had engraved amounted to the age-old adage that thieves never prosper. Scythians customarily only possessed one such "cup", but it is not inconceivable that some had more. Whether the Pechenegs went a step further and tanned Svyatoslav's skin as a war trophy, or drank his blood from a large bowl is hard to say.

Herodotus' explained that the Scythians sacrificed 1% of their captives to Ares, and this was probably a major reason for war; the gathering of offerings. The Conquistadors witnessed similar religious observances among the Mayans and Aztecs, so it is not an entirely unbelievable story. The brutality of these "Scythian" acts, which followed in the aftermath of victory, seem similar to the customs of the Cimbri warriors.

Concerning Celtic head hunting practices (which might have originated in Central Europe and the Russian Steppes) it is possible to suggest that under circumstances where a Zurvanite Magus or Brahman was not present at a battle to sacrifice their prisoners, the warriors brought the heads of their enemies home in victory. These heads could then be offered to the war god by the pagan priests, by being thrown into a lake or pit, or even cremated.

Binding ties

In pagan times two things allowed village life to continue in an atmosphere of relative order, things that bound society together just like a piece of string. These were the ties of blood and the binding word. This vital string was undone when the unswerving nature of the word or blood fell into question or open disrepute. In the pagan mind organised society would collapse if either of these factors disappeared, and drag civilisation down into a miasma of chaos and disunity. For this reason family and the oath was pagan and Christian society's highest forms of reality.

FAMILIES

There once was a time when the basic unit of any nation was the nuclear and extended family, a highly disciplined unit so unbreakable that it was like steel. Within it the interconnecting bonds and relationships that joined a husband and a wife together, the children, the youths, the sick and infirm grandparents, uncles and aunts, cousins and relatives, and friends down on their luck made them one people, a living entity. Folk could count their kin to several generations. Strangely, it was the rigidity, the unbending nature of the husband-wife relationship that proved to be the lynch pin holding the entire society together. Still, somehow the rigours and hardships of life, which were many, seemed to pull everyone together, closer in some ways than before.

To the Rus' and many others brought up under "Aryan" family life, existence outside of the family unit was inconceivable. The practice of disowning wayward family members, in a world as harsh as it always had been, was akin to a death sentence, for it would have been difficult to indefinitely survive the hostilities and carnage of steppe raiders, wild beasts, demons, hunger and privation all by yourself.

CLANS

Each tribe had its own constituent family based clans and it was from these families and the military agreements that sprung up between them, that the tribes themselves were formed. Clans possessed the right to impose their own laws and punish those who had wronged the "family". Similarly, an unjust harm perpetrated against a clan member by a non-clansmen was also a slight against the entire family tree. Just as a Scottish Highlander might have personal grudges for past treachery and grievances perpetrated by another clan's ancestors (events many hundreds of years old), so too did the Rus' base much of their communal thinking on events which had long passed into the annals of the clan folklore. In essence to fight one man was *potentially* a fight with his family, and his tribe, but whether arguments blew up into something bigger all depended on the circumstances.

FAMILY LIFE

According to white Magian belief every family member was required to show respect to their elders,

particularly one's father and mother. This was not just a matter of courtesy, but a holy duty;

"...it is not desirable to distress one's priest, or father, or mother; and, if people perceive much trouble, disquietude, and harm arising from them, it is certainly not desirable that they should give them back a reply with any aggravation. Because their satisfaction is connected with the satisfaction of the sacred being, and every time that people distress them they have distressed Hormazd (Ahura Mazda), the good and propitious. It is not possible for any duty or good work to extend to the spiritual existences while one does not make those guardians satisfied".¹²¹

In pagan and Christian times, the Russian woman's day was very busy, the busiest of all. She got up early in the morning stoked the hearth and greeted the Sun during the first prayer ceremony of the day. Led by a female Volkhv, and female elders, the women of a settlement made the expected offerings to the female goddesses, the Rozhanitsy and their ancestors at the proper times. Thereafter women milked the cows or goats, collect the eggs and then made the day's porridge, cakes and bread. The raising of children, cooking, cleaning, the laundry, looking after the finances, collecting foods, embroidering, working in the fields or crafts workshops owned by their masters or landlords, were just some of their daily chores. To top it all off, they might have to pull their drunken husband home by the ear.

From Ibn Fadlan's memoirs of the Slavs,¹²² Russian concubines and slave girls could be expected to "put out" for their master's friends and guests if he so commanded.

On the other hand the male's role was to provide the necessities of life, by whatever means. Black families engaged in plundering and banditry, and white families made goods, worked the fields or shepherded stock.

SEX-BASED ROLES

Historically speaking males and females played different, fairly traditional, *very clearly defined* roles within their family and society. Under Aryanism, the man was the Lord and Master of the house and acted accordingly, administering justice or favours to those who lived under his roof. He was the public face of the family in its dealings with others. But when it came to running the activities inside the house, it was his wife who had the most say. The wife through her dutiful attention to her family and children was, in many ways, responsible for keeping the family unit in tip top shape, physically and emotionally. The mothers normally took a keen interest in their children and could be credited with cementing together a society of individuals who understood the role that they would play in it once they came of age, as well as the manner in which they were expected to conduct themselves. In short the mother prepared them for life and its tribulations, and, together with the father, equipped them to honourably interact with other families and the greater society. Children were not permitted to back-answer or rebel against their mother, who was to be shown all due respect. The father, being the dispenser of justice would dish out a good flogging to the disobedient.

OFFSPRING

"Women have been created for the sake of propagation, the wife being the field, and the husband the giver of the seed. The field must be given to him who has seed. He who has no seed is unworthy to possess the field".¹³¹

Purity of bloodlineage was a fundamental Aryan-pagan belief, and something which was always taken into consideration when matching couples. In cases where a family exhibited exceptional traits or abilities, their choice of a breeding partner was given considerable thought. Being "gods", the magical blood of the Volkhvy, for instance, had to be streamlined, nurtured, concentrated and perfected by incestuous marriage with those of like blood. A settlement's Magus probably had a key role in influencing who a person married. In families renowned for certain attributes, the Volkhvy probably tried to pair brother off with sister, or son with cousin, in an attempt to achieve a superior bloodstock. In other words, they considered marrying outside of a finely bred family unholy, a watering down, or contamination of such fine specimens.

Only in Christian times were these next-of-kin marriages deemed sacrilegious, but in pagan Rus', where people congregated in family-based settlements, they were probably quite common.

In Ireland we find a great many heathen inscriptions executed in ogham script, etched into megaliths especially,

dating to druidic times, and even after that. They are not often lengthy inscriptions, and one of the most important pieces of information found in them is recorded in a standard format *X. Maqi Mucoi*, where *mucoi* means “a family headperson”, and *maqi* meant “son of”.¹³² These engravings were frequently defaced by Christians. So pagan rock engravers of the Christian era took heed of this danger and took measures to disguise the old druidic inscriptions, jumbling up the letters, or putting dummy characters in front of the phrase, transposing “g” for “m” for instance. Thus we would get inscriptions like *gaqimu* or *gucoi*. Considering the amount of Magian similarities in that part of the world, it is possible that *Mucoi* came from *Magoi* which means “a Magian” in Pahlavi.¹³³ Thus inscriptions might be better read as *X. son of a Magian*, or *X. a living descendant of a Magian*. If so, these stones had the effect of immortalising which families had the blood and which did not. If the Church could efface this knowledge, by destroying the etchings, they could break the chain of paganism, by destroying the proof of people’s ancient ancestry, thereby diverting whole families away from their ancestral blood inheritance. Small wonder the Christians chipped away at them.

When a Magian child was born they made a “religious announcement of a name for the new-born”. Naming days remain customary in Slavia, even today. Following this it was given “*haoma juice*” and “*the butter of Maidok-zarem*” to taste.¹³⁵

PAGAN SEXUALITY

The Aryans had clear perceptions about what constituted proper sexual conduct;

“Intercourse is permitted with a wanton woman, who belongs to another than the Brahman caste, or a prostitute, or a female slave, or a female not restrained by her master, if these women belong to a lower caste than oneself; but with a woman of superior caste, intercourse is prohibited”.¹³⁹

“A mother, mother’s sister, mother-in-law, maternal uncle’s wife, father’s sister, paternal uncle’s (wife), friend’s (wife), pupils wife, sister sister’s friend, daughter-in-law, daughter, spiritual teacher’s wife, Sagotra relation, one come to him for protection, a queen, a female ascetic, a nurse, an honest woman, and a female of the highest caste: When a man carnally knows any one out of these (twenty) women, he is said to commit incest. For that crime, no other punishment than excision of the organ (the penis) is considered (as sufficient atonement)”.¹⁴⁰

“He who does not give such a maiden in marriage commits the crime of killing an embryo as many times as her period of menstruation passes by without her having a husband”.¹⁴¹

They described the different classes of marriage;

“In the Brahma form, a maiden decked with ornaments is given (to the bridegroom), after he has been invited and honourably received (by the father). When he as been addressed with the words, “Fulfill your sacred duties together (with her), it is termed the Pragapatya form. When (the father) receives (from the bridegroom) a dress and a bull and a cow, it is termed the Arsha form.”

When she is given, before the altar, to a priest, who officiates at a sacrifice, it is termed the Daiva form”.¹⁴²

The union of a willing maiden with her lover is the fifth form, termed Gandharva. When a price is (asked for the bride by the father and) taken (by him) it is the form termed Asura. The Rakshasa form is declared to consist of the forcible abduction of a maiden. Sexual intercourse with a woman during her sleep or while she is unconscious (of the approach of a man) constitutes the eight form, the basest of all”.¹⁴²

Drawing upon Ibn Fadlan’s account of the sexual favours supplied to guests by Russian concubines, we can only be amazed by the cavalier swappery, and immense sexual bravado of the Russes. We might guess that the titillating hedonistic aspect of Slav paganism, was one facet of the old ways that was sadly missed with the coming of Christianity and its attempts to eradicate such “dissolute” heathen lifestyles. Svyashchenniks and pops could only usher in the new era of restraint by a promiscuity tax, which hit hard those single-mothers who were certain to result eventually. Aggrieved male family members of “shamed” females were not adverse to making the other guilty party /ies own up ... probably under pain of death!

In pagan and Christian times the belief that life resided within a man’s seed meant that, for white families anyway, it had to be treated with some reverence, and in accordance with the natural order.¹⁴³ In the case of it being transmitted to anything other than a woman, preferably one’s wife, it was deemed an evil act before the eyes of the

creator. Thus even auto-eroticism was regarded as a crime against life because if the generative function was improperly channeled, it would give birth to demons instead of human beings.

Manichaeans and some other Gnostic cults, however, took the opposite view, that creation was an evil beyond knowing, placing souls inside dark earthly tombs. Accordingly they fostered the ethic of treating the flesh with contempt. In due course this led to alternative sexual practices considered unsatisfactory by pagans, Jews, Muslims and Christian alike.

We know very little about heathen Russian attitudes towards homosexuals, but the Norsemen were in no way partial to it. The Norse Sagas glaringly illustrate that they were socially reprehensible, and what is more, the merest insinuation that a man was gay was enough to see weapons drawn, and blood spilled in retribution for the grievousness of the insult. The mediaeval text *Malleus Maleficarum* mentions that those who habitually engaged in the act of sodomy, or those who played with more bizarre forms of sexual activity rarely lived beyond their 33rd year, unless it was by an act of divine mercy.¹⁴⁴ This account may betray the presence of widespread sexually transmitted disease during the Middle Ages, which ravaged the mediaeval gay communities in particular.

Contraception employing toxic herbal concoctions, if they were used, were probably the responsibility of the woman, although men *may have* used an animal bladder sheath from time to time. To procure them women went to herbalists skilled in poisons. During the Middle Ages one popular contraceptive recipe consisted of precious myrrh, pepper, fennel juice, rue and the skin of a pomegranate, all mixed and brewed into a concoction using certain ratios. It did work but had another side-effect, namely that it could easily kill the drinker!¹⁴⁵

Herbal brews were not the only avenues of contraception available to the pagan Rus' either! A team of US gynecologists visiting Russia in 1995 were shocked to discover the number of Russian women using magical methods as their main means of birth control! An in-depth study on the theories behind these methods would go along way to expanding our knowledge of pagan Rus' fullest religious heritage.

The "White" Zoroastrian Magi had a deep hatred for all these practices; but they were not alone. The *Didache* (c. 90 AD), an ancient Christian document (said to be tainted by heresy), condemned magical birth control and these types of recipes, as abominable weapons against the gift of new life, an anathema unbefitting of any Christian.

BASTARDS

The status of illegitimate offspring in pagan Rus' remains unclear. Bastards were far from uncommon during pagan times. Not only did they possess a lower status within the "family" when compared with legitimate offspring, but society also. Inferior-looking bastards and those resulting from liaisons of a socially embarrassing nature would have become slaves. The unlucky ones probably ended up competing with the village dogs for discarded table scraps, or were taken in by unscrupulous speculators keen on exploiting them in every way. A kind old granny was the best they could hope for in life. Their status is a little more certain among the Norse. The Old Icelandic *hornungr* meant both "a bastard son", and "an outcast",¹⁴⁶ and this suggests that bastards were not well thought of in Norse society, though it is impossible to consign the origins of such a sentiment to either the pagan or Christian era with any degree of certainty.

Being a bastard during Christian times carried an equally great social stigma, however the exposed infants, abandoned orphans and bastards usually entered under the protection of the Church, living their formative years in a monastery where they acquired a trade or spent much of their time learning to stand on their own two feet.

Magians considered anyone born without a father to be automatically among the damned, who together with apostates would not be resurrected in the future existence.

Bratehini & oaths

Since the dawn of time there has always been a yearning deep within the human psyche which craves to belong to someone or something bigger in this world; be it a family, a band of friends, a guild of craftsmen, a religion, or even a member of a club or team. In ancient times these associations of people were formalised by an oath of loyalty to their comrades. By the nature of the sworn oath uttered between members of a formal fraternity or sisterhood, no member could break the faith of that vow without being judged and subjected to the punishment of his "brothers" or "sisters"; by people of the same caste. All brother/sisterhoods had a charter of rules and agreements which were binding on their members. This was the overriding principle inherited from the Aryan forefathers. In Roman times

these brotherhoods/sisterhoods were termed *Collegia*, associations of people of like status and interests. In pagan Rus' they were called *bratchini*.

JOINING A BROTHERHOOD OR SISTERHOOD

When attempting to join a brother or sisterhood, the prospective initiate was indoctrinated with the rules of the group and then subjected to an initiation ceremony, to see whether they were suitable to enter into the lasting bonds of the oath.

In magical or religious fraternities everything was based upon a person's level of knowledge, as gained through skilled tuition. Once everything had been learned they could take their vows of loyalty and obedience to the group, which were witnessed by the supreme god.

MILITARY OATHS

People normally swore oaths of allegiance to prospective lords, which could never be broken regardless of the personal cost to the member, even the sacrifice of one's life. To break this oath was to fall under the weight of Perun's (the Slav God of War and Justice) retribution. Cowardice in the face of battle, desertion or dereliction of duty were exceptionally grave offenses which would never go "unrewarded". Execution for the more serious offenses was regarded as the norm. Amongst warriors, the individual had to undertake feats of courage or physical punishment to see if they were skilled or hardy enough to be deemed a worthy member of the group. If so, the oath was duly sworn before Perun. There are no surviving accounts of the manner in which the warrior brotherhood ceremony was carried out during the 10th Century AD, but in Scythian times the leader and the initiate pierced their bodies, and emptied some of their life-blood into a cup of wine. After having wetted the points and cutting edges of all their weapons in the drink, all parties partook of the wine, draining away every single drop. The brotherhood was now sealed.¹⁴⁷

Since the Slav God Perun is thought to be a variant of the Aryan war god Indra, fused with Mithra, it is worth while looking at how the Iranians viewed the sanctity of this oath. According to Mithraic law the breaking of an oath made to Mithra would see the "liar" chased down, and rent apart by weapons, including the splitting asunder of their long bones and the removal of the marrow. Their bashed body and brains were finally to be trounced into the blood-sodden earth.¹⁴⁸ Whether such Mithraic penalties applied to the breaking a Perunic oath is anyone's guess, but lets put it this way, it was the last word in oaths. You could almost say you staked your life on whatever was sworn to! You messed with him, you were a dead man! Such were the oaths of the warrior breed, those born with a sword to use *as they willed*, a breed apart from the agrarian underlings.

OFFENSES AGAINST THE BROTHERHOOD

Under Aryan pagan (and Zoroastrian) law, the demand for utter obedience (especially in sworn service) was beyond question. Even within the family the father's authority was not to be challenged in any way, shape or form, and he had the right to dish out a good flogging to any wayward kin under his roof. Within Aryanism all brother and sisterhoods had the legal right to exact punishment upon their own errant members, including the death penalty for the more "treasonous" offenses.

Anyone who has served in the military forces will be able to tell you that there is an "unofficial" custom, whereby "trouble-makers", the disobedient, malingerers, thieves, those grossly negligent in their duties, or who have broken faith with their comrades in arms are gang-bashed, perhaps in the showers, or in the thick of night by men from their own unit. While most men are only too willing to submit to the calling of utter obedience to their commanders, from time to time there are high spirited types who require extra efforts to force them into submission to their leaders. Kangaroo courts are often the last recourse if the rebel has resisted other measures.

Infrequently the defaulters are severely injured, perhaps inadvertently killed. Although this internal disciplining of wayward comrades is "unofficially" tolerated, occasions where the person dies are naturally rigorously investigated in this modern age, owing to the fact that they are few and far between. Yet in distant Russia a most bizarre custom still lives on their within their military community.

I was amazed to see film footage of an event (1996) regularly staged by members of the Russian army, which of

late has sufficiently aroused the ire of the mothers of young conscripts, and led to the formation of lobby groups. Hundreds of servicemen gathered at a stadium to witness a grim spectacle, namely the formal beating of errant conscripts. It had all the atmosphere of the Roman colliseum, with successive pairs of victims brought into the arena for one hell of a beating.

Soldiers in fatigue uniforms dragged the dazed, and even barely conscious conscripts across the ground, with the odd punch being thrown in for good measure. Having reached the centre of the arena, the conscript was lashed to upright boards and repeatedly struck, buffeted and kicked, in the abdomen and other similarly vulnerable parts of the body. If they passed out, their torments did not end there, since helpers were on hand to douse them in buckets of water to bring them around for further treatment. Apparently four thousand conscripts die annually in Russia at the hands of fellow servicemen, from beatings or worse. So while it is normal for unsanctioned beatings to occur in the military, in no way does it ever reach the level of formality, ferocity and brutality practiced in Russia to this very day. Could these military customs be an ongoing survival of brotherhood rites practiced in Russia, at least since pagan times? Are they perpetuated through sheer force of habit, an adherence to tradition, or do some actually understand the religious basis of military brotherhood? Given that defence forces are notoriously conducive to the observance of ancient traditions, I am inclined to believe that it is inherited behaviour.

Such customs are reminiscent of the *Fustuarium*, a form of Roman punishment meted out to deserters and sentries who left their posts without permission. The penalty consisted of being stoned or beaten to death with wooden clubs by the very comrades whose lives had been endangered by the defaulter's behaviour.

Dress

Variations existed between Medean and Persian national costumery. Originally the Persians preferred clothing that fitted the form of the body, whereas the Medeans had loose fitting wear, of sumptuous design and decorated with embroidered embellishments. The Persians later adopted the dress codes of the Medeans.¹⁵⁰ I mention this because pagan Rus' clothing was considered to be stylish by many foreigners, and had something in common with Persian and far eastern dress standards; consider the baggy breaches once worn by Svyatoslav, or the full robes and breaches depicted on pagan Norse tapestries and stone monuments. Pagan Rus' clothing was usually created from linen and imported woollen cloth, the beauty of which was enhanced by extensive dying in lively colours and imaginative embroidery.¹⁵¹ Woollen cloth was frequently imported, loomed in either England or Flanders prior to arrival in Rus'.¹⁵²

The term *Pavolok* (which was used exclusively among the Slavs) related to valuable fabrics such as these, which had been shipped into Russia from abroad.¹⁵³

The linen smocks manufactured by the Rus' were normally white, but were often coloured in a variety of hues using the block method to stain them with the primary colours, and white or black toned dyes (or mixtures of them). As you will have read, these were most likely the same type of shirt as the sacred shirts worn by Magian folk.

Shirts were frequently of the *poruchi* style, possessing long sleeves and a hemline that reached down to knee level. *Porty* were the pants typically worn in conjunction with the *poruchi*.¹⁵⁴

The common people's clothing was made from *siriachyna*, a coarsely woven but sturdy form of cloth made from flax and hemp fibres.¹⁵⁵ Other items worn to enhance their dress were the *nachil'nik* (head ring)¹⁵⁶ and *drobnytsi* (metallic, often bejewelled plates which the rich had fastened to their clothing. One might suspect they were talismanic in nature in heathen times).¹⁵⁷ The lace-up, moccasin-like, footwear (woven from bast) worn by the lower-classes were called *luchaky*.¹⁵⁸

Russian families and individual clan members most likely personalised their sacred white shirt and belt with needlework depicting exciting images. Common motifs (which have survived to the present day) included hunting scenes, horses, crosses, swastikas, suns, line patterns, moons, stars, boars, foxes, wolves, bears, deer, geometric designs, ivies, flourishes or woven motifs, griffons, black winged dogs, intertwined serpents, battle scenes, harvesting scenes, ploughing scenes, cattle, fantastic beasts, flowers, ravens, birds and eggs. Some of this artwork originated in Iran, for there archaeologists have retrieved cloth bearing stylised bird motifs practically identical to those found in Russian folk embroidery.

Fig 70.1. A twisted gold arm ring from Pagan Jutland, Denmark.

Fig 70.2. A twisted silver arm ring from Parthia.

Fig 70.3. A silver neck ring from 11th C. Scandinavia. The Russian grivna was of similar form. It probably signified the coil of a serpent.

Fig 70.4. One type of Pagan Slav dangling pendants. They were often suspended from horse brooches that often possessed double-heads.

Fig 70.5. A Greek gold bracelet, perhaps an amulet or religious object. Found at Kul Oba, the Crimea, 4th Century BC. Practically identical rings were made in Parthia, and a vaguely similar ring has been found in Germany

Fig 70.6. A heathen Russian pectoral crescent.

Fig 70.7. An early Mediaeval Pagan Russian earring.

Fig 70.8. An Achaemenid earring, 5th C. BC. This style was probably a precursor to that still being crafted in Rus' some 1,500 years later.

Another favourite embellishment was the fastening of pearls along the hem of one's finest attire, *pearls cultivated in rivers throughout the northern reaches of Rus'*.¹⁵⁹ Unless the pagan Rus' discovered pearl cultivation independently, then the methods that they used might have been learned from either Britain,¹⁶⁰ India or ancient Rome. Linguistics gives us even better clues as to where they acquired the necessary skill for pearl harvesting, and suggests an entirely different location. The Russians had several words for "pearl", the oldest being *Inchi* and the other *zhemchug* (pron. Zhemchuk) which was used from at least the 11th Century AD onwards. *Zhemchug* came from the Hungarian (*gyongy*: Pearl) and the Middle Uighur (*jonzu* : Pearl) which originated from the Chinese. *Inchi* came from the Turkic and Azeri word *indzi*. Thus Russians first gained their love of pearls via the Turks and Azeris, but by the 11th Century the source of their pearls (or the loan word anyway), were derived from the Far-East, from China and the Uighur Empire.¹⁶¹ These Far-Eastern word transactions might be due to the number of Manichees (who saw the pearl as a major religious symbol), migrating into Europe from Manichaeian settlements in China and the Uighur Empire. The correlation may also be attributable to Magians who accompanied the last of the Sassanian monarchs to their place of repose at the Tang Dynastic palaces, following their flight to freedom.

Another was *marzhan* or *morzhan* meaning "coral" or "fine pearl".¹⁶² It can also be found in the Siberian. Irkut, Yakut, Turkic, Uighur, Kipchaq.¹⁶² These apparently originated in the Arabic, Armenian and Greek.¹⁶² Note how the words for "pearl" and "coral" had filtered into the frosty northern wastes, entering into the language of the northern Finno-Ugric peoples.

Typical Sassanian embroidery motifs were not dissimilar to the Russian, with birds and boar heads proving the most popular.¹⁶³ Pearl edging was not uncommon in Sassania.¹⁶³

Owing to a presence of artifacts closely resembling (Iranian) Luristanian bronzes across a very vast area, it has been guessed that Magian culture, and even migrants, had settled over much of the Caucasus and Caspian region,

not to mention the Kuban area of southern Russia.¹⁶⁴ Their jewelry, such as the small animals sporting dangling bells¹⁶⁴ were possibly the precursors of the Koltsy devices worn by later generations of pagan Iron Age Slavs and Finns, not to mention the many Caucasian races. Besides the diverse animals that they rendered into wearable objects, one can also find demon effigies and bearded divinities such as those which inhabited their world.

The Medes wore pectoral crescent moons,¹⁶⁵ or gorgets, in which case I suspect they could be the original inventors of the lunula crescent pendants worn by the Iron Age and mediaeval Russes. This is just one item of Rus' jewelry possessing an Iranian precedent. Both the Persians and Medes (whether men or women) wore torques, arm-rings, earrings and other jewelry, sometimes inlaid with cloisonne enameling.¹⁶⁶ Medean headdress was dome-like with chinstraps dangling behind, whereas the Persian aristocracy sported tiaras. As a point of difference the Babylonians of their day wore cone-shaped mitres draped with some tassel work.¹⁶⁶

It is therefore hardly surprising that Scythian art (deeply impregnated with Persian, Assyrian, Median and Mesopotamian imagery) has been unearthed in the Kuban, Dnieper and Kiev regions.¹⁶⁷

In this Appendix we have viewed many seemingly mundane aspects of life in pagan Rus'. Repeatedly Magian and Aryan influences can be seen as important components of their lifestyle.

Appendix I

Fig 71.1. Example of Rus' writing supplied by Al-Nadim

Equivalent phonetic values	E	M	M	M	U	D	K	E	N	K	R	UU	R
Avestan Persian Characters	𐬀	𐬁	𐬂	𐬃	𐬄	𐬅	𐬆	𐬇	𐬈	𐬉	𐬊	𐬋	𐬌
Avestan Persian characters reversed	𐬀	𐬁	𐬂	𐬃	𐬄	𐬅	𐬆	𐬇	𐬈	𐬉	𐬊	𐬋	𐬌

emmmud k enkruuR ▶ Ruurkne k dumme ▶ Rurik ne k dume. Likely English translation: "Rurik says no to the idea (or proposal)".

1. Being a communique from the Russians to the Armenians, the text originally possessed a political significance.
2. The courier guessed the Arab would be unable to recognise what was written, and showed him the Rus' writing for the sake of curiosity.
3. The emissary would not have shown the message to the Arabs if its contents were readable and highly sensitive.
4. It was a diplomatic communique and may have been encrypted in some way. The triple letter suggests that this was the case.
5. Of the 9 different characters used, 7 are almost identical to Avestan script, 1 more closely resembles the Pahlavi "n". Only the last character 𐬌 seems to have been twisted inside out. Most characters were inverted 180°. The Pahlavi insignia served to indicate that he was a trained priest.
6. Avestan was written backwards, from right to left, as was this example of Rus' writing.
7. Considering that Al-Nadim noted this during the 10th Century, it is unlikely that the Rurik mentioned was the father of the Rus' state, but another royal who went by the name of their illustrious forebear. This prince must have belonged to Svyatoslav's generation, living more than a century before the other historically known Prince Rurik c. 1092 AD (son of Prince Rostislav of Tmutorokan to the Magyar princess Lanka).
8. The Avestan origin of the Rus' script complements other existing data suggesting a Magian presence in Olden Rus'.
9. The orthographic style displayed in the Russian example (Fig 71.1) is in keeping with Avestan script, as shown in the following extracts from a Magian manuscript.

Fig 71.2

Fig 71.3

Writing systems

In Part I we saw evidence of writing in Rus'. Considering the Avestan-style mirror-writing below it is likely the Russian kings wrote a number of their texts in Old Russian but transcribed it into Avestan Persian script, which might be inverted on certain occasions. This is not entirely out of the question considering that Silver Bulgars are on record as using a form of Middle Persian used by the Manichees.

These were not the only scripts used in Slavia. For instance the Rotu document found in Albania was scribed in the *Ruxski pismena* or "*pisa ruhsska*".¹ Clearly the characters were Old Albanian, yet they were used to write an essentially Russian text. Such ad hoc means of writing were probably not uncommon. Many pagans (especially merchants) probably gained a knowledge of writing via the Crimean cultural "melting pot", in which many of the known world's writing systems were utilised. Rus' warriors involved in the southern military campaigns no doubt were exposed to these scripts and some may have learnt them there. The remainder of the illiterate masses probably made extensive use of cultured slaves or Magian scribes. Most of the cultured slaves could easily have served as scribes or accountants until the time when Cyrillics was introduced by the Church on a wider scale.

We might think that for an undetermined period after the Christianisation of Rus' in 989 AD, that Cyrillics were mainly confined to areas that had accepted Christianity (ie; the cities) or to those few places visited by travelling Byzantine missionaries. But by the 10th Century, not more than a hundred years after its inception, the Cyrillic writing system was in relatively widespread use amongst the Slavs (even among the lower classes), interspersed with elements of glagolitics.

That some Russes knew how to write is confirmed by Constantine (in the *Life of Constantine*), who met a learned Rus' in the Crimea around 861 AD, and saw that he kept a copy of the bible.¹ It had been written in a script that he believed was purposefully designed by them from an eclectic collection of foreign scripts.¹ Presumably some elements of the script were intelligible to him, others not so.

A glagolitic-style script can be found on the wall of a ruined pagan temple²⁰, so presumably glagolitics saw some usage and modification under the pagans. Glagolitics were also known to the Vlaxhs, Moravians, and especially the Bulgars. In later years the Patriarchate of Constantinople and the See of Rome fostered Latin and Cyrillic scripts, and then attempt to eradicate the use of glagolitics.

In summation, the sorts of writing systems present in 9th Century, pre-Christian Rus' probably included;

1. Avestan.
2. An unidentified script, perhaps Bulgar or Hungarian runes.
3. Modified glagolitics.
4. Cyrillics.
5. Khazar runes (similar to the Alphabet of the Kings, but without orbs).

DID THE PAGAN SLAVS USE CARRIER PIGEONS?

In today's world we use the internet or satellites for speedy communications, but in the ancient world, it was the pigeon that facilitated swift and reliable contact between distant locations. In Rome and Babylon, and later in Central Asia and Iran (under Arab rule), the pigeon and the sparrow were the only animals used for aerial communications.² The homing pigeons they bred and trained were indispensable during emergencies, such as surprise sieges, plagues and to contact more remote trading outposts. During the Middle Ages heretics were observed to be communicating with each other by means of carrier pigeons.

From the *Primary Chronicle*³ we know that the typical Drevlyanian household had their own pigeons and sparrows (a holy animal to the Persians). Whether other tribes followed the same practice is unrecorded. Sparrows and more especially pigeons are well known for their fondness of human company, but there may have been other reasons for keeping them other than companionship. While these birds would have been useful for eating insects in the thatching and under the eaves, or served as food during lean times, they might have provided a means of allowing relatives and friends separated by the tyranny of distance to converse by "air mail".

To give you some indication of the scale of pigeon and sparrow usage by the Slavs, the *Primary Chronicle* relates that Olga ordered the Drevlyanians to give her three sparrows and three pigeons from each house in reparation for them slaying her husband Igor'. Expecting mass reprisals, the locals thought they had got off lightly when she only

asked for their birds ... how wrong they were. Ol'ga ordered the birds to be released once they had a hunk of burning sulphur wrapped in material slung from their legs on pieces of string. These birds flew back to their owners' homes in the lands of the Drevlyanians (in Black Russia) whereupon *every single house, pigeon coop or dove cote* caught fire. First of all the mere admission that they had pigeon coops shows that they were breeding them for a specific purpose. Perhaps it was only a hobby, and perhaps only a ready food source, but we cannot discount the possibility that they were using them to cart messages.⁴ Most importantly, *they were homing pigeons!*

If every Drevlyanian house had homing pigeons during the pagan era, I think it says something about the potential ability of the average peasant to send news afar. But homing pigeons are just that, they return home upon release. And if they were keeping homing pigeons probably a certain number of those in a given coop might have belonged to other people, which were let free to fly back to their home. When visiting friends or business colleagues they might have taken their own birds with them and given them to the other party to release when they wanted to contact the pigeon's owner. The Chronicle does not mention fires breaking out in coops in other locations outside of the Drevlyanian lands. If they were used as carrier pigeons, then fires elsewhere went unrecorded, or they were simply for local dispatch, or the Drevlyanians gave them their own pigeons, rather than those of other individuals which they might have kept in the dove cote

And yet it is highly doubtful there was any degree of literacy among the peasantry during the pagan era. Despite the in excess of 100,000 birch scrolls excavated by archaeologists at Novgorod in the Christian cultural layers⁵ of the 11th Century, no archaeological traces of them have come to light in earlier soil horizons datable to the pagan era. Since there is no evidence thus far that the average person used or even understood the *Ruxski Pismeni* (the radiant script), the Glagolitic-style writing system of the Slav Magi, the people probably used the services of a Magian scribe to draft any correspondence. In this fashion the Magi became indispensable to the masses, and what is more, they got to find out exactly what was happening around their area of influence.

Being some of the few people who knew writing, the Magi probably kept whole flocks of them in basketed coops, grouped according to the particular areas they were accustomed to flying to.

Against this proposed usage of homing pigeons there is a *Primary Chronicle* account of a city on the Steppe that had been besieged for a very long time. The city's defenders could only send for reinforcements by getting a young lad to run the gauntlet through the lines of Pecheneg assailants. This may mean that the Rus' never used carrier pigeons at all, or that their settlement had no carrier pigeons, or simply that due to the pressing hunger generated by the siege, the people had eaten them. This might also mean that only the Drevlyanian kept coops, whereas the city mentioned did not.

In Cappadocia Turkey, a land once connected with the Goths, one can still see the valley of the fairy chimneys, peculiar natural rock formations that look every bit like wizard towers. Past inhabitants burrowed into them, hollowing out passageways and rooms. By my estimate they were first used by pagans, but were later taken over by Christian monks, as the heathens were driven from the area by Byzantine military actions. Seemingly numberless pigeon coops dotted their weird landscape, and are still to be found in conjunction with these sites. The birds themselves were probably kept for food and served to provide communications for the inhabitants of the valley.

Notes

Old and New Testament Bible quotations are sourced from the Old King James version. Select quotations from the Magian holy texts come from English translations first published by Oxford University Press in the 1880's, and subsequently reprinted by Mortilal Banarsidas in 1965, having been otherwise out of print since 1887. All other quotations are for research purposes, and are provided here, not for profit, in accordance with fair usage conventions.

1 - St Luke allegedly painted Jesus with blue eyes.

2 - To help cement his rule over the Jewish people, Herod torched all of the Hebrew genealogical archives, which showed the bloodline of each and every family, including which of them were descended from Ammonite and

Moabite stock. This account is to be found in *The History of the Church I:7*.

According to the writings of Hegesippus (a Jew who had adopted the Christian faith), which are recounted in *The History of the Church III:20*, Emperor Domitian sought to exterminate every Davidian Jew, in order to put an end to the threat of a future Messiah among their people. Hegesippus mentions during the 2nd Century AD, that two of St Jude's grandchildren, who were perhaps the last of their bloodline (he does not mention any other survivors of the House of David), were apprehended and taken before Domitian. They were interrogated about their earthly wealth (which on account of Roman predations was meagre), whereupon the Emperor decided that they were of no threat to Roman secular power. He then proceeded to ask them about the Kingdom of Christ, to which they replied that it was to come about only once the world had ended, and that it would not be in this world. Upon discovering that they were not planning an earthly kingdom, Domitian decided to cease destroying the Christian Church, and the two brothers were released. Thereafter these two figures went on to become leading figures in the Church until they passed into the next world during the reign of Marcus Trajan. It is not mentioned whether they had any offspring, but the survival of these personages might have given rise to the Mediaeval Christian myth that some of the Knights Templar were actually supposed to have been descendants of Christ's family line.

3 - Gilbert, A. *Magi - The Quest for a Secret Tradition*

4 - Alternative spellings are Caspar, Mechior and Balthasar, said to be from Tarsus, Persia and Saba respectively. In legend Balthasar was a black Ethiopian.

5 - (NT) *Matthew 2:2*

6 - (NT) *Matthew 2:5-6*

7 - (NT) *Matthew 2:9-12*

8 - (NT) *Matthew 2:13*. To help cement his rule over the Jewish people, Herod torched all the Jewish genealogical archives, detailing the bloodline of each and every family, including those descended from Ammonite and Moabite stock (*The History of the Church I:7*). From that time identifying the family origins of a potential Messiah became notoriously difficult, and one might guess heavily dependent on the mnemonic recollections of Jewish scribes. According to the writings of Hegesippus (a Jew who had adopted the Christian faith), which are recounted in *The History of the Church III:20*, Emperor Domitian sought to exterminate every Davidian Jew, in order to put an end to the threat of a future Messiah among their people. Hegesippus mentions during the 2nd Century AD, that two of St Jude's grandchildren, who were perhaps the last of their bloodline (he does not mention any other survivors of the House of David), were apprehended and taken before Domitian. They were interrogated about their earthly wealth (which on account of Roman predations was meagre), whereupon the Emperor decided that they were of no threat to Roman secular power. He then proceeded to ask them about the Kingdom of Christ, to which they replied that it was to come about only once the world had ended, and that it would not be in this world. Upon discovering that they were not planning an earthly kingdom, Domitian decided to cease destroying the Christian Church, and the two brothers were released. Thereafter these two figures went on to become leading figures in the Church until they passed into the next world during the reign of Marcus Trajan. It is not mentioned whether they had any offspring, but the survival of these personages might have given rise to the Mediaeval Christian myth that some of the Knights Templar were actually supposed to have been descendants of Christ's family line.

9 - Josephus. *Thrones of Blood*, p. 61 Josephus may have placed some store in Jesus as the Messiah stating 'There was about this time a wise man named Jesus - if it is lawful to call him a man, for he was a doer of wonderful works ... He was the Christ'.

10 - Fr. J Briand. *The Judaeo-Christian Church of Nazareth*

11 - *The Life of Christ*, p. 655-666

12 - (NT) *Matthew 23: 31-33*. See also West - *Pahlavi Text Part III*, p.241. This same scripture is retold to Magian audiences in *Sikand-Gumanik Vigar XV*, with Jesus' wording appearing as ' "How is it possible for you to do good works when you are Jewish evil-doers?" And it was not his (Jesus') own father he called an evil-doer'. In the lead up to Christ's baptism in the Jordan, John the Baptist before him bore similar animosity toward the Jewish priestly establishment of that day. As John cleansed away peoples sins in the river, and heard their confessions, a group of Pharisees and

Sadducees turned up, possibly to see what was going on, possibly to participate. John, the son of Zacharias, a fire priest and incenser of the order of Abia, addressed them with unabashed insolence 'O generation of vipers, who hath warned you to flee from the wrath to come?' (NT) Matthew III:7

- 230 - For example the Russian word for something 'sacred' or 'holy', or 'a saint' (*svyatoi, svet, sveta, sveto*) comes from the Avestan language of the Magi, rather than the Latin [*sanctus*] or Greek (*hagios*). The Old Russian and Old Slavonic was *svyat'*. The same saintly terminology was common to other Slavs also; *svet, sveta, sveto* (Bulgarian, Serbo-Croat, Slovenian), *svatu* (Czech), *swietu* and *sventa* (Polish), *sventas* (Lithuanian), *sventa* (Old Prussian). They come directly from the Avestan words *spenta* (meaning "holy" or "saintly") or *spanah* (meaning "sanctity"). *Svyat'* is also connected with the Old Indian word *svantas* meaning "thriving" or "prosperous", but clearly the meaning is much closer in the Avestan (Vasmer, M. , Vol III, p. 585).

- 237 - Hollingsworth. *The Hagiography of Kievan Rus'*

It is fascinating that several medieval hagiographies reveal noble birds of prey, or carrion eating ravens shepherding the corpse of a dead or martyred Christian saint, preventing it from being devoured, especially by dogs and other birds. The meaning of these tales is crystal clear to my mind; God no longer countenanced excarnation (a funeral method preferred by the Magians), and that any true follower of Christ was to desist from defleshing rites for the dead.

The Celtic Year, pg213-214

For the Irish, the Christian saints and soul-friends who passed into the next world in a state of holiness were not only guardians, but in their mind very real spiritual proteges who attentively looked after their needs against the attacks of demons, and who directed their charge towards the path to goodness, sanctity and righteousness.

In Chapter X of *The Life of Saint Cuthbert*, we find the story of Cuthbert praying to God while standing in the ocean, up to his neck in water. According to the recollections of the young monk who spied him leave the water, two

otters b scampered up the beach to where Cuthbert was drying off. There they lay at his feet, and in adoration of his piety dried the water from him with their bodies. If this incident is viewed through Magian eyes, we find that the Sea Otters (the *extremely holy* 'sea-dogs' as the Magi called them) gave adoration to him. And yet his immersion in seawater is a little un-Magian in that any true magus would have had to undergo a *Bareshnum* cleansing for doing so. On this basis we might say that Cuthbert was portrayed to his readers as a holy saint (in a Magian sort of way), but performing acts which Magians are less likely to have done.

In Chapter II of the same text, Cuthbert is crippled by a tumor on his leg, but saved from his affliction through the intervention of an angel mounted on a white horse. The angel tended his wound with a healing mixture of milk and milled wheat. Again we find Magian parallels in this hagiographical account, but as current wisdom has it, this heavenly horseman was one of the riders out of the (OT) *Book of Maccabees*.

In Chapter XX, St Cuthbert is depicted as a friend of the eagle, and discipliner of ravens that had been up to a little mischief. Once the ravens had stopped wrecking people's roofs, he developed a good relationship with them.

Some Frankish clergy might have identified themselves with the white *fravashis*. Adam of Bremen spoke out against the Frankish clergy's use of marten fur to line their cloaks, which he regarded as a custom both wicked and unbecoming. Interestingly the disciples of the Sun-like *Sraosha*, the pagan world messiah were supposed to have worn black marten fur cloaks on the field of battle during the war against Ahriman;

'The illustrious Peshyotanu forth he comes with a hundred and fifty men of the disciples who wear black marten fur, and they take the throne of their own religion and sovereignty'.c

If some segments of the medieval clergy chose to wear marten fur for this reason, then they would have perceived themselves as the servants of Christ, the Sun of God. Since the portion of Magian scripture mentioning this belongs to a very early tradition, it might indicate that early Magianism was in some way linked with the forests of the North, rather than the scorched deserts of Central Asia.

But the comparison between Christian and Magian saints has to end there, for the Magi went a step further by *actually worshipping* the *fravashis* as a manifestation of the divine being (as shown in the passage below), and not only them, but each little bit of the creator's masterpieces such as the rocks, the trees, the wheat, the grass and all such things. In successive generations this was super-simplified by commentators as pagans who indulged in 'nature worship', which the Church regarded as serious heresy.

'We worship the fravashi of the holy Atarepats; We worship the fravashi of the holy Ataredata; We worship the fravashi of the holy Atarekithra; We worship the fravashi of the holy Ataretoarenah.....We worship the fravashi of the holy Vohunemah, the son of Avaraostri, to withstand evil dreams, to withstand evil visions, to withstand evil, to withstand the evil

Pairikas (fairies).

We worship the fravashi of the holy Mathravaka, the son of Simaezi, the Aethrapati, the Hamidhpati, who was able to smite down most of the evil, unfaithful Ashemaoghas (devil-worshippers), that shout (yell?) the hymns, and acknowledge no lord

and no master, the dreadful ones whose fravashis are to be broken'. d

Misgivings about Christian saints later re-emerged during 'The Reformation', which saw many relics and images of the saints destroyed or defaced. From the Protestant perspective this meant dispensing with vestiges of idolatry, whereas Catholics (and the Orthodox Church which had resolved the issue of holy images during their war of nerves against the iconoclasts) regarded these acts as nothing less than unholy desecration, the profaning of saints who God held very dear and close to him. At no stage have the Catholic or Orthodox Church told their congregations to worship saints, only venerate them.

To illustrate the various points raised in this chapter, I include numerous individual examples where

Christianity and paganism appears to have become intertwined in Ireland and England. As elsewhere the transition to Christianity did not always entail slaughter and widespread chaos, but went fairly smoothly.

Many Protestants would say that the synthesis of the two faiths was and is wrongful, however the intricate interconnections between paganism and Christianity are far more complex than one would expect, so much so that value judgements of this kind may have entirely missed the essential clues which reveal the true origins and nature of Christianity. For instance, according to St Augustine, Christianity had existed in the ancient world, long before Christ came among us. e Is this an official Church reference to pagan expectations of a Messiah who turned out to be Jesus Christ, by one of Christianity's most famous theologians?

A similar confession was made by the renowned Welsh Bard Taliesin (of the 500's AD), who stated that there was never a time when the Druids did not hold to the teachings of the Christian Church. f This is perhaps a profound statement, a frank admission that the Old Faith had always loved Jesus (*Sraosha*), long before he had even been born. He was 'the Resurrector' and 'the Deliverer' foretold in ancient prophecy. One hagiography, the *Life of Colmcille* recounted the 6th Century exploits of St Columba, and contains references to Columba coming across men in Ireland who claimed to be Christian bishops, when in reality they were Druids. The theological climate of the age, evidently permitted Druids to claim with utmost conviction that they were Christian bishops, though I hasten to add, bishops that Rome was in no way happy with. g In some respects this parallels the Saxon/Germanic conversion experience, and for the very same reason ... the existence of Magi cognisant of their ancient messianic expectations.

Nevertheless other slightly more orthodox Christians may have lived there too. The evangelization of Ireland went largely undocumented until St Patrick's mission, in the year 432 AD. What we do know about it was contained in *Apologia* and *Confessio Patricii* (which Patrick himself wrote), and a plethora of other quasi-legendary tales scribed by later generations of Irish monks. But, roughly a year before Patrick's arrival, one Palladius went ashore to convert Irish Christians to the Catholic faith. h Some have guessed that these even earlier Irish Christians were somehow linked with the See of Alexandria, who as a result of the schism at Chalcedon in the mid-5th Century, separated from most of 'Christendom'. h Perhaps they came there to escape Roman anti-Christian reprisals. Whatever the case, Christians (of whatever shade) lived in Ireland earlier than 431 AD. h

On the continent numerous Celtic saints were beheaded by the pagans, which to the Magian mind would have been a sure sign of their sanctity. Regarding the absolution of Magian mortal sinners 'if the high-priest orders the cutting off of his head he is righteous on the spot'. i

St Keyne was described as a little girl whose body glistened like the sun. j And in a story reminiscent of the raising of Zoroaster, St Ailbe of Co. Munster was left to die in the wilderness during the early 6th Century AD, but was shortly rescued and affectionately raised by a wolf, k who he protected and fed in later life.

St Silyn's (an Irish saint) claim to fame was that he protected a stag from certain slaughter at the hands of huntsmen. l Is this an allusion to the holiness of the stag, stags such as those found in Mesopotamia, or on the wall of a Slavic temple, the totemic icon of the Iranian Saka tribe, or those kept in the royal forests?

St Decumen was a Welsh saint whose only sustenance was the milk of a cow. He was decapitated by a brigand who then made off with his beloved dairy cow. Decumen stood up and carried his head to a well-spring, where his blood sanctified the water. m Does Decumen's love of life-giving milk betray him as a white Magian saint?

And then there is the *Milking Song*. It implores the Virgin Mary (who it terms Jesus' milk-maiden) to bless the udders of a heifer. It then describes this heifer as black, and bound by a silken yoke. The singer likens the sorrow of this heifer whose calf had been lost, with the loss of Mary's son who lay underneath the sea. n

St Oswald, was a prince of the Angles who died in combat after converting to Christianity. Upon his death, his foes, the Northumbrians, cut his body into different parts, though his skull was later retrieved and interred at Lindisfarne. o Was this a continuation of the Magian practice of dismembering the body, and spreading the royal remains about various places, as though they were relics?

St Sidwell was martyred by scythe-bearing pagan farmers to place fertility back into the soil. Accordingly she was a saint invoked to give life to the fields. p Echoes of the old pagan sacrificial martyrdoms for the life of the land are all too clear in the death of this saint.

St Declan refused to eat some dog flesh given to him by a pagan, who told him it was from a sheep. Having sensed the deception, *Declan resurrected the dog*. q Did he do this to show Christ's powers of resurrection, because dogs were holy to the Magi, or because God had saved him from eating dog-flesh, an act, according to the Magi, capable of bringing one into the devil's kingdom for eternity, just as cannibalism would?

St Ninian taught that God was in everything from the least to the greatest, plant or animal. This saint was responsible for bringing the 'true Christian faith' to the idol-worshipping Picts, r which we think means he converted them to something altogether different from what they normally believed. But did he give them a totally new faith, or simply the Judaised, or corrected version of the faith as told by Rome?

Although the Catholic Church was vehemently opposed to the tenets of Magianism, they held a similar reverence for the living gifts which the Creator had made. The Church professed that we should be most thankful for the plants and animals, and every other good thing that God had provided for humanity, both for our use, our friendship and our enjoyment. This was more than fully illustrated in commentaries made by the Inquisitors s who classed the witchcraft-induced destruction of created nature, cattle and the fields as some of the more abominable achievements of the black witches, and gravely contrary to the magnificence of the Creator who had supplied all these things for the benefit of humanity. *Infernal witchcraft was truly a religion which pitted itself against the Creator God.*

- 259 - Simon Magus was anathematized by the apostles for offering money to gain the Holy Spirit's power of healing. This incident was traditionally used as a justification against simony. Even so other portions of the bible equate deeds with money, for example repaying sins 'to the last mite' (Luke XII:59). So too Christ's saying 'Pay to Caesar what is Caesar's, pay to me what belongs to me'. The latter wordings probably breathed extra life into the spiritual habits of the simoniacs.

- 262 - *On Simoniacs:9 Southern. R. W. - Western Society and the Church in the Middle Ages*, p.226. Following an analysis of documentation from the Holy Council of Closhevo, it appears that simoniacal practices were emerging during the 8th Century. 'When priests impose a penance of many years ...they sometimes indicate the sum of money necessary for remission of the annual stint ... This money payment is not found in the ancient canons of the Fathers'.

484 - Some scholars such as Cohn and Heer have wrongly stated that apocalyptic fears were not present around the year 1,000 AD, and had to wait until later in the Middle Ages to blossom. In the eyes of churchmen like the writer of the *Life of St George of Amastris* or Adam of Bremen there was a very real perception that the Viking and Rus' activities were, in their opinion, directly linked with the fulfillment of the previously quoted armageddonish passage from Ezekiel, and the *New Testament's Book of Revelation*. Such doomsday phobias are elaborately explained in the book *AD 1,000 - Living on the brink of Apocalypse*.

- 439 - See Christian and Stoyanov. *The Hidden Tradition in Europe*. The Manichaeans were the most prodigious of all the heretics. Its earliest missions encompassed Northern Africa, parts of Southern Europe and eastwards into China (especially Fukien province). After waves of persecutions and mass executions by the Romans in the 3rd Century AD, their parishes were pushed back as far as the Balkans, the Middle-east, India, China, Tibet, Siberia and Central Asia. During the 8th-10th Centuries, they were only on friendly terms with gnostics, Buddhists and the city states of the Central Asian silk route. Many steppe peoples were of this creed.

- We again hear of diving apparatus during the trial of John Wildman on charges of sedition in the last years of the 1600's. He allegedly procured the equipment from a female seer who learned how to construct the devices from the angels. Being a resourceful chap addicted to treasure hunting, Wildman used this novel gear to fossick offshore, where Spanish shipping had gone down.

- 662 - During his eastern travels Marco Polo claims to have seen the remains of the Three Wise Kings laying in an incorruptible state, somewhere in Iran, among a community of fire-worshipping Zoroastrians. This is interesting considering that the Kings' remains were peacefully residing in Cologne cathedral during that same time frame. Eastern legends mention more than three Magi going to Bethlehem. Perhaps the Iranian relics belonged to the rumoured larger retinue. Otherwise the authenticity of these or the Cologne remains are open to question. Examination of the Cologne relics have yielded a possible date almost 1,700-2,000 years old.

Delogne 1914, found on www.ladyoftheearth.com/witch/sugny.txt. The witchcraft poisoning accusations found in this trial, directed against the defendant Pihart (born to a family of known witches), allegedly happened to avenge a snub directed against their family. The deceased Jean Loison's family didn't want their son, Jean Lamblot marrying Pihart's niece, stating 'his mother ... didn't want Jean Lamblot of Sugny to mix with their (Pihart's) race (of the witches)'.

Tract Yomah. Chapter V and VI

CHAPTER V.

REGULATIONS CONCERNING THE REMAINING SERVICES OF THE HIGH-PRIEST ON THIS DAY IN THE TIMES OF THE FIRST AND SECOND TEMPLES.

MISHNA: *They brought to him a [golden] spoon and censer: he took two handfuls [of incense] and filled the spoon with it. If he had a large hand, it was much; otherwise, it was a little: he used the hand as the measure. He took the censer in his right hand, and the spoon in his left hand.*

GEMARA: *In a Boraita we have learned: They brought him an empty spoon from the chamber of the utensils, and a censer full of incense from the chamber of Beth Abtinias.*

"He took two handfuls." What was the spoon needed for on the Day of Atonement? It is written [Lev. xvi. 12] merely, "both his hands full of incense, and bring it within the rail"? He could not dispense with a spoon. If he had carried in the censer first, and thereafter the incense, he would carry in twice, and it is written "bring in" only once? If he should take the incense in both his hands, and put the censer upon them, and carry them in at once, what should he do then? Take off the censer with his teeth, and

put it down? If it would be unbecoming to do so in presence of a human king, how much more in presence of the King of Kings, the Holy One, blessed be He? Therefore it is impossible, and he is to do as the princes [Num. vii. 14], "One spoon . . . full of incense."

"He took the censer in his right hand," etc. Shall the citizen be seated on the ground, and the stranger on the heaven of heavens? ("The spoon of incense in his left hand," etc.) The spoon is small, and more easily carried in the left hand, while the large censer is borne in the right hand. And if they should be equally heavy, as occurred to R. Ishmael b. Qim'hi, who is said to have taken two handfuls of four Kabs of incense, even he had to take the censer in his right hand, as the censer was hot (and he had to be more careful).

It was said of R. Ishmael, the son of Qim'hi: It once happened on the Day of Atonement he spoke in a public place with an Arab, whose saliva was sprinkled on the high-priest's clothes. He became unclean (as the Arab might be so). Then his brother Jeshohab entered and took his place, so his mother saw two high-priests of her sons the same day. Another day it happened that he spoke with a Gentile nobleman, and the same happened. Then Joseph his brother took his place. And the rabbis taught: Seven sons had Qim'hi, their mother, and all officiated as high-priests. When the sages asked her: How hast thou deserved it? She replied: The ceiling of my house never looked on my hair. The sages answered: Many did so, and it did not profit them.

The rabbis taught: It is written [Lev. vi. 8]: "He shall lift up from it his handful." We might think, his hand might be overfilled; it is therefore written, "his hand full," not more. We might think, he may take some with the tips of his fingers. Therefore it is written, "hand full." He should bend his three middle fingers on his palm, and remove with the extreme finger and thumb the incense found outside of the three. This was one of the difficult services in the Temple.

R. Johanan said: R. Joshua b. Uza'ah propounded a question, What is the matter with the incense between the middle fingers? Is it considered as belonging to the handful, or the overflow? He himself, said R. Johanan, decided later that it is doubtful. What, then, shall he do therewith? Says R. Hanina: First he should offer the handful, and then this; for if he offered this first, perhaps it is superfluous: and elsewhere we have learned that if the remains of a meal-offering have been lost before the handful was offered, the handful must not be brought.

R. Papa propounded a question: These handfuls, were they exactly measured according to the hand, or too full? Said R. Abbi to R. Ashi: Come and hear the following Boraitha: The handfuls were not exactly according to the measure of the hand, nor overfull, but middling.

R. Papa propounded another question: When the incense happened to be spilled by him, how is the law? Shall it be said, his hand is like the neck of an animal, and the incense is invalid (if the blood has been received from the throat, it is valid, but not if spilled on the ground), or shall we say his hand is like other utensils of the Temple, and if it had been spilled, it may yet be offered? This question is not decided.

The schoolmen asked R. Shesheth: If he had taken the blood with his left hand, and placed it on the altar, is it valid, or invalid? He answered: We have learned it in our Mishna, that he took the spoon in his left hand (and yet it was offered). An objection was raised: We have learned in a Boraitha: "A layman, a mourner on the first day, a drunkard, and one who has a blemish, if one of these has received the blood, or carried it to the altar, or sprinkled it, he makes it invalid. The same is the case if he did it sitting, or with his left hand." This objection remains.

R. Papa propounded a question: If his companion took two handfuls, and emptied them into the priest's hands, how is the law? Shall we say, he has two handfuls, and it is valid, or shall we say, since it is written, "he shall take, and bring," it is invalid? This question is not decided. R. Joshua b. Levi propounded a question: When he had filled his hands with incense, and suddenly died, how then? Can another take it out from his hands and bring it in, or is other incense required? R. Hanina said: Come and see

what kind of questions our predecessors have asked. Was R. Joshua b. Levi older than R. Hanina? Did not R. Joshua b. Levi say that R. Hanina had given me the permission to drink a beverage of cress on Sabbath? (See Sabbath, Mishna, p. 226.) He means, R. Hanina asked a profound question like to those asked by the ancestors. How is the law? Come and hear: "That was the measure." From this we must infer, that as the measure was outside, so it must be inside (that priest has a different hand, hence other incense is to be taken).

Perhaps the Mishna means to say that he may use his hand as a measure, or that he may not add to it or take away from what he has grasped? Come and hear: How did he do it (empty the frankincense from the spoon into his hands, both of which were occupied)? He took the handle of the spoon with his fingertips—others say, in his teeth—and moved his thumbs up the handle (being thus able not to spill the frankincense) till the handle fell, near his armpits, and the head of the spoon was above his palms. He then overturned the spoon, thus emptying the frankincense thence into his hands, and heaped the frankincense on the censer, that the smoke might be retarded; some say, he spread it out that it should smoke more rapidly.

This was one of the most difficult services of the difficult services that were in the Temple. Hence we see, he took of the frankincense once two handfuls, and then once more.

The schoolmen propounded a question: If he died while slaughtering, might the blood be sprinkled? Shall we say, that since it is written "with a bullock," it is meant, the blood of the bullock alone, or the whole bull (so that the substitute cannot use him)? R. Hanina says, the entire bullock; Resh Lakish says, the blood alone. Said R. Papa: The hide and the flesh and the dung, all agree, are only parts of the bull; about the blood they differ. One says, the blood is not the bull; the other thinks the blood only is the bull. Says R. Ashi: It seems to me, the one who says that the blood is considered as one with the bull is in the right. Because it is written [Lev. xvi. 3], "With this shall Aaron come into the holy place: with a young bullock," is it meant that he should lead him by the horns? and not simply that he should bring the blood; hence the blood is considered as one with the bullock. And what can the other reply to this? His answer is: It is written, "for a sin-offering"; the word "come" refers, not to the bullock, but to the sin-offering. Let him who says that the blood is one with the bull, give the reason that a sin-offering whose owner has died cannot be used for any purpose, and is only put to death.

Said Rabbin b. R. Adda to Rabba: Thy disciples have said in the name of R. Anram that this bullock is considered a sin-offering for the congregation (who are considered its owners, because he comes to atone for himself and for his fellow-priests), and such is not put to death.

MISHNA: He walked through the Temple till he reached the place between the two vails which separated the sanctuary from the Holy of Holies—one ell wide. R. Jose says: There was but one vail, as it is said [Ex. xxxi. 33]: "And the vail shall divide unto you between the holy place and the most holy."

GEMARA: Did not R. Jose say very correctly to the rabbis? The rabbis may say: This was only the case in the tabernacle, but as in the second Temple there was no ell for the entrance at all (because a partition only an ell thick could not support itself, for the walls of the Temple were a hundred ells high) and only in the first, it was doubted whether this ell of the entrance belonged to the Holy of Holies or the sanctuary. Therefore they made two vails.

The rabbis taught: He walked between the altar and the lamps, so said R. Jehudah. R. Meir says, between the table and the altar. Others say, he walked between the table and the walls. Who are the others? That is R. Jose, who says the door of the Temple was in the north. R. Jehudah says the door was in the south.

R. Jose says that he walked between the table and wall, which is a public entrance, because the Israelites are a people beloved by God, and need no delegate to pray for them (as it is written [1 Kings viii. 38]: "When they shall be conscious every man of the plague of his own heart, and he shall then spread forth his hands"), therefore their delegate to God needed no private entrance, but

could do it in sight of the public.

R. Nathan said: The ell of the entrance was a matter of doubt to the sages, whether it was holy as the Holy of Holies or the sanctuary, and that is what R. Johanan has said: Joseph the man of Hutzal has propounded a question: It is written [1 Kings vi. 19]: "And the Debir in the house within did he prepare, to set therein the ark of the covenant of the Lord." They did not know what is meant: whether the place inside of the Debir was prepared for the ark, or that the Debir was itself inside.

MISHNA: The outer one was raised and looked to the southern [wall] and the inner one to the northern. He walked between them, till he reached the northern [wall]: having arrived thither, he turned his face to the south, he walked back with his left hand to the curtain, reaching the ark [which was on his right in the Holy of Holies, reaching the place where the inner curtain was]. Coming there, he placed the censer between the staves, heaped the incense on the top of the coals, so that the whole house was filled with smoke. He departed in the same manner as he had come [facing the Holy of Holies, walking backward], and said a short prayer in the outer sanctuary, but not making it a long one, so as not to alarm the Israelites [about his absence, lest he had been killed by God].

GEMARA: Of which Temple is it spoken? In the first Temple there was a partition, not a curtain, before the ark; if the second, there was no ark in it? As we have learned in the following Boraitha: Since the ark was concealed, with it were hidden the flask of manna [Ex. xvi. 33] and the flask of anointing oil, Aaron's staff, its almonds and buds, and the box the Philistines sent as a gift to the God of Israel with the golden vessels. And who concealed them? King Josiah. Why? Because it is written [Deut. xxxiii. 36]: "The Lord will drive thee and thy king whom thou wilt set over thee," he concealed it; as it is written [2 Chron. xxxv. 3]: "And he said unto the Levites that instructed all Israel, who were holy men unto the Lord: Set the holy ark in the house which Solomon the son of David the King of Israel did build; ye have not to carry it any more upon your shoulders: now serve the Lord your God, and His people Israel." And R. Eliezer said to this: From the analogy of expression—namely, that of the ark—it is said "there" [Ex. xxx.], and of the flask of manna also "there" [ibid. xvii.]; and there are also mentioned "generations" and "for preservation." R. Eliezer infers that Josiah concealed them. There was then no ark? The second Temple is meant; and not the ark, but the place where it had to stand, is meant. But it is said, "between the two staves." The place they would occupy is meant.

"Heaped the incense on the top of the coals." Our Mishna will agree with him who has said in a Boraitha: Heap it, that the issue of the smoke be retarded (made slow). In one Boraitha we have learned: He heaps it inside, away from him. In another Boraitha: He heaps it outside, toward himself. How will they agree? Says Abayi: There is a difference of opinion between two Tanaim; one says one way, the other, otherwise. Abayi says again: It seems to me the Halakha is according to him who says that he must heap it inside, away from himself; because, as we have further learned in a Mishna, they teach him not to heap near his face, lest he burn himself.

The rabbis taught: It is written [Lev. xvi. 13]: "He shall put the incense upon the fire, before the Lord." "Before the Lord": he must not prepare it outside, but inside, in the Holy of Holies. This is to contradict the Sadducees, who said that he must prepare outside. Why? Because, they say, it is written [ibid. 2]: "For in the cloud will I appear upon the mercy-seat." Cloud is interpreted, the cloud of the incense. When he prepares outside, he enters with a cloud of incense. The sages said to the Sadducees: Is it not written: "He shall put the incense upon the fire before the Lord"? So it has to be prepared inside. They rejoined: What will you make of the "cloud"? The rabbis say: From this we deduce that he must put in the herb which straightens the smoke. How is it known that that herb has to be put in? Because it is written [ibid. 13]: "That the cloud of the incense may envelop." Without that herb, how will the mercy-seat be enveloped? If he has omitted to put in this herb or any ingredient, he is liable to capital punishment. Why give this reason, when, if he come in without the incense being entirely prepared, he enters the Holy of Holies gratuitously, which involves capital punishment? Says R. Shesheth: The case is, he had omitted one ingredient intentionally, but entered unintentionally. R. Ashi says: Even if he did both things intentionally, but entered with two kinds of incense, one kind prepared as is lawful and the other not, for entering he is not culpable, but for having prepared incense lacking some ingredient he deserves capital punishment.

"He departed in the same manner as he had come." Whence do we deduce this? Said R. Shama b. Na'hmain in the name of R. Jonathan: It is written [2 Chron. i. 13]: "Then came Solomon from the high place that was at Gibeon to Jerusalem" (literally, at). How comes Gibeon to be in Jerusalem? His return from Gibeon to Jerusalem is compared to his entering Gibeon from Jerusalem. As when he entered Gibeon from Jerusalem his face was turned to the high place, so when he left it, his face was still turned to the high place. So did also the priests after service, the Levites after their song, and the Israelites after they had been standing. When they left, their countenances were turned to the Temple. So also a disciple, leaving his Master, should do. So R. Elazar, when he used to part from Johanan. When R. Johanan desired to leave first, he bent himself in his place till Johanan was out of his sight; when R. Elazar was to leave first, he walked backwards till he could see him no longer. Rabba, leaving R. Joseph (who was blind), used to walk backwards till his feet struck against the threshold, so as to cause them to bleed. When this was related to R. Joseph, he said to Rabba: May God's will be that you shall raise your head above the whole city. R. Alexandri said in the name of R. Joshua b. Levi: Who prays, should make three steps backwards, and then say, "Maketh peace," etc. Said R. Mordecai to him: If he has made three steps backwards, he must stop there a while. It is like a disciple who has taken farewell of his Master, and then returns to him on the instant, which is like a dog returning to his vomit. If he has failed in doing so, he would better not have prayed at all. In the name of Shemaia it has been said: When he says these words, he should first bow to the right, then to the left; as it is written [Deut. xxx. 2]: "From his right hand a fiery law." Rabba saw Abayi, who said "He maketh peace" first on the right, and then on his left. He said to him: Thinkest thou, thou must say this to the right side of thyself? nay, of the Holy One, blessed be He, who is opposite to thee and whose right side thus corresponds to thy left side. R. Hiya the son of R. Huna said: I saw Abayi and Rabba making the three steps backwards with one bow.

"And said a short prayer." What was the prayer? Rabba and Rabbin the sons of R. Adda both said in the name of Rabb: May it be Thy will, Lord our God, that if this year will be a hot one, Thou mayest give plenty of rain. R. A'ha the son of Rabba said in the name of R. Jehudah that the high-priest used to conclude the prayer as follows: May no ruler cease from the house of Judah, and may Thy people Israel not depend for livelihood on each other (not be paupers), and mayest Thou not heed the prayers of travellers who ask for the cessation of rain.

R. Hanina Dasa happened to be on the road. It began to rain. He said: Lord of the Universe, the whole world enjoys, but Hanina is afflicted. The rain ceased. When he reached home, he said: The whole world is in anxiety because no rain comes, only Hanina is contented (having no fields). Rain began to come again.

Says R. Joseph: What availed the prayer of the high-priest against the prayer of R. Hanina Dasa?

The rabbis taught: It happened that one high-priest made his prayer very long. When the priests became alarmed, they went to see whether he had died, and met him returning. They inquired of him why he had made his prayer so long. He said: Is this displeasing to you, when I prayed the Lord that the Temple might not be destroyed? They said to him: Do not thou repeat it, as we have learned in the Mishna, He should not make the prayer long, lest he alarm the congregation."

MISHNA: When the ark had been taken away, there was a stone from the time of the first prophets, "Shethia" [foundation] it was called, three-finger high above the ground. Thereupon he placed [the censer]. He took the blood from the one who stirred it, went to the place whither he had gone, and stopped where he had stopped [in the Holy of Holies], and sprinkled from his position once upward and seven times downward [Lev. xvi. 14], without being intent on sprinkling it either upward or downward, but holding the palm open, either turned outward or toward himself [meaning doubtful]. Thus he was counting: one [upward], one and one [downward], one and two, one and three, one and four, one and five, one and six, one and seven. He departed, and placed it [the basin] on the golden stand in the Temple. They brought to him the he-goat, he slaughtered it, and received in a basin its blood. He went to the former place, stopping where he had stopped, and sprinkled thereof once upward, and seven times downward, without taking care to sprinkle upward or downward, but holding his palm open, turned in or out, and counting thus: one, one and one, one and two, etc. He came out, and placed it on the second stand that was in the Temple. R. Jehudah

saith: There was but one stand there. He took up the bull's blood, and put down the he-goat's blood. He sprinkled thereof at the curtain which was opposite to the ark outside, once upward, and seven times down, without taking care, etc., and thus counting, etc. He lifted the blood [-filled basin] of the he-goat, and put down that of the bull's blood; he sprinkled of it on the curtain opposite to the ark outside, once upward, seven times down, etc. He emptied the bull's blood into the he-goat's blood, and transferred (the contents of) the filled basin into the empty one.

GEMARA: The Mishna says, "When the ark was taken away," not concealed; it holds, therefore, that it was removed to Babylon. As we have learned in a Boraitha, R. Eliezer said: The ark was taken into exile in Babylonia. As it is written [2 Chron. xxxvi. 10]: "And with the expiration of the year did King Nebuchadnezzar send, and had him brought to Babylon, with the precious vessels of the house of the Lord" (precious; that is, the ark). R. Simeon b. Jochai infers this from another passage [Is. xxxix. 6]: "No thing shall be left": no word (for "king," "word," and "commandment" the same Hebrew word is here used) will be left, none of the ten commandments (or the ark which contained them). R. Jehudah, however, says: The ark was concealed in its place (Temple), as it is written [1 Kings viii. 8]: "And they had made the staves so long, that the ends of the staves were seen out in the holy place in the front of the Debir, but they were not seen without; and they have remained there until this day." And he who says that R. Simeon b. Jochai thinks that the ark was taken into exile, differs from Ulla, who says as follows: R. Mathia b. Heresh had asked R. Simeon b. Jochai in Rome: We see that R. Eliezer infers from two verses that the ark was taken into exile. One verse is quoted above; the other is [Lam. i. 6]: "There is gone forth from the daughter of Zion all her splendor." Thereby the ark is meant. What hast thou to say thereto? He replied: I say, the ark was concealed on the spot, and the proof is the verse quoted above. Said R. Na'hman b. Itz'hak: We have also learned it in a Mishna in Shekalim [VI., b]: "Once a priest was engaged there, and he noticed that one of the paving stones on one place appeared different from the others. He went out to tell others of it; but he had not yet finished speaking, when he gave up the ghost. Thereby it was known to a certainty that the ark of the covenant was hidden there." What was he engaged in? Says R. Helbo: He was busy sporting with his axe. The disciples of R. Ishmael have taught: There were two blemished priests who picked out the wood, which was not mouldy. The axe of one fell down on the place where the ark was concealed; a fire issued, which consumed him.

"A stone, Shethia." We have learned in a Boraitha: The word Shethia means, that the universe has been created from it, as Shethia means foundation. This is according to him who says, that from Zion the world began to be created, as we have learned in the following Boraitha: R. Eliezer said: The world was created from the very middle, as it is written [Job xxxviii. 38]: "When the dust is poured out as molten metal, and the clods are made to cleave fast together" (first the central piece was made, then the other parts adhered to it). R. Joshua says: The world was created beginning with the extremities, as it is written [ibid. xxxvii. 6]: "For to the snow he saith, Be thou earth. Likewise to the pouring rain, and to the pouring rains of his strength." Four times the word "rain" is repeated here (in Hebrew, but "rain" means in Talmudic dialect "matter"). There were then four pieces of matter, and of them was composed the world. R. Itz'hak says: The Holy One, blessed be He, threw a stone into the sea, and therefrom a world was made. As it is written [ibid. xxxviii. 6]: "Upon what are her foundation-pillars placed at rest? or who threw her corner-stone"? The sages, however, said: The world was created beginning with Zion. As it is written [Ps. l. 1, 2]: "The God of Gods, the Lord Speaketh," etc. "Out of Zion, the perfection of beauty." That signifies, from Zion began to be the beauty of the whole world. In another Boraitha we have learned: R. Eliezer the Great said, It is written [Gen. ii. 4]: "These are the generations of the heavens and the earth when they were created, on the day, that the Lord God made earth and heaven." The luminous stars, etc., were created from the heavens, and all earthly things from the earth. But the sages say: Everything was created from Zion. As it is written [Ps. l. 1]: "A Psalm of Assaph. The God of gods," etc. "The perfection of beauty," i.e., the beauty of the whole world. "Holding the palm open." What is meant by this? Said R. Jehudah: As one uses a lash first from the right to the left, and then downward.

"He took the blood from the one who stirred it," etc. We have learned in a Boraitha: When he sprinkled, he did not sprinkle on the top of the mercy-seat, but opposite; and not that the blood should fall on it, but on the ground. When he sprinkled on the top of the mercy-seat, he bent the palm downward, that it should not fall on the mercy-seat, and when he sprinkled beneath it, he held his palm bent upward, that it should not fall on the mercy-seat, but on the ground. Whence do we deduce this? Because it is written [Lev. xvi. 15]: "He shall sprinkle it above the mercy-seat, and before the mercy-seat." This had not to be written, as it has already

been written in the case of the bullock [ibid. 14]. It is meant to make the "before" and "above" equal; as by "before" the mercy-seat, it is meant that it should not be sprinkled at it, but opposite to it; so also by "above" is meant, not upon it, but opposite to it.

The rabbis taught: It is written: "And he shall sprinkle it above the mercy-seat." From this we know only once above (it, in case of the goat). How many times had he to sprinkle downward? This we have to infer from the bullock: as it is written of him seven times, so we infer in regard to the he-goat. We know that it is equal in case of the bullock and goat, downward; but we do not know how many times he is to sprinkle downward in case of the bullock? We apply to the bullock the law in reference to the goat: as in the case of the goat, so in the case of the bullock—once downward, seven times upward.

"One, one and one," etc. The rabbis taught: He counted one, one and one, one and two, etc., up to seven. So said R. Meir. R. Jehudah says: One, one and one, two and one, three and one, four and one, five and one, six and one, seven and one. They do not differ. Each said according to the custom in his part of the country (in the one place they said, e.g., twenty-one, in the other one and twenty). Now we see that all agree that the first time of sprinkling had to be counted along with each of the other seven? What is the reason? Said R. Elazar: He should make no mistake in the number of countings. R. Johanan says: Because it is written again [ibid. 14]: "Shall he sprinkle," superfluously, it is to teach us that the first he ought to count with all the others, What is the point of their difference? R. Elazar says: If he has failed to do it, but made no mistake, it is valid; but according to R. Johanan, it is not.

"He departed, and placed it on the golden stand." One of the scholars read the prayer in the presence of Rabha, and read, "He departed, and placed it on the second stand"; and after this he read, "He took the he-goat's blood, and put down the bullock's blood." Said Rabha to him: The first thing thou readest according to the rabbis (who say there were two stands), and the second according to R. Jehudah (who says there was but one stand, and therefore he took down the bullock's blood when he came with the goat's blood), you thus contradict yourself. You should say: He put down the goat's blood (on the second stand), and took up the bullock's blood (from the first, stand).

The rabbis taught: It is written [ibid. 16]: "So shall he do for the tabernacle," etc. Wherefore had this to be written? It comes to teach us, that as in the Holy of Holies he had to sprinkle once and seven times, both from the bullock's blood and the goat's, so he had to do in the sanctuary.

"That abideth among them in the midst of their uncleanness." This signifies, even when they were unclean, the Shekhina continued to be among them. A certain Sadducee said to R. Hanina: At the present time, when the Temple is destroyed, ye are certainly unclean, as it is written [Lam. i. 9]: "Her uncleanness on her skirts." He replied to him: Come and see. It is written: "That abideth among them in the midst of their uncleanness."

We have learned in a Boraitha: When he sprinkled on the veil, he sprinkled not upon it, but opposite to it (that the blood fell on the ground). R. Eliezer b. R. Jose, however, said: I have seen on the veil in Rome the marks of the drops of blood of the bullock and goat of the Day of Atonement.

What is the law, when the bloods of the bullock and goat got mingled? What shall he do therewith? Says Rabha: He sprinkled thereof once upward, and seven times downward, and this sufficed for both. This Halakha has been communicated to Jeremiah in Palestine: He said: Ye Babylonians are stupid. Because ye live in a dark land, ye say dark Halakhas. In this manner, he will sprinkle the he-goat's blood before the bullock's, and it is written [Lev. xvi. 20]: "When he hath made an end of atoning for the holy place." "The end"—hence everything must be in its proper turn. What, then, shall he do? Says R. Jeremiah: Once he sprinkles it as the bullock's, and then a second time as the he-goat's blood.

How if the bloods got mixed, when he has already sprinkled the bullock's blood upward? Said Rabha: He should sprinkle it seven times downward as the bullock's, and then upward and downward as the he-goat's, blood. How if he has confounded the basins?

What shall he do then? He should sprinkle three times, once for the bullock, then for the he-goat, and the third time for the he-goat (lest the he-goat's blood had preceded the bullock's when he sprinkled the first time).

"He emptied the bull's blood into the he-goat's." Our Mishna will be according to him who maintains that the bloods must be mixed, for the purpose of putting it on the corners of the altar. Because it was taught: R. Josiah and R. Jonathan said, one of them that they had to be mingled, and the other that they ought not to be mingled, but put separately on the corners of the altar. It seems that R. Josiah was the one who said they had to be mingled, as we have heard elsewhere, though it is not written "together" [Lev. xvi. 18]; yet since it is written "and," it is as good as though it had been written "together."

We have learned in another Boraitha: It is written: "He shall take from the blood of the bullock and the blood of the he-goat." That signifies, they should be mixed together. But whence do ye know that it means that they should be sprinkled together, not separately? Therefore it is written [Ex. xxx. 10]: "And Aaron shall make an atonement upon its horns once in a year": once, not repeatedly. We see that the anonymous Boraitha is according to R. Josiah.

"He transferred (the contents of) the filled one into the empty one." Rami b. Hama propounded a question of R. Hisda: If he had placed one basin in the other, and therein received the blood, how is it? Should we say, as they are of one kind, that forms no invalidation? or that though of one kind, it is an invalidation? R. Hisda answered him: We have learned it in our Mishna: He has transferred the filled one into the empty one. Shall we not assume that it means, he placed the full basin in the empty one? Nay. It means, he poured the contents of the full basin into the empty one. But this is already mentioned in the beginning of the sentence? He transfers the mixed blood again into an empty vessel, to mix the two kinds of blood the better.

MISHNA: He then went out to the altar which is before the Lord, which is the golden altar, and began to cleanse it, downward. Whence does he begin? From the northeastern corner [horn] to the northwestern, southwestern, southeastern. Where he begins to cleanse the outer altar, at that spot he finishes cleansing the inner. R. Eliezer says he remains where he stands, and thence cleanses [the altar being one ell square]. Everywhere he sprinkled from below upward, except at the spot where he stood, whereat he sprinkled from above downward.

He, sprinkled on the clean place of the altar [where the gold was to be seen] seven times, and what remained of the blood he poured at the western base of the outer altar, and what remained of the blood of the outer altar he poured at the southern base. Both kinds of blood mingled in the trench, and flowed out into the brook Kidron. And it was sold to gardeners as manure, but one offends by [using without paying for] them.

GEMARA: We have learned in a Boraitha: Why is it necessary to repeat here, "before the Lord"? Said R. Nehemiah: Because we find that when he held the bloods of the bullock and he-goat he stood inside of the altar, and sprinkled the blood on the veil, we might think that at the same time he should sprinkle on the golden altar: therefore it is written [Lev. iv. 7], "the altar of the incense of spice, before the Lord," to let us know that the altar was before the Lord, but not the priest. What, then, should he do? He had to come out to the outside of the altar, and thence sprinkle.

"Began to cleanse it, downward." The rabbis taught: He began to cleanse from above downward. And whence did he begin? From the southeastern to the southwestern, northwestern, northeastern. So is the decree of R. Aqiba. R. Jose the Galilean said: From the northeastern to the northwestern, southwestern, southeastern. So that at the place where, according to R. Jose, he begins, according to R. Aqiba he finishes, and vice versa. Now we see that, according to all, he does not begin with the corner he meets first, but some definite corner. What is the reason? Said Samuel: Because it is written, "He went out to the altar," till he has come out from the place inside of the altar, and comes outside. (What is the point of difference between the two Tanaim?) The following: R. Aqiba thinks he has to walk round the altar, and R. Jose that he ought only to cleanse the altar at all corners, making its round with the hand. We have learned in a Boraitha: R. Ishmael said: Two high-priests remained of the first Temple. One said, he had passed round the altar with his hand; and the other, he had walked round it with his feet. And both gave their reasons. The one said: As it is written, "round." The inner altar was like the outer, which was large, and had to be walked around; while the other

said: It was small, and with his hand one could reach all corners, as it was only in size like one corner of the outer altar: hence it was not necessary to walk round it.

"He sprinkled at the clean place of the altar." What is meant by the clean place? Said Rabba b. R. Shila: Where the altar was not covered, as it is written [Ex. xxiv. 10]: "Like the color of heaven in clearness." We have learned in a Boraitha: Hanania says, he sprinkled on the northern side, and, R. Jose says, southern. On what point do they differ? The one says the door of the sanctuary was at the north, the other says, at the south; but all agree, that where he finished to put the blood on the corners, at that side he sprinkled on the top. What is the reason? Because it is written [Lev. xvi. 19]: "He shall cleanse it and hallow it." That signifies where he had hallowed it, there he shall cleanse it.

"What remained of the blood," etc. This is because it is written [ibid. iv. 7]: "All the (remaining) blood of the bullock shall he pour out," and when he comes out, he meets the western base of the outer altar first.

"Of the outer altar, he poured at the southern base." The rabbis taught: By the base of the altar, the southern base is meant.

And another Boraitha states that, according to R. Ishmael, it was the western. The disciples of R. Ishmael, however, taught in the name of R. Ishmael, as the disciples of R. Simeon b. Jochai, that it was the southern (that is, R. Ishmael revoked what he said).

"One may offend," etc. The rabbis taught: One becomes guilty, when he uses the blood for his benefit. So is the decree of R. Meir and R. Simeon. The sages, however, said: The blood may be used. They are at variance only as to whether it is rabbinically an offence or not; but all agree that, biblically, one cannot offend (for if they thought it was biblical, they would not sell it to gardeners. Tospath.) Whence do we deduce this? Says Ulla: It is written [Lev. xvii. 11]: "I have appointed it for you upon the altar to make an atonement for your souls": for you, it should belong to you. The disciples of R. Simeon taught: To make an atonement, but not an offence. R. Johanan says: In the same verse it is written, "For the blood it is that maketh an atonement for the soul." It is (after the atonement) as it had been before the atonement.

MISHNA: It holds true of all the rites on the Day of Atonement, whose order is prescribed by the Bible (and stated in the above Mishnas), that if they are performed in a wrong order, one has done nothing. Had he used the blood of the he-goat previously to that of the bull, he should sprinkle once more some of that he-goat's blood after that bull's blood, and if while he had not completed the offering of the gifts in the inner part [Holy of Holies], the blood was spilled, it is incumbent upon him to fetch other blood, and once more sprinkle it inside, and the same is the case in the Temple, and also of the golden altar, because all [rites] are separate atonements. R. Elazar and R. Simeon say, however: From where he had been mistaken, he should begin anew.

GEMARA: The rabbis taught: It holds true of all ceremonies of the Day of Atonement whose order is stated in the Mishna, if one of them has been performed earlier than that which should precede it, it is as nothing. R. Jehudah, however, said: This is only true of the rites performed in the white garments in the Holy of Holies, but of the ceremonies performed in the white garments outside (e.g., the lots, emptying the remaining blood, or confessions), it is true that if he has done them out of the right order, they are still valid. R. Nehemiah said: The case is simply, all ceremonies performed not in the right order in the white garments, whether in the Holy of Holies or outside, are invalid; but the rites performed in the golden garments outside must not be done again. Said R. Johanan: Both have deduced it from the same verse. It is written [Lev. xvi. 34]: "And this shall be unto you as a statute for everlasting, to make an atonement for the children of Israel for all their sins once a year." R. Jehudah holds, what is meant by "once a year"? Where the atonements are made once a year, and that is in the Holy of Holies. R. Nehemiah holds, that not the place where once a year the rites are performed is meant, but the rites done for atoning once a year, and that is inside and outside.

How can R. Jehudah say, the place is meant? It is only written "once a year." We must say, the reason of R. Jehudah is this: It is written, "and this shall be," and then "once a year." Hence two limitations, one excluding what is performed in the white garments outside of the Holy of Holies, the other

excluding what is done in the golden garments. And R. Nehemiah says: The one expression excludes what is performed in the golden clothes, and the other the remainders of the blood, which, if not emptied at all, involves no transgression.

R. Hanina said: If he has taken the handfuls of frankincense before the bullock has been slaughtered, he has done nothing. This cannot be according to R. Jehudah, for according to R. Jehudah it is only the rites performed in the Holy of Holies, but this is done outside? Nay; even according to R. Jehudah it would have been invalid. Why? Because it is a preparatory service for a service performed in the Holy of Holies (it is equal to such a service).

Ulla said: If he has slaughtered the goat before the bullock's blood had been sprinkled, he has done nothing. An objection was raised: It is said in our Mishna, if he has sprinkled the he-goat's blood before the bullock's, he should sprinkle once more. If it were as Ulla says, it should have been said: he should slaughter a second time. Ulla explained the Mishna: That is the case with the offerings in the sanctuary, but in the Holy of Holies the bullock's blood must be sprinkled first, then the he-goat must be slaughtered. And so has also R. Ephes explained.

"The same is the case in the Temple," etc. The rabbis taught: It is written [Lev. xvi. 33]: "He shall make an atonement for the sanctuary of holiness, and for the tabernacle of the congregation and for the altar shall he make an atonement; and also for the priests and for all the people of the congregation shall he make an atonement." The sanctuary of holiness—that is, the Holy of Holies; by the tabernacle the Temple is meant—the altar, literally; "shall he make an atonement"—by this is meant the court where the priests might walk; "the priests," literally, "the people of the congregation," Israel; "make an atonement" once more—that means the Levites.

All are then equal in their atonement; that is, all are atoned for by the scapegoat for all sins except uncleanness. So said R. Jehudah. R. Simeon, however, said: As the blood of the he-goat, sprinkled inside, atones for Israel only the uncleannesses of the Temple and all sacred things, so the blood of the bullock atones for the priests only the sins of uncleanness. And as the confession over the scapegoat atoned for Israel's other sins, so also the confession over the bullock atoned for the other sins of the priests. In a Boraitha we have learned: Rabbi has said: My Master, R. Jacob, has taught me this difference of opinion of R. Elazar and R. Simeon in our Mishna is only in relation to the logs offered by lepers.

R. Johanan said: The trespass-offering of a leper, if slaughtered for a wrong purpose, is where the same difference of opinion of our Mishna exists. According to R. Meir, who says that if he has made a mistake, he must begin anew, he must in this case also bring another trespass-offering. But according to R. Elazar and R. Simeon, who say that he must begin where he had made the mistake, there is no mending of this mistake; for it has been slaughtered already (and if he should slaughter another, he will offer two, while it is written one). The following Boraitha is according to R. Johanan: If a leper's trespass-offering has been slaughtered for another purpose, or some of its blood was not put on the thumbs and great toes of the leper, it may be offered on the altar, and requires a drink-offering; but another trespass-offering has to be offered.

The rabbis taught: All things mentioned in our Mishna—bullocks, he-goats—that have become invalid, defile the garments of him who burns them, and they must be burned in the place where the real sacrifices are burned. [See Lev. xvi. 27, 28.] So is the decree of R. Eliezer and R. Simeon. The sages, however, say: They are not to be burned, because only those which have been used the last, because used for the atonement, must be burned there. Rabha asked R. Na'hman: (If the he-goats have become invalid, two others are required) how many shall he despatch as scapegoats? R. Na'hman answered him: Shall he send a whole flock? R. Papi says in the name of Rabha: He sends the first. R. Simi says in the name of the same: The last. It is right according to R. Simi, because the other of the couple has been used for the atonement; but what is the reason of Rabha, according to R. Papi's saying? He holds as R. Jose of the following Boraitha: If one separates his Paschal lamb and the same be lost, and after he purchases another one in its stead the first one is found, he may offer either one of them. So is the decree of the sages. R. Jose, however, says: There is a merit to offer the first one, unless the second was a better one.

CHAPTER VI.

REGULATIONS CONCERNING THE HE-GOATS OF THE DAY OF ATONEMENT AND THE SENDING TO THE DESERT, AND THE CONFESSION THEREAT.

MISHNA: It is a merit that the two he-goats for the Day of Atonement should be equal in color, stature, and price, and both (bought) at the same time; but if they are not equal, they may still be used. If one was bought to-day, and the other on the morrow, they are valid. If one of them died, then if this occurs before the lots are drawn, another is purchased to make up the pair; but if later, then a new pair should be acquired. Lots should be drawn again, and this should be said: If the Lord's he-goat has died, "The one on which the lot has fallen for the Lord may substitute him"; and if that of Azazel has died, "The one on which the lot has fallen for Azazel may substitute him." And the remaining one of the previous pair should be allowed to feed (graze) till it chance to get a blemish, when it is sold, and the money goes as a gift-offering, since an animal designed to atone for the congregation is not put to death. R. Jehudah says, it is (put to death). Also said R. Jehudah: If the blood [of the Lord's he-goat, when slaughtered] had already been spilled, the scapegoat should be put to death; if the scapegoat had died, the other one's blood should be poured out [and a new pair purchased].

GEMARA: The rabbis taught: It is written [Lev. xvi. 5]: "He shall take two goats." Why is it mentioned, two? If it were in the plural, we would know, not less than two. It is meant, then, the two should be equals. How, then, do we know that when they were unlike they were still valid? Because it is written twice "goats" [ibid. 9, 10], That shows, that if they were not alike they were still valid. But if "goat" were not repeated twice, they would have been, according to you, invalid? Whence would you deduce this? At the first glance, we would say, because it is written thrice "two" [ibid. 5, 7, 8]; but if the repetition of "goat" makes it valid, wherefore is this repeated thrice? Infer from this, it is a merit that they be, first, equal in color; secondly, in stature; thirdly, in price. We have also learned thus in a Boraitha of sheep offered by lepers: It is written "two sheep." Sheep would suffice? From this it is also inferred they should be like each other, as stated above. But how do we know that if they are unlike each other they are valid? Because it is written "one sheep." The same Boraitha states in relation to the burnt-offering of a leper; there it is also written "two birds." The two could be dispensed with; and from the word two it is inferred that they should be alike. If it is so, why should we not say the same of the daily offerings, about which it is also written "two sheep"? This two is needed for what is stated in the following Boraitha: It is written [Num. xxviii. 3]: "Two on every day." From this we infer that it must be before the day's arrival (daybreak). (This is explained in Tract Tamid.)

The rabbis taught: Should the two he-goats of the Day of Atonement have been slaughtered outside of the Temple, if this was done before the drawing of the lots, he is culpable for both; but if later, he is culpable only for that designed for the Lord (not that for Azazel. Why should he be culpable?) Before the lots have been drawn, what are as yet these simple he-goats fit for? Said R. Hisda: Because they are fit for the additional sacrifices of the Day of Atonement, which are sacrificed outside of the Temple. (But how is this to be understood?) Why are they not fit to be sacrificed inside? Because the lots have not been drawn. The same is the case with the additional sacrifices; since all the services preceding these have not yet been performed they are not fit for additional sacrifices either?

R. Hisda holds: The inappropriate time is not to be compared with the unfitness of the goat itself (before the lots are drawn).

"If the Lord's he-goat dies." Said Rabh: The second of the first pair must be sacrificed, but the second of the second pair must be left to graze. R. Johanan says conversely. On what point do they differ? Rabh says: A living thing is not postponed. (The second goat of the first pair, being fit, should not be postponed in favor of another goat to be sought out), and R. Johanan says, that such are postponed. What is Rabh's reason? Because he deduces it from the too early time; as he was unfit only as long as he had no fellow, he is fit henceforth. What comparison is this? In that case the he-goat was not yet fit for anything, but here he has been already postponed. Why not continue to be postponed? Therefore we must say: Rabh deduces it from a temporary blemish. After the blemish has passed away, he is fit; so here, his unfitness is considered temporary.

According to Rabh's theory (that a living thing is not postponed), why only the second of the first pair and not as well of the second pair, say, then, he can choose which he likes? Said Rabba: Rabh holds as R. Jose that it is a merit to use the first (as mentioned at the end of the preceding chapter). Rabba said: It seems to us, that our Mishna is in accordance with Rabh, and a Boraitha is in accordance with R. Johanan. In our Mishna, it is stated: If the Lord's he-goat dies, the one on which the lot has fallen for the Lord shall substitute him; from this we infer that the other one continues to be as it has been. A Boraitha is according to R. Johanan, as we have learned: It is said in the Mishna 1: The second should be allowed to graze. We do not know whether the second of the first or second pair. As it is written [Lev. xvi. 10]: "Shall be placed alive." Placed alive, not the one whose fellow is dead. How can that be inferred? "Shall be placed alive," signifies that it shall be placed alive now. But the one whose fellow had died has been left alive already. An objection was raised from the following sentence in our Mishna: "R. Jehudah said also: If the blood of the Lord's he-goat had been spilled, the scapegoat should be put to death; if the scapegoat had died, the other one's blood should be poured out." It is right according to Rabh, who says that, according to the first Tana, living things are not postponed, and the second of the second pair is to be left to graze; and what R. Jehudah says of its being put to death refers to the second of the first pair. It is right according to Rabh, who says that according to the first Tana a living thing is not postponed, as it is said in the Mishna, "also said R. Jehudah." That is to say, he differs on two points: first, whether a sin-offering for the congregation is put to death (he says, it shall be put to death), and whether a living thing is postponed. R. Jehudah says, it is postponed, and shall be put to death, and the second of the first pair shall be put to death. But according to R. Johanan, who explains that the first Tana means to say the second of the second pair (shall be sacrificed), but of the first shall be put to death, because a living thing can be postponed, consequently R. Jehudah differs from the first Tana only on one point, on the congregational offering. Why does the Mishna say, "and also"? This difficulty remains. (From this we see, the Mishna is according to Rabh, not R. Johanan.)

"If the blood has been spilled, the scapegoat should be put to death." It is right that if the blood has been spilled, the scapegoat should be put to death, because the duty with the blood has not been fulfilled yet; but if the scapegoat has died, why should the blood be poured out? The duty (of drawing the lots, and of slaughtering the first) has been fulfilled already. Why need the blood be poured out? Said the disciples of R. Janai: Because it is written [ibid.]: "Shall be placed alive before the Lord, to make an atonement for him." That means he (the scapegoat) shall be alive till the atonement with the blood (of the other goat) has been made (and when he has died before, the blood must be poured out).

We have learned in a Boraitha about the Mishna in Shekalim, II., a. "If the inhabitants of a town sent their Shekalim," etc., as far as, "and nothing is credited to next year's account" (pp. 7, 8). R. Jehudah, however, said, they may be credited to next year's account. What is the reason of R. Jehudah? Said Rabba: R. Jehudah holds, the duties to be paid this year may be paid the next year. Abayi objected: From the following Tosephta: The bullock and the he-goat of the Day of Atonement, if lost, and the he-goats offered for idolatry, if lost, and substituted by others and then recovered, then all should be put to death. So says R. Jehudah. If the duties of this year can be paid the next year, they could be left for the next year? Rabh answered: You want to compare the he-goats for idolatry to congregational sacrifices. The latter are quite different. This is as R. Tebi said in the name of R. Joshiah: It is written [Num. xxviii. 14]: "This is the burnt-offering of the new moon for every month throughout the months of the year." The Torah says: Proclaim it a new month, and also bring a sacrifice from the new products (Rosh Hashana, p. 9). This would be right in case of the he-goat, for it comes from the congregational funds; but the bullock, which is from the high-priest's, what can be said to it? And, secondly, what R. Tebi said in the name of R. Joshiah is only a merit, but not a duty, as R. Jehudah said in the name of Samuel [ibid., ibid.], that if it was done it is acceptable?

Therefore says R. Zerah: The reason is, that the lot cannot determine during this year for the next year. Let him draw lots the next year? It is a precautionary measure, lest it be said that the lot does determine during one year for the next year. All this is right of the he-goat? But why should the bullock, for which no lots are drawn, be put to death? It is a precautionary measure, lest one should deal with the he-goat as one would with the bullock.

Shall he then be put to death for a precautionary measure against what itself is a precautionary measure? Therefore, says Rabba: It is a precautionary measure, lest there should be a mistake. What mistake can be made? That of sacrificing them (if left to graze). Then this apprehension ought to exist in all cases where animals are left to graze (till they get a blemish and are sold)? If that of

shearing their wool, or using them for work, the same fear ought to exist in all cases where invalid sacrifices are left to graze? The mistake of sacrificing them is meant, but for others there is no intention to sacrifice them at any time, as they are left to graze until they get a blemish; therefore a mistake cannot come to pass. But here, as the he-goat must be kept until the Day of Atonement of the next year, and it may be sacrificed by mistake before (the owner will take care it should not get a blemish). And whether a precautionary measure is taken against a mistake or not, the Tanaim of the two following Boraithas differ: one states, that a paschal sacrifice that has not been sacrificed during Passover may be sacrificed during the second Passover (the succeeding month, when those unclean before, celebrate it); and when not during the second Passover, it may be reserved for the Passover of the next year. And in another Boraitha we have learned: It may not be sacrificed at all. They differ, then, about the apprehension of a mistake; the Tana of the last Boraitha fears a mistake, and that of the first does not.

MISHNA: He comes to the scapegoat, and puts both hands on him, and confesses, using the following expression: I beseech Thee, Jehovah, they have committed iniquities, transgressed, sinned before Thee, Thy people the House of Israel. I beseech Thee, for the sake of Jehovah, forgive the iniquities, transgressions, and sins that they have committed, transgressed, and sinned before Thee, Thy people the House of Israel, as it is written in the Torah of Moses Thy seroant, thus: "For on that day shall he make an atonement for you, to cleanse you, that ye may be clean from all your sins before Jehovah." And the priests and people who stood in the forecourt, hearing the expressed name [of God, i.e., Jehovah] issuing from the mouth of the high-priest, used to kneel, prostrate themselves, and fall on their faces, and say: "Blessed be the name of His kingdom's glory for ever." They delivered him [the scapegoat] to the man who was his conductor. All were fit to perform this function. Only the high-priests fixed a usage, that Israelites should not be permitted to do it. Said R. Jose: It happened the conductor was Arsala of Tsiapore, who was an Israelite [not a priest]. An elevated walk had been constructed for him [the he-goat], on account of the Babylonians [Babylonian Jews; according to the Gemara, Alexandrian Jews], who used to pull him [the he-goat] by the hair, saying: "Take [the sins] and go, take and go."

GEMARA: We see that in this confession the children of Aaron are not mentioned. According to whom is it? Said R. Jeremiah: This is not in accordance with R. Jehudah; as he said, the priests are also atoned for by the scapegoat. Abayi, however, said: This may be according to R. Jehudah. Are not the priests included in the general phrase, "Thy people Israel"?

"They delivered him to his conductor." The rabbis taught: It is written [Lev. xvi. 21]: "A man appointed thereto." From the word "man," it is inferred a layman is also fit. "Appointed" means, appointed from the day before, even when the Day of Atonement falls on a Sabbath, and even if he is unclean. Wherefore does he tell us, even a Sabbath? If the he-goat has become sick, and cannot walk, he may take him on his shoulder, and carry him. Said Raphram: From this it is inferred, that the law of Erub and carrying applies to Sabbath only, but not to the Day of Atonement (else what difference between a Day of Atonement falling on a week-day and a Sabbath?)

Why is it mentioned, even when unclean? What case of uncleanness can be here? Said R. Shesheth: Even if the conductor became unclean, he may enter the Temple and take the he-goat.

R. Eliezer was asked: When the he-goat had become sick, might he be taken on the shoulders? He replied: The he-goat was so healthy that it could bear away you and me together. They asked him again: When the conductor had become sick, may another be appointed? He replied: Let us be healthy; do not ask us about a case of sickness. They asked him again: If after having been pushed down he did not die, shall he go down and kill him? He gave them as answer the verse in Judges v. 31: "Thus may perish all Thy enemies, O Lord." The sages, however, said: If he had become sick, he must be taken on the shoulders; if the conductor is sick, another should be appointed; if he had been pushed and has not died, he should go down and put him to death.

R. Eliezer was asked whether a certain man would enjoy the world to come. He replied: You inquire of me concerning that man (he named a different man). 1 They asked of him again: May a shepherd rescue a sheep carried away by a lion? He replied: Do you ask me of a sheep? They asked him again: May the shepherd be rescued from the lion's mouth? He answered again: You ask

me only of the shepherd. They asked him again: May a bastard be heir of his father? He asked them: May he espouse his dead and childless brother's wife? They asked him: If he possesses a house, must a memorial of the Temple's destruction be left, when his house is whitewashed (an ell is left bare)? He answered: I think you ask me whether his sepulchre is to be whitewashed? He answered thus, not because he wanted to repel them, but he never decided what he had not heard from his Master.

A wise woman asked R. Eliezer. What was done with the golden calf being equally forbidden, why were the penalties different, some being slaughtered with the sword, some dying by water, or by a plague? He answered: The wisdom of a woman relates only to the spindle, as it is written [Ex. xxxv. 25]: "All the wise women spun with their hands." It was taught: Rabh and Levi said—the one, that he who slaughtered to the golden calf and offered incense was slain by the sword; he who embraced and kissed it, died by the plague; and he who rejoiced in his heart thereat, died from dropsy. And the other says: They who did it in spite of warning by witnesses, were slain; they who were not warned but only witnessed, by the pest; and those whom witnesses had not seen, died by dropsy.

R. Jehudah said: The tribe of Levi was not idolatrous (in relation to the golden calf), as it is written [ibid. xxxii. 26]: Whoever is on the Lord's side let him come unto me. And there assembled themselves unto him all the sons of Levi." Rabhina was sitting and repeating this saying. The children of R. Papa b. Abba objected to him: It is written [Deut. xxxiii. 9]: "Who said of his father and his mother, I have not seen him." 1 By this is meant, those who slew for worshipping the calf, inflicted penalty on their relatives. Whence we see some of the Levites were guilty. Rabhina replied: By father is meant the maternal grandfather, who was of Israel, by brother a half-brother of the mother, and by children, the daughter's children, whose father was an Israelite.

"An elevated walk had been constructed," etc. We have learned in a Boraita: R. Jehudah says: They were not Babylonian, but Alexandrian (Jews). Said R. Jose to him: May thy mind be appeased, as thou hast appeased mine (for he was a Babylonian himself).

"Take and go." We have learned in a Boraita: They used to say: Wherefore are they detaining the goat, the sins being so great?

MISHNA: Some of the prominent men of Jerusalem used to accompany him [the goat] as far as the first booth [of the ten, supplied with provisions for the conductor]. There were ten booths between Jerusalem and Tsuk [the rock of its destination], a distance of 90 Ris [7½ Ris are equal to one mile]. At each booth they said to him [to the conductor]: "Here is food, and here is water." And they [persons of the booth] accompanied him from booth to booth, excepting the last of them, for the rock was not reached by them; but they stood at some distance looking on what he [the conductor] did [to the scapegoat]. What did he do? He divided the tongue of crimson wool: the half of it he tied to the rock, and the second half between his [the scapegoat's] horns; he pushed him down backward. He went rolling and falling down; he did not reach half-way of the mountain before he became separated limb from limb. He [the conductor] returned to sit down under the last booth, till dark. And since when became his clothes unclean? After he had issued from the walls of Jerusalem. R. Simeon says: After he had pushed it down from the rock.

GEMARA: The rabbis taught: There were ten booths, and twelve miles: so says R. Meir. R. Jehudah says: There were nine booths, and ten miles. R. Jose says: Five booths, and ten miles. All were combined by an Erub. Said R. Jose: Elazar my son told me, if there were an Erub, two booths at ten miles would have been sufficient. Who is the Tana according to whom is what we have learned in our Mishna, that the last stood at a distance and looked? This is according to R. Meir, who says there were ten booths, and twelve miles.

"At each booth they said to him," etc. We have learned in a Boraita: They never made use of it, but they were cheered by the consciousness that they could have it?

"The half of it he tied to the rock," etc. Why not the whole of it? Because he had not yet fulfilled the duty of pushing down the goat, and as soon as he had tied it to the rock, it might have become white: he would have rejoiced so much at the thought of the sins

having been pardoned, that he might not have attended to the pushing him down. Why did he not tie it wholly to the horns? Because it might happen that the goat bent his head, so as to make him unable to perceive whether it had become white or not.

The rabbis taught: Formerly the tongue of crimson wool used to be tied to the door of the porch, outside (that all should see). When it became white, all were rejoiced; when not, all became out of spirits and ashamed. Therefore it has been reformed that it should be tied to the door of the porch inside. However, they used to take a look at it even then. It was then reformed that half should be tied to the rock, another half to the horns.

"Before he attained half way of the mountain," etc. The rabbis taught: It is written [Lev. xviii. 4]: "My ordinances shall ye do." This signifies, such things as, even were they not written, it would be wrong to do, as idolatry, adultery, bloodshed, robbery, and blasphemy. "And my statutes shall ye keep" [ibid.]. There are things that Satan laughs at, as abstaining from pork, from wearing mixed stuffs [Deut. xxii. 11], the taking off of the shoe of the husband's brother, purification of a leper, and the despatching of the he-goat. Lest it be said, they are nonsense, it is therefore written [Lev. xviii. "I am the Lord your God." I have commanded it; you have no right to question.

"Since when became his clothes unclean," etc. The rabbis taught: The conductor defiles his clothes, but not the person that sends him (the conductor). Shall we assume that as soon as he comes out from the walls of the Temple court he becomes unclean? Therefore it is written [Lev. xvi. 26]: "He that takes away the goat to Azazel shall wash his clothes." What is meant by taking away? He who pushes him head downward, and he defiles his clothes.

MISHNA: He [the high-priest] went to the bull and to the he-goat destined to be burned. He ripped them, and tore out the parts to be burned upon the altar. He placed them on a charger (Magis), and kindled (for kindling) them upon the altar. He intermingled the limbs of the two animals, and they were removed to the place for burning. Since when are the clothes [of the porters] made unclean? When they came out behind the wall of the forecourt. R. Simeon says: When the fire is consuming most parts [of the animals].

GEMARA: He intermingled. Said R. Johanan, a sort of mingling. What is meant? We have learned in a Boraitha: He did not cut them as all burnt-offerings, in which the hide is flayed; but the bullock and he-goat, he cut the hide and flesh together. Whence do we deduce this? Because it is further written [Lev. iv. 11]: "His inwards, and his dung." How is it to be inferred from this? Said R. Papa: As the dung was in the inwards, so the flesh in the hide.

"Since when are the clothes made unclean?" The rabbis taught: It is written [ibid. xvi. 28]: "He that burneth them shall wash his clothes." He that burns, but not he who kindles, or he who lays the wood for the fire. Who is considered as the one that burns? He who assists at the burning, his clothes become unclean. Shall we say, that when it has been burned to ashes they still defile the clothes? Therefore it is written "them": he who burns them, but not the ashes. R. Eliezer b. R. Simeon says: When the flesh is still called flesh, it defiles; but when it has been dissolved, it no longer defiles. What is the difference between them? According to R. Eliezer, singed flesh ceases to be flesh, and does not defile; but according to the first Tana it is, and does.

MISHNA: The high-priest was told: "The goat has reached the desert." How was the fact known? Watches were stationed on high towers [meaning doubtful], who lifted up flags [to give signals]. Said R. Jehudah: They could have excellent evidence [by calculating the time]. From Jerusalem to Beth Hadudo was three miles. The prominent men had walked one mile, went back one mile, and had tarried as long as a mile is gone over. Thus they could calculate that the he-goat had reached the desert.

R. Ishmael says: Why, they had another sign. A tongue of crimson wool used to be tied to the gate of the Temple, and as the he-goat had reached the desert, the wool used to become [by miracle] white; as it is said: "Though your sins be scarlet, they shall be as white as snow; though they be red as crimson, they shall become like wool" [Isaiah i. 18].

GEMARA: *Said Abayi: From this we see that the Beth Hadudo was in the desert.*
